Shake the winter's dust off all the motor accessory lines—get them into the window in an attractive display—tell the motorist about them through your newspaper ads.—activity should be the keynote adopted and the time to start is now. This applies to those hardwaremen whose winter business on accessories has not been great. In the smaller towns where road conditions do not permit the use of cars extensively, business necessarily would be limited. However, the period of sales is by no means far away and there are numerous items which can be brought to the attention of the man who wants to get his car out when the first opportunity presents itself.

APOLOGIZED FOR UNFAIR ADVERTISEMENT

At the annual meeting of the Ontario Motor League, held in Toronto, January 21st, H. H. Williams, chairman of the Campaign Committee of the Toronto and York Patriotic Fund, made an apology for a full-page advertisement recently appearing in the morning papers, in which some reflection was cast upon motorists. Mr. Williams stated he had not seen the advertisement in question until it came out in the papers. Dr. P. E. Doolittle added that fully 90 per cent. of the money donated to the fund comes from motor owners, and in addition he pointed to the fine work being done by motorists in the reception of returning veterans. The motor, he assured the public, is no longer a means of pleasure, but a commercial necessity.

YORK FARMERS OBJECT TO BUYING OIL FROM DEALERS

A delegation of farmers of York County, Ont., waited upon the York County Council urging the removal of the $300 license which is necessary for the selling of oil direct to the consumer from the oil tank cars on the railways. The farmers claimed that it was against their interests to have to buy their oil from dealers stores, because it occasioned a serious waste of time. No definite action was taken regarding the matter.

Timely Newspaper Advertising Pulls

Hardware Merchants Prepare Interesting Copy — Fuel Shortage Results in Ads on Fuel Savers—Tool Department Suggestions—One Merchant's Ad Headed "Cool Cooking on Hot Days"

"DOUBTLESS you make the most of these long winter evenings, but you can't do good work without good tools." This is the message contained in the ad. of COWAN'S COLOSSAL HARDWARE, LONDON, ONT., addressed to the amateur mechanic.

The man of the house likes to keep busy these long winter evenings and an appeal to his mechanical genius will encourage sales in the tool department materially.

The ad. is reproduced herewith, from which it will be seen how strongly the appeal has been made. Illustrations brighten the ad., prices are plainly shown. Ruling the items off gives each a touch of individuality.

* * * * *

It is not only by the use of oil or electric heaters that a saving in fuel can be effected, if an advertisement of A. WELCH & SON, TORONTO, ONT., be followed. This ad. says in part: "Make your coal go farther with a ———dustless ash-sifter. Simple and easy to operate. Convenient, sits close to furnace. Economical, saves fuel. Dustless, keeps the basement clean. Dustless ash can supplied with each sifter."

* * * * *

"Draughts, keep them out with our best weather strip." This is the heading which appears on an attractive advertisement of the MARTIN HARDWARE, HAMILTON, ONT., an ad. brightened by the use of a cut of the weather strip they sell, and giving prices on the different sizes. Listed also are "automatic closing door bottoms," with the final summarizing, "Every home should be equipped with these coal savers." This ad. gives another angle to the saving of fuel which retail merchants are emphasizing.

* * * * *

"Help out the heating problem." Under this heading the RICHMOND HILL HARDWARE CO., RICHMOND HILL, ONT., direct attention to the means which they can supply to overcome the present fuel shortage. They say: "If you are short of coal, use coal oil— ———— heaters will heat any ordinary room, and can be carried from one room to another"—but, read their ad., it is reproduced herewith. The use of a cut brightens it up, and prices are quoted.

* * * * *

JAMES S. NEILL & SONS, LTD., FREDERICTON, N.B., in advertising the ——— sanitary window ventilators, say in part: "Wouldn't you like to be able to keep your bedroom window open, on stormy nights, without having the floor covered with snow? You can do it by using the ——— sanitary window ventilators. They keep out draughts, dust, rain and snow. Come and see them."

* * * * *

A timely advertisement is that which comes from the store of JAS. SIMMONDS, LTD., HALIFAX, N.S., wherein carpenters' tools are featured. Following the terrible disaster, retail hardwaremen of that city have responded splendidly to the calls made upon them. The ad. of this firm calls attention to items which will be of prime necessity to mechanics and even the amateur carpenter. The items are listed under distinct headings as follows: "Hatchets," following which comes, "Good tools that will keep an edge. Just the right shape and weight. Prices 80c to $2.25. Hammers, carefully made and finished. Best drop forged steel, 16 oz. Prices, 95c to $1.50. Chisels, bevel back and plain, firmer and framing, ¼-in. to 2-in. wide. Planes, the well-known ———— brand. All the usual sizes in wood and iron. Prices from 80c to $5.50. Also all other tools."

* * * * *

An example of how **not** to advertise has been unearthed. At first glance it might be thought this firm were looking ahead to future business, but such is not the case—it's a case of unchanged copy extending back over a period of months. The heading of the ad. which comes under the cut is: "COOL COOKING ON HOT DAYS," and then goes on to say: "Eight a.m. and the sun already blazing. Just the kind of a morning to stay out of a hot kitchen, etc., etc."

It is a splendid ad.—if it were at all seasonable, but this firm is just wasting the money spent for this space.

The fuel situation is such to-day that any suggestions as to how relief may be afforded are carefully read. The ad is for those whose coal supplies are limited as well as those who have some on hand.

EDITORIAL COMMENT

LICENSE NEEDED FOR SHEETS

ON account of the serious shortage of fuel and the acute transportation situation, and in order to relieve the congestion at the sea board, United States authorities have issued a new order whereby producers are forbidden to roll or manufacture sheet steel products for export, except under license.

Prior to the order which has just come into effect, licenses were required only for plates. The new regulations make it necessary to secure a license for the rolling of black or galvanized sheets and also for wire.

Goods already manufactured are allowed to be shipped as soon as the railway companies lift their embargoes. This will mean, of course, that Canadian importers who have sheets on order, which are already manufactured, will probably receive them as soon as the present transportation difficulties are overcome.

It will probably mean, however, that there will be a serious shortage in black and galvanized sheets, and it will also mean that prices will remain decidedly firm during the next three or four months.

It is not likely that immediate advances in price will take place, but if the serious complications which exist at the present continue for some time higher prices would be justified.

The new regulation further complicates matters in a market which has been greatly disturbed for some time past.

THE NEW PAINT REGULATIONS

THE decision of paint manufacturers, as announced in last week's issue of HARDWARE AND METAL, regarding the elimination of certain colors of ready-mixed paints, seems to have met with the general approval of the retail trade.

Inquiries in the trade indicate that a great many retailers have felt for a long time that the range of colors was too great and necessitated the carrying of a much larger stock than would have been necessary with a narrower range of colors. Retailers generally are of the opinion that they will have no difficulty whatever in satisfying customers' needs with a smaller range of shades. Under the new arrangement retailers will be enabled to carry a large stock of the shorter range of colors without increasing his investment.

Manufacturers will consider the matter very carefully and will make a minute examination of sales records to find out which have been the best and which have been the poorest sellers, at the same time taking into consideration the maintaining of a well-selected and good-looking range of colors covering the number which will be left. It is altogether likely that by the middle of summer a new color card will be ready for distribution.

The trade generally appreciates the action of manufacturers in allowing all retailers to book their spring orders at the old price, as outlined in last week's issue of HARDWARE AND METAL.

The Canadian paint manufacturers are to be commended on having taken action voluntarily without the necessity of Government intervention. Canadian manufacturers have followed the lead of United States manufacturers, who were urged by the Conservation Commission to take action.

It has also been pointed out by paint manufacturers that the dealers will eventually benefit by the change in differentials on various sizes. For instance, an order placed to-day for half-pint cans of paint is purchased on the basis of a differential which is really 60c a gallon less than the new price. Twenty-five cents of this is made up in the change in price of paint, and 35c additional on the differential in size.

Manufacturers are now busily engaged in booking up retailers who have not already covered for their spring requirements.

CANADIANS WILL CO-OPERATE

CANADIAN business men will respond to the latest demand made on them in respect to the closing-down order issued by the Government at the instigation of the Fuel Controller. Undoubtedly pressure has been brought to bear from Washington, where a similar edict was recently issued, and as Canada is dependent on the United States to a great extent for her supplies of coal, it would seem in the best interests of the country that the order be faithfully carried out.

There are very few communities in either Ontario or Quebec where the order applies that have not experienced difficulty in securing sufficient supplies of coal for even domestic needs. However, only improved weather conditions, combined with the order-in-council, will bring relief to the many towns actu-

ally suffering. For some time the railways have been laboring under traffic conditions which are abnormal, and anything like decent service has been impossible. However, they will have an opportunity to turn in and clear up much of the congestion now existing during the week-end, and great hopes are held out.

Canada has been extremely fortunate in that she has endured comparatively little of the inconvenience and hardships of other countries, and there is no spirit of grumbling evident over the sacrifice she is now called upon to make. Everywhere people are accepting the inevitable, and it is clearly evident they will demonstrate in a practical manner their spirit of self-sacrifice and loyalty to the cause so deeply rooted in their hearts.

BACK ON THE FLOOR

FROM many parts of the Dominion comes the word that store help is scarce. In some places proprietors, who for years have been taking only a supervisory interest in their stores, are back on the floor. Well, that will probably be good for the store, and it will certainly be good for the proprietor. A supervisory interest often means a half-hearted interest. These are days for a man to do a big work. It won't hurt to add to the work of supervision and direction that of head salesman as well. Some of the brightest and most prosperous merchants have for years been acting in this dual capacity. It is quite possible that to this very fact must be attributed a good part of their success.

THE IMPORTANCE OF THE MAILING LIST

THE month of February now here is one in which much useful work can be done by the retail merchant. The period of stock-taking is completed in the majority of stores and an opportunity to size up the past year's activities has been afforded. Plans for even better results during 1918 should be outlined and definite steps taken to assure their being carried out.

The mailing list forms one of the most important factors in the success or otherwise of any retail store. This should be gone over carefully, cancellations and additions made to bring same up to a state where its use will be effective.

A careful review of the mailing list will reveal the names of many customers who perhaps have not favored you with as much business as you would like. By investigating it may be found that they have just drifted for no apparent reason; it may be that some misunderstanding exists which can be adjusted by personal attention. No opportunity should be lost to hold all your old customers and bring into the fold the new ones.

The mailing list can be made the very pulse of your business. No merchant can hope to keep in touch with five hundred or one thousand customers or prospects unless an effective means is right at hand. The mailing list can be made the means to that end—can be used to increase sales, to promote a better feeling for your store. Its importance justifies careful consideration and no better time exists than the present to go over same thoroughly.

IRON AND STEEL TRADE STILL SUFFERING

THE situation in the iron and steel trade has not improved, in fact conditions are if anything worse, due to the continuance of the severe weather. Steel plants and foundries in this district are very badly in need of coke and production is being curtailed by reason of the shortage. There is little hope of the proposed increase in production of steel materializing for some weeks as little improvement can be looked for in the transportation situation until the weather moderates sufficiently to enable the railways to catch up with arrears in car shipments and clear the terminals. Under prevailing conditions the steel companies cannot even approach maximum capacity let alone increase output. The situation is undoubtedly serious and conditions are such that relief measures are difficult to put in force.

Conditions in the steel trade across the line are not much easier in spite of the drastic measures that have been taken to relieve the fuel situation and the shortage there will affect consumers in Canada. The demands of the United States Government are growing heavier and are fully sufficient to keep all the producing plants actively employed. There has been a serious falling off in the output of steel the last few weeks and the continued severe weather has made matters worse. The output has probably been reduced 50 per cent. The most serious aspect of the situation is the shortage of pig-iron which is as acute as ever, due to the failure of the coke supply.

FEWER TRAVELERS, THEN WHAT?

BECAUSE of the reduced number of available men—because of higher traveling expense, in money and especially in time, because of a scarcity of goods to sell—there is a probability that merchants in the out-of-the-way centres will not see as many travelers as a year or two ago.

The calls of these "ambassadors of trade" will be missed. There is no better friend to a courteous merchant than one of these travelers—men who see much, and who are only too glad to pass on suggestions, suggestions, moreover, which do not grind their own particular axe. Still, if the war results in the number of travelers' calls being reduced—and that seems certain—then the merchant will need to lay his plans accordingly. Greater than ever will be his dependence on the printed message. Perhaps more frequent trips to the buying centres will be profitable.

Merchants and Paper Get Together

"Buy at Home" Campaign in New Westminster, B.C. — People Told in Plain Terms Who the Home Merchant is—Names of Merchants Appear in the Advertisements

"Without the hardware store, without the general store at the cross roads, without the corner grocery store on the main street, without the haberdasher, the bookseller, the printshop, the sanitary engineer, and the dry goods and department store of every thriving country centre, the whole commerce of Canada would inevitably decline. Not only the individual, but the community, and the whole nation benefit by the buy-at-home policy."—Editor's Note.

WHEN a "Buy at Home Campaign" is organized as has been done in several cities and towns in Canada, community interest is focused on the home merchant. The New Westminster "British Columbian" did this recently asking in great black type the plain blunt questions: "Who is the home merchant?"

As if that were not straight enough, the next line, almost as bold, repeated the question reversed thus: "The home merchant—who is he?"

What a Buy at Home Campaign Does

That is the very essence of a buy-at-home campaign. It sounds too simple, but the plain truth is there. The people continually under the bombarding influence of the mail order catalogue actually begin to forget who is the home merchant.

When they want to buy anything they think first of the merchant whose name they have continually in front of them—the mail order merchant whose catalogue hangs in their kitchens, or adorns their boudoirs. They have to be asked out loud "Who is the home merchant?" before they begin to think of the home merchant at all.

If the mail order man had got in only a little more work the question might have to be "Have you a home merchant?" For the natural outcome of the causes that make a Buy at Home Campaign necessary is to abolish the home merchant entirely.

However, by that time probably the community would have dwindled to a select few mail order house patrons whose incomes arrived also by mail, who studied their mail order apparel in mail order mirrors, whose mail order pants polished mail order chairs, who paid mail order bills with money orders by mail, whose small change was mostly postage stamps which now and then found their way into the mail order plate at church where the one home product—the sermon—was listened to from mail order pews and delivered from a mail order pulpit by the light of mail order electric fixtures.

Who the Home Merchant Is

How much more healthy read the real answers to the real question "Who is the home merchant?" as they appeared in the "British Columbian," of New Westminster. The page from that paper is here reproduced, but as the type is small through reproduction, the answers are given in ordinary type for you to study. They may be useful in your own community. Here they are:

Who is the home merchant?

He is the man who gives you credit when you find it convenient to get it, and carries your account when you are unable to pay.

He is the man who gives you back your money or makes exchanges when you are not satisfied with what you have bought.

He is the man who stands back of his guarantee, and makes good any loss you may think you have sustained on goods bought from him.

He is the man who meets you at the door with a handshake, and lets you out with a message to "the kids" and a real "come again" goodbye.

He is the man who takes a neighborly interest in you, your family and your affairs.

He is the man whose clerks live in your home town, and spend their money with you and other people of the city.

He is the man who pays heavy taxes to help support the schools, build and maintain the streets, police and fire departments, and other public institutions. He helps to support the churches, hospitals, and charity organizations.

He is your home merchant, your neighbor, your friend, your helper in time of need.

A Supplement to Advertising

These are the answers to the ques-

THE BRITISH COLUMBIAN, NEW WESTMINSTER, B.C., MONDAY, NOVEMBER 12, 191

"Trade at Home" Announcement No. 10

Who is the Home Merchant?

The HOME MERCHANT--who is he?

He is the man who gives you credit when you find it convenient to get it, and carries your account when you are unable to pay.

He is the man who gives you back your money or makes exchanges when you are not satisfied with what you have bought.

He is the man who stands back of his guarantee and makes good any loss you may think you have sustained on goods you bought from him.

He is the man who meets you at the door with a hand-shake and lets you out with a message to "the kids" and a real "come-again" goodbye.

He is the man who takes a neighborly interest in you, your family and your affairs.

He is the man whose clerks live in New Westminster and spend their money with you and other people of the city.

He is the man who pays heavy taxes to help support the schools, build and maintain the streets, police and fire departments and other public institutions. He helps to support the churches, hospitals and charity organizations.

He is the HOME Merchant—YOUR neighbor—YOUR friend—YOUR helper in time of need

Don't you--or won't you--realize that every dollar you send out of town goes to strangers who never spend a cent here?

Be Fair to the Home Merchant---your friend and neighbor--buy in New Westminster at all times

The following merchants, banking and other business interests of New Westminster are in hearty accord with the "Buy at Home" movement and have pledged their co-operation and support towards the success of the campaign:

MERCHANTS BANK OF CANADA
T. J. TRAPP & CO., LTD.
MERCHANTS LIMITED
M. J. PHILLIPS
RIDLEY KENNEDY, LIMITED
GORDON & WALTERS
JAMES & McCLUGHAN
THE T. H. SMITH CO., LTD.
W. S. COLLISTER & CO.

ROYAL BANK OF CANADA
REID & McDONALD
KENNEDY BROS
KELLY, DOUGLAS & CO., LTD.
HYSLOP HARDWARE CO.
THE COLUMBIAN CO., LTD.
WALTER HILKES, JEWELER
J. H. TODD
THE MODEL GROCERY

C. A. WELSH, LTD.

NEW WESTMINSTER CAN SERVE YOU BEST

Those wishing to join in this movement can get all particulars at the office of the British Columbian

The New Westminster British Columbian has been publishing a series of page advertisements under the heading, "Who is the Home Merchant?" of which series the above is No. 10. This is fine enterprise to promote local community trading. Retailers in other towns should encourage their local newspaper to follow suit.

tion as given by the "British Columbian." You won't need a magnifying glass to read them as reproduced in the illustration, and the larger type with its important reminders you can easily read.

Names of merchants of New Westminster were listed below as you can see. This is the method used in many Buy-at-Home campaigns. The idea is to remind citizens of the existence of their home merchants in association with the big Buy-at-Home principle. The collective effort has an appeal apart from the ordinary publicity value of each particular name in print. It is not a substitute for regular advertising. It is a supplement to it.

Help for the Home Merchant

A Buy-at-Home campaign becomes necessary in many a Canadian country centre because the home merchant sometimes needs help. He always needs support, the support of his own community's purchasing power. He never asks or needs help from outside sources. His own circle is sufficient for him. He is just that much superior to the mail order man.

But the mail order man can sometimes get past even the best of home merchants. For the sake of a pretty picture on a printed page with a price in plain figures below it people pass their own home merchants by every day in the week, Sundays included. Hundreds do it. Thousands do it. And as a result the home merchant every here and there has a hard row to hoe.

The menace of the mail order catalogue is ever at his elbow. His heaviest competitor is light enough for a little girl to carry home from the mail-box, but mighty enough to break many a striving country merchant in a very few months.

A Big Gun in Buy-at-Home Campaign

In the ordinary everyday matter of helping the home merchant keep his name in front of his community by advertising himself and his wares the home printer and the home paper help the home merchant. But when there is a real fight on—a real attack on the mail order menace, captained and organized for victory, then the home paper becomes a big gun in the battle, and does big work.

The home printer who runs the home town paper is a home merchant himself, and a hardy fighter when it comes to a real scrap—printed matter against printed matter. In the Buy-at-Home campaign he's out to beat the mail order catalogue in the interests of his community. The home town printer is one of the first men to realize that the welfare of the home town hardwareman, grocer, and haberdasher, and dry goods merchant is inseparable from his own welfare. Men in other employments in a small city may not realise the fact so quickly. But the home town printer does realise it, and this makes his help so loyal and so vigorous in a Buy-at-Home campaign.

Campaign Costs Merchants Little

The home town printer who runs the home town paper is often ready to supply the ammunition and fire the big gun of Buy-at-Home publicity at trifling cost to the home merchant. This was the case in Brantford, Ont., only recently. Regarding the Buy-at-Home campaign there J. A. Powell, business manager of the Brantford "Courier," writes:

> "Our Buy-at-Home and Boost-Brantford series ran twice a week, Wednesday and Saturday, for two months, and was almost entirely in the nature of a gift to the local merchants. The "Courier" has been warmly commended by many of the merchants for this effort."

This shows how newspaper and merchants may get together for their mutual good, and the great good of their community and country. The Brantford Buy-at-Home campaign will form the subject of the next article in this series on the importance of the home merchant, and how he can be aided in his important function in furthering the prosperity of Canada and Canadians.

Tire Mileage Means Tire Care

Under-inflation Chief Reason for Tires Going Out of Service—Other Causes Outlined—Tire Care and Tire Mileage Are One and the Same.

THERE were over 24 million tires used during the year 1917, and at least this many more tubes. According to reliable statistics 85 per cent. of these tires are prematurely worn out from neglect and abuse by car owners. It is obvious that a great waste is constantly going on. The waste of tires through misuse amounts far into millions of dollars, and much of this waste may be stopped by care and attention from the car owner.

Avoid Under-Inflation

Few causes contribute to the shortened life of the average tire, but these causes of lost mileage should be remembered. The chief reason for tires going out of service prematurely is under-inflation. Tires should be inflated to the pressure recommended by the manufacturer. A tire gauge should be used to keep the pressure constant. With tires at the proper pressure, the liability of rim cutting is decreased and the chances of a blow-out caused by casings becoming bruised is lessened.

Other Causes Outlined

Some car owners unreasonably blame the manufacturers when a tire is worn out after a few hundred miles of service. If these car owners had inspected the wheel on which these tires were used, they would no doubt find the wheel out of alignment, so that it wobbled from side to side, quickly scraping and tearing the life out of the tire.

Neglected cuts and bruises often pass un-noticed, but are often a great factor in the deterioration of a tire. Small stones, sand and grit working in through those cuts quickly rots the fabric and a blow-out occurs. Large injuries should be attended to by a competent repairman at once. Small cuts should be cleaned and sealed with cement.

Brakes should be used sparingly. Stops can be made nearly as quickly and with less fuel consumption, without any great strain on the tire, by cutting off the power of the car a few seconds before it would be customary to apply the brakes. It is possible for a heavy car braked quickly on a rough road to result in tire tread being ground through to the fabric.

It is sometimes advisable to save the mechanism of the car by running in car tracks for a short distance, or in deep ruts in the road to avoid rough spots. Continually doing this, however, will increase tire bills. The edge of the rails will in time cause the fabric to break and rough edges will cut the casing. Ruts in the roadway tear the light rubber away from the tire sidewalls and lost mileage is the result.

Care should be taken that oil does not collect on the tires. When fatty substances come in contact with rubber, the rubber quickly loses its strength and resiliency. Too much chalk inside of the casing to prevent the inner-tube from sticking may cause the inner-tube to harden and blow-outs to occur.

Overloading Leads to Blow-outs

Tires are built to carry a certain load to conform with the size of the rim on which they are used. If a car is overloaded there is a corresponding overload on the tires which increases the possibility of a blow-out. Cars that are used to their maximum capacity of loads should be equipped with over-size tires. This is really not an extra expense, as it is a considerable saving in tire costs.

When a blow-out occurs, with no means of repair at hand, the tire should be taken off and the rim wound with rope so that the trip may be made slowly to the nearest repair shop. Tires which are run for any distance after being deflated are generally beyond repair. If car owners would spend a few minutes to glance over their tires after each trip, they would be repaid by more miles of service from their tires and a consequent saving of many dollars on their tire bills.

Tire care and tire mileage are one and the same.

—⚙—

Paris.—The Alabastine Co., whose factory was gutted in a recent fire, contemplate rebuilding. Approximate cost $35,000.

EVENTS IN THE TRADE

BUSINESS CHANGES

Sarnia, Ont.—Martin Hardware Co. has sold to Sarnia Hardware Co.

Toronto, Ont.—P. T. Osborne, hardware, has sold to Gabriel Caplan.

Toronto, Ont.—Kogan & Abramovitz, hardware, have dissolved partnership.

Montreal, Que.—Mercure Hardware & Lumber Co., has dissolved. New firm formed under same style.

Roland, Man.—Roland Hardware Co. has been succeeded by Roland Hardware Co., Ltd.

FIRE LOSS

Winnipeg, Man. — Charles Mulvey, hardware, suffered severe fire loss.

Harrison, N.J.—Driver-Harris Wire Company's plant was partially destroyed by fire recently, with a loss estimated at $700,000.

OBITUARY

St. Mary's, Ont.—Richard Parsons, hardware, is dead.

Edward Bond, formerly hardware merchant of Orillia, Ont., is dead. His wife predeceased him by six weeks.

PERSONALS

James Dandie, hardwareman of Streetsville, spent Monday in Toronto on business.

W. T. Chestnut, of R. Chestnut & Sons, Fredericton, N.B., was a recent visitor in Toronto on his way to New York City.

Raymond A. Catlin, representing the Corbin Cabinet Lock Company of New Britain, Conn., called on the wholesale hardware trade in Toronto during the week.

A. Kellough, hardware and plumber, Winnipeg, Man., was a visitor at HARDWARE AND METAL'S Toronto office during the week. Mr. Kellough was on his way to New York.

INCORPORATIONS

Walkerville, Ont.—The Beaver Truck & Tractors Co. has been incorporated to manufacture motor trucks, farm tractors, fire apparatus and vehicles at Walkerville, Ont., with $500,000 capital stock. Edward P. Brownell, Toronto; Charles J. Stodgell and Henry P. Crocker, Walkerville, are interested.

Montreal, Que.—Canadian Die Casting Co. has been incorporated at Ottawa with a capital of $300,000 to manufacture iron and steel products of all kinds. The chief place of business is Montreal, and the incorporators are: Harry A. Bertram, F. H. Markey, and W. W. Skinner, all of Montreal.

Hamilton, Ont.—The Boston Insulated Wire and Cable Company, Ltd., capital $200,000, to manufacture wires and cables used for electrical and other purposes.

CHANGES IN IMPERIAL OIL LTD.

A change in the organization of Imperial Oil, Limited, has been effected through the division of territory in Ontario into Eastern and Western sections.

J. F. SHATFORD

Who takes charge of the newly created Eastern Ontario Division of the Imperial Oil Company, Toronto.

J. F. Shatford, formerly general manager of the Queen City Branch, will have charge of the Eastern Division, while Fred J. Wolfe, formerly manager of the lubricating department of the Queen City branch, will have charge of the Western Division. G. I. Hambly is to be assistant manager of the Eastern division and F. W. Deer, formerly agent for the company at Haileybury, has been appointed assistant manager of the Western division. The change has been made in order to make a more intensive solicitation of territory possible.

INDUSTRIAL NOTES

Melfort, Sask.—Imperial Oil Company plans the construction of a new warehouse with tanks of 100,000 gallon capacity.

Hamilton, Ont.—Temporary offices of the Dunlop Tire & Rubber Co. have been located at 17 Park St. since the recent fire. The new headquarters of the Dunlop Company in Hamilton will be at 17 Jackson St. E., on the site of the old Gurney Foundry building.

MAKE ADDITION TO PLANT

The King Edward Hotel, London, has been purchased by the McClary Mfg. Company as an addition to its plant, and will be remodelled at once. It is estimated that $2,500 will have to be spent on it to place it in proper condition.

IMPERIAL OIL CONVENTION

The Eastern Ontario Division of the Imperial Oil, Limited, last week held a convention at the King Edward Hotel, Toronto, which was attended by the sales representatives from the Eastern sections of the province. J. F. Shatford manager of Eastern Division, was presiding officer at the convention. The sales convention of the Western Division is being held in the King Edward Hotel for four days commencing February 4, with Fred J. Wolfe, Western manager, as presiding officer. Questions of vital importance to the company will be discussed.

A. D. ARMITAGE, PRESIDENT

Succeeds A. B. Rinehart as President of Whitman & Barnes Mfg. Co.

At the annual meeting of the Whitman & Barnes Mfg. Co., held at the general offices of the company in Akron, Ohio. A. D. Armitage was elected president to succeed A. B. Rinehart. F. A. Seiberling was named a director.

Mr. Armitage has risen from the position of a mechanic, held in 1892, to the highest place of honor. He has been continuously connected fith the company 25 years at its three factories and offices in Akron, Chicago and St. Catharines, Canada.

He started as mechanic in the Akron factory September 1, 1892, became purchasing agent in 1900, was transferred to the Chicago factory in 1902 and made superintendent of that plant in 1904. In 1908 the board of directors elected him general manager of the three factories and manager of sales for Canada. At the annual meeting in 1915 he was elected vice-president and manager of the Chicago and Canadian factories with charge of sales at those offices. C. E. Sheldon, chairman of the board of directors, presided at the stockholders' meeting. The directors and officers elected are: C. E. Sheldon, chairman; A. D. Armitage, president; W. H. Eager and A. B. Hall, vice-presidents; W. E. Rowell, secretary; S. H. Tuttle, assistant secretary; Frank A. Seiberling, George R. Hill, C. B. Raymond and A. H. Commins, directors. E. A. Fisher, assistant treasurer, was made treasurer.

CHAIN COMPANIES AMALGAMATE

Columbus Chain Co. and McKinnon Chain Co. Unite—Fire Welded Chain to be Made in Canada

The Columbus Chain Company, with factories at Columbus, Ohio and Lebanon, Pennsylvania, and the McKinnon Chain Company, with factories at Buffalo, New York and St. Catharines, Ontario, have been united under the name of the Columbus McKinnon Chain Company. The new company have formed a Canadian organization, known as McKinnon Columbus Chain, Limited, with general offices at St. Catharines, Ont.

Besides offering the trade a full line of electric welded chain, it is the intention in the near future to manufacture fire welded chain at St. Catharines, under supervision of experienced men from the Columbus plant. The new company will therefore be in a position to offer chain of the Columbus Company—but manufactured in Canada. Until the Canadian plant is in operation it is said orders for fire welded chain will be imported from Columbus, Ohio.

The McKinnon Columbus Chain, Limited, was incorporated by L. E. McKinnon, D. S. Brisbin, and W. A. McKinnon, all of St. Catharines, with a capital of $1,000,000.

MONTREAL NEWS NOTES

H. K. Kearns, sales manager for B. & S. H. Thompson, Montreal, has just returned from an extended tour of the United States steel centres. Mr. Kearns was away for about two weeks.

R. C. Misson of the Sherwin-Williams staff, Montreal, is a visitor this week to the Maritime Provinces.

ADDS IMPLEMENTS TO STOCK

A. D. Enticknap & Son of Drumbo, Ont., who have conducted a hardware business and tinshop for the past 18 years have taken over the implement lines formerly handled by Geo. Law & Son. Earl Enticknap, grandson of the senior partner will be special salesman for this department.

ELECT NEW OFFICERS

Bicycle dealers of Vancouver, B.C., got away to a start for the season of 1918 at the annual meeting of the Vancouver Cycle Trades' Association held recently. A number of important matters received attention, including the adoption of a set of rules and regulations.

F. M. Armstrong, of the Kitsilano repair shop, was elected president in succession to J. G. Pape, who has gone to Winnipeg; Jack Hitchcock, of A. M. Chapman's, was made vice-president, and Fred Deeley, Granville Street, was chosen for the united offices of secretary and treasurer.

CHANGE OF MANAGERS

John F. Stevenson who has been with the Burrow, Stewart & Milne Co., stove and scale manufacturers, as manager of their Toronto branch, has severed his connection with the company to accept a position with the Bird Manufacturing Company as manager of their Toronto branch. W. F. Carson, who has been a travelling salesman with Burrow, Stewart & Milne Co. for some eight years past, has been transferred to Toronto as manager of the branch.

T. F. HODGSON GOES SOUTH

Thomas F. Hodgson, a sales representative for the Steel Company of Canada, Toronto, office, has been granted leave of absence for six weeks or so and has gone to Jacksonville, Fla., for the benefit of his health. Before leaving for the South on Tuesday, January 29, Mr. Hodgson was waited on by a large number of friends from Balmy Beach and presented with a purse of gold as a token of the esteem in which he is held. Frank E. Barchard, Sec.-treasurer of the Ward 1 Liberal-Conservative Association, of which organization Mr. Hodgson is president, made the presentation to which Mr. Hodgson replied in his usual happy manner, expressing his sincere appreciation of their kindness in remembering him, and said that the thought which prompted the gift was valued far more than the purse itself and that he would often think of his friends while sojourning in the South.

T. F. HODGSON

A sales representative of the Steel Company of Canada, Toronto office, who has gone South for his health.

POULTRY AND AUTO SHOW IN PICTON

The annual poultry and automobile show of Prince Edward county was held in Picton, Ont., for three days last week W. J. Carter, of Carter Bros., hardware merchants, had charge of the advertising which has been running since last November. Newspapers, bill boards and street advertising has been made use of successfully. All the public school children of the town and county will be guests of Carter Bros. at the show, over 2,000 admission tickets going into the homes of the pupils.

WAR MISSION AT WASHINGTON

Canada has established a War Mission at Washington. Lloyd Harris, of Brantford, Ont., who has been associated with the British War Mission there for several months, will act as chairman. The Canadian War Mission, it is announced, "will act in the closest conjunction with the British War Mission at Washington as well as with the British Embassy. It will act on behalf of the various departments of the Canadian Government in respect of negotiations relating to purely Canadian affairs, and will exercise general supervision and direction over all officers of the Government of Canada stationed in the United States in respect of matters connected with or incident to the prosecution of the war."

TRADE INQUIRIES.

Wanted: Canadian iron founder to manufacture cast iron rainwater pipes with ears British patterns. Diameters 2", 2½", 3" and 4". Weights: 16, 20, 23 and 32 lbs. per 6 ft. length overall. Diameter of pipes is measured in to out. Name will be supplied to any one writing Hardware and Metal.

Buys Interstate Electric Novelty Co.

Canadian National Carbon Co. Takes Over Assets—"Franco" Line to be Maintained Intact

THE physical assets of the Interstate Electric Novelty Co. of Canada, Ltd., Toronto, has been taken over by the Canadian National Carbon Co., Toronto. This is the result of negotiations which have been conducted over a period of weeks.

The Interstate Electric Novelty Co. of Canada was incorporated in Canada in June, 1914, and has conducted its business in flashlights and electrical novelties under the "Franco" trademark.

The Canadian National Carbon Co. will maintain the "Franco" line intact both in range and quality, and for the present, at least, no change in the sales organizations of the two former companies is anticipated. "Franco" salesmen and "Eveready" salesmen will continue to solicit business for their respective lines, though a constructive, rather than competitive attitude will be assumed by each.

E. G. Ernst is manager of the Canadian National Carbon Co., and under this firm name business will be handled for both "Franco" and "Eveready" products.

CATALOGUES and BOOKLETS

Hyslop Bicycles and Sundries

A very attractive catalogue has been issued by Hyslop Brothers, Ltd., Toronto, illustrating their line of bicycles and sundries. The catalogue is well illustrated and includes complete descriptive matter applying to each line. Several styles of bicycles are illustrated in addition to a comprehensive showing of accessories, many of which are new.

1918 Catalogue Ready

The McFarlane Mfg. Co., Toronto, formerly the McFarlane Ladder Works, are now distributing their 1918 catalogue of woodenware. The catalogue contains about 70 pages, and includes such lines as ladders, wash boards, ironing boards, curtain stretchers, lawn chairs, baskets, sleighs, coathangers, etc., many of which are new. Descriptions of each line are given, and where possible, list prices included.

Reaching Your Market

The remarkable progress made in the retailing of automobile tires and tire accessories is well typified in a handbook on the subject recently published by the McGraw Tire & Rubber Company, of East Palestine, Ohio. It is entitled "Reaching Your Market," and deals with the fundamentals of success in selling tires to the user. The story is so simply told, and the exhibits are so graphic that a dealer can quickly pick out the suggestions most applicable to his own business.

The pages devoted to advertising and selling are profusely illustrated with color designs, posters, cards, signs, booklets, ads, movie slides, etc., all worked out ready for use.

The pages are devoted to SERVICE—the kinds of service a retailer can render gratis to build up goodwill, are especially interesting.

The handbook, it is said, is too expensive a publication to distribute broadcast among dealers, but it will be sent without charge to any who write for it to the McGraw Company at East Palestine, Ohio.

Milbradt Catalogues Issued

The Milbradt Mfg. Co., St. Louis, Mo., have issued an attractive catalogue, No. 30, illustrating their complete line of rolling step ladders and tracks. The catalogue contains illustrations of the different styles, and complete description is given with each. Included with the catalogue is a form containing instructions on how to order.

In addition to the above lines a supplementary catalogue has been issued to illustrate and describe the Milbradt power lawn mower, and another which shows a range of store settees, store stools and foot stools. Catalogues can be secured by writing to the above address.

B.-H. Anchor Marine Paint Specialties

An exceptionally attractive catalogue has been issued by Brandram-Henderson, Ltd., featuring their various marine paints. The catalogue, which is handsomely illustrated, gives authoritative information on all phases of marine painting, and contains a large amount of information which should prove of real value to Canadian shipping interests. Several illustrations are shown of vessels on which the company's paints have been used, and reproductions of testimonial letters are also a feature of the catalogue. The colors of the paints are also attractively shown in the catalogue.

STEEL PLATE MILL CONSIDERED ON COAST

Vancouver.—Hon. Wm. Sloan, Minister of Mines in the B. C. Government, has just given an intimation that the Government is about to join with two of the steel plants on the mainland and controlled by the Tudhope interests of Orillia, Ont., and R. Turnbull, of Welland, in inviting an eminent outside metallurgist of recognized standing to come to Vancouver to make a final report as to the feasibility of establishing a steel plate mill here.

Each of the above interests, it is stated, is interested in the Pacific Steel Company of Eburne and the Aetna Iron & Steel Company of Port Moody, whose plants are being equipped with the latest modern furnaces available for the purpose and which, when finished, will be the largest electrical furnaces on the Pacific coast. The two plants are already producing iron and mill steel rods and shapes, and find an ample market at home for all they can produce under present conditions. There is also a great demand for steel plates for the ships under construction on this coast.

If the report of the metallurgist is favorable an electrical smelting and steel plate industry will be located either on False Creek in the heart of Vancouver or on Burrard Inlet dividing the city from North Vancouver.

TO ENCOURAGE GROWING OF HEMP

A measure to remove the duty from hemp seed in order to stimulate production of hemp, which is so largely used in the manufacture of binder twine, will be introduced at the coming session of Parliament. For causes due to the war it is now desirable to use hemp seed. This seed, which originally came from China, has been acclimatized in the United States, and is worth $22 a pound there. It is at present subject to a duty of 25 per cent., and a 7 per cent. surtax. S. Frank Glass, M.P. of East Middlesex, will introduce the measure. Mr. Glass believes the duty should be removed and the growth of hemp and flax encouraged by every possible means.

HARDWARE LETTER BOX

Standard Oak and Ideal Oak Heaters

McElhone & Kelly, Gadsby, Alta.—Can you advise us where we may get repairs for Standard Oak and Ideal Oak Heaters?

Standard Oak heater repairs from the National Mfg. Co., Ltd., Ottawa; Ideal Oak heater repairs from McIntyre & Taylor, 501 Queen Street W., Toronto.—Ed.

M. W. Marvin, Atnarko, B.C.—Could you furnish me with addresses of manufacturers of snowshoes?

Henry Ross, Indian Lorette, Que.; Robert Ryan Co., Regd., Three Rivers, Que.—Ed.

Buckeye Incubator

Creeper & Griffin, Ltd., Owen Sound, Ont.—Can you let us know where we can secure the Buckeye 50-egg incubator?

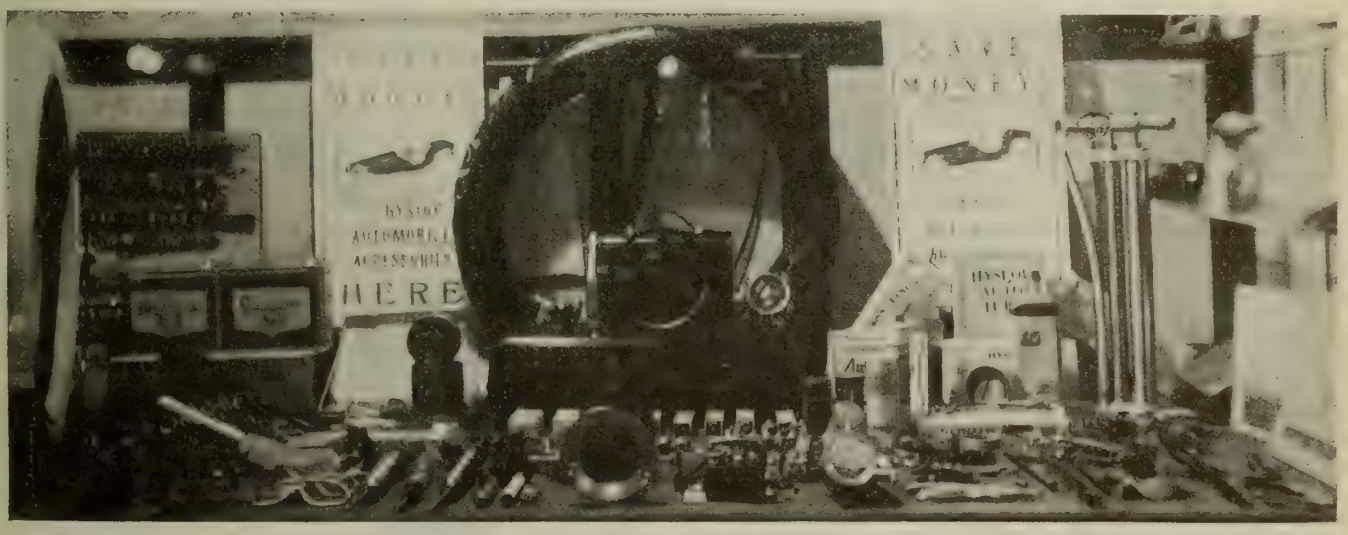
The Buckeye Incubator Co., Springfield, Ohio.—Ed.

FURTHER EXTENSION IS MADE IN BRITISH STEEL REGULATION

A recent further British Government regulation regarding the use of steel will have considerable effect upon Sheffield manufacturers, particularly those engaged in the manufacture of table cutlery. After the former regulations went into force commandeering the output of steel except under Government license, the only steel for which there was a free market, and on which manufacturers depended for material to supply other than Government orders, was what was known as shell-discard steel.

This was steel which was originally intended for shell making, but which was rejected for this purpose, as it did not come up to specification, and as the quantity was considerable it enabled manufacturers to maintain a hold on their private trade. It has now been found that this shell-discard steel is suitable for shipbuilding and other war purposes, and it has therefore been brought under the war-material regulations.

Because shell-discard steel could be dealt with in the open market it has commanded higher prices than the official maximum prices of steel without defect.



SPECIAL LICENSES FOR HARDWARE

The Canadian Deputy Minister of Trade and Commerce has received word from the Canadian High Commissioner in London, Eng., that general licenses in respect to hardware will be revoked from February 1. From that date special licenses will be issued on rational basis. Goods covered by general licenses will be admitted into Britain on proof of despatch to consignees on or before January 31, 1917.

Suggestions for Seasonable Window Displays

The playing up of a single line of goods from the paint department will undoubtedly bring in splendid returns. In the above window the use of display cards adds greatly to the attractiveness of the display of floor finishes. The present is a good time to keep the people thinking of you. Well-arranged window displays do much towards accomplishing this end.

There is no better business-getter for the auto accessory department than the window display. Keeping these items prominently before your customers is one sure method of maintaining interest in your store as headquarters for these goods. Auto accessories sell all the year round and already car owners are planning trips for the coming summer. See that they are well supplied with accessories which will add to the pleasure of their outing.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

SPOTLIGHT STOPGLARE

The chief feature of the new "Spotlight Stopglare" is, it is stated, its driving range of 400 to 500 feet; this is exceptional for a diffusion type of lens, and is ample range even for the speedsters. This is now being marketed by Stopglare Sales Co., Ltd., Hamilton, Ont. It is

"Spotlight Stopglare."

claimed another important feature to consider is that stopglare eliminates back glare; this means absolute protection from the glare of approaching lights.

Other points enumerated by the manufacturers are: Stopglare equipment ensures comfort and safety for night driving. The ditches are always clearly visible—no chance of a sudden swerve landing you unexpectedly into one. Road signs may be easily read when on a strange road. Turns are always outlined while approaching them and clearly illuminated when making the turn; no chance of driving past the turn without seeing it, and in making the turn the light is on the road, not on the field.

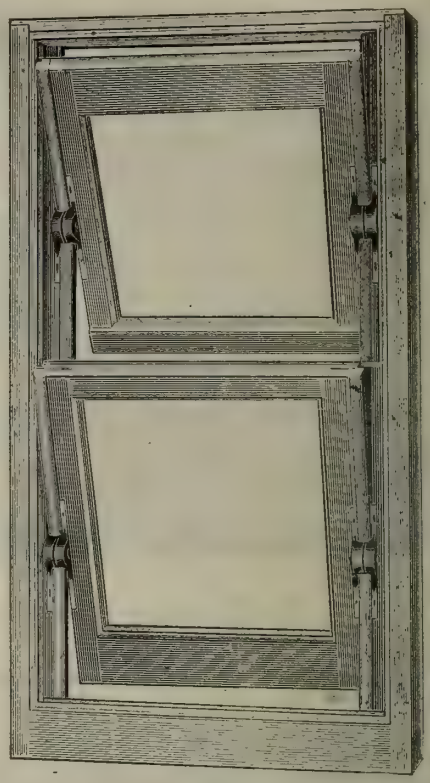
KERO COAL OIL CARBURETOR

The Kero coal oil carburetor now being marketed by Ker-Carb Limited, 3 Adelaide St. E., Toronto, will it is stated, operate a car on kerosene as simply and as well as will gasoline. Points enumerated by the manufacturers as important are outlined herewith: To operate your car on kerosene is as simple as on gasoline. Pull the fuel switch lever up when starting a cold motor. This connects you with the gasoline and you start and run as usual. When started push down the lever and you are on kerosene. When the motor is warmed up you need not switch to gasoline at all as it will start on kerosene.

The Kero coal oil carburetor will operate a car on kerosene or gasoline with equal efficiency. No changes made. Simply raise or lower the fuel switch as wished. It will also operate a car on any of the other heavier fuels that are used for motor consumption satisfactorily. No disagreeable smoke or odor noticeable when carburetor is properly adjusted.

This carburetor is in every sense a device that vaporizes, gasifies and vitalizes motor fuels.

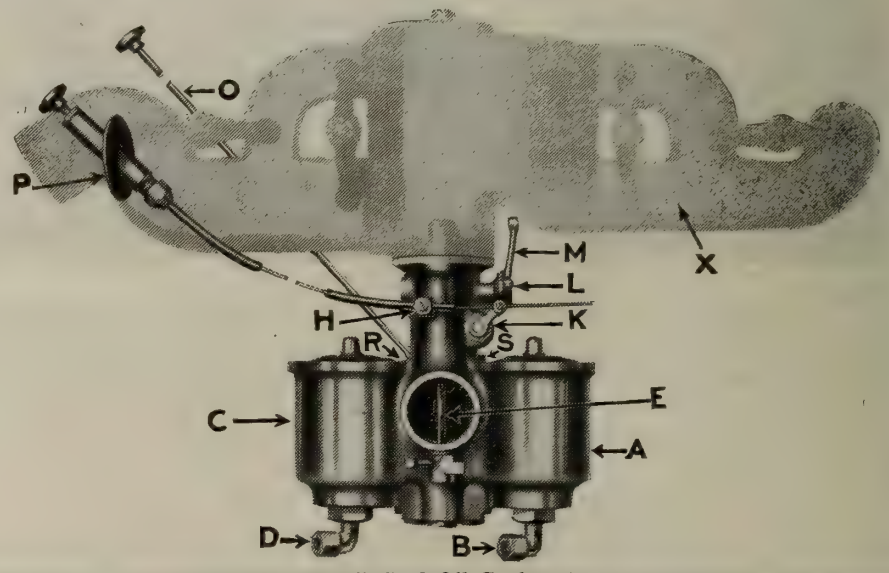
B. H. AUTO ENAMEL



Brandram-Henderson Ltd., paint manufacturers, Montreal and branches, have placed on the market the B-H auto enamel, which it is stated, makes an old automobile look like new by producing a beautiful finish.

The manufacturers have prepared a window cut-out for the dealers' use. B-H auto enamel comes in eight different colors.

WINDOW SASH PIVOT HINGES



The Gillies' perfect reversible pivot hinges for all kinds of window sashes are now being marketed by the Springer Lock Mfg. Co., Ltd., Belleville, Ont..

It is claimed they are cheap, serviceable, and easily installed, can be fitted to all designs of windows both in iron or wood sashes. With this pivot hinge, it is stated, sashes can be reversed to the vertical with safety and ease and have a water-tight joint; the hinge can also be

Gillies Perfect Reversible Pivot Hinges, Applied.

applied to top and bottom rails and the sash reversed on the vertical axis; the sash can also be set at given angles to allow for ventilation. They are made of cast brass, in two sizes.

"Kero" Coal Oil Carburetor.

THE CLERKS DEPARTMENT

A NEWS BOY GRADUATE HEADS MUNITIONS BOARD

Frank Scott, Who is Buying All Uncle Sam's Shells, Has Had a Meteoric Career—Why He is Able to Make Good.

ONE of the ablest business men to be taken by the U. S. Government to Washington to help in war organization is Frank Scott, who holds the extremely responsible position of Chairman of the War Industries Board.

Allen Hamilton in "Everybody's Magazine" gives a readable sketch of this dynamic young American. He says:—

Frank A. Scott, chairman of the War Industries Board, comes close to being a perfect expression of that intangible, yet very real thing we call "the genius of a free people." A poor boy, robbed of a chance for schooling by his bitter necessities, and facing life without the aid of friends or influence, he rose to wealth and position, and to-day, in an hour of national need, stands among America's elect in a place of tremendous power.

The War Industries Board is the Government's answer to the situation's demand for concentrated authority. Seven men compose it: Admiral Frank L. Fletcher, representing the Navy; Lieutenant-Colonel Palmer E. Pierce, for the Army; Hugh Frayne, of the American Federation of Labor; Bernard M. Baruch, the New York financier; Robert S. Brookings, of St. Louis; and Robert S. Lovett, Chairman of the Executive Committee of the Southern Pacific Railroad. *And* Frank A. Scott.

From this body flows a vast stream of administrative activity. Colonel Pierce and Admiral Fletcher present the needs of the war-making branches of the Government. Mr. Baruch's province is the world of raw materials, Mr. Brookings looks after the finished product, Judge Lovett is master in all questions of priority, and Mr. Frayne is the expert in dealing with the human element in industry.

It is the job of Frank Scott to keep all these strings in his hands, to see that full effectiveness is gained by an absolute co-ordination, and as from a watch-tower, to guard the country against the sly approaches of greed and rapacity. For, mind you, in the War Industries Board is centered the answerable responsibility for the purchase of America's war supplies—a business running high into the billions.

And Frank Scott started as a newsboy in the streets of Cleveland hardly more than forty years ago! His father died when the son was ten, and in order to aid a mother left penniless, the youngster got a job delivering papers. Getting up long before daylight, he trudged over his route, and after a day in school, he sold papers on the streets until his tired little legs carried him home to his dinner.

At twelve he left school definitely for work in a telegraph office, and he is still remembered in Cleveland as the one messenger boy who "never loitered," who did not read dime novels, and whose mouth was minus a cigarette.

A railroad office, liking his looks, gave him a place as office boy, and before his majority he was a specialist on freight rates, and a highly prized employee. The Cleveland Chamber of Commerce, deciding to fight for community growth instead of waiting for it, looked around to find a freight-rates expert, and Scott was elected by acclamation. From that post he went to the assistant secretaryship, and then into the secretary's office.

Everybody admired Frank Scott because of the ability that he was always demonstrating, but more than that, everybody *liked* him. He was clean of mind and clean of mouth without being priggish, he worked all the time, yet never lacked time to be human, and in an atmosphere of intense competition, he made kindness his principle of life. No one ever heard him say an ugly thing or saw him do one!

Naturally enough, business reached out for him. He went from the Chamber of Commerce to be secretary and treasurer of a trust company, and made good there just as he had made good in his other jobs. So much so that the City of Cleveland turned to him in the day when the powers of High Finance schemed Tom Johnson's three-cent street railway into disaster. As receiver, Mr. Scott restored the company to solvency and success, and made it a going concern that justified a people's faith in the radical idea.

A great Cleveland firm, eager for a pair of younger shoulders to shift the burden, asked Frank Scott to come over and be its vice-president and general manager. Instead of sitting in an office, the new official took to the road, explored every corner of the civilized globe, studied world trade, and as a result, that which had been a big business became an international business.

Shortly after the declaration of war, when the whole munitions business was getting into a sad tangle, Secretary of War, Baker, sent a hurry call to Cleveland for Frank Scott. "Come and straighten things out," he ordered.

At once, and without thought of the sacrifice entailed, Scott came and "straightened." Under his directions a General Munitions Board was formed to co-ordinate the various purchasing activities of the Government, to the end that order, economy, and efficiency were brought out of chaos. Naturally enough, when the Administration decided upon a War Industries Board, the last word in concentrated drive, Frank Scott was chosen chairman.

A big man, this Scott person, but better than that, a *good* man. He believes in all the old-fashioned virtues like honesty and honor and good faith and patriotism, and what is more to the point, he *practises* them. As yet, no such scandals have broken as cursed the Spanish-American and Civil wars, but, nevertheless, to Washington have come some men who seem to see in America's crisis nothing more than an opportunity to add more dirty dollars to their grimy hoardings.

Against these Frank Scott stands like solid granite. They can't buy him, they can't fool him, they can't frighten him; and when the smoke of his daily battles clears away, it is seen that the forces of greed have met with another defeat.

Taken all in all, Frank Scott stands for the thing that has made America and that will *win* for America—the capacity to work practicality and patriotism in double harness.

DEATH OF J. S. N. DOUGALL

J. S. N. Dougall President of Dougall Varnish Co. Passes Away in Montreal

After a three months' illness, James Samuel Niven Dougall, president of the Dougall Varnish Co. of Montreal, died at his Montreal home on Saturday, Feb. 2.

Mr. Dougall was born in Montreal in 1853. His early education was received in Montreal, and that of his training for the work of his chosen calling was received while in the employ of McArthur Corneill & Co., varnish manufacturers. He later became connected with this firm as a partner and his connection covered a period of ten years. In the year 1892 he became a partner in the business of D. A. McCastill & Co., also varnish manufacturers, and continued with this firm until the formation of the present Dougall Varnish Co., continuing as president until his death. Among other organizations with which he was connected are: Commercial Travellers' Association, of which he was president on different occasions: Canadian Manufacturers' Association, of which he was chairman, and member of the council of the Montreal Board of Trade.

Two sons survive Mr. Dougall: J. H., a member of the Dougall Varnish Co. and J. B. of the Canada Sugar Refineries, Two daughters, Mrs. Turnbull and Mrs. Matthewson, also survive.

Brantford, Ont.—Dominion Steel Products Co. has increased its capital stock from $500,000 to $1,000,000.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

OF outstanding interest in the market situation pertaining to hardware commodities is the decision of the United States Government to prohibit the manufacture of black and galvanized steel sheets for export except under license. The regulation has also been extended to wire. This means that a practical embargo exists on all gauges of black and galvanized sheets, which can come forward to Canada only when permit is granted. After the sheets reach Canada a further permit must be secured from the Dominion Government before sale is permitted. This regulation previously applied to No. 10 gauge and heavier but under the new regulation is now applicable to all gauges. The situation thus created will undoubtedly work out toward firmer prices for existing stocks of black and galvanized sheets, although advances in price may not necessarily be forthcoming in the immediate future.

Following the reduction recorded last week in the price of wire nails and smooth steel wire, a further reduction has been recorded in hay wire in coils. Advances have been numerous during the week and include those on candles, pruning saws, plastering trowels, brick trowels, pointing trowels, compass saws, crosscut saws, oyster shell, Paris green, storage batteries, speedometers, valve removers, brake rod supports, clutch release devices, mechanical starters, tire holders, engine driven tire pumps, headlights, sidelights, tail lamps, axle braces, column braces, oil gauges, accelerators, cut-out outfits, wheel pullers, crank holders, curtain lights, curtains. An unusually big advance has been recorded in the Winnipeg market on the price of axes.

Wholesalers are experiencing much difficulty in getting shipments of goods both incoming and outgoing. Invoices of goods that have been shipped by manufacturers but which have not yet been received by wholesalers continue to grow in number daily. Fuel Controller's action will cause further delay in shipments. Movements of travelers through the country have been greatly hampered by the curtailment of passenger service and delays to trains through storms. In spite of the handicaps to trade business continues seasonably good.

MONTREAL MARKETS

MONTREAL, Feb. 6.—During the past week jobbers report that business has been very satisfactory. This was hardly expected to be as brisk owing to weather conditions. The activity has been most noticeable from outside points. Among the few changes that have occurred are the following:—Wire nails have been reduced to $5.25 per keg base. Standard smooth wire and annealed wire have also been reduced, the former to $6.25 per cwt. and the latter changes are recorded under a separate head. Thirty gallons standard range boilers are up to $14 each. Cotton rope will shortly be advanced, say importers. Tap soles are lower and it is stated that other leather products are due for lower prices in the immediate future.

Prices Of Pipe Will Be Revised Upward

Montreal.

IRON PIPE.—There is nothing definite in the way of actual new prices on iron pipe but these are being revised and there will be approximate advance of from 1½ to 2 per cent. over the old list. These will probably be effective within the next week and definite figures will be published at the earliest possible date. The advances will apply to both black and galvanized pipe.

Paint Brushes And Other Lines Advance

Montreal.

BUSHES.—An advance is announced in Boeckh brushes. This will affect the entire line and covers paint and varnish brushes, stable and floor brooms, wall and kalsomine brushes and other odd and special lines. It will approximate but a small advance and the discounts will now be 50 per cent. and 10 per cent.

Fibre Tubs And Pails And Other Lines Up 5%

Montreal.

FIBRE WARES.—An advance has been recorded in indurated fibre wares. This applies to the complete line and will cover tubs, pails, butter bowls and such other specialties of this line as are carried by the trade. The advance is five per cent.

Leather Quoted Lower; Tap Soles Decline

Montreal.

LEATHER SOLES, ETC.—There has been a considerable decline in the prices of tap soles and these are shewn as follows:—No. 10 are reduced from $7.55 to $6.05 per dozen pairs:—No. 121 from $5.25 to $4.20; No. 122 from $5 to $4 and No. 123, $4.75 to $3.80 per dozen. It is stated that other manufactured lines of leather may be affected in the immediate future.

Range Boilers Are Marked Up One Dollar

Montreal.

RANGE BOILERS.—An advance has been effected in the price of range boilers this week. This applies to the standard galvanized steel boiler and the 30 gallon size is now quoted at $14 which represents an advance of $1 over the old price. It is brought about through the conditions of supply and labor.

Cotton Rope To Go Up And All Prices Firm

Montreal.

ROPE AND CORDAGE.—There has been a decidedly firm tendency to the market all week and prices while unchanged are very likely to record upward tendencies at any time. "This will also apply to cotton rope," said a large dealer to HARDWARE AND METAL and the advance is suggested as likely to be considerable. A cable was received by one large concern stating that an advance was being made in the European market. The local and Canadian situation is depending upon the action of the United States War Board.

Gasoline And Coal Oil Still Holding Firmly

Montreal.

GASOLINE AND COAL OIL.—The local situation is steady and without any changes being recorded a seasonable amount of business is being done. The local market will probably reflect any action that may result from the action of the U.S. War Board which has been considering the whole oil situation, but nothing definite having been arrived at as yet the situation here remains unchanged. Coal oil is selling at 18c per gallon for Royalite and at 21c for Palacine and Electroline. Gasoline is still 32½c.

Business In Stoves Looks Good For Spring

Montreal.

STOVES AND ENAMELLED WARE.—There is very little change to report in the conditions obtaining in this market for stoves. But there is an optimistic feeling among the manufacturers regarding future business and spring shipments, which are expected to be well up to those of the past season. The same applies to the bookings for enamelled ware and it is likely that this business will be well taken care of.

Iron Prices Are Ruling Without Marked Change

Montreal.

IRON AND STEEL.—The country business for iron and steel products is reported as continuing in fair seasonable volume. Locally this is light and only small orders are received. Changes have not been made and what orders are received are being filled at the following prices:—

MONTREAL—	
Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	11 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0.17½-0 19
Black Diamond tool steel, per lb.	0 18-0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Black And Galvanized Sheets Are Holding Well

Montreal.

SHEETS AND PLATES.—The condition of trade in sheets is one of steadiness. Prices have been maintained and with greater activity prevalent at some of the country points, trade is noticeably better. The quotations given usually apply to lots of half a ton and over and in some cases an advance of 70c per hundred pounds may be added to these quotations for less lots, in sheets, and in the bundles for less than half tons 20c per 100 lbs. may be added.

MONTREAL— BLACK SHEETS—		100 lbs.
10 gauge	$8 00	$12 50
12 gauge	8 65	11.50-11.60
14 gauge	8 80	8.85- 8.55
16 gauge	9 00	8.65- 8.65
18-20 gauge	9 25	8.75
22-24 gauge	9 40	8.90
26 gauge	9 45	8.95
28 gauge	....	9.05
10¾ oz. (28 English)	10 55	10.75

GALVANIZED SHEETS—	
10¾ oz.	$10 00
28 ga.	9 65
26 ga.	9 25
22 and 24 ga.	9 05-10 45
20 ga.	8 85-10 30
18 ga.	8 85
16 ga.	8 70

Old Materials Are Firm With Iron Very Strong

Montreal.

OLD MATERIALS.—The movement of old materials is necessarily small owing to the congestion of traffic. There is a strong market all through the list which is specially marked in the iron situation, there being a decided scarcity of large lots. No changes are made for the week, the following prices being paid:

MONTREAL—		
Tea lead	$ 0 05	....
Heavy lead, pipe	0 06¼	0 06½
Yellow brass	0 13½	0 14
Red brass	0 20	0 21½
Light brass	0 08	....
Scrap zinc	0 05½	....
Heavy copper	0 22	0 23
Wrought iron, No. 1, per gr. ton	25 00	....
No. 1 machinery scrap	27 00	....
Heavy melting steel	18 00	20 00
Pipe scrap	15 00	17 00
Stove plate, per ton	17 00	19 00
Old rubbers, boots and shoes	0 08	0 08½
Overshoes, lumbermen's rubbers boots	0 07	....
Bicycle tires	0 03½	....
Auto tires	0 04½	0 05½
No. 2 busheling	....	13 00

Trading In Lead Products Still Light

Montreal.

LEAD PRODUCTS.—Little interest centres for the time being in the lead situation as affecting the manufactured lines. These are moving out in a small way for immediate sorting needs and the prices remain unchanged as follows:

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12½	0 13
Lead sheets, 4 to 8 lbs. sq. ft.	0 11½	0 12½
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c lb. extra.		
Solder, strictly, lb.	0 47	....
Solder, commercial, lb.	0 45	....
Solder, wiping, lb.	0 42	....
Zinc sheets, casks	0 26	0 30
Do., broken lots	0 28	0 32

Nails Drop To $5.25; Wire Down To $6.25

Montreal.

WIRE AND CUT NAILS AND WIRE.—Last week it was very definitely pointed out in HARDWARE AND METAL that there was a strong probability of a downward revision of price for wire nails. This has been decided upon and the base price is now $5.25, a reduction of 25c per keg. Smooth steel wire has also declined and is now sold at base price of $6.25. Bookings are said to be fairly heavy and the jobbing trade from outside points is seasonably good. Cut nails are still selling at $5.60 base.

Annealed Hay Wire Declines Twenty Cents

Montreal.

ANNEALED HAY WIRE.—Interest centres in this item for many merchants who handle large lots as a decline of 20c per 100 lbs. is announced. The No. 13 is now quoted at $6.10 per 100 lbs.; No. 14 gauge at $6.15 and No. 15 gauge at $6.25. For those who wish carload lots a price of 5 cents per 100 pounds less is quoted.

Pig Lead Easier; Spelter Is Very Scarce

Montreal.

INGOT METALS.—The lead situation shows a little easier tendency, and the general situation on ingots is held without feature. One of the local dealers stated to HARDWARE AND METAL that some copper would shortly be to hand and that this would probably be sold for less money than the quotations now made which will be based on the Copper Commissioner's fixed price plus a fixed profit. The price cannot now be arrived at.

COPPER.—Trading is rather light and the prices hold unchanged at 33 to 34c.

LEAD.—This is a little easier and the trade is being supplied on the basis of 9 to 9½c per lb.

TIN.—Advices are to the effect that there is a lesser spread in prices at the primary points. Locally little is doing at from 79c to 82c per lb.

SPELTER.—One of the importers states that this is very scarce and that his firm had just sent by express a shipment to the Maritime Provinces to cover a shortage there. The price holds at 10½ to 11c.

ANTIMONY.—Supplies are very short and the prices have firmed slightly. Sales are being made on the basis of 19c per lb.

ALUMINUM.—The trade in aluminum is still small and with prices at from 58 to 60c per lb. the situation is unchanged.

TORONTO MARKETS

TORONTO, Feb. 7.—With but few exceptions, the price movements in hardware commodities have been in the upward direction. Trade has been somewhat disorganized during the week owing to the difficulty of getting shipments, both outgoing and incoming. Travellers are also greatly handicapped in making their rounds through the curtailed train service. Advances have been recorded in candles, pruning saws, plastering trowels, brick trowels, pointing trowels, compass saws, crosscut saws, oyster shell, Paris green, storage batteries, speedometers, valve removers, brake rod supports, clutch release device, mechanical starters, tire holders, engine driven tire pumps,

headlights, sidelights, tail lamps, axle braces, column braces, oil gauges, accelerators, cut-out outfits, wheel pullers, crank holders, curtain lights, curtains. Notwithstanding the handicaps to trade, business has been seasonably good.

Storage Batteries For Autos Advance

Toronto.

STORAGE BATTERIES. — Higher prices have been announced on "Eveready" storage batteries for automobile lighting systems, through the advancing of list prices. Following prices are subject to a discount of 33 1-3 per cent. 30-lb. battery $27.50 each, and advance of $2.50; 38-lb., $33.44, an advance of $3.04 on list; 40-lb., $34.15, an advance of $3.10; 53-lb., $40.10, an advance of $3.65; 60-lb., $46.04, an advance of $4.19; 71-lb., $51.98, an advance of $4.73. Advances in similar proportions have also been made on the automobile starting types of battery, 6-volt, 12-volt, 16-volt, 18-volt, 24-volt. "Franco" line of batteries and cases has also been increased in price owing to increased cost of production.

Speedometers Show Increase In Price

Toronto.

SPEEDOMETERS.—An increase in price of Van speedometers has been made effective. Flush and bracket type are quoted at following prices: In quantities 1 to 10, $9.75 each; 10 to 50, $9.45 each; 50 and over, $9 each. Combination and plain shield, the list price is $15 for plain shield and $20 for combination shield. Discounts on plain and combination shield types are as follows: Quantities 1 to 11, 25 per cent.; 12 and over, 30 per cent.

Valve Remover List Price Higher By 10c

Toronto.

VALVE REMOVERS.—List prices on Atlas valve removers have been advanced 10c, now making selling price 90c. Regular discount on this line is 25 per cent.; in quantities of 24, 30 per cent., quantities of 96, 35 per cent. This is the second change to take place in this commodity within recent months, and in this respect has shared the upward tendency common to so many products.

Brake Rod Supports Increase in Price

Toronto.

BRAKE RODS.—A substantial advance has been made on brake rod supports through changing of list prices. They are now quoted at 80c per pair list, the former list price being 55c. In quantities of less than 12 discount is 25 per cent.; quantities 12, 30 per cent.; quantities 48, 35 per cent. Principle of this device is steel ball held in tension against brake rod which prevents vibration. Abco brake rod supports have advanced to 75c list, former price being 45c. Discount on latter line is 25 per cent.; quantities of 10, 30 per cent.; quantities 50, 35 per cent.

Clutch Release Device Higher in Price

Toronto.

AUTO ACCESSORIES.—An advance of 25c on list price of automatic clutch release for Ford cars, which makes the list price now 70c each. This device permits throwing out clutch and applying brake in one operation. Discounts applying to sale are 25 per cent. in quantities of less than 6; quantities 6, 30 per cent.; quantities 24 and over, 35 per cent. Apco clutch controls for Ford cars are now sold at 60c, former price being 40c. Discount 25 per cent.; quantities 10, 30 per cent.; quantities 50, 35 per cent.

Mechanical Starters Advance $4 on List

Toronto.

STARTERS.—A considerable advance has been recorded in price of Sandbo

mechanical starters for Ford cars, the increase amounting to $4 on list prices, making the list selling price now $18 each. Discounts remain unchanged at 25 per cent. in quantities less than 5; 30 per cent. in quantities of 5; 35 per cent. in quantities of 25 and over.

Tire Holders Show Considerable Advance

Toronto.

AUTO ACCESSORIES. — Higher prices have been announced on McKinnon line of tire holders. While higher cost is attributable in part to increase in cost of materials, new ideas are embodied in construction which accounts for part of increase. No. 160 rear tire holder for roadsters, single tire, shows an advance of $1 on list price over last year's prices, new price being $3 each. No. 165, for two tires, the price is $3.50, for roadster type. No. 180 rear tire holder for touring car, one tire, formerly $3, now $6. No. 185, rear tire holder for touring car, two tires, $6.50. No. 170, side tire holder, single tire, $3.50. No. 175, side tire holder, two tires, $4 each. Niagara rear tire holder is now quoted at $6, the price quoted formerly being $4.50. King rear tire holders are quoted at $6, former price being $5 list. Above tire holders are designed for use on Ford cars. In quantities of less than 6, discount to dealers is 25 per cent.; quantities of 6, 30 per cent.; quantities 24 and over, 35 per cent.

Engine Driven Pump Advances $3 on List

Toronto.

PUMPS.—An advance of $3 on list price has been announced by some accessory houses on Mayo spark plug engine-driven pump for Ford cars, which makes list now $10.50 each. Kellogg engine-driven pump for Ford cars has been advanced $2.50, and is now quoted at $16 list. Discount on pumps is 20 per cent. in lots of less than 6, and 25 per cent. in quantities of 6 and over.

Headlights, Side Lamps And Tail Lamps Up

Toronto.

AUTO LIGHTS, EXHAUST HORNS. —Substantial advances have been recorded on the price of Clasco headlights, side lamps and tail lamps for Ford cars. No. 1156 electric headlights are now quoted at $8.30 per pair, an advance of $1.10 on list price. No. 1156 Special are quoted at $8.80, an advance of $1.10 on list. Clasco No. 346 electric side lamps are quoted at $5.50 per pair, former price being $4.70. Clasco electric tail lamps No. 26 are quoted at $1.70 each, an advance of 35c on list, while No. 27 electric tail lamps are quoted at $1.65 each. No. 8 side oil lamps are now quoted at $6 pair, an advance of $1 on list price. No. 9 oil tail lamps are quoted at $3.50, an advance of 70c on list price. Jericho-Fogg exhaust horns are quoted higher at $9.50 each, former price being $6.75. Discounts on above lines are as follows: Less than 6, 25 per cent.; quantities 6, 30 per cent.; quantities 24 and over, 35 per cent.

Axle Braces, Column Braces, Axle Trusses Up

Toronto.

AUTO ACCESSORIES.—Apco line of axle braces, steering column braces and rear axle trusses for Ford cars show substantial advances over prices prevailing for last Spring. Front axle brace is now quoted $2.50 list, an advance of $1.10. Apco steering column brace for Ford cars is higher by 30c on list, making price $1. Apco rear axle trusses are higher by $1.40 on list prices at $3.50. Discounts on above lines: Less than 10, 25 per cent.; quantities 10, 30 per cent.; quantities 50, 35 per cent.

Oil Gauges, Accelerators, And Cut-Outs Advance

Toronto.

AUTO ACCESSORIES.—Apco glass crank case oil gauges are now sold at 50c each list price. Discounts: 25 per cent.; quantities 20, 30 per cent.; quantities 100, 35 per cent. Apco steel oil gauges are now quoted at 85c each list price, with discount of 25 per cent.; quantities 10, 30 per cent.; quantities 50, 35 per cent. Apco foot accelerators are now quoted at $1.10 each, list price, with discounts of 25 per cent. in quantities less than 10; quantities 10, 30 per cent.; quantities 50, 35 per cent. Muffler cut-out of Apco design are quoted at $1 each, an advance of 15c on list. Discounts on cut-outs: Less than 10, 25 per cent.; quantities 10, 30 per cent.; quantities 50, 35 per cent. All of above lines are designed for Ford cars.

Wheel Pullers, Crank Holders and Assemblies Up

Toronto

AUTO ACCESSORIES.—Adjustable wheel pullers for Ford cars are now quoted at 60c each list, an advance of 15c. Discounts: Less than 6, 25 per cent.; quantities 6, 30 per cent.; quantities 24, 35 per cent. Leather crank holders are slightly higher on list prices at 30c each, with discount 25 per cent. in quantities less than 10; quantities 10, 30 per cent.; quantities 50, 35 per cent. Ignition wiring assembly in metal dome. four-wire outfit, is 5c higher on list price at 90c. Ignition wiring assembly in metal dome, five-wire outfit. $1 each, an advance of 5c on list. Discounts on assemblies: Less than 10, 25 per cent.; quantities 10, 30 per cent.; quantities 50, 35 per cent.

Contact Points Have Declined In Price

Toronto.

CONTACT POINTS —Repair parts for Ford K.-W. coil upper spring with contact point is one of the few lines to register a decline during the week, and amounts to a substantial decrease. Formerly sold at 60c each list price, now sold at 35c list price. Same article for lower spring contact point formerly sold at 45c each list are now quoted at 27c. Discounts: Less than 10, 25 per cent.; quantities 10, 30 per cent.; quantities 50 and over, 35 per cent.

Gaskets Lower in Price; Switch Blocks Unchanged

Toronto.

GASKETS, SWITCH BLOCKS. — Cylinder head gaskets in copper and asbestos for Ford cars registered a decline of 5c on list price, making the price now 65c each. Easier price on this line was due to fixing of lower price on copper by United States Government. In quantities of less than 12 discount is 25 per cent., and quantities of 12 and up 30 per cent. Goodrich switch block, three keys, for Ford cars remains unchanged in price at same quotation as that given last year, $4.50 each. Discounts: Less than 10, 25 per cent.; 10 blocks, 30 per cent.; 48 blocks, 35 per cent.

Curtain Lights, Curtains, Compressors Go Higher

Toronto.

LIGHTS, CURTAINS, COMPRESSORS.—Three auto accessory lines for Ford cars to register advances include rear curtain lights, windshield and top connecting curtains, piston ring compressors. Celluloid rear curtain lights are now quoted at 90c each, an advance of 5c on list. Connecting curtains for windshield and top are quoted at $2 each list, an advance of 25c. Stevens' piston ring compressors are higher by 15c each on list prices at 75c. Discounts on above lines: Less than 10, 25 per cent.; quantities 10, 30 per cent.; quantities 50, 35 per cent.

CONSERVE YOUR TINPLATE AND OTHER SHEETS

H. K. Kearns, of the B. & S. H. Thompson Co., of Montreal, who spent several weeks in many of the large United States centres, has just returned. In speaking with a representative of HARDWARE AND METAL, Mr. Kearns said: "You may advise your readers to conserve their stocks of sheets and tinplate in view of the situation that is general at all the large producing centres. I was over a great deal of territory and visited Cleveland, New York, Buffalo, Pittsburg, and many points as far south as New Orleans. The mills are confronted with the absolute necessity of closing at least part of their plants, and with the severity of the weather affecting so many points that have never had such low temperatures confronting them before, they have been unable to overtake orders. Yards and tracks are blocked, and it is impossible to operate trains in many of the points visited." For the immediate future Mr. Kearns is satisfied that no improvement of this condition is possible. It was 13 degrees below zero at New Orleans recently, Mr. Kearns states.

Pruning Saws And Crosscut Saws Go Up

Toronto.

SAWS.—An advance of approximately 10 per cent. has been made effective on Disston line pruning saws. No. 10 are quoted at $24 dozen, D 24 x 16, $12.85 dozen; D 24x18, $14.30; D 24x20, $14.25. York State pruning saws are quoted at $15.25 dozen. No. 17 at $18 and No. 18 at $18.55. Simonds crosscut saws have been advanced slightly in price and prices on Lance and equal are as follows: 4-foot, $4.15 each; 4½-foot, $4.65; 5-foot, $4.95; 5½-foot, $5.85; 6-foot, $6.60. Compass saws of Disston brand are quoted as follows: No. 2 by 12 in., $6.65 dozen; No. 2 by 14 in., $6.95.

Plastering And Pointing Trowels Go Up

Toronto.

TROWELS.—Disston line of trowels have been increased in price to the extent of 10 per cent. Plastering trowels are quoted as follows: No. 2x11, $19.95 dozen; No. 2x11½, $21.35; No. 2x12, $22.80; No. 23 x 12 $17.60. Brick trowels: No. 10x11, $15.60 dozen; No. 10x11½, $16.25; No. 10x12 $16.90. Pointing trowels No. 15x4½ are quoted at $5.85 per dozen.

Oyster Shell Up 20c; Candles Advance 2c Dozen

Toronto.

SHELL, CANDLES.—An advance of 20c per hundred pounds has been made effective in the price of oyster shell, which makes the price now $1 per 100 pounds. Oyster grit has advanced in similar amount and is now quoted at 75c per 100 pounds. There is an excellent demand for this commodity at this season of the year from poultry raisers and others interested in fowl of various kinds. Wax candles have been advanced 80c per case, or 2c per dozen.

Heavy Tee And Strap Hinges Advance

Toronto.

HINGES.—A slight advance has been recorded in the price of heavy tee and strap hinges. Following are the net prices prevailing in accordance with the advance. Light tee and strap hinges remain unchanged at 20 and 2½ per cent. off list prices:

	Strap	Tee
4-inch, dozen pairs	$2.40	$2.05
5-inch	2.95	2.65
6-inch	3.20	2.90
8-inch	4.30	3.30
10-inch	7.70	5.85
12-inch	9.50	9.30
14-inch	11.00	9.50

Hay Wire in Coils Reduced in Price

Toronto.

WIRE NAILS.—Following the reduction in wire products noted last week, when base price on smooth steel wire was reduced to $6.25 per 100 lbs., there has been a reduction in three sizes of hay wire in coils. No. 13 is now quoted at $6.10, a decline of 70c; No. 14 at $6.15, a decline of 75c; No. 15, $6.25, a decline of 80c. The decline recorded applies to Eastern Ontario points and to Sudbury and North Bay districts. Wire nails are holding steady at the decline noted last week. A very important regulation has been made effective in the United States which may affect the situation in wire products in Canada. Stipulation has been made that an embargo has been placed on the shipment of wire for export trade.

Castor Oil Can No Longer Be Obtained

Toronto.

OILS, GASOLINE.—Some of the large dealers in oil advise that they are out of the market so far as English

castor oil is concerned. It is now impossible to get shipment of this commodity from England owing to the demand for war purposes. Recent quotations in this market were at 50c per pound. One buyer during the week offered to pay 60c per pound but could obtain none whatever from the source where he inquired as they were entirely out of the commodity. From this time forward there will in all probability be a great scarcity of castor oil. Gasoline held steady in price at 31½c per gallon. Coal oil was also unchanged at 17c and 20c per gallon f.o.b. Toronto.

Uncertainty in Market Over Probable Regulation

Toronto.

CORDAGE, TWINE.—There is an uncertainty in the market for cordage products at the present time owing to the possibility of the United States fixing prices on hemp. Manufacturers have been inclined to look for higher prices for rope in view of the raw material situation, in which prices are higher, and great difficulty is experienced in getting supplies from the Philippine Islands. Binder twine prices have not yet been announced, but with the probability of the United States Government fixing the price it is anticipated in some quarters that prices may be announced some time this month. The usual time for announcement of prices is toward the end of March or the first part of April.

Tap Soles Decline; Leather Belting Firm

Toronto.

BELTING.—There is a strong situation in the market for leather belting at the present time owing to the heavy demand for the particular kind of leather from which belting is made. There has been a heavy demand for leather from United States concerns who have contracts for artillery harness and other heavy harness. Lace leather is holding in steady market and based on the price of winter hides at the present time prices show an easier tendency. For the better grade of hide taken from the animals in the Fall the prices will in all probability hold steady for some time. There is a continued good demand for belting. Manufacturers point out that advances in this commodity since the war started have amounted to only about 30 per cent., while certain lines of leather and shoes have advanced fully 100 per cent. Tap soles have declined approximately 25 per cent. due largely to lack of demand. Men's half soles, No. 123, formerly quoted at $4.75 dozen now quoted at $3.80 dozen.

Milk Cans And Cream Cans Advance

Toronto.

STOVES, ENAMELWARE, TINWARE.—An advance in the price of railroad cans has been recorded, prices at which they are now quoted being 20 per cent. on list, while cream cans are also higher, being quoted at 25 per cent. on list prices. Gurney lines of stoves, ranges and furnaces have been increased in price to the extent of 5 to 10 per cent. Enamelware is holding in steady market with a fair sale reported.

Brushes Advance From 10 To 12 Per Cent.

Toronto.

BRUSHES, BROOMS.—Following the intimation made last week in these columns that brushes were in strong market and that an advance was probable in the near future, one manufacturer has already increased the price on all lines of brushes from 10 to 12 per cent. Increases apply to Boeckh line of brushes and include paint, kalsomine, household and stable brushes. Increases have been necessitated through the advance in cost of materials and through the scarcity of bristles. Brooms continue in very strong market owing to the difficulty of getting shipments of broom corn from the United States. At the present time there is an embargo on shipment and all field operations have been suspended.

Canadian Mills Better on Deliveries

Toronto.

IRON AND STEEL.—Dealers report that Canadian mills have been making fairly regular deliveries of iron and steel within recent weeks. The demand keeps up well and prices held unchanged during the week. Stocks coming from the United States have been greatly restricted owing to operation of embargoes on various lines of railways.

TORONTO—	Per 100 lbs.	
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65
Angle base	....	5 75

Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Wrought Pipe Goes Higher By $2 Ton

Toronto.

WROUGHT PIPE.—An advance in the price of wrought iron pipe has been decided upon, which amounts to two points, or $2 per ton. At time of writing new prices had not been issued, but change becomes effective from February 5. Prices as given in current quotations are, therefore, cancelled. Announcement of new prices will be given next week.

Steel Sheet Situation Becomes More Acute

Toronto.

SHEETS, PLATES.—A recent regulation by the United States Government provides producers are forbidden to roll or manufacture sheet metal products for export except under license. This regulation applied previously to No. 10 gauge and heavier, but by the new regulation all gauges of black and galvanized sheets are affected. Furthermore, any stocks that are permitted to come through to Canada as a result of the export license granted by the United States Government cannot be sold in Canada until the importer has obtained permit from the Dominion Government. The situation thus created will in all probability mean a decided firmness in the market for existing stocks of black and galvanized sheets, and for those stocks which are to come forward on contracts previously made. If the situation continues for any length of time, higher prices would not be an improbability. Prices during the past week have held steady.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$	$10 00 $12 00
12 gauge	7 55	10 10 11 60

14		8 35 9 35

Corrugated Sheet Prices Maintained

Toronto.

CORRUGATED SHEETS.—The situation as outlined above with respect to black and galvanized sheets will have a bearing on the market for corrugated sheets. With a restriction in the amount of galvanized sheets available there is pretty sure to be a firm situation in the manufactured article. Demand is somewhat light at this season of the year.

TORONTO—	Galvanized Per 100 Sq.	Painted Feet
No. 28 gauge	$ 8 25-$ 8 75	$6 75-$7 25
No. 26 gauge	9 00- 9 50	7 75- 8 25

No. 18 gauge	23 00-	20 00

Discount 7½%.

No Improvement In Tube Situation

Toronto.

BOILER TUBES.—Strict regulation of the sale of boiler tubes for domestic use still continues. Permits must first be secured to export from the United States, and when stocks arrive in this country permits must then be obtained from the Dominion Government to sell them in Canada. A tight rein is being kept on this commodity by the Governments of the two countries.

Prices of Lead and Zinc Products Hold Steady

Toronto.

LEAD AND ZINC PRODUCTS.—Prices were unchanged in lead and zinc products during the week. Demand is somewhat light, which is characteristic of this season of the year. In the primary market pig lead was in slightly firmer underton during the week although sales were sale ¼c down.

Heavy Lead Pipe And Scrap Zinc Higher

Toronto.

OLD MATERIALS.—There was a firmer tendency with the higher prices in heavy lead pipe and heavy zinc during the week. Former is quoted ½c higher in prices being paid by wholesalers while heavy zinc is quoted firm at 6c. Heavy copper showed a firmer tendency at 21c to 21½c per pound. Country mixed scrap is quoted at $16 per ton. Movement of old materials is being hampered at present owing to snow. There has been a fair demand from consumers. All lines of old materials held steady in price.

Tin Continues Most Active Of Metals

Toronto.

INGOT METALS.—Tin continued to be the most active of the ingot metals during the week. There is a better demand for spelter in local market. Trade in copper has settled into routin business.

COPPER.—There was a steadiness to the market for copper in view of the established price which is to rule until June 1. There is a heavy consumption of copper on this continent and for the export business but there is every indication that production will keep pace. In the local market business was not heavy and prices held unchanged at 30c to 32c for casting copper.

TIN.—The market for tin locally continues in a strong position. There is a good demand and prices were firmly maintained at 78c to 80c per pound. In the United States market further commandeering of supplies has been going on, stocks on two steamers having been taken in charge before they had a chance to reach warehouses.

SPELTER.—There was more interest in buying of spelter in the local market during the week, and prices were held steady at 9¾c to 10½c per pound.

LEAD.—The firm undertone to lead continued to be manifest in the primary market and the condition was reflected in the local market by an advance of ¼c per pound with some of the large dealers. Quotations are now made on the basis of 9¼c to 9½c per pound. Demand is light.

ANTIMONY.—The market is quiet with quotations unchanged at 16c to 18c per pound. Primary situation is one of steady firmness. Demand in the local market is not heavy.

ALUMINUM.—Quotations for aluminum were unchanged at 60c per pound. The demand is steady with little keenness manifest.

PIG IRON.—Transportation problems continue to be the big factor with the producers of pig iron. There is a fair demand but deliveries are greatly hampered through inability of railways to cope with storm and severe weather conditions. Quotations were unchanged at $49.50 per ton for foundry iron.

LONDON MARKETS

LONDON, Feb. 7.—Advances in hardware commodities have again been numerous and reflect the firm condition in the market. Included in the number are the new prices on Paris green, snow shovels, cant hooks, plaster of Paris, churns, carpenters' clamps, saw sets, grass catchers, expansive bits, alarm clocks, lamp chimneys, stovepipe dampers, stovepipes, wood handles, paint brushes, bucksaws, cobbler sets, solder. Business in this district is keeping up fine in spite of the very cold weather. Wood cutting and heating supplies are still in big demand. Collections continue to be good, indicating that money is plentiful.

New Prices On Paris Green Show 7c Advance

London.

PARIS GREEN.—Prices on Paris green for spring booking have been announced, which show an advance of 7c per pound over the opening prices of last spring. Following are the prices on Canada Paint Company line:—Half-pound packages, 66½c lb.; 1-lb. packages, 64½c lb.; 25-lb. drums, 62½c lb.; 50-lb. drums, 61½c lb.; 100-lb. drums, 61½c lb.; 250-lb. kegs, 61c lb.; 600-lb. barrels, 60½c lb.

Snow Shovels And Cant Hooks Go Up

London.

SNOW SHOVELS, CANT HOOKS.—Higher prices have been made effective on snow shovels and cant hooks. New list prices have been issued on snow shovels, to which a discount of 12½ per cent. applies. Following are list prices: D-handled socket, $15 dozen; King D-handled socket, $12; Queen, long-handled socket, $10; Prince, long-handled socket, $9; furnace scoops, D-handled and long-handled, $10 dozen. Figured on above basis the net prices are as follows: D-handled, $13.13 dozen; King, $10.50; Queen, $8.75; Prince, $7.88; furnace scoops, $8.75. Higher prices have been announced on cant hooks as follows: 3½-foot, $19.25 dozen; 4-foot, $20 dozen; 4½-foot, $20.50 dozen.

Plaster Of Paris, Churns And Clamps Go Higher

London.

CHURNS, PLASTER OF PARIS, CLAMPS.—An advance has been made effective in price of Lightning Sanitary churns, new prices for No. 1 being $13.50 dozen and $19 for No. 2. Higher prices have been made effective in plaster of Paris following advances recorded in other sections of the province, quotations now being made on basis of $2.70 per barrel. Star carpenters' clamps show an upward tendency in new prices made effective: 3-inch, $6.25 dozen; 4-inch, $8.25 dozen; 5-inch, $10; 6-inch, $12.50; 8-inch, $20; 10-inch, $27.

Saw Sets And Grass Catchers Advance

London.

SAW SETS, GRASS CATCHERS, BITS.—Taintor hand saw sets have been advanced $1 per dozen, which makes new price $13 per dozen. Galvanized bottom grass catchers show an upward tendency in price, due to higher labor costs and advancing costs of raw materials. No. 16 is quoted at $15.50 dozen and No. 10 at $20 dozen. Expansive bits have also recorded an advance, and new prices for small size are now $12 dozen, with large size at $16 dozen.

Alarm Clocks And Lamp Chimneys Up

London.

CLOCKS, LAMP CHIMNEYS.—An advance has been made effective in price of Big Ben and Baby Ben alarm clocks, which makes price to retail trade $2.92 each. New retail price in Canada has been set at $4 each. Rochester lamp chimneys are higher in price, due in large measure to the firm situation in the glass industry. No. 2 is quoted at

$1.50 dozen, with electric slim at the same price as No. 2.

Stovepipes And Pipe Dampers Higher

London.

STOVE PIPES, DAMPERS.—Cast stove pipe dampers show an advance in price during the week, which makes price for 6-inch $1.20 per dozen and 7-inch $1.30 per dozen. Easy-lock or patent stove pipes show an advance in price, with the following prices prevailing: 5-inch, $20.37 per 100 lengths; 6-inch, $20.37; 7-inch, $21.87 per 100 lengths. Stove pipes are packed 25 to crate.

Brushes Up 10%; Wood Handles Advance

London.

BRUSHES, HANDLES, BUCKSAWS.—By the changing of the discount on handles an advance has been made effective on all styles and qualities of handles. Quotations are now made on basis of 35 per cent. off list, the former discount being 40 per cent. off list. Paint brushes show a generally upward trend, with an advance of approximately 10 per cent. recorded. Good bucksaws have advanced 80c per dozen, which makes price on Prince Rupert lance tooth $12.50 per dozen and Disston lance tooth $12.50 dozen.

Crosscut Saws Firm; Cobbler Sets Higher

London.

SAWS, COBBLER SETS, SOLDER.—A very firm situation exists in the market for crosscut saws, which seems to indicate higher prices. There is a good sale of this line at present time owing to the demand for wood to take place of coal. Cobbler sets have registered an advance, Economy now being quoted at $9.75 per dozen, Home No. 1 at $1.75 each, and Home No. 2 at $1.25 each. Solder has been increased in price by 1c per pound; new price for half-and-half is 43c per pound.

Rope Continues Firm

The situation in rope continues to be one of firmness. No change in prices has been recorded as yet, as the manufacturers are evidently waiting to see what will come as a result of the proposed regulation of fibre by the United States Government. Pure Manila rope is quoted at 39c lb. base, British and New Zealand hemp rope at 33c lb., and sisal rope at 27½c lb. base.

Heavy Sale Of Oil Heaters Keeps Up

London.

HEATERS.—Severe weather conditions have resulted in a continued heavy demand for oil heaters. Manufacturers are behind with orders owing to the increased use to which these articles have been put. Perfection line is selling at list prices as follows: No. 520, $6.25 each; No. 525, $6 each; No. 530, $6.50 each; discount, 25 per cent.

Good Sale of Axes

Need for augmenting the coal supply by wood has resulted in good sale of axes. Hand-made are quoted at $15.50 dozen, Black Diamond at $16, Cherokee at $15, Keystone at $13.25. Handled axes are quoted: Boys, $12 dozen; Eagle, $15.75; Cherokee, $17.50.

Linseed Oil Firm; Turpentine Unchanged

London.

LINSEED OIL, TURPENTINE.—There is a firm market for linseed oil, due to difficulty of getting seed from the Canadian West. Quotations are unchanged at following prices: 1 to 2 barrels, raw $1.55 gallon, boiled $1.58; 3 to 5 barrels, raw $1.54, boiled $1.57; 6 to 9 barrels, raw $1.52, boiled $1.55. Turpentine holds unchanged at 73c per gallon in single barrel lots and 72c per gallon in 2 to 4-barrel lots. In five-gallon lots the price is 83c per gallon.

White Lead in Oil Steady

The market for white lead in oil held unchanged during the week at $15.70 per 100 lbs. in ton lots and $16.05 in less than ton lots. Elephant is quoted at $16.20 in ton lots and $16.55 in less than ton lots.

Nails Hold Unchanged

Market for nails holds unchanged at the decline recorded last week, new selling price being $5.20 per 100 lbs. base. Cut nails are quoted at $5.60 base per 100 lbs.

Glass Very Firm

A very firm situation prevails in the glass market, which points to higher prices in the near future. Single and double diamond are quoted at 40 per cent. off list, and cut lights at 25 per cent. off list.

WINNIPEG MARKETS

WINNIPEG, February 7.—Business for the past week has been fairly brisk as spring orders are beginning to move out. Advances for the week show a very heavy increase in axes and bamboo poles as well as advances in oil heaters, brush hooks, toilet clippers, steel squares and sad irons; while stove pipe shows a downward trend. With Winnipeg's annual Bonspiel opening on February 12, the hardware jobbers are looking forward to meeting many of the Western hardware dealers, some of whom owing to pressure of business are not able to visit the city at any other time.

Cordage Holds In Firm Market

Winnipeg.

CORDAGE.—Prices on all lines of cordage remain firm and reports indicate that no immediate change is anticipated; prices at present ruling are as follows: Sisal 27½c base; pure Manila, 38½c base; British Manila, 32½c base; African hemp, 32½c base; lath yarn, 27½c base; cotton rope ¼ in. and over, 55c lb.

Advances In Axes From $3.50 To $5.50 Dozen

Winnipeg.

AXES.—One of the most important changes for many months past has just gone into force on all lines of axes and represents an advance ranging from $3.50 to $5.50 per dozen. The heavy advance is accounted for by the fact that last June prices were advanced by the manufacturers but owing to fairly heavy stocks Winnipeg jobbers were able to maintain old prices; however, another advance by manufacturers last month and the necessity of replenishing stocks at to-day's prices makes the above advances necessary. The following prices now prevail, and for comparison old prices are also quoted:

	Old Price	To-day's Price
	Dozen	
Black Prince—		
Unhandled	$11 00	$14 50
Handled	14 00	17 50
Double bit, unhandled	14 00	19 50
"Diamond Edge," handled	12 50	16 50
Criterion—		
Unhandled	10 50	14 00
Handled	13 00	16 50
Hudson's Bay—		
Handled 3-4 lb.	14 50	18 00
Unhandled, 2	9 50	13 25
Do., 2½	10 50	14 00
Do., 3 to 4	11 50	15 00
Do., 4½	13 50	15 50

Revision Downward In Stove Pipe

Winnipeg.

STOVE PIPE.—Tinware houses have again revised their prices on stove pipe, etc., and although still higher than 1917 prices they show a reduction from the new prices issued in January of about 10 per cent., and the new prices now in effect are herewith quoted:

Riveted Pipe—6 in., $19.45 100 lengths; 7 in., $20.60 100 lengths.
Ready to Rivet Pipe—6 in., $18.50 100 lengths; 7 in., $19.75 100 lengths.
Patent Pipe—6 in., $20.25 100 lengths; 7 in., $21.40 100 lengths.
Taper Pipes—6 in., $2.85 doz.; 7 in., $2.85 doz.
Tee Pipes—6 in., $4.75 doz.; 7 in., $4.75 doz.
Elbows remain unchanged as formerly quoted.

Oil Heaters Show Slightly Higher Prices

Winnipeg.

OIL HEATERS.—Another small advance has just gone into effect on Perfection oil heaters. New numbers covering the different finishes are now being used as follows: Old number No. 125 Japanned finish will now be known as No. 525; No. 130 nickled is now No. 530 and No. 130 blue enamel is now No. 630. The following are to-day's marked prices: No. 525, $4.50; No. 530, $4.90; No. 630, $6.20 each.

Heavy Freight Rates Send Bamboo Poles Up

Winnipeg.

BAMBOO POLES.—Probably the heaviest advance recorded on any commodity handled by the hardware jobbers is shown in the new prices just issued on bamboo poles. This advance is due solely to the exorbitant freight rates between here and Japan, and with the present shortage of boats no reductions

are expected. The following are to-day's market prices and show from 150 to 200 per cent. of an increase over former prices both of which are quoted:

	Old price	New price
12 ft.	$ 4.00	$ 9.00 per 100
14 ft.	5.00	12.00 per 100
16 ft.	6.25	17.50 per 100
18 ft.	8.00	22.00 per 100
20 ft.	10.00	31.00 per 100

Steel Squares Higher; Brush Hooks Up

Winnipeg.

SQUARES, BRUSH HOOKS.—Steel squares again move up in price 5 per cent. being now quoted at 5 per cent. advance on list. Net prices on a few of the more familiar lines are as follows: No. 14 plain, $15.50 doz.; No. 14 galvanized, $20.50 doz.; No. 22 $10.50 doz.; No. 24 $11.55 doz.

Following the advance in axes, new prices have been established on Western brush hooks which represents a strong advance and are quoted to-day at $15.75 doz.

Sad Irons Increase 20 To 40 Per Cent.

Winnipeg.

SAD IRONS.—Prices on common sad irons and tailor's irons have advanced considerably after remaining firm for many months, showing an increase of from 20 to 40 per cent. due to increases in raw material. Prices now ruling are quoted herewith.

Common sad irons, 3, 4 and 5 lbs. 14c lb.; 6 lbs. and over 11c lb.

Common tailors' irons, 12 lbs. 14c, 14 and 16 and 18 lbs. 13c lb.; 20 and over 12c lb.

Clippers Advance; Bolts Remain Unchanged

Winnipeg.

CLIPPERS, BOLTS.—Slight revisions have been found necessary on some lines of toilet and horse clippers and new prices are herewith given on a few of the regular lines; toilet clippers "Yankee" $1.35 each, Success No. 1, $1.75 each, Liberty, $2.90 each, fetlock clippers 71, $1.50 each, horse clippers, "Coates," $3.00 each.

Bolts of all kinds continue in fair demand with prices on all lines holding firm, while stocks in general are well assorted. To-day's ruling prices are herewith quoted: Carriage bolts ⅜ and smaller 5 per cent. off; 7/16 and larger, 5 per cent. on list; machine bolts ⅜ and smaller 5 per cent. off; 7/16 and larger 5 per cent. on list; plow bolts, 5 per cent. on list; stove bolts, 50 per cent.; shaft bolts, 5 per cent. on list; tire bolts, 25 per cent.; sleigh shoe bolts, ⅜ and smaller, 5 per cent. on list; 7/16 and larger, 5 per cent. on list.

Turpentine Firm; Linseed Oil Unchanged

Winnipeg.

TURPENTINE, LINSEED OIL.—The turpentine market still continues firm with no advances in sight. Prices ruling are as follows: Barrels 80c gal.; ½ barrels 83c gal.; 5 gal. lots, 85c gal.; 1 gal. lots, 85c gal.; plus the usual charge for containers.

The linseed oil market remains unchanged despite the fluctuation in flax seed. However, manufacturers contend that if seed remains at the present high prices an advance will be necessary. In the meantime prices ruling are as follows: Raw, $1.65 gal.; boiled, $1.68 gal. in barrel lots.

PITTSBURG MARKETS

PITTSBURG, Pa., Feb. 7.—New business in iron and steel, except for the placing of orders by the Government, remains practically at a standstill, as transportation conditions have not improved. In a nutshell the situation is that the iron and steel industry is held by an incubus which it can do nothing to throw off and it is simply waiting until warmer weather dispels the incubus.

Weather Conditions Hold Up Country

Throughout the winter, or since late in November, the weather has been uniformly bad. There has been no particular spell that has been distinctly worse than the worst of previous winters, but the rapid succession of spells of bad weather, now zero temperatures and lower, now heavy snowfalls, has been altogether unprecedented. Illustrating the situation, last Sunday night there were extremely heavy snowfalls in the east, causing the entire annulment of many passenger trains, while at the same time there was a sleet storm in the Connellsville coke region, causing deposits of sleet more than an inch thick, breaking down many telephone and telegraph wires and further curtailing the production and shipment of coke. Incidentally it may be mentioned that Pittsburgh has had its own troubles. Located in the heart of the greatest coal producing region of the world it has been short of coal, because the railroads could not increase the service and the river coal on which Pittsburgh normally depends to a large extent has been practically altogether shut off since Jan. 3 by the Monongahela river being frozen. The three lower pools of the river are now clear of ice and steamboats are breaking the ice in the fourth pool, with many fourth pool mines all ready to start the moment the pool is cleared. Above Dam No. 5, at Brownsville, there is an ice gorge six miles long and 30 feet high in places, which there is practically no hope of removing. When the ice breaks up and the snows melt in the upper reaches of the Monongahela and Allegheny rivers, which form the Ohio river at Pittsburgh, a record flood is a possibility if not indeed a probability.

Light Operations

Steel mills in the Pittsburgh, valley and lake front districts made shipments during January equal to between 50 and 60 per cent. of their capacity. In the past week shipments have been somewhat lighter still. The greatest restriction has been due to the inability of the railroads to move the finished product. Almost the entire territory is plastered with embargoes, and permits to ship commercial steel through the embargoes are now rarely granted, and even when they are secured the time limit sometimes runs out before the necessary cars are secured. If the shipper makes sure of cars before seeking a permit demurrage usually results. Even war steel is not exempt from the embargoes in all cases. The shipments made in January were almost wholly war steel, the commercial steel shipments in the districts referred to probably representing no more than say 10 per cent. of productive capacity.

Production is no longer materially in excess of shipments as the storage capacity of mill warehouses and yards is already taxed. The difficulty in shipping commercial steel is illustrated by the situation in tin plate. This is essentially a war necessity, as it is important to have the greatest amount possible for taking care of the perishable food crops this summer and under direction of the Food Administration the tin plate mills have been striving to operate fully, the steel mills in turn endeavoring to supply them fully with steel. From the railroad viewpoint, however, tin plate is not a war material, hence it has received no preference and the tin plate mills have accumulated very large stocks, some having already been forced to shut down from their warehouse being full. The average storage capacity equals about six weeks of production. In the past week complete data have been assembled showing the destination of tin plate on order for use of the Food Administration which seeks relief from the railroad administration and an order is expected that will enable the tin plate mills to operate in full.

No Market Demand

There is practically no demand in the open market for pig iron or steel products for commercial purposes. There is practically no enquiry, buyers show no anxiety as to the shipment of material already ordered, and their specifications against current contracts are very light. They are in the grip of the transportation situation the same as are the producers. It is simply a case of everyone waiting until the passage of the weeks brings better weather and, with the aid of the various efforts made to improve railroad conditions, a freer movement of freight.

What will then occur with the makers is anyone's guess. Production of steel will, of course, greatly increase. The consumptive requirements may increase by the same amount, by more, or by less.

WEEKLY PAINT DEPARTMENT

Carrying a Full Line of Paint

Will be Easier When Range of Colors is Reduced—Getting in on Thrift Campaign—Use of Paint an Economy

THE merchant who carries a full range of colors and takes steps to see that stock is on hand to meet his customers' demands stands by far the best chance of securing the paint business in his territory. This applies to all lines in the hardware store, but is so essentially in the paint department.

The selection of paint very often is only completed after great thought on the part of your customers—they take color cards home with them and visualize the colors as they will appear when applied. It is easy, then, to imagine their disappointment if the merchant's stock is "just out," or he doesn't carry the shade selected. The substitution of another color is sometimes possible, but it is doubtful if it is desirable, and the customer usually tries another store.

Greater Concentration Possible

The action taken by Canadian manufacturers, outlined in full in last week's issue of HARDWARE AND METAL, in eliminating pint and half-gallon containers and the reduction in the number of shades that will be manufactured should result in the retailer being able to concentrate on his paint business with splendid results.

Will Benefit Retailer

The effect upon the dealers' stocks will be evident. It will materially reduce the investment required, inasmuch as the smaller the number of shades carried the less the number of dollars required to stock an assortment.

Likewise the elimination of some sizes of containers will reduce the amount of shelf and stock room space required, and will have its natural effect upon investment.

It costs no more to sell a gallon can than it does to sell a pint can of paint. The amount of the sale is materially increased. Hence the percentage of the total sale required to cover operating expenses of the store will be lowered.

Thrift and Paint Hand-in-Hand

The thrift campaigns now being conducted by Dominion, Provincial and Municipal Governments is one which can be utilized successfully by the hardwareman in selling paints. There is no question as to the economy of painting, and the public is to-day wide-awake to the desirability of conservation.

Those who would not heretofore listen to such a thing as paint being building insurance will be inclined to listen now. The Government is actively carrying to the people the message of the need of thrift and of the necessity of preventing waste and decay. Connecting up with this propaganda will not only be a patriotic privilege of the retailer of paints, but it will also be a source of increased business and profits.

PAINT POINTERS

In telling a customer that you are "just out" of the particular color she wants, you shake that customer's confidence in your store—keep the stock intact.

Concentration on the smaller range of paints should lead to greatly increased sales.

The thrift campaign concerns the paint salesmen. Paint insurance is real thrift—it is a subject which calls for the best efforts of the paint solicitor.

Economy is conservation — conservation is the essential function of paint.

Conservation Essential Function of Paint

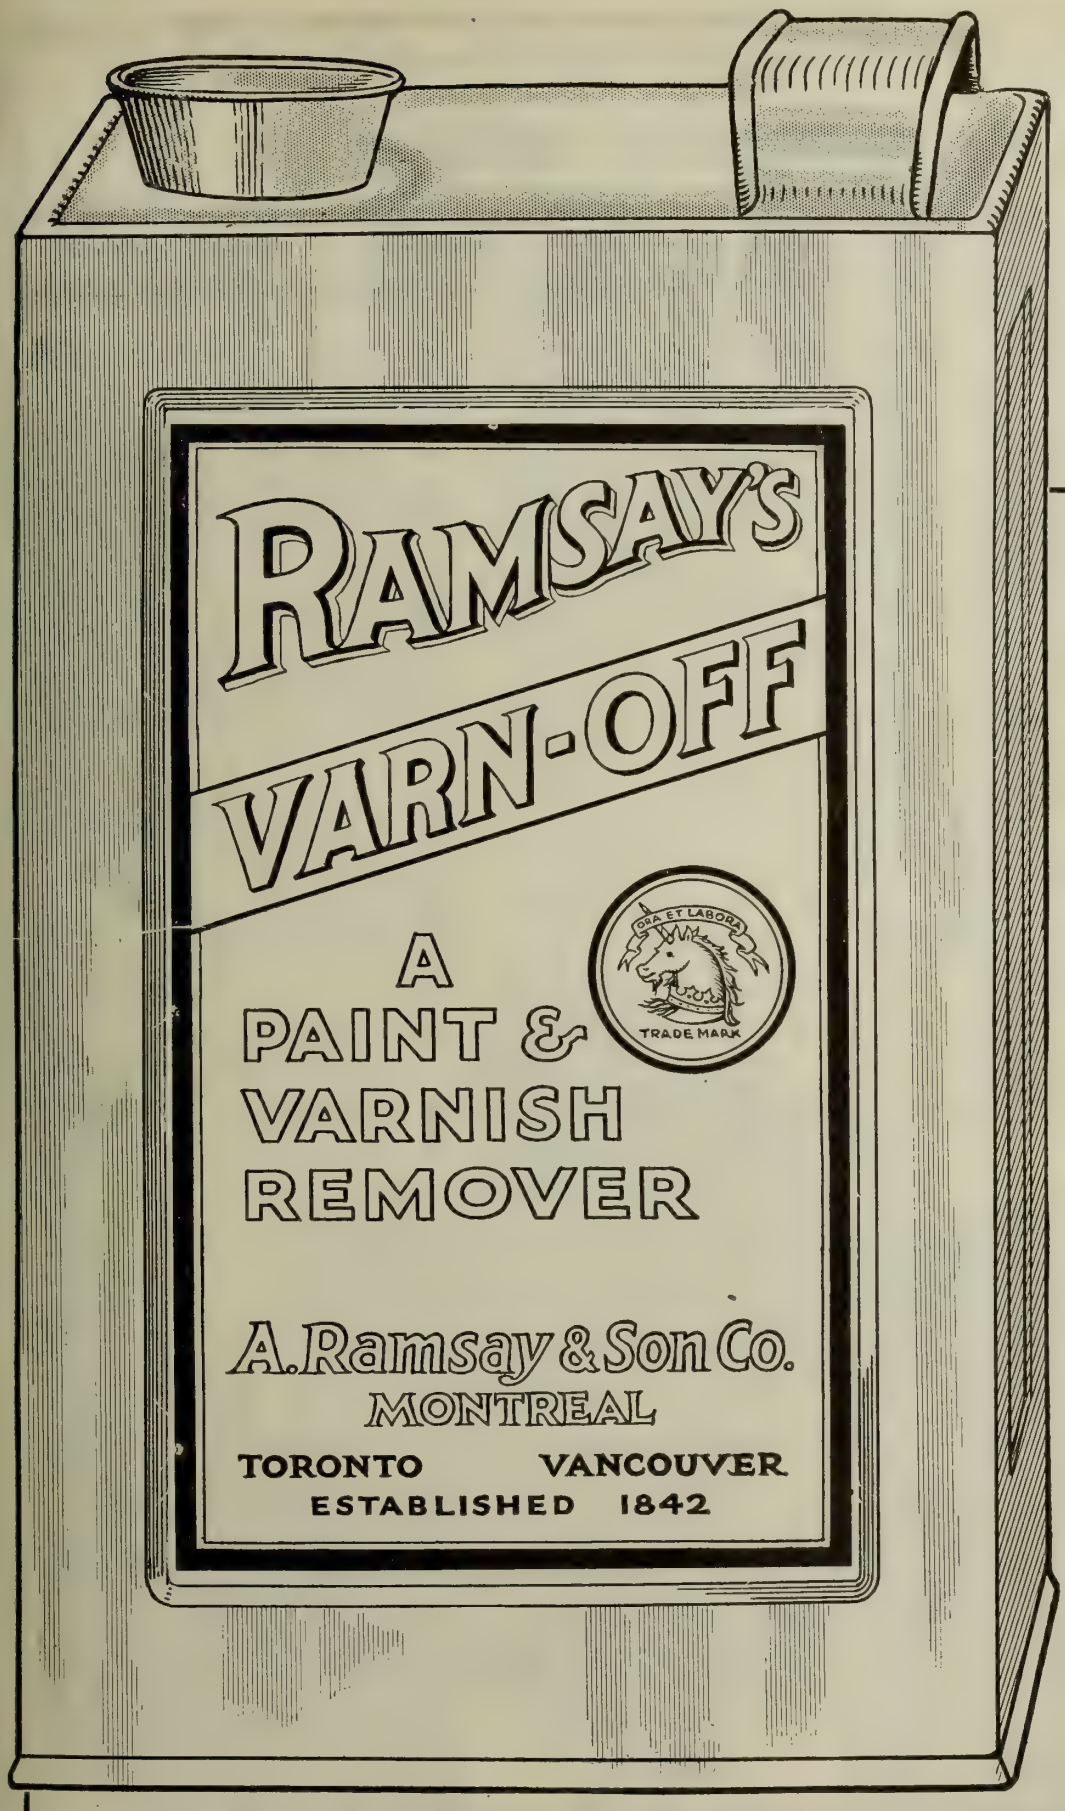
The average property owner has been too apt to regard painting as a "movable feast," forgetting that this thin film of oil and pigment, the thickness of which is expressed in thousandths of an inch, is the only efficient shield for his structure against the ravages of the elements. Unprotected wood will rot, unprotected steel will rust; paint will safeguard both indefinitely. Thus a few dollars' worth of paint applied at proper intervals will preserve the most costly structures indefinitely.

This is realized by those responsible for the upkeep of the great Forth Bridge in Scotland, which from the time of its erection has been maintained in the same way. It requires three years for complete painting, consequently when the painters finish at one end they immediately go to the other end and start again. It is being exemplified in any number of instances, and the campaign of education on paint insurance is slowly but surely securing the ears of a hitherto incredulous public.

It is an easy practice to defer improvements or expenses of upkeep, but this is by no means a measure of economy. The time to maintain the highest standard of upkeep is when capital is hardest to get at and replacement costs are almost prohibitive. Properties to-day should be maintained in perfect condition, and this can only be accomplished by systematic repainting at regular intervals.

Paint, 25 Per Cent.; Labor, 75 Per Cent.

When it is considered that the cost of materials for any one job is about 25 per cent. of the total cost, the rest being labor, the relative price of the paint at any one time is negligible, and the property owner who delays painting because of fluctuations in the cost of materials, lays stress on an immaterial factor. This is a point which should be borne in mind by the retail merchant in view of the advance which has gone into effect in the prices of practically all lines. When it can be shown that the actual cost of paint is a negligible factor sales should be that much easier. The time to paint is when paint is needed, and there is no economy in delaying necessary repainting because of present conditions. Economy is conservation and conservation is the essential function of paint.



LONDON STORES DAMAGED BY WATER

City Water Main Bursts and Floods Hardware Stores

Owing to the bursting of one of the city water mains considerable damage was done to the stores of J. A. Brownlee and O'Dell & Mitchell, hardware merchants, London, Ont.

The cellar in the store of J. A. Brownlee was flooded and about $1,000 worth of Canada plate, besides coal oil, linseed oil, turpentine, etc., will represent a complete loss. Other items which suffered were building papers and nails. It is stated that the rope was so saturated with water and escaped oils that it could be squeezed like a sponge.

In O'Dell & Mitchell's store the most serious damage was to dry colors, nails and rope. Everything which could float drifted to the front of the store, and when the water receded, it is said, the floor was covered with about two or three inches of muck.

If interested, tear out this page and keep with letters to be answered.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Feb. 7.—The paint makers are very busy for this season of the year, and all seem to be very much gratified with the outlook for spring. Orders are coming to hand well, and these indicate a general healthy condition in all sections of the country. The changes for the week are confined to a new schedule of prices, which have just been announced for Paris green and other insecticides. Linseed oil is very firm, and turpentine holds unchanged.

Flaxseed Rules Firm With Linseed Oil Up 2c

Montreal.

LINSEED OIL.—The market is very firm, and manufacturers are conserving supplies as much as possible for the needs of the usual winter activity in making up spring requirements. There is little disposition to seek any business. Seed is ruling strong in the local market, and is quoted around $3.30 per bushel. Of this little is moving at present owing to the serious conditions imposed by the weather. Quotations on oil are made for small lots only, and are 2c per gallon higher.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barre'ls	$1 52	$1 54½
5 to 9 barre'ls	1 51	1 53½
10 to 25 barrels	1 50	1 52½

Turpentine Steady Here With Decline In States

Montreal.

TURPENTINE.—The local market rules firmly, and, while prices are unchanged, there seems to be little likelihood of a downward revision in the immediate future, as supplies are not coming along freely. In the southern markets there has been a very steady market during the week. Little local business is passing, the requirements of the trade at the midwinter season being light.

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.69-$0.72
1 barrel lots	0.70- 0.73
Small quantities	- 0.83

Mixed Paint Orders Coming Along Well

Montreal.

MIXED PAINT.—The volume of business coming along from the dealers throughout the country is seasonably good, and in most quarters a satisfactory situation is reported. Retailers are buying with due care and sorting as the requirements of their particular case may justify. With the new schedules to work out, there is considerable additional labor involved, and all are busy this week making the changes decided upon.

In last week's report the new differentials on varnish tins were not as clearly defined as those on paint containers. These are as follows: Half-gallons, 15c advance over gallons; quarts, 30c advance over gallons; eighths, 60c advance over gallons; sixteenths, $1.20 advance over gallons.

The report also stated that barn and bridge and marine paints were advanced 15 per cent. This should have read "an advance of 15c per gallon." The situation was fully covered last week in a special article on the changes.

Plate Glass Very Firm; Putty Prices Held

Montreal.

GLASS AND PUTTY.—While discounts on plate glass as yet remain unchanged, the tone of the market is firm and would indicate that a change of the discount may be made, which will probably increase the price from 5 to 10 per cent. Box and pane glass are still ruling in a firm market at unchanged prices. Futty is firm, and the prices are held as follows: Bulk, in casks, $4.10 per cwt. for less than ton lots; over tons, $3.90 per 100; 25 and 100-lb. drums, $4.95 per 100 lbs.; and 12½-lb. irons and bladder putty are both quoted at $5.20 per 100 lbs.

White Lead In Oil Holds Unchanged

Montreal.

WHITE LEAD IN OIL.—Little interest is manifested in the market locally, what orders there are being for shipment later in most cases. The tone continues firm, without change here. In the southern centres there is a somewhat easier market, but with a firm undertone for pig lead. Present business is very confined—that is, for immediate shipment. The quotations hold as follows: Five-ton lots, $15 per 100 lbs.; ton lots, $15.50, and less quantities, $15.85 per 100 lbs.

Prices Announced For Paris Green

Montreal.

PARIS GREEN, INSECTICIDES.—New prices have been issued for Paris green and other insecticides, and are as follows on C. P. line: Barrels, 60¼c per lb.; 200-lb. kegs, 60¾c; 50 and 100-lb. drums, 61¼c; 25-lb. drums, 62¼c; 1-lb. packages, 64¼c; ½-lb. packages, 66¼c; and 1-lb. tins, 66¼c. The terms are 1 per cent. 15 days or net thirty days, Montreal prices and for the Maritime Provinces; ¼c per lb. must be added for shipments to Toronto, Hamilton and London. There are also new schedules for other insecticides, which will be found hereunder. Several manufacturers have stated to HARDWARE AND METAL that there is a very limited supply of these products, and dealers will probably make provision for their needs early.

Following are prices of Berger's Paris green: Barrels, 600 lbs., 61c; arsenic kegs, 250 lbs., 61½c; 100 and 50-lb. drums, 62c; 25-lb. drums, 63c; 1 lb. packages, 65c; 1 lb. tins, 67c; ½ lb. papers, 67c; ½ lb. tins, 69c.

Arsenate of lime (calpoiso)—100 lb. kegs, 30c; 50 lb. kegs, 30½c; 25 lb. kegs, 31c; 10 lb. kegs, 31½c; 5 lb., 32½c; 1 lb., 34½c.

Dry lime sulphur—Barrels, 11¾c; kegs 50 lbs., 12¼c; 25 lbs., 14c; 10 lbs., 14¼c; 5 lbs., 14¾c.

Tuber tonic—Kegs 50 lbs., 51½c; kegs 25 lbs., 52½c; 10 lbs., 53½c; 5 lbs., 54½c; 1 lb., 55½c.

TORONTO

TORONTO, Feb. 7.—Interest in the paint trade during the week has centred around the way booking business has developed. Under the stimulus of recent advance with the provision that one spring booking order could be placed on old basis there has been a desire to cover for needs on part of dealers. Linseed oil is in very strong position due to the difficulties in transportation. Spring booking prices on Paris green have been announced which show an increase of approximately 7c per pound over opening prices of last year. Movements of travellers for paint manufacturers and wholesalers have been greatly handicapped during the week.

Linseed Oil Firm With Supplies Limited

Toronto.

LINSEED OIL.—A very firm situation has maintained throughout the week for linseed oil due in large measure to the lightness of seed arrivals from the Canadian West. Eastern crushers have been unable to get anything near like their requirements of seed. There has been a fairly good movement of seed in the Canadian West, as inspections showed in five days that 100 cars were moved. Presumably this seed is going South into the United States. Supplies of oil on

What is the Profitable Paint—from the Dealer's Standpoint?

Store Displays one of the 4 important factors in answering this question

IF you, as a hardware man, were about to stock a brand of paints, what factors would influence you most in favor of one Paint Manufacturer or another, all prices being about equal?

Would not the following four points form the basis for your final selection of the Paint you would feel most like placing on your shelves and pushing:

First—Is the paint pure, and certain to give satisfaction to all my customers?

Second—Is the line complete?

Third—Is it well known?

Fourth—What co-operation will its manufacturer give me when I have stocked it?

With these questions answered, you can make an accurate selection and go ahead strong.

How do we, the manufacturers of B-H Paints, "size" up?

As you possibly know, B-H Paints are Pure Paints, as well as being ideal for Canada's changing climatic conditions.

As no doubt can arise as to their quality the next point is this: "Is B-H a line complete in itself, so that when I have it, I will not also be forced to handle Smith's Varnish, and Jones' Enamel?"

The B-H line includes a Stain, a Varnish, Color or Outside Paint for every purpose. If you are the B-H Agent for your town, you are absolutely assured of being able to procure, by dealing with but one concern, an entire assortment of Paints, Varnishes, etc., at all times.

B-H Paints are the best-known, best-advertised brand in Canada. The B-H advertising propaganda includes huge painted signs in the large cities, billboards in the towns with the local agent's name thereon, and advertisements in "home-town" papers with the dealer's name inserted too. Also farm papers are carrying advertisements that are influencing the farmers in favor of B-H Paints. This advertising is only one of the methods we use to influence and create B-H users.

B-H Change and Improve Labels

Recently, we have created many new label designs for use on B-H cans. We consider them the most attractive labels on any line of paint in this country. They are new and attractive in appearance; attention-compelling, they possess true sales-developing power. These new designs are now a feature of the B-H line—they make the B-H cans show up right on the dealer's shelves.

To immediately familiarize B-H users with these new labels, we have prepared attractive window cut-outs, showing how the cans now actually appear.

Sales helps are available, not only for the Paints with new labels, but for every B-H Paint. In fact the Store Helps for Dealer's use are as complete as the B-H line itself. They include the following:

Paint Paddle Frames for each line.

Counter Cut-outs for each line.

Celluloid and Enameloid Display Signs for each line.

Enamel "flange" signs for outside of store, indicating that "This is the Agency for B-H Paints."

Color Cards for each line.

Special cut-out to help create sales for our new line—B-H Auto Enamel. A reproduction of the attractive sales helps for this product appears below.

Dealers should avail themselves of all this advertising material to "link up" with the big national advertising campaign, conducted by the company throughout the whole Dominion.

It will mean increased business, and increased business means more money in the bank.

Besides being business-bringers, these sales helps for the B-H lines will add "life" to the appearance of the store. They are the finest that money could buy—and they are offered to B-H agents without charge. BRANDRAM-HENDERSON LIMITED, Montreal, Halifax, St. John, Toronto, Winnipeg, Calgary, Edmonton and Vancouver.

spot are very light. One large dealer stated that he did not have any oil to offer in small lots but that on basis of present situation would ask $1.60 per gallon for raw oil in single barrel lots if he were in the market. There is a feeling among those interested in the oil trade that prices stand every chance of being much higher before spring. At the present time in the United States market linseed oil is quoted from $1.28 to $1.30 on carload basis. When the difference in size of gallon is considered this would bring price in that market to an equivalent of $1.54 to $1.56 per gallon for raw oil on carload basis. Flaxseed in the Winnipeg market showed a higher tendency during the week a net increase of 2c per bushel having been recorded over quotations for cash seed over Wednesday of last week. There are reported strikes in the Argentine which may interfere with shipment of seed later. There is still the possibility that the Argentine Government may commandeer supplies of flaxseed in that country. Demand for oil for future delivery has been active. Range of quotations held unchanged from those given last week.

	Raw, Imp. Gal.	Boiled, Imp. Gal.
1 to 2 bbls.	$1.50-$1.55	$1.52½-$1.58
3 to 5 bbls.	1.50- 1.54	1.52½- 1.57
6 to 9 bbls.	1.49- 1.52	1.51½- 1.55

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Steady; Shipments Held Up

Toronto.

TURPENTINE.—The market for turpentine held steady during the week, quotations being unchanged. Arrivals of turpentine have been very light. Shipments have been on the way for some time past but owing to railway situation remain undelivered. With any noticeable increase in demand a scarcity would in all probability result. The market at primary points held remarkably steady during the week. There is a feeling in the United States primary markets that a good domestic demand should develop during the coming spring as industrial conditions are good and people will no doubt be inclined to spend their money.

	Imp. gal.
1 barrel	$0.70-$0.73
2 to 4 barrels	0.69- 0.72
5 gallon lots	0.77- 0.83

Stimulus Given To Booking Of Paint

Toronto.

MIXED PAINTS.—Under the stimulus of the advance recently recorded in the price of paint there has been an increased desire to book on the part of dealers, who have been accorded the privilege of placing one single order on the old basis. Booking business has been very satisfactory under the conditions. There has been a general acceptance of the increased price as warranted by the conditions. Reduction of number of colors and certain sizes of cans has also been commended.

White Lead In Oil Prices Maintained

Toronto.

WHITE LEAD IN OIL.—The basic materials contained in white lead in oil give evidence of a firm undertone. Linseed oil is scarce at present owing to difficulty of getting flaxseed from Canadian West, and there is free prediction among those interested in the oil business that prices are likely to be considerably higher before spring-time. Pig lead in the primary market maintains a firm undertone although prices were fractionally lower during the week. Prices on white lead in oil in the local market were firmly maintained during the week at $15.70 per 100 lbs. on ton basis and $16.05 in less than ton lots.

Glass Market One Of Much Strength

Toronto.

GLASS.—A very strong situation prevails in the glass market, which seems to indicate higher prices in the not distant future. Stocks of glass are being rapidly depleted, and are now at a very low ebb in some sizes. Dealers will sell only on the basis of sizes they have in stock, as there is small chance of getting additional supplies from the manufacturers in the near future. Production has been greatly curtailed in the United States as a war measure.

Whiting Goes Higher; Putty Market Firm

Toronto.

WHITING, PUTTY.—There is a scarcity of whiting in the local market and prices have advanced 50c per 100 pounds, making the price of plain whiting $2.50 in barrels and $3 for gilders' bolted in barrels. Importation of this commodity from England has been practically shut off. Only supplies available are those from United States, where they are scarce. In view of the situation in whiting the market for putty is firm. Prices, however, were maintained on the basis of $4.30 per 100 lbs. for bulk in casks, and $5.05 to $5.15 for 100-lb. drums.

Paris Green Prices Show Advance 7c Pound

Toronto.

PARIS GREEN.—Prices have been announced to the trade for Paris green for spring booking and show an increase of 7c per pound over the opening prices of last season. Scarcity of raw materials and high prices are assigned as the reason for the increase in price. Following are the prices:

	C.P.	Berger's
Barrels, 600 lbs.	$0 60½	$0 61¼
Kegs, 250 lbs.	0 61	0 61¾
50 and 100-lb. drums	0 61½	0 62¼
25-lb. drums	0 62½	0 63¼
1-lb. papers	0 64½	0 65¼
½-lb. papers	0 66½	0 67¼
1-lb. tins	0 66½	0 67¼
½-lb. tins	....	0 69¼

Prices are f.o.b. Toronto, Hamilton and London. Terms one month net or 1 per cent. in 30 days.

RESULT OF FUEL CONTROLLER'S EDICT

(Continued from page 32.)

ent on the United States for our supplies of coal, and there is no reason why they should go out of their way to supply us unless we show ourselves willing to sacrifice in as great measure as they have done. For that reason I would think that we should close down for at least the same length of time as our neighbors to the south have done, that is, five days, in addition to "heatless" Mondays.

"To what extent the closing down order will relieve congestion on the railroads is problematical. It really depends on the weather. If mild weather prevails over the week-end, there should be considerable relief, but extreme cold or excessive snow will minimize the good effects hoped for."

Will Be Able to Overcome Handicap

"We are making arrangements, in fact, have made arrangements, to close our plant up during the three-day period," said another paint manufacturer when questioned in reference to the order-in-council. There will not be much effect as far as the output of our plant is concerned and there will be no difficulty in catching up with orders. We are engaged principally in making shipments of spring orders, and there will be no appreciable holdup in getting these away sufficiently early for our customers' requirements. We will save some coal."

Shipments Seriously Delayed

Asked as to whether they were experiencing difficulty in securing their shipments, he stated that transportation was decidedly bad, and they could not figure at all on when their goods might arrive. "However, we must say that we have been fortunate in that our supplies have been anticipated sufficiently in advance to overcome any delays in operation of our plant which would result from a shortage of raw material."

The attitude generally is hopeful as to the best results being secured, and the weather will be an important factor in the railroads being able to clear their lines. The change to milder weather which is predicted will, if it materializes, be welcomed by all transportation companies.

LICENSES REQUIRED FOR ALL SHIPMENTS OF WIRE ROPE

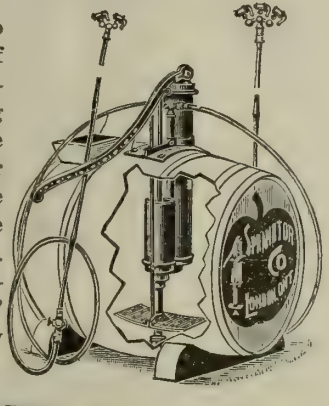
In the United States export licenses are required for all shipments of iron and steel wire rope, cable, and strands consisting of six or more wires, whether or not the wires are painted, galvanized, or coated in any way, and it is necessary to obtain an export license for every shipment of this material. It should also be noted that the act of improperly classifying material in order that it may be exported without a license subjects the exporter to a penalty of the law.

CARTER'S

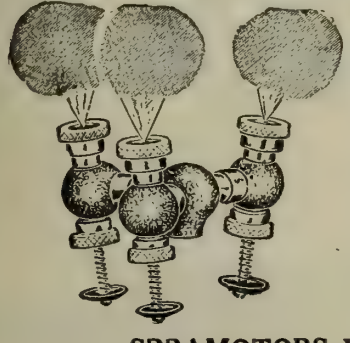
QUALITY THE BEST

Your customers will need Red Lead to protect the iron work around their homes. The Painters want a Genuine Red Lead for their work. Are you prepared for this demand? If not, put in a good stock of

Carter's Genuine Dry Red Lead
and
Carter's Genuine Powdered Litharge



They are the best quality you can buy. Made in Canada from the best grade of Canadian Pig Lead.



Do you know the quality of these goods? Your customers know it and will insist on using Carter's Brands. Look over your requirements and order now.

BERRY BROTHERS' CELEBRATED MADE IN CANADA VARNISHES

BRILLIANT DURABLE UNEXCELLED

WALKERVILLE, ONT.

THE great demand for Berry Brothers' Varnishes, Enamels and Stains grows greater as consumers realize their economy. They not only produce the most beautiful interiors, but their lasting quality offsets the high cost of labor, and as everyone knows labor is the chief item in finishing operations. It costs no more to apply Berry Finishes that last for many years and the kind that wears out the first year, and the difference in the price per gallon is nominal.

Liquid Granite Floor Varnish, Luxeberry Enamels (white, ivory and three shades of gray), Luxeberry Wood Finish, Luxeberry Wall Finishes Berrycraft Stain Finishes and Luxeberry Spar Varnish are a few among the many "Berry" products it pays to push because they make permanent customers.

MOORE'S

House Colors

3 Good Reasons for making Moore's House Colors the Leader in your Paint Department

Salability-Quality-Profit

PROFIT

3 In pricing Moore's House Colors your big reason for being in business was not overlooked. There is a goodly margin for you—a profit which you can take without qualms of conscience for you know it's well earned in supplying the very highest quality of paints.
—And Moore profits are cumulative—they keep on growing—each sale paving the way to another, and each showing a good profit. 3

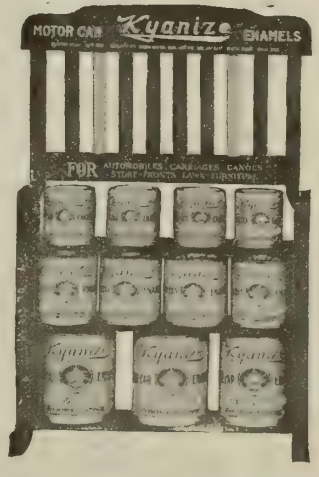
Kyanize KY-AN-IZE Products

Make Your Store The Motorist's Store

The automobile owner is a most desirable patron—he purchases often and abundantly. Assured of highest quality, he is eager to become a permanent customer and a booster pre-eminent for your store.



Many motor car owners have tried Kyanize Varnishes and Enamels in their homes with the usual perfect results—those that have not tried them have heard of the wonderfully satisfying results to be obtained with these products. All would welcome a Kyanize Product to use on their car,—and here it is.

Kyanize KY-AN-IZE

Motor Car Enamels

A trial of these fine products will make the "tryer" a permanent user. We have the plan to induce the motorist to try Kyanize Motor Car Enamels—a typical Kyanize business-producing plan—an original plan, the very novelty of which is irresistible and will capture the business.

The Free Glove Offer

If there is now no Kyanize Exclusive Agency in your locality and you want to grasp the livest, snappiest, highest grade proposition in the varnish and enamel business, get this plan at once—to-day—tell us you want particulars on the Kyanize "Free Glove" offer.

Boston Varnish Company

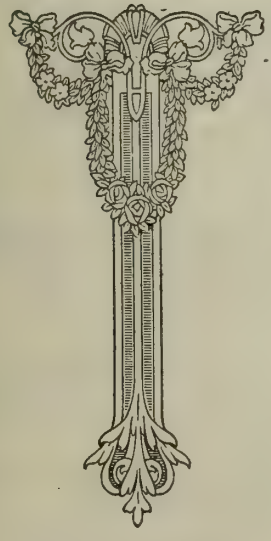
A237 — "Kitchener" packless, quick-opening Bibb, swan neck, China handle.

When you see "Empire" you're sure of Quality.



Good Money in "Kitchener" Bibbs

The "Kitchener" Quick-opening, Packless Bibb for kitchen, slop sink and laundry tray has proven a good seller wherever shown. Its ease of operation and quick action, together with the big, smooth, splashless stream it delivers have made it a general favorite with householders.

The "Kitchener" is made of full Empire Quality red metal. It is standardized, which means big business for the dealer who lays in a stock of parts.

EMPIRE MANUFACTURING COMPANY, Limited

LONDON TORONTO

Every order is a RUSH order with us

When you send your order for Electrical Supplies and Auto Accessories to us you have this assurance that it will be filled promptly and shipped immediately.

We work on the assumption that what you want you want quickly—that you're always in a hurry to get goods—that you have a customer waiting.

And so we give you speed. Not speed that disregards everything else, but a highly developed efficiency that gives you exactly what you want in the shortest possible time.

We don't want you to believe this. We want you to know it. Send an order that will test our service.

Stephens'
REGISTERED TRADE MARK

Every can of Stephens' Paint must satisfy

We realize that our business as well as the business of our dealer-agents is built on the good-will of the public. Therefore we back up our agents with paint that we can and do guarantee. This means that our agents, besides being fully protected against possible loss, have the use of a sales-argument that is usually irresistible. Competition of any kind has no fears for the dealer who can say to his customer, "This paint **will** do what the makers claim for it, **it's guaranteed.**"

And then we make Stephens' Paint so carefully and test it so frequently that we're sure that every can of it will back up all we say and make paint selling increasingly easy for our agents.

If we haven't an agent in your locality we would appreciate hearing from you.

Manitoba Bridge & Iron Works, LIMITED

WINNIPEG MANITOBA

It Pays to buy Westwo REG'D Wagon Sets in Crates

The Dealer who orders Westwo Wagon Sets in crates secures to himself the extra advantage of having sets perfect in every detail— no bruised woods—no marred finish—just as good-looking as when they left the factory. It costs very little to be assured of this perfection, and having it to add weight to the Westwo absolute guarantee, makes selling easier and business more profitable. Get the Westwo folder which illustrates and describes Westwo Sets, Hitches and Eveners for Wagon, Implement and Plow.

D. Ackland & Son, Ltd.

Winnipeg—Calgary

GUARANTEE

All Westwo Sets are guaranteed, and any defective part will be replaced free.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

The Canada Paint Agency Proposition

The Biggest Business Getter ever offered to Merchants in Canada

It not only increases your trade in paints, varnishes, stains, enamels, etc., but also increases your business in other lines, such as Hardware, etc.

It is a well-known fact that the successful merchant in any district will be found to be C.P. Agents—The confidence which your customers have in C.P. products insures a ready trade for you.

Your customers have used at some time, one or more products manufactured by The Canada Paint Co. with satisfactory results. When they require another line for some other object, it requires very little energy on the part of your clerk to sell them a C.P. product, as they know what these goods will do. There is a line manufactured by The Canada Paint Co. to answer every requirement, and the extensive advertising done by this Company means that C.P. products are in the minds of your customers when they enter your store.

Be a full-line Agent and reap the benefit of the C.P. consumer advertising and dealers' helps. If you are not a C.P. Agent, write us regarding our proposition to-day, and if you have not a full line of C.P. products on your shelves, see that you have a supply to meet the demands of your customers.

The Canada Paint Co., Limited

Have this double check on all sales

For the protection of your customers as well as for yourself, there is nothing to equal a Cash Carrier. The system not only obviates running, but gives to salesmen more time for the selling of goods. It also insures a double check against errors from the fact that there are two persons in every transaction, each checking the other.

We have issued a four-page leaflet that tells crisply a good many facts about it. Will you write for one to-day?

Level, Grade and Perpendicular Wire Cash Carriers, Parcel Carriers, Cable Carriers and Pneumatic Tubes.

The men who use files every day

Do they buy from you?

They know files—those machinist boys—and they're almost as particular in buying them as you'd be in buying a car. They know what a file should do—what it can do if it's made right.

That's why they always buy "Delta" Files when they can get them. And they buy a lot of other articles you handle—their good-will is worth striving for.

A stock of "Deltas" will put you in a position to get this "professional" business as well as the business of the "amateur" who likes to feel that he's buying the same files that real mechanics use.

We'll help you sell "Delta" Files if you'll take the agency for your district. We use tried methods that bring the business. You think it over and in the meantime ask us for further particulars.

How Often Do Your Customers Come Back?

What makes Customers come back?"

Fair dealing, courtesy and selling an article with a steady demand.

Does selling wheelbarrows or lawnmowers bring customers back often?

No.

What line can the Hardware dealer handle that will keep him in constant touch with a larger number of customers?

Automobile Oils and Greases.

Why?

Because they are articles of steady consumption. Every year brings a bigger increase in the already large army of motorists who are buying automobile lubricants. By stocking Polarine Automobile Lubricants you can make the motorists in your town or vicinity patrons of your store. You can not only add profit to your business by selling them their motor oils, but it offers you an opportunity to increase your business in your regular Hardware lines.

Automobile Lubricants are a real business-builder with the best kind of patron—the motor car owner.

What is a good motor oil to handle?

POLARINE.

It is made in two grades, POLARINE and POLARINE Heavy, and is put up in barrels, half barrels, 1 and 4 gallon cans. There is also a special half gallon size for the Ford car, and a 12½ gallon steel keg equipped with a reversible faucet.

Polarine is already the best known motor lubricant made. It is consistently advertised each year in a large list of newspapers, farm journals and motoring magazines throughout Canada.

Our dealers' proposition offers you a profit of 33 1-3% or more, according to the quantity you sell.

Write to Imperial Oil, Limited, Room 704, Imperial Oil Building, Toronto, for full particulars.

MACLEAN'S MAGAZINE for FEBRUARY

John Bayne Maclean Robert W. Service
Agnes C. Laut George Bernard Shaw
Archie P. McKishnie Alan Sullivan, *et al.*

The Ending of the War—When? How?

JOHN BAYNE MACLEAN writes with amazing courage and information about the war situation, past and present, in the February issue of MACLEAN'S MAGAZINE. He tells of the bungling of politicians in Britain and elsewhere—men of Cabinet rank who baulked the military and naval leaders, and in his exposures he includes some military and naval men. What Colonel Maclean writes rubs some men the wrong way—those who have "ostrich minds." But the whole English-speaking world is Colonel Maclean's debtor for publicly stripping away the concealments of truth, and letting the world see things as they actually are. Colonel Maclean's contribution is entitled "Why We Are Losing The War."

The Eternal Irish Question

this time dealt with by that surprising, bold-thinking, unharnessed man, *George Bernard Shaw*. Mr. Shaw puts the Irish Question forward in a fresh way, and proposes a novel—yet not impracticable—solution. Writing in trenchant style, and always sensibly, Mr. Shaw is worth reading. MACLEAN'S MAGAZINE shares with a London (England) daily paper the right to publish this article by Mr. Shaw. In passing, we desire to suggest to you that the class and quality of articles and contributors which MACLEAN'S MAGAZINE is securing are matters for all Canada to have pride in.

It scarcely needs to be said that such a wealth of good reading matter, much of it of first-class current interest, makes MACLEAN'S MAGAZINE take its place fairly alongside the best magazines in the world.

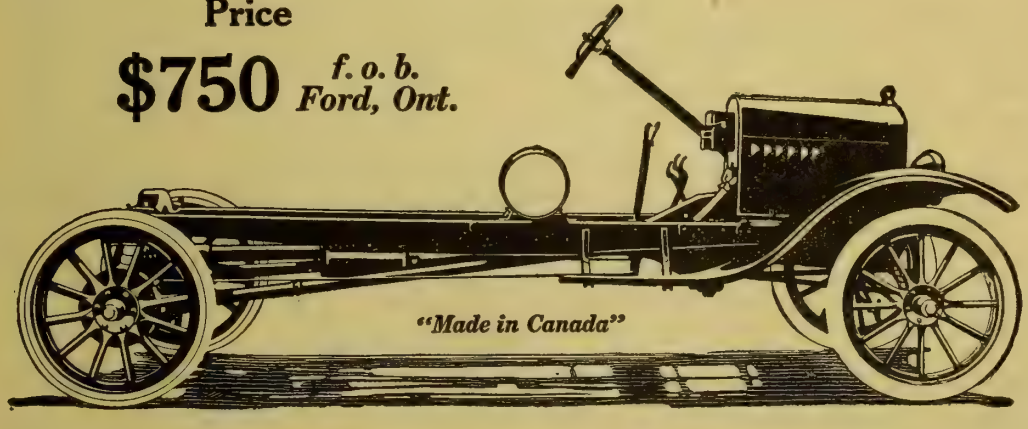
Ford ONE-TON TRUCK

COUNTRY-WIDE interest and comment have followed the recent appearance on the market of the new Ford One-Ton truck.

It is now possible to get a serviceable commercial car of one-ton carrying capacity that also embodies the desirable qualities of Ford sturdy construction and low up-keep expense.

The Ford passenger car has proved itself the most economical and serviceable automobile in the world. And this latest Ford model differs from the standard Ford chassis only in being constructed for heavy-duty service.

The frame is built of heavy steel, and the wheel base has been lengthened to 124 inches. A worm drive is used, and rear wheels are equipped with solid tires. Front tires are pneumatic. The standard Ford motor, transmission and ignition are embodied in the truck.



The Ford truck is supplied as a chassis only. This allows the purchaser to equip his car with any style of commercial body to suit the individual requirements of his business. It is an easy matter to get this equipment, for many of the leading body builders of Canada already have developed standard bodies of the various styles, made specially to fit the Ford truck.

Ford service has contributed in no small way to the reputation of the Ford car for day-in-and-day-out dependability. This same universally satisfactory service is available to owners of Ford trucks—an important thing to consider.

Realizing that a Ford model of the popular one-ton capacity would find immediate favor, this new truck is announced. Don't fail to see it on exhibit at the Ford service station in your town.

SHALER

5 Minute Vulcanizer

Mends Tubes in 5 Minutes

EASY TO USE---EASY TO SELL

Every buyer of a SHALER 5-Minute Vulcanizer becomes a booster! Every motorist who buys one shows it to his friends—gives them a demonstration—because it is such a wonderful thing.

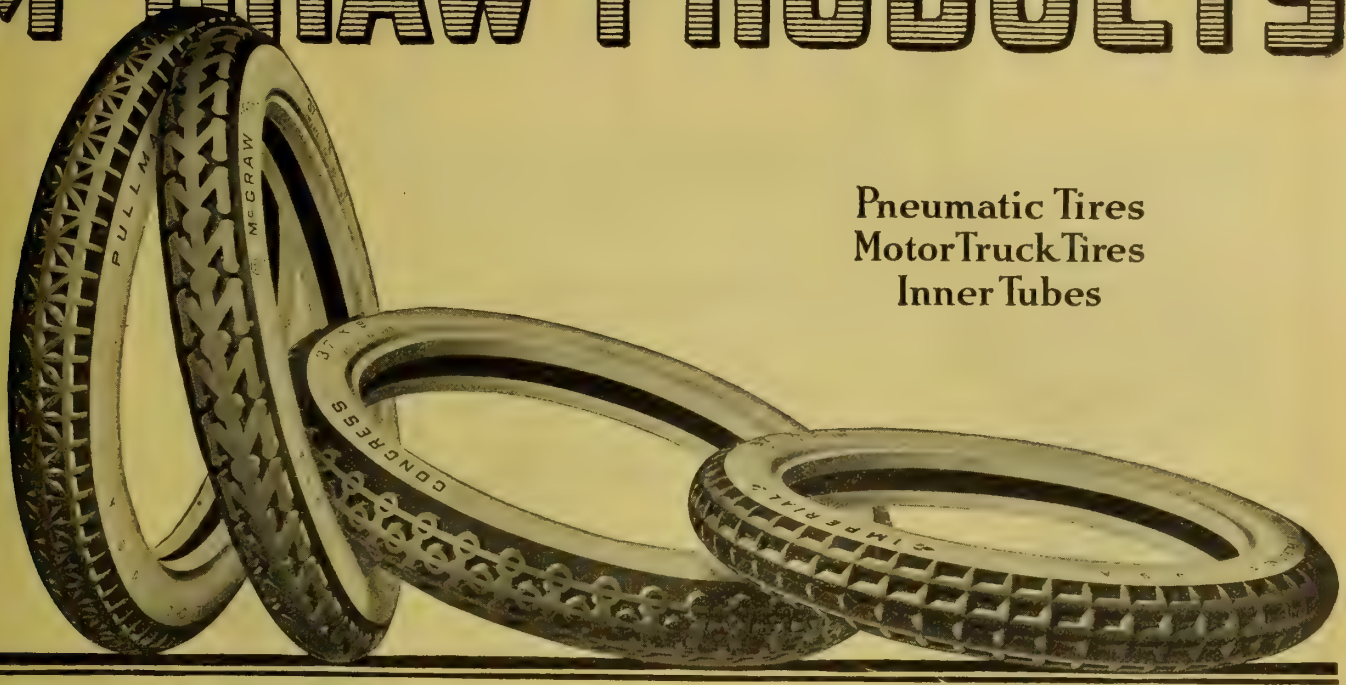
This means big sales for you. As soon as you start selling the SHALER 5-Minute Vulcanizer, your customers will spread the news. You will quickly notice new faces in your store—new customers passing their money across your counters.

Complete Outfit With 6 Round and 6 Oblong Patch Units $2.00 in Canada

The dozen patches and combustible discs that go with the vulcanizer are soon used up—and the motorist comes back to you for more. He pays you 75 cents for every dozen of these units. You make a good profit.

Can you realize what a big repeat business this means for you? Can't you see how it will bring car owners into your place for additional "ammunition"—who will also buy other goods? And that is what you need to build up your business.

Place Your Oraer With Your Jobber NOW!



Don't delay! The enormous demand for SHALER 5-Minute Vulcanizers has exceeded our factory capacity to make deliveries. We are building a large 3-story addition to our plant. But—to make sure of prompt shipments—place your order with your jobber now—specifying date of shipment desired.

Complete catalog of full line of SHALER Vulcanizers for Motorists, Garages and Repair Shops mailed on request

Coöperation

COÖPERATION with distributors has been a prime factor in the rapid and steady growth of the McGraw business.

In addition to an efficient field service, we maintain a merchandising department to assist dealers in making frequent turn-overs of their stocks and to enable them to develop a profitable, permanent tire business.

The McGraw system of district warehouses assures the dealer of quick delivery and efficient service from our jobbing distributors.

Let us tell you the details of our selling plan and methods of dealer coöperation and service.

Bedrock in Auto Tire Prices

¶ No other **standard** make of tires can be purchased at lower prices than Dunlop Tires sell at. (If so, they must be "seconds.")

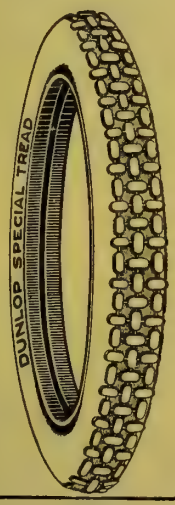
¶ No other **standard** make of tires can show reasons why they should be purchased at higher prices than Dunlop Tires sell at.

¶ Tires lower-priced than Dunlop mean a loss to you **in the end.**

¶ Tires higher-priced than Dunlop mean a loss to you **at the beginning** and **no gain to you in the end.**

¶ If anybody tells you they have lower-priced tires than Dunlop, tell them possibly so but more than likely their tires are Unknown and Untried.

¶ If anybody tries to sell you higher-priced tires than Dunlop, ask them to name a single virtue in their product not found in Dunlop Tires —"Traction Tread," "Special," or "Plain."



¶ Dunlop prices are standardized prices for standardized Quality. Dunlop Tires have been made in Canada since 1894. Therefore, Dunlop means "Dean of the Tire Industry."

ELASTICITY, QUALITY

Both are permanent with

Mr. Local Dealer,

Selling "North Star Multiples" will effect a splendid increase in your Battery business and pay you a good immediate profit.

Specially designed for:—
Automobile Ignition and Lighting
Motor Boat and Gas Engine Service.

Selected cells put up in an attractive blue moisture proof case. Every cell is insulated from the case and from the other cells. Heavy copper ribbon soldered to the terminals is used for connecting the cells, which are surrounded by a waterproof insulating compound. Just connect two wires to the binding posts and the battery is then ready to operate. A convenient handle is provided for carrying.

Made in several sizes to give various voltages and capacities.

Make sure your jobber understands it's "North Star" Multiples you want.

The Western Battery for the Western Need.

Johns-Manville Fire Extinguisher

Tell your customers to protect both car and cargo

Your customer's truck is probably insured—but how about his cargo? With the country at war a burned cargo is more than a commercial loss, it's an advantage to the enemy.

Not one cargo, but every load that the truck carries is adequately protected when there's a Johns-Manville Fire Extinguisher aboard.

It's the only one-quart extinguisher with a two-way method of operation—discharged either by pumping, or in tight corners by air pressure previously pumped up.

Entitles car owners to 15% reduction in automobile fire insurance premiums.

Trade details sent on request.

Service Life

The initial short circuit reading of a dry cell has no bearing on the amount of actual service obtained.

It is not difficult to produce a high amperage battery—say one reading 30-35 amperes—for all that has to be done is to decrease the internal resistance. For example, if you leave out a portion of the active material and replace with a low resistance inactive material, you reduce the internal resistance and raise the short circuit amperage, but this cuts down the service capacity—meaning short life.

Test after test of batteries in actual service has proven that for ignition or heavy current drain a battery around 26-28 amperes is most economical. For telephone or where current drain is light 22-24 amperes.

20% higher amperage does not mean 20% more service. Reverse this and you are nearer correct.

HOYT METALS

MEMO

February 9th

for your Babbitt Metal file

QUALITY

looms as large in alloys as in anything you buy or sell. That's why it means so much to you to sell those high quality Babbitt Metals — "Nickel Genuine," "Trojan" and "Frost King." Quality of raw materials and extreme care in the mixing have always been considered of paramount importance in the manufacture of Hoyt Metals. It is a point of pride that Hoyt Babbitts have in all cases stood up handsomely under all tests to which they have been subjected.

You will readily understand the importance of passing on to your customers metals which are so perfectly made and so uniformly effective under all conditions.

We would like you to look over our price list. Shall we send it?

FOR SALE—A NUMBER OF MACHINES for use in tinshop. These are second-hand but in good repair; will be sold cheap. T. I. Thomson, Limited, Owen Sound, Ont.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

FOR SALE

FOR SALE—BUILDING AND HARDWARE stock in good live Saskatchewan village. Stock on hand about $6,000. Living rooms above. Good opportunity and terms for right man. Box 726, Hardware and Metal.

HARDWARE BUSINESS FOR SALE—IN A Northern Ontario town of 8,000 population. Stock of shelf and heavy hardware, in excellent condition. Stock can be reduced to about $15,000.00. Will sell or lease premises. Owner has been in business over twenty-five years and wants to retire. Box 730, Hardware and Metal, Toronto, Ont.

MISCELLANEOUS

WANTED—TO REPRESENT A GOOD LIVE proposition in Manitoba or Western Canada. Headquarters now in Winnipeg, where a good connection is already established. Fifteen years' experience in general hardware, stoves and paints, and can furnish first-class business and bank references. Apply Box 731, Hardware and Metal.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

THE "MORRISON"

Automatic Cellar Drainer

For ease of operation and simplicity of construction, this cellar drainer has no equal. It can be installed easily and takes up very little space. No complicated cams or levers to get out of order, and all working parts are placed above water.

This is a very important feature in cellar drainers, because when such an appliance is submerged, it is liable to get dirt into the moving parts.

No such trouble for you if you instal a "Morrison."

No part of a sanitary system can cause so much damage as can a poorly constructed cellar drainer. The whole contents of a basement are liable to damage.

Building foundations are protected and all other assets below the ground floor when a Morrison cellar drainer is installed. We have been established over 50 years, and all our experience stands behind the "Morrison." Let us furnish you with full particulars and prices before you decide to buy your next lot of cellar drainers.

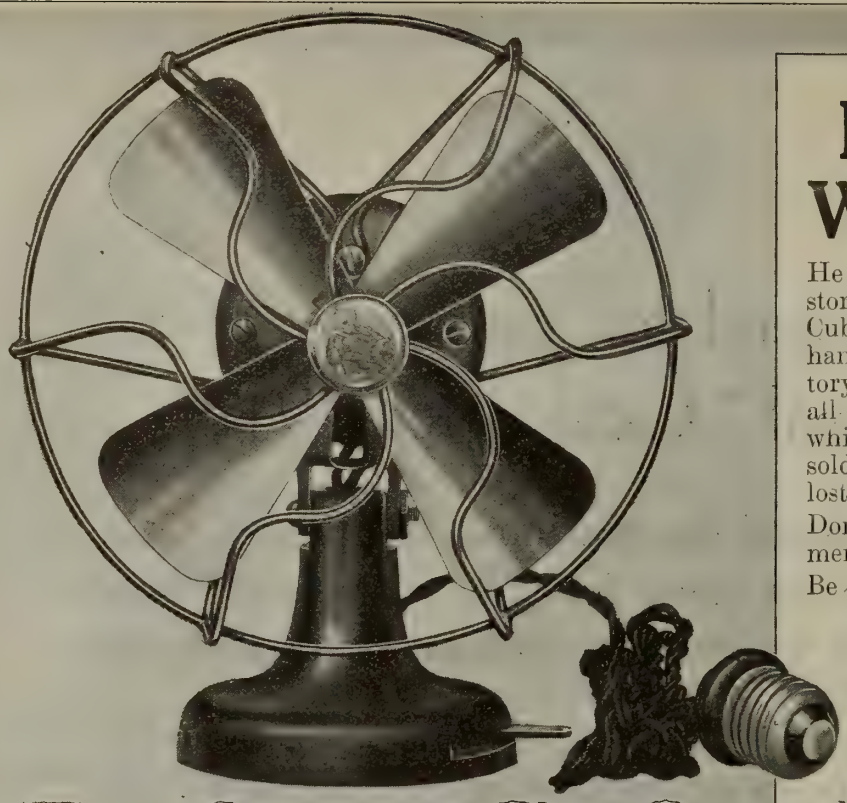
Will you send for your copy of the "National" Catalog for 1918?

There's a copy of the National Hardware Catalog for 1918 set aside for you. If you will send your address your copy will be mailed to you right away.



Whether or not you are handling National Hardware you will find the 1918 Catalog of decided interest. Besides the excellent illustrations of "National" goods and the complete descriptions there is valuable information on packings, finishing and distribution. The illustrations are all from photographs and the descriptions are ample and suggest good sales arguments that you can use every day.

Aside from its informative value the catalog is a handsome specimen of typographical art well worthy of a place in your business library.

Just send your address. A postal card will do.

Polar Cub Electric Fan

REG. U.S. PAT. OFF.

Polar Cub Warns You!

He remembers how, last summer, stores everywhere sold every Polar Cub Electric Fan they had on hand—and were wiring the factory for more. But they couldn't all get them—'twas too late. So while hundreds of thousands were sold, thousands of more sales were lost.

Don't lose those profits this summer.

Be prepared for the hot-weather demand. Be prepared to cash in on the big sales-making 1918 Polar Cub advertising campaign. Place your order early. Guard against last-minute delays.

1918 Features:

Motor—Beautifully nickel-plated.
Blades—Black Japan.
Mica filled Commutator.
Two speeds and stop.
Die-cast frame.
Bearings are integral part of die-casting.
Cannot get out of alignment.
Fan adjustable to any angle.
Equipped with 8-ft. cord and plug.
Many other refinements.

All exclusive features above for retail price of $8.50 on the 6" Fan.

Polar Cub Nine-inch Fan

with same exclusive features, only larger motor and stand, retail price $12.00.

Help to keep every horse working —That's real patriotism

Right now every working horse is an asset to the Empire.

Every horse that is "laid off" on account of gall sores is a distinct loss to us and our Allies.

TRADE-MARK Ventiplex PADS

Do your bit to keep every horse working by preaching the merits of "Ventiplex" Sweat Pads, Housings and Saddle Blankets.

"Ventiplex Pads" are effective, economical; never get hard or "bunchy," and can be washed and kept thoroughly clean.

"Ventiplex" protects the shoulders and backs of horses that are "doing their bit" for the Empire, keeps them "fit" and in good temper, and enables them to do more and heavier work.

You do horse-owners a real service when you introduce them to "Ventiplex" Pads.

Kills The Losses

Why should housewives take **all** the risk in regard to honest mistakes in weighing? It certainly is easy to convince her she shouldn't, and that a Renfrew scale will save not only risk but many actual losses. That builds up sales for **you.**

An ordinary, doubtful scale would only add useless disputes. The Renfrew is accurate for every weight from ½ oz. to 30 lbs., and its owner can prove her weights every time by means of the Government Inspector's Certificate which goes with every Renfrew.

The Renfrew is made in black finish, or in all-nickel finish suitable for candy stores or homes desiring something a little bit better. Write for literature and attractive selling proposition.

SPEED

in Hack-Sawing

It's not "How much did the hack saw cost?'

But "How fast will it cut?"

Only a fast-cutting saw saves a mechanic's time.

Some saws clog because they are not suited to the material or shape being cut.

Some dull quickly because the "quality" isn't there.

Some break without provocation because too brittle.

Save valuable time by using

Starrett Hack-Saws

CUT QUICKER—LAST LONGER

You know this if you have compared "Starrett" with other saws—if you haven't used them, try a few—you may feel safe in doing so for

Starrett Hack Saws are Unexcelled Just as Starrett Tools are Unexcelled.

Catalog No. 21MA shows what numbered saw will give real speed—save time.

This is a photograph of a Pyrex pie plate standing on ice and subjected to boiling water. Pyrex dishes stand this test without cracking. This proves how safe they are in the hottest oven heat

From freezing to boiling without breaking

PYREX transparent cooking dishes are made of a material that stands even such violent change of temperature as is pictured above. They are guaranteed not to break in the oven.

Why Pyrex sales are increasing so rapidly

Sixty per cent. more heat is transferred to food cooked in Pyrex than to food cooked in any kind of metal pan! This is proved by scientific tests. It means that Pyrex cooks food more thoroughly, more evenly, makes it noticeably more delicious. It means, too, a big saving in fuel!

Pyrex transfers the heat so evenly that food cooked in it burns far less readily than it does in any other utensil.

"No more black, greasy pans to scrub!" This is another reason women prefer Pyrex.

Pyrex never chips, rusts, discolors, crazes or absorbs odors. It always stays *like new.* Your customers, like thousands of other women, will find it in the end the most economical cooking utensil they could buy.

Most effective advertising campaign ever used on an oven ware

This year more than 5,974,593 people will see Pyrex advertising in their favorite magazines. In The Ladies' Home Journal, The Saturday Evening Post and Good Housekeeping, striking full-page announcements—sometimes in color—will bring the news of Pyrex in a big way to every city and town. McCall's Magazine, Christian Herald and forty-nine other religious magazines will make Pyrex a familiar word even in the remote country districts.

The women who read these magazines are the home-loving type who take pride in buying the best equipment for their homes—they are the people whom you consider your most satisfactory, most influential customers.

This is bound to create a demand which will bring your customers to you to order Pyrex. It will also bring into your store many new customers. Be prepared to meet this demand.

Write for the 1918 Dealer offer. It's unusually attractive.

Conservation of Food

Made in Canada

DOMESTIC ECONOMY is impossible without FRUIT JARS. This is fully recognized by all authorities interested in FOOD CONSERVATION, and their PUBLICITY CAMPAIGN will undoubtedly stimulate the use of JARS this year and create a demand far above normal.

RETAILERS should be ready to do their part by having JARS on hand when required. REQUIREMENTS should be carefully considered and orders placed with WHOLESALERS as early as possible.

LATE ORDERS may not ensure delivery in time to meet the requirements of the PUBLIC.

NO FRUIT or vegetables should be wasted this year for want of JARS.

Ask your wholesaler for JARS "MADE IN CANADA" and guaranteed by a reliable manufacturer.

NOW THAT LABOUR COSTS ARE HIGH

Shop Superintendents are seeing to it that their men don't waste time and labour with inefficient tools.

They find it much cheaper to give a mechanic a new file than to have him waste time working with a file that has passed its "efficient point."

They find it pays to buy Standard quality tools because they give the best results for the longest period of time.

And the dealer who sells standard quality tools gets their trade.

They recognize "Famous Five" as the standard quality files.

That's why you should specify them when ordering.

Dominion Rubber System Pension Fund

Details of Pension Plan adopted by Canadian Consolidated Rubber Co. Limited, for its employees.

1. NAME The name of the plan is Canadian Consolidated Rubber Co. Limited Pension Plan.

2. OBJECT After careful consideration of the subject and an examination of existing pension systems, the Company has adopted the following plan as the most liberal for employees who, by long and faithful service, have earned an honourable retirement.

3. DEFINITIONS a. In these regulations the word "Company" shall mean the Canadian Consolidated Rubber Co. Limited, or its successors.

b. "President" and "Board of Directors" shall mean the President and Board of Directors of the Company.

c. The word "Committee" shall mean the persons appointed by the Board of Directors to administer the Pension Plan in accordance with approved regulations.

d. The word "employees" shall mean those persons who receive a regular and stated compensation from the Company, other than a pension or a retainer.

e. The expression "term of employment" shall mean period of continuous employment in the service of the Company, or any company or companies subsidiary thereto, allied with, or predecessors of the Company, and shall include such employment whether commenced prior to the adoption of this plan or not.

f. The expression "continuous employment" shall mean service with the Company continuously without a break of any kind, except as due to leave of absence, sickness, injury, or necessary temporary lay-off on account of reduction of force or for any other reason, all such cases to be subject to the discretion of the Company; but when such absence exceeds six months in any twelve consecutive months it shall be deducted in computing the length of service. In any other case than such mentioned, if a person is re-employed after such a break in the continuity of this service, for the purposes of this pension plan he shall be considered as a new employee.

4. PENSION COMMITTEE a. There shall be a committee of not less than five nor more than seven, appointed by the Board of Directors to serve during its pleasure, whch shall be called the Pension Committee. This Committee shall be charged with the administration of this plan.

b. The Committee shall have the specific powers elsewhere herein granted to it, or that may be granted to it from time to time by the Board of Directors. Exceptions to or deviations from the regulations so laid down shall in all cases be subject to the approval of the Executive Committee of the Board of Directors of the Company.

c. It shall determine conclusively for all parties all questions arising in the administration of this plan.

d. It shall adopt such by-laws and rules of procedure as it may find necessary, subject to the approval of the Board of Directors.

e. It shall be empowered to employ a secretary and such other assistants as may be required in the administration of the plan.

5. PENSION FUND The Company shall appropriate such sums of money from time to time as may be necessary in administering this plan, and no contributions will be required, or received from any employees of the Company.

6. ELIGIBILITY a. All employees of the Company engaged in any capacity whatsoever, and wherever located, are eligible to a pension as hereinafter stated.

b. All male employees who have reached the age of sixty-five years and whose term of employment has been twenty years or more, and all female employees who have reached the age of sixty and whose term of employment has been twenty years or more, may with the approval of the Pension Committee retire from active service, if they so desire and become eligible for pensions.

c. All male employees who have reached the age of sixty years and whose term of employment has been twenty years or more, and all female employees who have reached the age of fifty-five and whose term of employment has been twenty years or more, may at the discretion of the Pension Committee be retired from active service, and become eligible for pensions.

7. DISABILITY PENSIONS At the discretion of the Committee and with the approval of the Board of Directors, any employee who has become totally disabled as a result of sickness or injury, compensation for which may not otherwise have been provided, and whose term of employment has been fifteen years or more, may be retired from active service and granted a pension. If a pension is granted it shall be for such period as the Committee may determine, and if at any time during such period the employee recovers sufficiently to resume active service, the pension may be discontinued by action of the Committee. If the employee re-enters the service of the Company at the time such pension is discontinued he shall be eligible to a pension under these regulations, and the period of absence on disability pension shall be considered as a leave of absence and not a break in the continuity of the employee's service.

8. AMOUNT OF PENSIONS a. The annual amount of such pensions shall equal one per cent. of the average yearly wage for the ten years prior to retirement, multiplied by the number of years employed, but such pensions shall not be more than $5,000.00 per year, nor less than $240.00 per year.

For example, if an employee's average annual wage for ten years is $1,000.00 and he has been in the service for thirty years, he would receive 1% of $1,000.00 or $10.00 multiplied by thirty, or $300.00 per year or $25.00 per month.

b. In case of special difficulty in determining with practical accuracy the average yearly wage for the ten years prior to retirement, the Committee may at its discretion take some smaller consecutive number of years for the purpose of determining a fair average yearly wage.

9. PAYMENT Pensions shall be paid to the pensioner personally on the first of each month from the date of retirement until the death of the employee, unless suspended for such reasons as are described in this plan, and in case a male pensioned employee at the time of death is survived by a widow, or if either male or female pensioned employee is survived by minor children, the pensions shall be continued for three months after death, payable to the widow in the first instance and to the administrator or other legal representative of the minor children in the second case, to be applied as in the case of other property of the deceased, in the interest of the minor children.

10. GENERAL PROVISIONS a. Neither the action of the Board of Directors in establishing this Pension Plan or any action hereafter taken by the Board of Directors or the Pension Committee shall be construed as giving any officer or employee or agent of the Company the right of service, or any right to a pension; and the Company expressly reserves its right and privilege to discharge at any time any officer, employee or agent when the interests of the Company, in its judgment, may so require, without liability for any claim for a pension or other allowance other than salary or wages due and unpaid.

b. The Board of Directors may annul, alter, add to or amend in any way any and all of the provisions contained in this plan, or hereafter adopted by the Board of Directors in respect of this plan, and may at any time set aside any action taken by the Pension Committee.

c. The Company guarantees that, once a pension has accrued to a particular employee, it will continue such pension for the life of the particular employee and as specified with reference to widows and minor children; subject, however, to the provisions and conditions of the regulations laid down by the Board of Directors or the Pension Committee. It is understood that Section 10b given above shall not affect such guaranty.

d. Assignment of pensions under this plan will not be permitted or recognized.

e. Pensions may be suspended or terminated in the discretion of the Committee in cases of gross misconduct or of any conduct prejudicial to the interests of the Company.

f. Any retired employee may, by first obtaining the approval of the Committee, engage in any occupation or work which is not prejudicial to the interests of the Company. If any retired employee shall engage in any thing which in the judgment of the Committee is prejudicial to the interests of the Company, the payment of a pension to such retired employee may be suspended or discontinued.

g. Regular employment with this Company shall suspend the right of a retired employee to pension payment during the period he continues in such employment.

h. In case any pension shall be payable under the laws now in force, or hereafter enacted, of the Dominion of Canada or any Province thereof or any State or Country, to any employee of the Company under such laws, the excess only, if any, of the amount prescribed in this plan above the amount of such pension prescribed by law, shall be the pension payable under this plan.

11. TIME TO TAKE EFFECT This plan shall take effect January 1st, 1918.

Stanley Garage Chain Bolt No. 1055

NO matter how hard the door is slammed, this sturdy drop-forged steel bolt can't break. The door, as it closes, forces the bolt down over the staple and when the door is shut the heavy sherardized piano-wire snaps it locked.

Applied at the top of the inactive leaf of a pair of garage doors, this bolt locks automatically. A pull on the chain releases it.

Other popular STANLEY equipment for the garage includes Butts, Hinges, Door Pulls, Latches and Stanley Garage Door Holders.

Stanley Garage Hardware is an essential part of the stock of every up-to-date hardware dealer, because STANLEY equipment is in demand. To-day write for booklet "Selling More Stanley Garage Hardware."

Co-operation New Key-note in Business

Room for the Little Concern as Well as the Greatest Corporation — Labor and Capital in Greater Harmony for the Common Good—Co-operative Instead of Cut-throat Competition—The War Brings About the Birth of the New Spirit

Address delivered before Toronto Ad Club at Toronto, on Tuesday of this week, by J. G. Jones, vice-president and director of sales, Alexander Hamilton Institute, New York, N.Y.

"AFTER the war the American Continent will be governed by working men, but I am not afraid of that kind of government" is what I hear Mr. Schwab said to a gathering of business men who had been his contemporaries at college.

Co-operative Basis of Government

"I don't agree with Mr. Schwab that the United States will be controlled entirely by working men after the war, but I do believe that after the war Canada, the United States, England, France, and the countries of the civilised world will be on a more co-operative basis of government. Working men, tradesmen, business men, manufacturers will all co-operate towards greater harmony. I am not saying that we won't have our troubles: I am not saying that we won't have to close down plants in certain parts of the country, but I will say that we are to have easier re-adjustment because of the new spirit of co-operation that is developing. If men like Mr. Schwab can stand up and say that they look on the future undismayed, then I say that this is because of the new spirit that is springing up for this country and the world as a result of the war."

Prussian Attack Awoke World

J. G. Jones, vice-president of the Alexander Hamilton Institute, New York, thus illustrated the force of the new spirit in business in which he believes, and which formed the subject of his address before the Toronto Ad. Club, on Tuesday, February 12. The key-note of his whole address was co-operation.

"Prior to the war" he said "there was a change coming over the sentiment of business, but it took that cruel war—the savage attack of Prussianism upon a defenceless nation—to startle the world awake to the necessity for the new spirit.

A World Asleep

"When we look back to 1914 we have got to realise that the entire world with the exception of the Central Powers seemed to be asleep. England was through with her colonisation. The British business man was making profits easily and sufficiently with so little ex-

Window dressed by John F. Bingham for May Brothers, West Toronto. Mr. Bingham was awarded second prize in HARDWARE AND METAL'S *annual Christmas window display contest for places over* 5,000.

ertion that he was asleep. A few far-sighted men such as Lord Roberts, Churchill were different. They were awake to the menace of Prussianism, and gave warnings.

"We in the United States were equally asleep. None of the big corporations were awake. As regards business conscience they were practically dormant. We passed the Sherman Anti-Trust Law to curb the operation of big interests on their old lines. That law to-day is virtually dead because we are coming to a period of co-operation, the new spirit in business which makes the Sherman law unnecessary.

Business Too Prussian

"Why did we need the Sherman law? Because there was too much Prussianism in business. It took the rude shock of the outbreak of war to make the big manufacturer and head of the big trust realise that he too was dealing in Prussian style. It took the war to waken us up to the fact that we were doing business in the German way without regard to the rights of small business.

A New Age of Business

"After this war Great Britain, and France and America will countenance small business as never before, in the co-operative spirit, the new spirit of business. We are approaching the age of co-operation. Why if you had suggested four years ago that the government should take control of the railways, what would have happened? You would have been utterly disregarded. If you had said four years ago that the factories and mills would be ordered to close down on Mondays? Don't you see that we are coming into a new age?

Awakening Conscience

"The awakening conscience of civilisation will make it a better world. Only through sacrifice could we come to realise it. Only the life of sacrifice leads to the life worth living."

That the whole scheme of the trade war Germany was carrying on throughout the world before 1914 was part of the preliminaries of the real war that broke out on August 4th of that year, Mr. Jones declared?

What Paternalism Did

Behind all this commercial preparation was what he sternly described as "damnable paternalism," the policy of the Prussian ruling caste with the Kaiser at their head. "Germany has done nothing since the war began more damnable than Germany was doing before the war in trade" declared Mr. Jones.

"If we had only had the foresight, we might have known that Prussia with her lying guise of peaceful intent was all the time preparing for the war of world conquest." he claimed.

"But none of the nations ever realised that Germany with her policy of paternalism was assiduously building up her power throughout the world. To such an extent was she doing this with her agents everywhere, that we in the United States for long after war started did not know whom we could well trust. That I believe had a great deal to do with our staying out of the war for so long.

Breaking the Prussian Spell

"The Kaiser thought he had finished his work in South America and the United States. Backed up by that damnable paternalism science had stepped forward a long way in Germany. Why, they were so damnably cunning they had got business people in Britain believing that no dyes could be made without German skill. They were making great headway towards their Prussian ideal of world domination with the Kaiser as the right hand man of God.

"But thank God for England that rushed to the aid of little Belgium: thank God for the English colonies that stood shoulder to shoulder with her, and gave every thing they had to end this accursed paternalism of Prussia. Thank God that my own country is side by side in the battle with these countries!"

End of All Autocracy

"The banner of freedom will be unfurled, and autocracy be a thing of the past not only in Governments but in business. The atmosphere of business is becoming clarified. The employee is coming closer to the business man, his employer. From the era of competition that was almost military we come to the age of co-operation, and of co-operative competition. I think that you in Canada have gone farther ahead in this than we have so far in the United States. You have faced your losses, and learned the value of your sacrifices. We in the States will learn our lesson also, and will never forget it.

The Returned Soldier

"Our problems after the war will be industrial problems. You have some of them already. You have your soldiers coming back wounded, and I am glad to see that your government is making plans to take care of the returned soldiers. Some of these boys will have to be made over. They come back almost as helpless as children after having been through the discipline under government orders and supervision, fed, clothed, told where to go and what to do for so long, and facing such nerve testing ordeals.

Dawn of Democracy

Troubles between capital and labor will be adjusted on a different basis from now on. The spirit of sacrifice that has awakened conscience will never brook again such conduct of business as it did before the war. I look forward to seeing a future of far more harmonious dealings between employers and employees. You in Canada have never been as money-mad as we have been in the States, but you will find that the new spirit of business will be the spirit of give and take, the spirit of co-operation, the spirit of democracy. That is what we of the United States in this war are fighting for, the spirit of co-operation and of democracy, and that we may help bring the whole world closer together in the kindly bonds of fellowship and humanity."

Future of Enamelware Uncertain

Manufacturer Advises Buying Now—War Needs Must be First — Adverse Working Conditions During Past Few Weeks Will be Reflected on Supply of Many Lines

"WE can only say that we believe those merchants who buy their merchandise early and take delivery as soon as possible are acting wisely. The situation in regard to the future of the tinware and enamelware business is such that we can make no promise with regard to fall business. In six months' time our business in these lines may be shut off entirely, though, of course, we hope not. But it is true that we must face the possible shortage squarely, and for that reason our advice to our customers is to buy while we have the stock on hand." In this manner did an official with one of the large manufacturers of this class of merchandise express himself to HARDWARE AND METAL.

Necessary to Say "Please" and Smile

For some time past it has been almost impossible to get delivery of tin plate, galvanized and black sheets and the latest embargoes and restrictions, which necessitate the issuing of many permits, result in decided delays, if the goods are allowed to come forward at all. As this official stated with reference to shipments of sheets and tin plates, and it applies to many other lines: "We have to say, please, Mr. Manufacturer, will you roll our sheets? Mr. Manufacturer, before replying, goes to the Government for permission to accept the order. If the order is granted, the manufacturer replies and states that he will fill your order in six or eight months' time. Finally the order is completed, and then we have to go to the Government and

apply for an export license; when this comes through we have to say, please Mr. Railwayman, accept our shipment. The railway man is most obliging, accepts the goods, and then the question of delivery is involved. The congested state of the railways is well known. Practically the only cars moving to-day are bearing coal and foodstuffs, so our shipment is left on the siding and we have no means of knowing when delivery may be expected.

War Needs Must be First

"Our neighbors to the South are now at war as one of our Allies, and the first call on all manufacturers and means of transportation is for war material and its delivery. This is a condition which we have to bear in conjunction with all others, and so offer no adverse comment. It is up to everyone to make the best of the situation.

"Undoubtedly when spring comes and the railways are able to handle freight expeditiously some relief may be afforded. However, it must be remembered that manufacturers' warehouses and railway sheds are loaded to capacity and it is going to require herculean efforts to clear away this accumulation of material."

All Energies Directed Towards Production of War Material

Already there is evidence that manufacturers who have not hitherto turned their plants to production of war materials will be asked, wherever possible, to work for the government. It is evident that many manufacturers who are now turning out goods which might be termed non-essential, will make necessary changes towards this end. Where the real distinction against non-essentials will be drawn is as yet not quite clear. The United States Government does not wish to take any man's business away from him but most certainly the needs of the fighting machine will be catered to first.

Hardwareman's Stock May Be Further Affected

It is really impossible to forecast how the hardwareman's stock will be affected as yet. Are those turning out steel goods such as butts, hinges, thumblatches, etc., going to be allowed to continue or not?

Are those manufacturers turning out electric irons, percolators, heaters, fans, etc., to be allowed to continue? Most certainly those using these items consider them essential but will a government whose main business is war look on it in this light?

Already the governments of practically every allied country have commandeered the aluminum available. This is used in aeroplane contruction and means that the manufacture of aluminum cooking utensils is being greatly curtailed.

Sell the Goods Available—Smile

It would be possible to go through the entire range of merchandise found in the hardware store and a question as to the future possibility of securing same would crop up. However, that isn't the attitude which merchants must assume. It is true that already shortages on some lines exist. As the war continues the list may grow but there are so many items on which stocks are available and on which the merchant can make a bid for sales that the outlook is not discouraging.

There is every reason to believe that the real needs of every community will be taken care of. The cry for production of food stuffs and grow your own vegetables is one which the hardware merchant can turn to his own good in the sales of many of his lines. It is true that forecasts on conditions six months hence is wrought with uncertainty but a spirit of optimism will be the dominating factor in the success of the retail hardware merchant.

THE NEW TRENCH ON THE WESTERN FRONT

Convention Program Now Complete

Good Attendance Urged—Letter From the President—Have You Business Problems?—The 1918 Outlook—Advertising and Salesmanship Addresses—Closed Meetings For Members Only

PROBABLY the best programme on record has been arranged for the fourteenth annual convention of the Ontario Retail Hardware and Stove Dealers' Association, which will be held in Hamilton on Tuesday, Wednesday, and Thursday, February 19, 20, 21.

All that is needed now to make the convention a huge success is a good attendance of retailers. Those who attend will derive immeasurable benefit.

Non-members of the association are asked to join and make their plans to attend. In this way they not only exercise the get-together spirit so necessary in an association of this kind, but will get a close insight into business conditions, and the many problems confronting the trade.

It should be the aim of hardware merchants of Ontario to have an association to which they can look for real good, live information. The officers have this year arranged for a splendid program, and it is up to the Ontario retail hardware trade to show their interest in the association and place it on a solid foundation, thus paving the way for even greater conventions in the future.

The convention programme is printed in the accompanying panel, and it contains many excellent features.

Have You Business Problems?

There are many problems confronting the hardware merchant in the conduct of his business, and a solution of these may be secured from the address which will be given by John C. Kirkwood, business counsel.

The address which Mr. Kirkwood will give will undoubtedly be a feature worth the cost of the trip itself. Mr. Kirkwood's experience covers years of actual merchandising, in addition to which he has made a careful study of the problems of the retail merchant. He is well qualified to discuss merchandising from all its angles, and the subjects which he will treat are listed in the order in which they will be discussed:

1. Ascertaining and recovering the cost of doing business.
2. Making a net profit of thousands per year.
3. A salary for the boss.
4. Selling more goods on the matter of turnover.
5. Making the man behind the counter a better salesman.

The wide range of subjects will be covered in Mr. Kirkwood's talk in a most thorough manner. In addition to hearing the talk, retailers will be given an opportunity to ask questions which may have been bothering them for some time past. The meeting is to be thrown open to a discussion of the various subjects, and this should prove one of the interesting features of the convention.

The 1918 Outlook

Prominent manufacturers and wholesalers will give a series of short addresses on the outlook for 1918 in their respective lines, and this should prove another most interesting feature. These speakers will undoubtedly give out information in regard to the future outlook which should prove of great value to retailers during the course of the next few months.

The subjects to be treated in these addresses are: "The Linseed Oil and White Lead Situation," by H. M. Ashby, managing director Sherwin-Williams Co. of Canada, Ltd., Montreal.

"A Forecast on Sheet Metals," by A. T. Enlow, president Dominion Sheet Metal Co., Hamilton.

"Saws and Tool Situation," by H. P. Hubbard, general manager E. C. Atkins & Co., Hamilton.

"Shovel Situation, Present, and Future, as we See it," by W. G. Skelton, Canadian Shovel and Tool Co., Hamilton.

"Hinges and Wrought Hardware," by A. F. Hatch, manager Canada Steel Goods Co., Hamilton.

"Ready Mixed Paint Outlook," by F. J. Penberthy, mnager Lowe Bros., Ltd., Toronto.

"The Metal Market," by W. G. Harris, senior, president Canada Metal Co., Toronto.

"The Outlook From a Wholesaler's Standpoint," by T. B. Williamson, H. S. Howland, Sons & Co., Toronto.

Following the addresses a discussion will take place and members' queries will be given consideration.

Advertising Problems

Inasmuch as advertising is considered part of the sales programme in the majority of retail stores, the address on this phase of the business, to be delivered by A. A. Briggs, advertising manager Dunlop Tire and Rubber Goods Co., Toronto, should also prove most interesting.

Undoubtedly many splendid ideas will be given out which the retailers can adopt in their own advertising. This address will be followed by a discussion on advertising problems.

Salesmanship Address

Mr. Geo. A. Simpson, sales manager Steel Company of Canada, Hamilton, will give an address on "Salesmanship." Mr. Simpson's experience has been gained in a wide field, and he is an authority on sales problems. At different times a number of Mr. Simpson's articles have appeared in HARDWARE AND METAL and other publications.

Mail order house, and department store methods of buying and selling goods will form the basis for an address to be given by Geo. D. Davis, manager HARDWARE AND METAL.

Letter From the President

To the Retail Hardware and Stove Dealers of Ontario:

After our annual convention in Hamilton last year, an article appeared in HARDWARE AND METAL strongly urging drastic changes in our convention methods, in order to get greater efficiency from such an association. This elicited a number of good, practical letters from retailers who had the best interests of the trade at heart.

The result is the executive have formulated a programme for the coming convention, which is well worth going miles to hear. Please give this programme (which appears elsewhere in this issue of HARDWARE AND METAL) your careful consideration, and I think you will conclude that it will be worth while to attend the convention.

The volume and class of trade which we represent is worthy of a strong, intelligent, enthusiastic and practical association. This can only be attained by concerted effort, and for this reason a large gathering of representative hardware men of Ontario is urged. This will enable us to discuss matters of mutual interest, and get down to such a substantial basis that it will stand us in good stead through the uncertainties in the business situation that prevail to-day. Respectfully yours,

James N. McGregor,

President Ontario Retail Hardware and Stove Dealers' Association.

Methods employed by mail order houses and department stores will be covered in this address.

A "question box" session is to follow the address and at this the retailers will have an opportunity for discussion. Two "question box" sessions are slated on the convention programme, and at these merchants will have every opportunity given them to bring up matters of importance.

Closed Meetings

Some of the meetings will be open to all who attend the convention. There are others which will be closed, and at which only members will be admitted. These meetings are confined to the retail merchant so that those present will feel free to discuss matters which would not be undertaken were outsiders in attendance. Distinctive badges will be provided for members, association members, and visitors.

The meetings are to be called on time and carried out according to schedule. No deviation from this rule is to be permitted.

Election of Officers

This year the election of officers will take place by ballot. The first two days nominations will be received, after which ballots will be printed, and the election take place Thursday morning. It is thought that men best fitted to carry on the work of the association will be elected, and members are expected to take more interest in the election of officers this year.

Entertainment Tuesday Evening

A luncheon is to be tendered convention delegates by Wood, Alexander & James on Tuesday, February 19, the opening day. This will take place from 5.30 to 8.00 p.m., after which a theatre party will be held, the delegates being the guests of Hamilton manufacturers.

A "Clearing House" Proposition

The secretary of the association, W. F. MacPherson, Prescott, Ont., has sent out a letter to all members of the association in connection with a proposition which has been adopted to help merchants move unsaleable goods they may have on hand. It is really a clearing house proposition, by which merchants may be able to move unsaleable overstocks. It is pointed out that slow or unsaleable goods in one district are good stock in another district.

It is said facilities will be provided during the convention for submitting lists of goods which each member would like to dispose of. Sellers and buyers will be put in touch with each other and all possible assistance given toward disposal of goods offered. It is stated the results of a similar appeal last spring were excellent, many entire lists being sold out. It is asked that where possible samples be brought and marked at lowest price which would be accepted.

Instructions to persons attending Ontario Retail Hardware and Stove Deal-

(Continued on page 50)

CONVENTION PROGRAMME

THE ONTARIO RETAIL HARDWARE AND STOVE DEALERS' ASSOCIATION

ROYAL CONNAUGHT HOTEL, HAMILTON
FEBRUARY 19-21, 1918

TUESDAY, FEBRUARY 19

10.30 a.m.—Meeting of Executive, appointment of Convention committees.
Reports of Officers for approval by Executive.

2.00 p.m.—Open Session.
Reception by Mayor and Trade Association representatives.

3.00 p.m.—Business Session for members.
President's Address.
Secretary's Report.
Treasurer's Report.
Reports of Executive and Advisory Committees.
New Business.

Evening—Luncheon and theatre party.

WEDNESDAY, FEBRUARY 20

9.30 a.m.—10-minute addresses on "Outlook for 1918," by following speakers:

"The Linseed Oil and White Lead Situation," by H. M. Ashby, Managing Director Sherwin, Williams Co., Montreal.
"A Forecast on Sheet Metals," by A. T. Enlow, President Dominion Sheet Metal Co., Hamilton.
"Saws and Tool Situation," by H. P. Hubbard, General Manager E. C. Atkins & Co., Hamilton.
"Shovel Situation, Present and Future, As We See It," by W. E. Skelton, Superintendent Canadian Shovel & Tool Co., Hamilton.
"Hinges and Wrought Hardware," by A. F. Hatch, Manager Canada Steel Goods Co., Hamilton.
"Ready Mixed Paint Outlook," by F. J. Penberthy, Manager Lowe Bros., Ltd., Toronto.
"The Metal Market," by W. G. Harris, Sr., President Canada Metal Co., Ltd., Toronto.
"Outlook From the Wholesaler's Standpoint," by T. B. Williamson, H. S. Howland Sons & Co., Toronto.
Queries from members and consideration of forecasts.

WEDNESDAY AFTERNOON

1.30 p.m.—Address by John C. Kirkwood, Business Counsel. Mr. Kirkwood's address will cover the following subjects: Ascertaining and Recovering the Costs of Doing Business; Making a Net Profit of Thousands Per Year; A Salary for the Boss; Selling Enough, or the Matter of Turnover; Making the Man Behind the Counter a Better Salesman.

3.30 p.m.—Address on "Advertising," by A. A. Briggs, Advertising Manager Dunlop Tire & Rubber Goods Co., Toronto.
Queries and discussion on above subjects by members.
Question box.

WEDNESDAY EVENING

Closed meeting for members.
"Department Store and Mail Order House Methods," by Geo. D. Davis, Manager HARDWARE AND METAL.
Question Box Session led by Messrs. Davis and Kirkwood.

THURSDAY MORNING

Closed Session.
9.30-10.30—Election of Officers and General Business.
10.30—Address on "Salesmanship," by Geo. A. Simpson, Sales Manager Steel Company of Canada, Hamilton.
"Mock Sales."
"Demonstration of Actual Salesmanship."

THURSDAY AFTERNOON

New Lines for the Hardware Store.

Labor Resources Pooled

Governments of Canada and U. S. Reach Agreement — More Trade Prohibitions—Executive Reorganization Due

WASHINGTON.—The labor agreement entered into between the United States and Canada is regarded here as one of the most effective measures taken since the beginning of the war to make the industries of both United States and Canada most effective. Under the plan worked out it is the opinion of officials of the Department of Labor that the labor resources of the United States and Canada will be virtually pooled and all labor competition will be wiped out.

Labor Agreement

Under the terms of agreement there can be no shifting of labor from the United States to Canada or vice versa, without the permission of the two governments interested. This measure will protect Canadian manufacturers from the inroads made on their labor supply by the higher wages offered by some manufacturers in the United States. On the other hand it is deemed a measure that will be equally favorable to the United States. For some time, according to officials of the Department of Labor here, there has been a general shifting of labor between the United States and Canada and this has resulted in disruption of the industries of both countries. Under the present agreement there must be mutual agreement by both governments before there can be any labor shifting so that there will be a virtual pooling of surplus labor. All fears expressed by industrial leaders that the plan might work to the disadvantage of the United States have been set at rest by the Department of Labor. Senator G. D. Robertson of Canada has been appointed as the representative of Canada to act as a member of the Federal Employment Board of the United States and protect the interests of Canadian labor and industry at all times.

More Trade Prohibitions

Strict prohibition on imports and exports of the United States will be the next drastic step taken by the United States Government. It is generally understood that within a few days President Wilson will issue a proclamation in which he will set forth drastic regulations of the imports and exports of the United States. The step is taken in order that every possible bit of shipping space may be reserved for the transportation of war supplies. It is understood that all non-essentials will be prohibited, both as imports and exports. Detailed instructions will be given as to what are considered essentials and what are non-essentials. It is generally believed here that some agreement will be made with the Canadian Government whereby the full terms of the proclamation will not be extended to trade between the United States and Canada. Inasmuch as much of the trade between these two countries does not involve the use of any shipping which might be used for trans-oceanic cargoes the effect of the prohibition would be to put a damper on trade which has no interference with the problem of shipping war supplies across the Atlantic.

The fuel situation in the United States has become somewhat relieved during the past week. It has reached a state where the order issued by Fuel Administrator Garfield, closing down factories on Mondays, has been revoked in as far as it applies to the Southern states. Railroad congestion is gradually clearing and there is a hope that the closing order may be gradually revoked until all the industries of the United States will be unrestricted before April 1, when the order finally ceases to operate.

The question of shipping space still remains the most important question confronting officials of the United States. An agreement reached with the Allies for the pooling of all shipping space and placing the control of all bottoms in the hands of a central committee is looked upon as one measure which can be counted upon to bring maximum efficiency to shipping.

Executive Reorganization Due

President Wilson has asked Congress for power to reorganize the executive departments of the government. This measure will probably fail to pass Congress, but it is generally taken in Washington as an indication that a general reorganization is about to come, which will place the industries of the nation more fully in the power of the government. President Wilson has steadfastly refused to countenance proposals for the establishment of a Director of Munitions, but it is generally conceded that steps will be taken shortly which will place the war industries of the nation under a more central head. It is regarded as a possibility that the present War Industries Board which has only the power of advice now may be given some real authority by legislation.

RESIGNS AFTER 63 YEARS' SERVICE

William H. Hart, who has held an executive position with the Stanley Works, New Britain, Conn., for 63 consecutive years, has resigned as chairman of the board of directors.

Mr. Hart entered the employ of the company in March, 1854, and in May he was elected secretary and treasurer. Within two years the general management of the business practically devolved upon Mr. Hart, and the story of his struggles during those early days, when he was working with insufficient capital and had to compete with old established concerns a great many times larger, is interesting.

A brief sketch of Mr. Hart's association with the Stanley Works since 1854 is given herewith:

He was its secretary from May 16, 1854, to 1872; its treasurer from 1854 to 1905; its president from 1884 to 1915; the chairman of its board of directors from 1915 to the present time; filling all of these successive positions of trust and responsibility, it is said, with marked devotion and ability, and in each case voluntarily retiring from the position.

Mr. Hart will continue to be a member of the board of directors.

New Steel Company Formed

Manitoba Steel and Iron Company, Limited, Organized at Winnipeg—Will Conduct Merchant Business

ORGANIZATION meeting of the Manitoba Steel and Iron Company, Ltd., was recently held in the city of Winnipeg, and the following board of directors was elected for the ensuing year, viz.: T. R. Deacon, H B. Lyall, Sir Augustus Nanton, Geo. F. Galt, G. W. Allan, K.C., M.P., Sir Douglas Cameron, Chas. Pope, Capt. Wm. Robinson, W. H. Cross.

At a subsequent meeting of the directors, the officers were elected as follows: T. R. Deacon, president, H. B. Lyall, vice-president, Walter Stuart, secretary.

The company has been incorporated with a Dominion charter with an authorized capital of five hundred thousand dollars ($500,000.00) to take over the merchant end of the business of the Manitoba Bridge and Iron Works, which has grown to considerable dimensions.

The new company is strongly financed, it is said, and will carry on a general merchant business in heavy steel goods such as structural steel, plates and sheets, bar iron and steel, boiler tubes, rivets, bolts, railway supplies, mining equipment, heavy forging billets and stock for shipbuilding. An entire block of land with suitable warehouse has been secured on Logan avenue with railway siding facilities, and business will be commenced on March 1st. The business it is said will be carried on along lines similar to the large steel and iron merchant businesses of the United States, contracts for large tonnages being made at one time with the rolling mills. Authority is also given under the charter to build and operate rolling mills and blast furnaces.

The Manitoba Bridge and Iron Works purpose confining their business more to the purely manufacturing side of the business, for which this change will afford them more needed room on their present site. The latter company is also applying for a Dominion charter with an authorized capital of one million ($1,000,000).

Interiors Time Savers and Sales Builders

As a Means of Good Service—Women a Factor in Buying — Displays Have Wrought Change—Five and Ten Cent Counter Important—Reaching All Classes of Buyers

GETTING the goods over the counter is greatly facilitated when the interior arrangement of the store is such that the merchandise is easily accessible.

Under present conditions, when merchants are experiencing considerable

The use of store signs is one which can be employed successfully. In this store electric signs are used to direct customers to the various departments.

difficulty in maintaining a sufficient supply of help, everything possible to save steps and assist in rendering an adequate service to the customer should be done.

As a Means of Good Service

The interior of the store should lend itself to the rendering of real service. Nothing impresses a buyer more than an arrangement of merchandise which is neat and attractive, and from which the clerks are able to take care of their requirements quickly.

The Woman a Factor in Buying

Shown on this page are two store interiors, which cannot fail to impress the customer. A great deal of the shopping to-day is done by women, and it is not so many years ago that the hardware store was looked upon as man's domain. This idea has become extinct now, however, and the aggressive hardware merchant has fitted up his store so that the woman need feel no uneasiness in doing the shopping there.

Displays Have Brought Change

One of the features which has gradually led up to this state of improvement is the importance placed on the display of the goods. It is not only the women who like to see and examine the goods —the man is equally interested in good displays of the lines which he is seeking, and the cases where goods well displayed have influenced sales are too numerous to enumerate here.

Signs to Direct the Buyer

Take the item of cutlery. In the one interior shown herewith, an electric sign is suspended from the ceiling directing the buyer to where these goods are stocked. Further down another sign draws attention to the paint department. Throughout this store these signs are used to guide the persons entering the store to the department which they wish. This is a feature which can be adopted easily and successfully by practically all hardwaremen.

Looking at the cutlery department, what is at once evident? Real show cases, cleaned, dusted, and holding a splendid assortment of merchandise which must appeal to even those who may not anticipate making purchases at the time. Goods displayed in this manner hold a fascination for the average individual, and when in the market these customers will remember the store which shows it has the goods.

The Counter Display

In the sectional view to the right, counter displays are used in addition to the show case. This is a method of getting the goods right in front of people which has proved successful. There are many who like to handle goods or have them so convenient that a careful investigation is possible.

Five and Ten Cent Counters Important

This is well exemplified in the case of counters or tables showing goods at five, ten, fifteen and twenty-five cents. Merchandise arranged in this manner with a price card stating in plain figures the price very largely sells itself. To the woman of the house particularly, little labor-saving articles in plain sight that she can go and pick out for herself, this method appeals. In mentioning this to a lady buyer recently, the question was asked: "Do you think counter displays of this nature are really advantageous to the store keeper?" Her own words fully answer the question: "When I went into —— store the clerks all happened to be busy, so I walked over to the tables showing these small wares. Do you know I picked up little things there which I felt I needed in my kitchen, and when I came to pay for them the bill was nearly two dollars. Had these goods not been in plain sight I would never have thought of them, and the clerk had to exercise no power of salesmanship to get me to take the goods away."

Household Lines Appeal Primarily to Women

Other lines of household goods which can be attractively displayed are enamelware, nickel-plated ware, electrical goods, carpet sweepers, vacuum sweepers. In the household goods' department the hardware merchant has a range of merchandise which appeals particularly to the women, and the average man will not refuse to spend the money for any labor-saving device which will relieve the work at home.

Reaching All Classes of Buyers

For the carpenter, good tools are always acceptable; for the painter, brushes and paints issue a call to his nature; for the small boy, pocket knives, skates, hockey sticks, baseball goods, in fact anything in the line of sports goes right to his heart.

But none of these items gets a chance unless they are brought out from the dark corners or under counters to where they can be seen

As a measure of economy, as a means of maintaining and even showing increased sales with less help, the matter of interior display and arrangement of stock is one which should engage the attention of every merchant.

Cutlery displays in this store have been made on special shelf stands. The arrangement is decidedly attractive and effective.

Accounting as Basis for Advertising

Necessity of Keeping Advertising Expenditure Closely Related to General Accounting—Thorough Analysis Enables Concentration on Successful Features

WM. ASHBY, managing director the Sherwin-Williams Co. of Canada, Ltd., was the guest of the Montreal Publicity Association at their weekly luncheon, held at the Windsor Hotel. After luncheon Mr. Ashby spoke on advertising cost accounting, the title for his subject being "Cost accounting as a basis for good advertising."

Mr. Ashby stated successful advertising is the steady application of pressure on the public mind to a realization of some truth which is to the advantage of the advertiser and the public, and also that it is absolutely the recognition of certain needs for the right product at the right price.

If the definition as stated above is recognized as being correct, a firm must confine their advertising to their statements and ideas being fundamentally true, and of mutual advantage to all concerned, and these truths must be firmly impressed upon the public mind with steady pressure.

Mr. Ashby stated that generally advertisers did not usually adopt the policy of steady pressure, and therefore lost a great deal of value in advertising. It is realized that in the first place one must start with the right product at the right price, but too often the question of the amount which should be apportioned in the advertising appropriation or budget and in the direction in which this appropriation is applied, is given very little consideration.

Our president, Mr. W. H. Cottingham, stated when leaving Canada to take up executive duties with the Sherwin-Williams Co. of America, that he took with him a profound belief in the value of good advertising and a very keen appreciation of accurate figures and accounting in executive control.

With these two thoughts dominating, an advertising policy was inaugurated, and has been carried on ever since. It has been the policy of this company for twenty years.

Mr. Ashby went into details regarding the proper way of keeping an accurate account of the cost of advertising, showing how in the large business which the company is doing, they are able at any time to determine the amount of any one line sold, as a total or by one salesman's division or district. This method of keeping accurate account of the sales enables the management at all times to ascertain the volume of business being done in any branch of the business. Keeping separate all the different sales of the different lines determines the value of the advertising policy adopted for increasing the volume of business in any one line, and enables the firm at any time to switch from this policy to that of another employed for pushing the sales of any line and which appears to be more successful.

Mr. Ashby pointed out the necessity of keeping the advertising expenditure closely related to the general accounting so that at any time an accurate figure can be obtained, showing what it costs for advertising in proportion to the sales.

Other methods of general accounting which the Sherwin-Williams Co. use permit the management at any time to know what the cost of selling their products amounts to. This is ascertained by the correct accounting of their expenses, such as travelling expense, general expense, expense incurred by salaries, etc., and includes cost of advertising. He explained the use of special forms and reports used for this purpose and showed how essential it is to watch advertising and see that it is kept in proper proportion to their sales. By this accurate method of accounting it is possible to keep up a steady pressure of advertising and to increase the advertising appropriation at any time during the year in keeping with the increased business being done, and eliminate any possibility of the management suffering surprises at the end of the year when their total expenses are made up.

The accurate records of sales which have been kept from year to year enables us to safely push our advertising expenditure, whereas if these records were not available one might be timid about spending too much money, which in reality should be spent, and on the other hand it might be found that more money was being spent than what really could be afforded, and in the latter case, in the midst of an advertising campaign, it would be necessary to retrench, which would mean probably the failure of the whole campaign.

By adopting and following out these plans the company has been able to keep up a steady maximum pressure for over twenty years. Also we are able to determine, on account of knowing the volume of business done in each of our products whether it would be advisable to keep on or increase the advertising on one line at the expense of some other, or whether one form of publicity is better for one section of the country than another.

By the thorough analysis of your advertising costs you are able to keep down the items of rather doubtful value, such as over-distribution of color cards, fence signs, and other matter which might possibly be sent to the waste paper basket, and to concentrate on those features that are driving home the truth.

Mr. Ashby explained the necessity in successful advertising of adopting a trade mark, referring to the Sherwin-Williams' "Cover the Earth" design, and how all advertising, stationery, etc. was centred around this trade-mark. Giving us an instance, during some of his early experiences as a traveller he found that in some cases consumers would not know the name of the company but recognized the trade-mark.

During his remarks he referred to Mr. Geo. Ford, the originator of the "Cover the Earth" design, and the strength of the "Cover the Earth" trade mark, pointing out how the spilling of a pot of paint over the world when appropriately advertised serves as a connecting link with the name of the Sherwin-Williams Co. that never can be forgotten. This symbol or sign is easily and always recognized.

During his remarks, Mr. Ashby referred to some companies who have not a trade mark which could be so generally or easily used, and pointed out the difficulty there existed when trying to link up an advertising policy with a trade mark which is not a symbol of the business, or has no connection whatever, literally, with the product being advertised.

He also mentioned the experiences through which this firm has passed in advertising a special product, and not adopting the present policy of pushing the whole line, and how it was found to be costly and not a good policy for a manufacturer of many different lines—the adoption of general publicity being preferable.

The topic chosen by Mr. Ashby is one that probably is a little different from what is generally discussed at such meetings, but it is a phase of the advertising policy which every large advertiser must consider if he is spending his money judiciously for the furtherance of his business.

PRICE FIXING IN BALANCE

"A new situation which may have an important bearing on the whole present system of Federal price determination has been precipitated by the free lance action of the Navy Department," says the *Iron Trade Review* of Cleveland, under date of February 7. Competitive bids have been taken on a number of steel products, and some quotations considerably under the maximum price recommended on these lines by the American Iron and Steel Institute have been developed. Such a course of procedure may serve to bring to a clean cut issue the future functions of the War Industries Board on matters of price and distribution.

EDITORIAL COMMENT

ATTEND THE CONVENTION

IT is hoped that the Ontario retail hardware trade will turn out in large numbers to attend the hardware convention to be held at Hamilton on Tuesday, Wednesday and Thursday, Feb. 19-20-21.

The officers of the Association have provided a program that should prove a splendid inducement for retailers to give up business cares for two or three days, and meet their fellow merchants in convention at Hamilton. This is a time for co-operative competition, a time when retail merchants should get together as much as possible. Every retailer and every salesman who attends the convention meetings, meets the manufacturers and their representatives, feels the thrill of the get-together spirit which will be bound to predominate, will go home a better merchant and feeling that the time and money spent in attending the convention is a good investment. The City of Hamilton is an ideal convention city, easily accessible from all parts of the province, and with good accommodations for visitors. All that is needed to make the convention a success is a good attendance of retailers. You can help the Association and yourself by making it a point to attend the convention.

THE ELECTION OF OFFICERS

ELECTION by ballot is one of the features of the coming hardware convention. This is a move in the right direction, and was strongly urged by HARDWARE AND METAL following last year's convention—not because it was felt that good officers had not been elected, but because it is the proper method and one that will undoubtedly stimulate interest in a feature of the convention that had been neglected to a great extent by the members. In this connection a few suggestions from the Minnesota Hardware Association are in order. Prior to the annual election of officers suggestions were offered as follows:

"You are already thinking about who will be elected as 1918 officers. Don't allow anything to influence you to put into office any but men whom you think will be for the best good of the Association."

"The Minnesota Retail Hardware Association is a very important organization. It is helping conditions for retail hardware men, and in order to be a success it needs the best men you have in the Association."

"Don't put in a man only because he is your friend."

"Don't urge his election for the reason only that he is in your part of the state."

"You have been having good men in office during the past or the Association would not be where it is to-day."

"I would, therefore, urge that you use your best judgment when selecting the men into whose hands you place the management of your Association."

"The selection of names in the nominating committee meetings should be by ballot so that each man would give an unbiased vote."

CREATING THE ATMOSPHERE

ADVERTISERS when attempting to place their finger on some definite results from an advertising campaign are often met with an apparent blank. Some in consequence become disheartened and will condemn advertising as a sales agent. These forget that it is the continual dropping of the water that wears away the stone, and also forget that the average individual for some unknown reason dislikes to admit that an advertisement has influenced him.

We had this brought home to us most vividly when talking to one of the executives of the Victory Loan Committee the other evening. He referred to the immense amount of advertising that had been done and the astounding results that had been achieved. "Nevertheless," he added, "I have yet to meet one man who will admit that the advertising influenced him to buy a bond."

The advertising, however, had created the atmosphere. Subconsciously it was being hammered into the mind of every man, woman and child from every billboard, from every show window, and from every newspaper page, that it was his or her duty to buy a bond. Just when the psychological moment was reached, when the individual in question said, "I will buy a bond," could not be directly traced to any particular advertisement, but the atmosphere was created. Little by little, day by day, that man became impressed with the urgency of the case, and the results we all know.

Retailers should take a lesson from this. Do not expect a flood of customers to your store carrying newspapers in their hands with your announcement in it the first time that an advertisement is used, but remember that, like the Victory Bonds, continual telling of your story will wear its way into the reason of the most obdurate.

Hold Sixth Annual Convention

Canada Metal Company Sales Staff Meets—Practical Subjects Taken Up

THE Canada Metal Co., Ltd., held the sixth annual convention of their sales staff at the head office in Toronto commencing the week of February 4. Representatives of the firm from all parts of the Dominion were present, trade conditions were discussed on all territories from the Atlantic to the Pacific coasts, and it is stated that a most interesting and successful convention was the result. One salesman stated, "I have been selling metals all my life and the first year that we met I thought there was nothing more for me to learn, yet when I hear the views and experience of our other salesmen, I decide that as long as I live it will be necessary to come to these conventions with an open mind ready to digest and benefit all that is possible by the knowledge of others.

W. G. HARRIS, Sr.
President, Canada Metal Co.

The exchange of ideas and experiences gives a wider viewpoint and educates one for all emergencies.

W. G. Harris, Sr., president of the company, gave an address of welcome and expressed his great pleasure in once more meeting the staff.

Only once a year he said it is possible for us all to meet and year by year the family grows and to-day we have here the managers and their salesmen, not only from head office, but also from our factories in Hamilton, Montreal, Winnipeg and Vancouver.

In 1911, he further added, we moved to our new factory on Fraser Avenue and to illustrate the growth of our business may state that not only is our staff increased by more than twenty salesmen but this factory has been enlarged five times in the period to cope with the great demand for our goods. We have also built factories and are manufacturing most of our lines in Montreal, Winnipeg and Vancouver. Our progress, he continued, has been remarkable and our success has been built on a sure foundation. The motto we stand by is "SERVICE and DEPENDABILITY." Give excellent service, manufacture and sell goods of dependable quality and success is bound to follow.

Mr. Harris also gave some good sound advice on square dealing. Know your business, said he, learn all there is to know about metals. Ask questions. Teach and be taught and thus ensure closer co-operation, and he told how, during the convention they would have the opportunity of seeing many lines manufactured so that they could gain an accurate knowledge of what they were selling and how and under what conditions various goods were manufactured.

Mr. Harris, Jr., vice-president, presided at the convention and opened by going through the annual report and he gave some interesting figures. All sales have increased and 1917 was the best year to date.

He further pointed out that no firm can stand still. It must either go ahead or go behind and to go ahead after a successful year required greater efforts, more concentrated efforts. and more carefully organized efforts. Particularly is it necessary to take into consideration that some day the war will end and give every business a tremendous jolt during the re-organization which is bound to follow. Only those firms who prepare for after war conditions can hope to reap the benefit when normal times arrive and this is our reason why the organization must be kept to the highest pitch of efficiency.

Thirty-four times on the Agenda and following the review of general sales was the presentation of the prizes for the various sales competitions. Then came a visit to the lead rolls and samples of Galena lead ore were exhibited and an address on how the ore was mined, smelted, and in some cases treated by electrolytic process to give the pure lead.

Then following the melting of the lead into slabs, sheets were rolled in various thicknesses from 1/16" to ¼" and in widths up to 7' 6" and various lengths. Next a visit was made to the small rolls where the process of rolling lead and tin foils was witnessed.

Another Session was taken up in reviewing the sales of babbitt metals for 1917. Mr. Harris, Jr., gave a very interesting address on this subject illustrating the real meaning of specific gravity of babbitt metals.

An exhibition of how to pour babbitt metals to give best results was made most instructive.

The question was asked by one of the salesmen "Why do we guarantee our babbitt metals to give excellent service?" This opened a subject full of discussion and to illustrate and give a practical demontration of its manufacture, first, a visit was made to the laboratory where tin, antimony, lead, zinc, copper, etc., were tested by the metallurgical chemist. Then the melting pots were visited where three of the largest were being operated. Each of them have a capacity of 35 tons. During the melting process more laboratory tests were made to prove the accuracy of the alloy and later in the day after the metal was poured, another tests was made on the friction testing machine.

At the conclusing of the babbitt metal discussion came one of the most interesting events of the convention, when Fred Harris, manager of the Winnipeg branch, presented a gold watch and chain to Messrs. D. L. Scott and E. Parkin, who have been successful in the Harris Heavy Pressure Competition.

Another Session was given over to ingot metals so that salesmen would thoroughly understand what they were selling. Samples of copper ore, zinc ore, lead ore, phosphor tin, antimony, and phosphor copper were thoroughly dealt with.

Metal conditions for 1917 were reviewed and prospects for 1918 discussed and

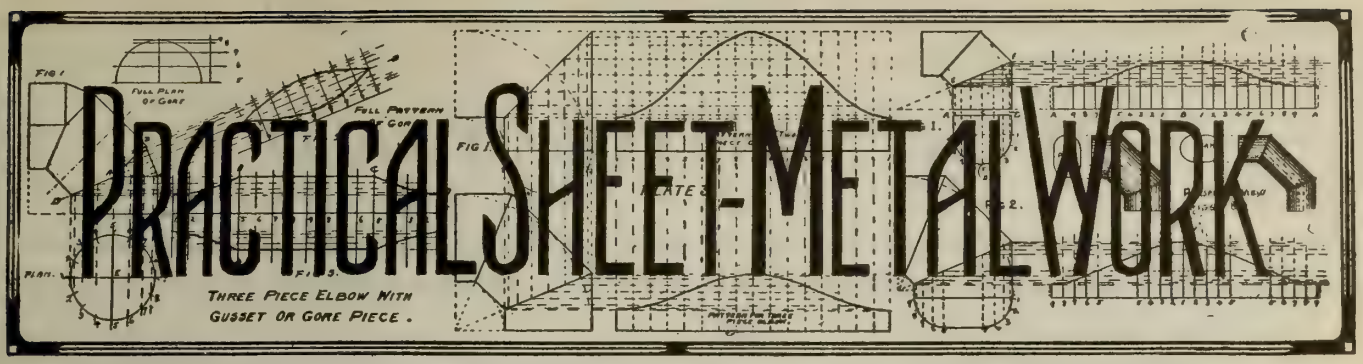
W. G. HARRIS, Jr.
Vice-president, Canada Metal Co.

the effect the war upon the metal industry brought out some most interesting details.

Type metals were also fully gone into and following this came the manufacture of solder of various grades. The salesmen after going minutely into all the points of solder, as to quality, &c., were taken through the factory to see the manufacture of bar solder, slab solder, wire solder and ribbon solder.

Each day lunch was served at the Sunnyside pavilion

The salesmen were encouraged to give addresses and to illustrate the practical and interesting subjects the following might be noted.



Humanity in Business.—E. Parkin.

Contracts.—F. Harris.

What we are doing in Winnipeg.—W. G. Garrett.

Sales assistance from the office.—M. Matthews.

(Continued on page 50)

BY THOMAS STANFIELD

IN a letter from a reader, HARDWARE AND METAL is asked to describe how patterns for a branch pipe can be made, the branch to be at an angle of 45° from the main pipe.

As the size of pipe or branch required was not stated we are describing a method to adopt for both pipes of same diameter. But the same method can be followed even though the branch be a smaller diameter.

Fig. 1. Let E F G H L M N O P be the elevation, with A B C D the plan of main pipe and J K the plan of the branch piece.

First divide plan A B C D into equal parts 1, 2, 3, 4, 5, 6, 7 and repeat until the whole of the circumference is divided. Next draw dotted lines down until they intersect the joint at L M N.

Now divide plan of branch piece J K in the same manner as was adopted in plan A B C D.

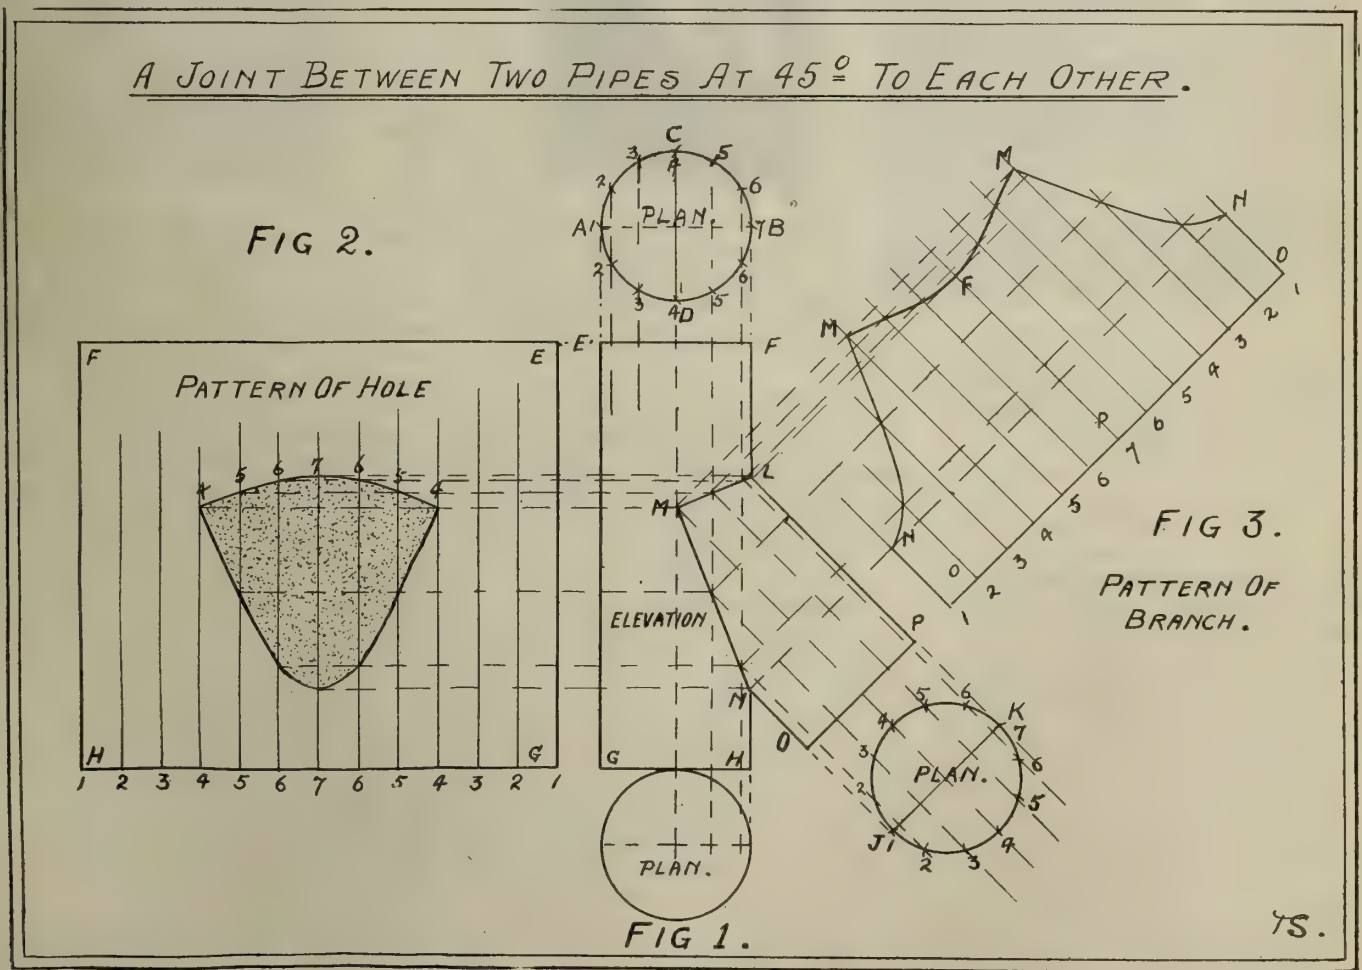
Next draw dotted lines upwards from 1, 2, 3, 4, 5, 6, 7 plan J K until they meet the dotted lines drawn from plan A B C D. These lines should meet at the joint L M N.

The next step to take will be to draw stretchout lines, as shown in Fig. 2 and Fig. 3 respectively.

First draw the stretchout line Fig. 2 as shown at F E H G. These points give the total length of main pipe.

Now transfer the measurements on plan A B C D. 1, 2, 3, 4, 5, 6, 7 and repeat backwards, making 7 on line H, G the centre.

Next draw the stretchout line for pattern of branch piece as shown by line O P O Fig. 3. and transfer the measurements from plan J K 1, 2, 3, 4, 5, 6, 7 repeating these backwards in same manner as was done in Fig. 2.



Now draw a number of dotted lines 4, 5, 6, etc., on both the stretchout lines in Fig. 2 and 3.

From line 7 Fig. 2 draw horizontal line until it meets point L on elevation, and repeat by drawing lines from 6,6 Fig. 2 to intersections on M L elevation until the four lines are drawn.

Next draw three more dotted lines from 5,5 6,6 and 7,7 Fig. 2, to the intersections on joint line M N. The points where these horizontal lines cross the vertical lines 1, 2, 3, 4, etc., Fig. 2 as shown by the shaded portion is the pattern of the hole required for the branch.

Now draw lines upwards from 1, 2, 3,

(Continued on page 54.)

EVENTS IN THE TRADE

BUSINESS CHANGES

Edgerton, Alta.—McLeod & Wheeler, hardware, have dissolved.

Broderick, Sask.—Arthur Battersby, hardware, has sold out.

Duval, Sask.—M. A. Boyd, hardware, has sold to E. W. B. Ruse.

Rockhaven, Sask.—R. J. Nelson, hardware, has sold to N. Mead.

Birdview, Sask.—R. A. Ross, hardware, has sold to W. G. Thompson.

Camrose, Sask.—T. C. Battram, tinsmith, has sold to H. S. Sanderson.

Vonda, Sask.—Roulstone Bros. hardware has been sold to J. J. Fournier.

St. Tite, Que.—Francois Duchesneau, hardware, groceries, etc., has sold out.

Whitewood, Sask.—J. L. Lamont, hardware, has been succeeded by J. F. Parr.

Montreal, Que.—Archambault & Lachapelle, hardware and groceries, have dissolved.

Semans, Sask.—Chesney & Botterill, hardware, have dissolved. G. F. Botterill continues.

Dilke, Sask.—J. A. McIntyre, hardware, has been succeeded by J. W. Mattheson.

Yellow Grass, Sask.—Cooper Bros., tinsmiths, have dissolved partnership. Each continues.

Earl Grey, Sask.—John Cleverley, hardware and implements, has been succeeded by A. M. Nairn.

OBITUARY

Burlington, Ont.—George Allen, formerly hardware merchant of this town, is dead at the age of seventy-five years. Mr. Allen recently took an interest in civic affairs and was honored with the Reeveship some years ago.

INDUSTRIAL NOTES

Three Rivers, P.Q.—The St. Maurice Foundry Co. are erecting a brick extension to their factory.

Owen Sound, Ont.—J. H. Cole, of this town, has organized a company under the name of the Great Lakes Steel Corporation to manufacture machine screw products and nuts. A site has not yet been purchased but the company has been incorporated with capital of $1,000,000.

Windsor, Ont.—Announcement has been made on semi-official authority that the Canadian Steel Corporation has decided to proceed at once with the construction of an independent water works system having a daily capacity of 7,000,000 gallons for its new Canadian plant to be erected at Ojibway.

PERSONALS

J. Taylor Webb, of Bissett & Webb, Winnipeg, Man., spent several days recently in Akron, Ohio, visiting manufacturers whom his firm represent.

A. D. ARMITAGE.

Elected President, Whitman & Barnes Mfg. Co., Akron, O., and St. Catharines, Ont. Notice of Mr. Armitage's appointment appeared in last week's issue of HARDWARE AND METAL.

M. J. Beatty, one of the members of the firm of Beatty Bros., Ltd., Fergus, Ont., has been made a director of the Manufacturers' Life Insurance Company in succession to G. P. Scholfield. It is stated Mr. Beatty is the company's largest Canadian policyholder.

PENSION SCHEME STARTED

The Canadian Consolidated Rubber Company, Montreal and branches, has brought into effect a pension scheme. This is now being worked out, at no cost to the employees. It is provided that the annual amount of these pensions shall equal one per cent. of the average yearly wage for the ten years prior to retirement, multiplied by the number of years employed, provided that such pensions do not exceed $5,000, nor fall below $240 a year. For instance, if an employee's wage is $1,000, and he has served thirty years with the company, his pension will be $300 a year. Provision is made for those reaching the age of 60 retiring voluntarily on a pension if they have been twenty years with the company, or in the case of females, at the age of 55. Provision is made also for disability pensions.

DEATH OF S. J. SHURLEY

S. J. Shurley, one of the founders of the Shurley and Dietrich Saw Works, Galt, Ont., died on Feb. 8. last.

With J. C. Dietrich he founded the Shurley & Dietrich Saw Works, with which he was actively engaged for thirty-six years, retiring in 1910. He was eighty-three years old and was born in London, England. He located in the United States, coming to Galt forty-four years ago.

BUYS FACTORY IN JAPAN

The Stanley Works, New Britain, Conn., have purchased the Crescent Works, a Japanese factory engaged in the manufacture of small butt hinges.

The Stanley Works has, it is stated, a large market for its products in the Far East, and control of this plant will enable it to enlarge its business in that part of the world. The plant is at present a small one, but the possibilities for a gradual growth are extremely good. There are both American and Japanese stockholders in this concern and the directing of the plant's operations will be largely in charge of A. L. Rae, who has for many years been the Stanley Work's Eastern representative.

The board of directors will consist of an equal number of Americans and Japanese. The factory will be under Japanese management and the sales end will be under American supervision.

The plant is located near Kobe. F. W. Horne Company of Tokyo and Yokohama, and a number of prominent Japanese in Nagoya and Osaka were the original owners. The plant will be developed to accord with the demands and opportunities in its present field and also in the manufacture of rolled steel.

MEETING IN EDMONTON

The Retail Merchants' Association of Canada are holding what is primarily an organization meeting for Alberta in Edmonton this week. For some time past efforts have been made to enlist the sympathies of all merchants in the work of the association, and it is expected there will be a representative attendance from all over the province. It is stated items of vital interest to all retailers will be discussed.

IMPERIAL OIL CONVENTIONS

Many Important Subjects Taken Up at Salesmen's Gatherings

Eastern and Western Ontario divisions of Imperial Oil, Limited, have each held their salesmen conventions during the past couple of weeks. J. F. Shatford, manager of the Eastern division presided at the convention of Eastern representatives, and Fred J .Wolfe, manager of the Western division, had charge of the Western programme.

Details in connection with the Western convention, at which many interesting subjects were brought up, are outlined below. The subject matter at both conventions was practically the same.

The Western representatives' meetings were held at the King Edward Hotel, Toronto, starting on Monday, February 4. The first discussion was that in reference to the refined oils, gasoline and

FRED J. WOLFE
Manager, Western Ontario Division, Imperial Oil, Limited

lubricating oils situation. General talks on each were given, and a review of sales for the past year made. Plans for increased business during 1918 were formulated. Geo. W. Mills gave an address on automobile and tractor oil lubrication.

Tuesday the advertising program for 1918 was the subject of an address by R. Atwood.

A very interesting address was given by J. W. Cannon, of the Gilbert and Barker Mfg. Co., Springfield, Mass., on underground storage. Mr. Cannon dealt with the threatened shortage of gasoline and how necessary it was to conserve supplies in every way possible. He spoke of the value of underground storage to the merchant as a means of avoiding waste, impressed on his hearers that the use of measuring pump and hose was a means of preventing loss by fire, evaporation and spilling.

Tuesday night was left open for entertainment, and this was supplied in the form of a dinner at the St. Charles Hotel, followed by a theatre party.

A thorough discussion of the stoves, heaters and lamps occupied the greater part of Wednesday. It is said that great enthusiasm was manifest, and the conventions in every way a success.

It was pointed out in connection with the service the company is rendering that distributing stations for refined oil and gasoline by tank wagon and steel barrel delivery had increased from 57 to 140 for Ontario during the past three years.

The following representatives of the Western Ontario division were present at meetings:

F. J. Wolfe, district manager, F. W. Deer, assistant manager, Toronto; W. P. C. Andrew, Niagara Falls; F. P. Bannister, Brantford; J. K. Beatty, Chatham; W. J. Butchart, Toronto; R. E. Burns, Orangeville; J. F. Cody, London; J. H. Franks, Kitchener; C. I. Grierson, Hamilton; F. G. Hall, F. Lapp, Toronto; W. D. MacEdwards, C. W. McGuire, J. H. McGuire, London; C. A. Mayer, Hamilton; J. Morgison, Brantford; L. Parker, St. Catharines; L. Quick, London; J. S. Ross, Hamilton; F. J. Ryan, Windsor; R. H. Spurr, Galt; E. H. Teagle, Windsor; W. W. White, Hamilton; Gordon M. Young, Woodstock.

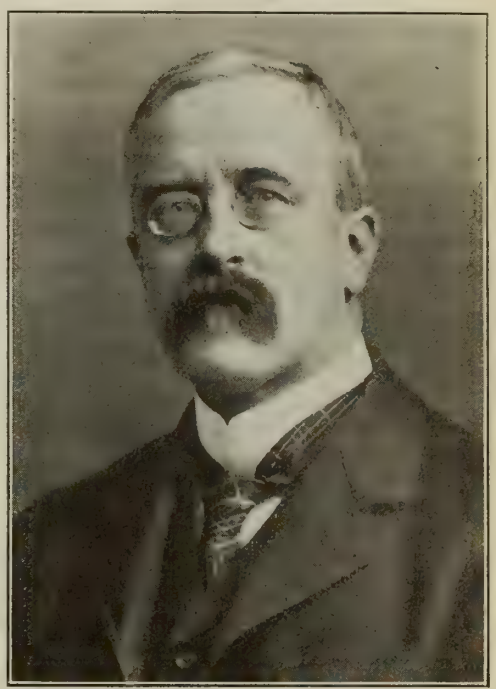
E. A. MOORE ELECTED PRESIDENT

Stanley Works Officers Changed—C. F. Bennett Vice-president

George P. Hart was elected Chairman of the board of directors of the Stanley Works, New Britain, Conn., to fill the vacancy caused by the recent resignation of William H. Hart. E. A. Moore was elected president, and C. F. Bennett vice-president at a meeting of the directors of the company held after the annual stockholders' meeting.

President E. A. Moore began his business career with Bradley & Hubbard of Meriden, Conn., but left there to take a position in the cost department of the Stanley Works in 1889, on his twenty-third birthday. It was not very long before Mr. Moore became head of the cost department, and in 1892 Mr. Moore became manufacturing superintendent.

Mr. Moore became general manager of the company, in charge of all plants, including foundries, machine shops and hot rolling mills at Bridgewater, Mass. He had charge of the construction and until recently the management of the Stanley Works' heavy hardware plant at Niles. Later he became second vice-president and a director of the company, then first vice-president, in 1916, and finally president.



Besides being president of the Stanley Works, Mr. Moore is president of the Canada Steel Goods Co. and the Stanley Steel Company, both of Hamilton, Ont.

Mr. Bennett Began in Shipping Room

Vice-president C. F. Bennett came to New Britain when he was sixteen years old to work for S. H. Beard & Co., heating and plumbing contractors. He entered the employ of the Stanley works in 1891, the day after his nineteenth birthday and went to work in the shipping room, entering orders and helping to make out invoices.

Within a year of Mr. Bennett's coming to the Stanley Works, Mr. Moore was made manufacturing superintendent, and what is now the production and hurry department was started. Mr. Bennett was transferred to this department, where, with the help of one clerk he had charge of ordering the goods to be made throughout the plant, hurrying up production and taking charge of all correspondence in connection with this work.

Within three years he worked from this position into general charge of production, and in 1907 he was put in charge of all general manufacture at the New Britain plant. In 1912 Mr. Bennett was made a director of the Stanley Works, in 1916 second vice-president, and now becomes vice-president, in charge of the Stanley Works plants at New Britain and Niles.

The late J. S. N. DOUGALL
Former President, Dougall Varnish Co., Montreal, announcement of whose death appeared in last week's issue of HARDWARE AND METAL.

KITCHENER MERCHANTS LIMIT BUSINESS HOURS

In an endeavor to conserve coal resources, retail merchants of Kitchener, Ont., have decided to curtail the hours of business. It has been decided to limit the hours from 10 a.m. to 6 p.m. five days in the week. On Saturdays the present hours for that day will be observed. The arrangement will be for the month of February. It is estimated that fifteen tons of coal per day will be saved under the new regulations.

TRADE NOTES

Montreal, Que.—J. E. Tobin, hardware, has registered.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

STARR ORANGE DERINDER

J. E. Beauchamp & Co., Montreal, have been appointed Canadian distributors for the Starr orange derinder, with which, it is claimed, the rind can be

Starr Orange Derinder.

severed from the flesh of the orange without wasting a single drop of its juice or destroying the rind. The tool it is stated has a keen cutting adjustable router, shown in the center of the tool,

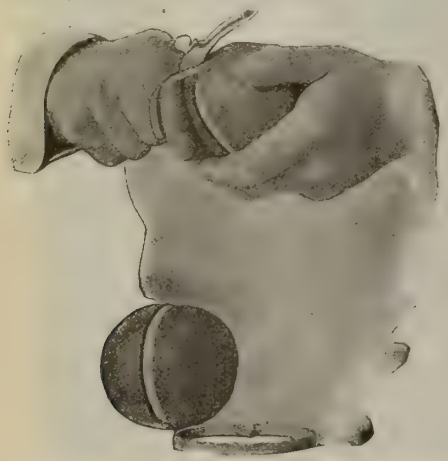


Fig 2.

which can be set to the exact thickness of the rind on different kinds of oranges. This is first used to remove a strip of rind midway between the stem and navel of the orange as shown in Fig 2.

The tool also has, it is claimed, a smooth non-cutting penetrating end,

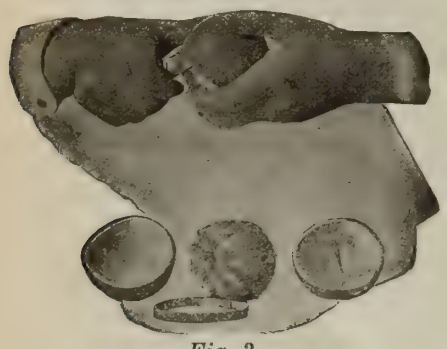

Fig. 3.

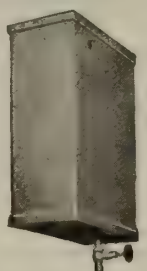
which can be safely worked down between the rind and the flesh of an orange to the stem and navel, as shown in Fig. 3. After loosening both half rinds, by simple twist of the hand the rind cups may be removed, including the core of the orange.

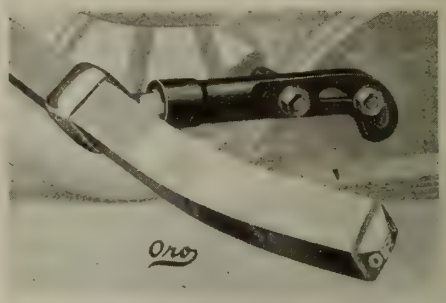
UNIVERSAL BUTTER MERGER



To make butter that will cost much less per pound than is usually asked in retail stores a new "Butter Merger" has been placed on the market by Landers, Frary & Clark, New Britain, Conn., through their Canadian agents, A. Macfarlane & Co., Montreal. By using a pint of milk and a pound of butter this new device will make, it is claimed, two pounds of creamy, palatable butter.

The straight line gear drive, it is stated, admits of free and easy operation; gears are so enclosed that fingers cannot be caught nor flowing sleeves come in contact with them.

The rotating paddle will, it is claimed, produce maximum churning efficiency with minimum effort, the paddle paddling around in such a manner that the oily globules of milk and butter are broken up and mixed in a thoroughly merged mass. It is easily taken apart for cleaning; easily put together for use.

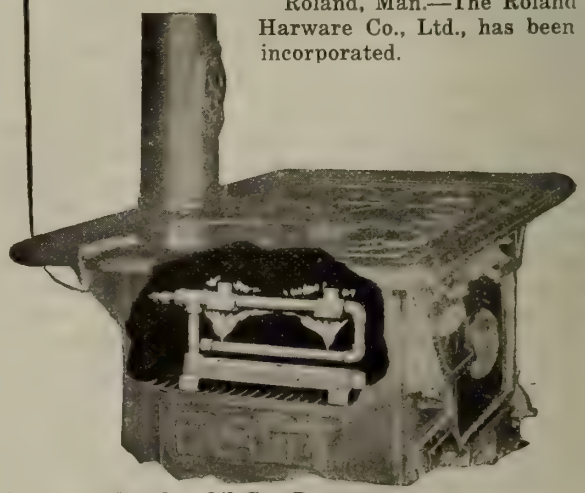


"ORO FORMOST" BUMPER

The Au-to Compressor Company, Wilmington, Ohio, has recently placed on the market a new bumper known as the "Oro Formost," with a universal fitting.

The bumper is, it is stated, adapted to all recent models of cars, having the mud apron and fenders extending all the way to the front tips of the chassis frame, width and curve of frame being taken care of with the special adjustment. The brackets are made of malleable iron, sturdy and well balanced. The springs are concealed in housing and are finished in baked black enamel. The bars are finished in black and nickel, specially rustproof treated.

This bumper comes complete with drop forged hook bolts ready to attach, packed in individual cartons.



"Oro Formost" Bumper.

KERODOX OIL GAS BURNER

The Kerodox gas burner is being distributed by the Canadian Fairbanks-Morse Co., Ltd., Montreal and branches, and is, it is stated, one solution of the fuel problem. The Kerodox gas burner dispenses with coal or wood for cooking or baking by substituting coal oil.

It consists of a burner and a feed tank and, it is stated, no alterations to the stove are necessary to instal. Maximum heat is supplied at a moment's notice or shut off entirely when not needed; is self-cleaning, and will not clog. It is stated the Kerodox is a scientific arrangement which can be fitted into any range, converting coal oil into gas and getting the maximum heat from the oil; heat when required; no expense when shut off.

Roland, Man.—The Roland Harware Co., Ltd., has been incorporated.

Kerodox Oil Gas Burner.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

MODIFICATION of the original order by the United States Government providing for prohibition of all steel products for export except under license has made it possible for the lighter gauges of black and galvanized sheets to be brought into Canada. The original order stipulated that all black and galvanized sheets were to be placed on the embargo list. Through the change in this ruling the situation with respect to sheets now holds in the status quo, namely, an embargo only on No. 10 gauge and heavier. These heavier gauges of sheets can only be brought forward when license is granted and when sale has been sanctioned by the Dominion War Trade Board.

The appointment of the War Trade Board will have the effect of giving the Government a greater measure of control over imports and exports, and also a better knowledge of condition of stocks of raw materials and partly finished and finished products. Its powers are similar in scope to the War Trade Board of the United States. The opinion is expressed in some quarters that it would not be a surprise to see the United States place an embargo on an even wider range of commodities coming into Canada than those prevailing at the present time.

Advances have been numerous and include increased prices in such commodities as sashcord, cotton rope, awning cord, candlewick, cotton plow lines, tinned pipe straps, socket firmer chisels, drawknives, cotton clotheslines and a number of lines of automobile accessories.

Great difficulty is experienced in getting shipment of goods by railway. Embargoes on acceptance of freight by railways are of frequent occurrence. Wholesalers never know from one day to the next whether they will be able to depend on shipment of freight on any particular day. Even shipment by express has been banned on certain days. Under the conditions business is being hampered through transportation situation.

MONTREAL MARKETS

MONTREAL, Feb. 14.—The week has been a trying one in some ways and still no complaints are heard. Tuesday morning's mail was a heavy one after the enforced holidays and business received has been of splendid proportions with many jobbers. Changes have been upward and these are important, while not of great number. Certain lines of compass saws, trowels, screwdrivers and pliers have advanced. Crowbars are up to 8½c per pound and wire lawn rakes have advanced nearly 50 per cent. Stoves are very firm and the tendency points to higher prices in the very near future. Old material has a firmer and better tone and pig lead advanced 25c per 100 lbs. Rope is still firm and an advance is anticipated in certain quarters.

Crowbars And Lawn Rakes Make Advances

Montreal.

CROWBARS, LAWN RAKES.—Advances have been made in crowbars this week, now being quoted at $8.50 per 100 lbs. The former prices of these ranged from $7.50 to $8. The wire-tinned lawn rakes sold in some sections are also advanced and the relative prices are as follows:—20-tooth wire rakes formerly selling at $6 per dozen have been advanced to $9, and the 24-tooth selling previously at $6.25 per dozen are advanced to $9.75 per dozen. Increases in handles and other costs have been responsible in part for these increases.

Cotton Rope And Cords Make Big Advance

Montreal.

COTTON ROPE, LINES, ETC.—Advances of considerable proportions were made in the price of cotton rope and other lines this week. Cotton rope is now quoted at 60c to 61c per lb. for the 3/16 and for the ¼ inch and larger 59c and 60c is asked. Sashcord is also higher and the range of advance here is about 4 cents per lb. Shade cord is selling at $1.95 per dozen for the No. 3½; $3.15 for the No. 4; $4.30 for No. 4½ and $11.75 for the No. 5. Cotton clotheslines are selling higher at $2.16 for the 30-foot; $2.66 for the 40-foot; $3.21 for the 48-foot and $3.98 for the 60-foot. Twines, as yet, have not shown advances. Candle wick is also up and is quoted at 60c per lb.

Saws And Certain Pliers Are Quoted At Advances

Montreal.

SAWS, TROWELS, PLIERS, ETC.—Advances in the prices of certain Diston lines have been made and while these are not available in definite form, the advance all round is about 10 per cent. The lines affected are compass and wood saws and frames, crosscut saws and one or two other lines. Brick trowels and No. 9 and No. 32 screwdrivers are advanced by a similar percentage. In Utica pliers an advance approximating 20 per cent. has been announced.

Iron Pipe Advances About Two Per Cent.

Montreal.

IRON PIPE.—The last issue of HARDWARE AND METAL pointed out the definite trend of the market for iron pipe, an advance being predicted for all sizes. This has now been effected and the new prices are shown elsewhere in the current quotations. Trading is just fair, but with all the surrounding conditions considered the volume of business is good. Stocks seem to be fairly well assorted but are not excessive.

Rope Rules Firmly But Prices Unchanged

Montreal.

ROPE AND CORDAGE.—While there is small movement of imports to replenish spot stocks, some business is being effected and the prospects are better. It is expected that when the spring shows signs of arriving the impetus given business will be considerable. At the present time a good enquiry is being made from the trade outside, and manufacturers and importers are looking for a large volume of trade. The situation in the United States has changed materially within recent days in that there seems a disposition on the part of government to establish lower prices on manila fibre.

Somewhat Lighter Stocks Coal Oil And Gasoline

Montreal.

COAL OIL AND GASOLINE.—The trade in gasoline and coal oil continues to be seasonable and deliveries are quite satisfactory. The difficulty of securing new supplies has caused some considerable draining of spot stocks, but as yet there is no acute shortage and deliveries are maintained in a satisfactory manner. Coal oil is selling at 17c for Royalite while Palacine and Electroline are quoted at 20c per gallon. Gasoline is quoted at 32½c.

Sheets Reported Scarce And Trading Is Fair

Montreal.

SHEETS AND PLATES.—A steady movement for sheets is reported and while this is not very heavy it is satisfactory, in view of the somewhat lighter stocks on spot. Prices are maintained without change. With improved weather conditions it is thought there will be a better delivery and while this may improve it will be wise for those having quantities on hand to conserve them as was pointed out in last week's issue. Prices quoted here are as follows:

MONTREAL—		
BLACK SHEETS—		**100 lbs.**
10 gauge	$8 00	$12 50
12 gauge	8 65	11.50-11.60
14 gauge	8 80	8.85- 8.55
16 gauge	9 00	8.65- 8.65
18-20 gauge	9 25	8.75
22-24 gauge	9 40	8.90
26 gauge	9 45	8.95
28 gauge	....	9.05
10¾ oz. (28 English)	10 55	10.75
GALVANIZED SHEETS—		
10¾ oz.		$10 00
28 ga.		9 65
26 ga.		9 25
22 and 24 ga.		9 05-10 45
20 ga.		8 85-10 30
18 ga.		8 85
16 ga.		8 70

Interest In Lead Products Confined To Sorting Orders

Montreal.

LEAD PRODUCTS.—Sorting business is the feature of the market this week in manufactured lead lines and this is quite small. There has been a firming tendency to the local market which is characteristic of United States markets also. In fact there is little inclination to trade extensively in spot stocks there. In futures some business has been effected. Much of the shortage is attributed to the congestion of traffic. The largest sheet zinc manufacturers have revised prices and the new lists show considerable advances although the extent of these is not available as this report is written.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12½	0 13
Lead sheets, 4 to 8 lbs. sq. ft.	0 11½	0 12½
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c lb. extra.		
Solder, strictly, lb.	0 47	....
Solder, commercial, lb.	0 45	....
Solder, wiping, lb.	0 42	....
Zinc sheets, casks	0 26	0 30
Do., broken lots	0 28	0 32

Bar Iron And Steel Are Firm In Short Market

Montreal.

STEEL AND IRON.—Trading in iron and steel continues on a seasonable basis and the prices are maintained on all sides. There is a very serious shortage of needed quantities on the United States market, and this is estimated at around 500,000 tons. Notwithstanding this, the trade does not seem to be suffering for essential needs. If transportation permitted and the quantities were available, it is stated that there would be a better movement which would mean less difficulty in caring for needed orders from widely separated sections of of the country.

MONTREAL—	
Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	11 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10

Black Diamond cast steel, lb.	0 20-0 21

Some Improvement Is Noted For Old Metals

Montreal.

OLD MATERIALS.—While the movement of old materials has not been large it has improved to a noticeable extent. The bareness of some lines in the market has firmed prices on iron, while brass and copper have also been characterized by a firm tone. If the weather should permit of a freer movement there will probably be a better price schedule for some lines at least. For the week there are no changes and prices are maintained on the following basis.

MONTREAL—		
Tea lead	$ 0 05	....
Heavy lead pipe	0 06¼	0 06½
Yellow brass	0 13½	0 14
Red brass	0 20	0 21½

Nails And Wire Hold On Recent Revisions

Montreal.

NAILS AND WIRE.—There is a fair amount of booking reported for nails against spring shipment. Tuesday's mail was reported to have brought in some good orders, after the lapse of three days, and jobbers are quite satisfied with this seasonable business. Prices are held at the revisions of a week ago, wire nails selling at $5.25 base and cut nails at $5.60 base. Smooth steel wire is quoted at $6.25 base.

Stove Prices Are Firm And An Advance Probable

Montreal.

STOVES AND ENAMELED WARE.—The usual amount of business is reported as applying to the sales of stoves and ranges. Retailers are buying just what they require for the present, but the outlook is favorable and the coming season is expected to reveal a fairly large movement of the regular lines. It is quite evident, that while there have been no revisions of price for several weeks, these will receive consideration in the very near future. Advances for raw supplies may reflect to a relative extent in stove prices. Enameled ware is looking up well for spring and bookings are satisfactory.

Pig Lead Advances 25c; Local Situation Strong

Montreal.

INGOT METALS.—There is a very firm tone to the lead market and as this report is written HARDWARE AND METAL is advised of an advance of 25c per 100 lbs. in the New York market, making the price there 7c the Trust price. This reflects in the local market by a relative firming of prices.

COPPER.—Supplies on spot are of small but ample proportions to meet the existing demand and trading is being done on the basis of 33 to 34c per lb.

LEAD.—Just as this report is written advices are received of a 25c advance in the Trust price of pig lead at New York. The price there is now 7c. Locally trading is being done on a basis of 9¼c to 9¾c lb.

TIN.—Markets are strong and a shortage is reported for spot. The trading being done is of fair volume and the prices are from 82½c to 85c per lb. Outside spot markets are rather bare and the tone is very steady and strong.

SPELTER.—The trade is awaiting the government's announcement in the United States with regard to the fixing of prices for the high grades. This is expected to be made shortly and will have a steadying effect on the ordinary grade which is now quoted at 10½c to 11c per lb.

ANTIMONY.—Little interest is manifested and trading is done at 19c lb.

ALUMINUM.—Market is dull and trading light at 58c to 60c lb.

TORONTO MARKETS

TORONTO, Feb. 14.—The greatest concern with wholesalers at the present time is to get delivery of goods. Their stocks are being rapidly depleted owing to non-arrival of shipments. Embargoes on shipment of freight by railroads during the week have been numerous. Some days not even the express companies have been picking up parcels. The disorganization

to trade caused through these conditions can be well imagined. Advances have been numerous during the week, particularly so in automobile accessory lines. Accessory houses are getting in shape for the Spring trade. With the coming of milder weather the transportation situation is expected to improve rapidly.

Standard 30-Gallon Boilers Advance $1

Toronto.

RANGE BOILERS.—An advance of $1 was made effective on the 30-gallon standard range boiler, which now makes the selling price to the dealers $14 each. For the extra heavy 30-gallon size the price remains unchanged at $17 each. Prices on 35-gallon, 40-gallon, and 52-gallon hold unchanged. Some of the larger sizes have been increased in price to the extent of approximately 10 per cent. Following are prices on some of large izes: 66-gallon standard, $37; extra heavy, $42; 82-gallon, standard, $45; extra heavy, $50; 100-gallon, standard, $62; extra heavy, $70. Increase in manufacturing costs is given as the reason for the increase in price. Following are the prices now prevailing on various sizes:

Lamps, Knife Polish, Flour Sifters Advance

Toronto.

LAMPS, POLISH, SIFTERS, BRUSHES.—An advance of approximately 7½ per cent. has been made effective in lamp prices, due in large measure to increased cost of packages. Assortment package No. 9881, containing three dozen lamps of six different sizes, is now quoted at $9.10 per case, former price being $8.75. Lamp A2 is quoted at $3.15 dozen, and B design at $3.65. Wellington knife polish has been increased 35c per dozen, now selling at $2.35. Eagle flour sifters show a 10 per cent. advance and are quoted at $2.25 dozen. Artist brushes show an increase in price, Royal now being quoted at 80c dozen, Providence at 85c dozen and Superior at 60c dozen.

Primary Coils Show Higher Range

Toronto.

PRIMARY COILS.—A substantial advance has been recorded in the price of primary coils. Type formerly used for make and break ignition short form, Edison type, a six-inch gas engine coil is now quoted at $9.70 each, former price being $9 list. Long form primary coil sold formerly at $4.30 list is now quoted $4.65 list each. Steel clad primary coil, sold formerly at $1.70, is now quoted $1.85 list. Discounts from above prices: less than 12, 25 per cent.; 12, 30 per cent.; 48, 35 per cent.

Gas Headlights Up 50c to $1 on Lists

Toronto.

HEADLIGHTS, SPOTLIGHTS.—Gas headlights show an increase in price during the week. Style with 10-inch diameter and 6-inch mirror in black is quoted at $13.50 list, and B. and N. at $13.75 pair. Style 8-inch diameter, black, is quoted at $10 pair, and black and nickel at $11 pair. Discount 25 per cent.; lots of 12, 30 per cent.; lots 48, 35 per cent. Old Sol spotlights have advanced 50c on list price, 6-inch door now being quoted at $7.50, and 7-inch door at $10.50 each. Discount on spotlights is 25 per cent. Old Sol Nitrojector has been advanced $1.25 on list price, now being quoted at $15, subject to discount of 25 per cent. to retail trade. Swivel gas searchlights for trucks have been advanced $2 on list price, making 8½-inch diameter now $13.50 each, and 9½-inch $14.50 each.

Prices—Ontario, Quebec and Maritime Provinces.

Discounts on truck lights are: less than 12, 25 per cent.; quantities 12, 30 per cent; quantities 48, 35 per cent.

Electric Horns And Gasoline Systems Up

Toronto.

HORNS, GASOLINE SYSTEMS.—New list prices have been issued for Sparton electric horns, increase amounting to $1 on list. Spartonette and Spartonette M in black enamel are now quoted at $5 list. Spartonette with nickel bell and Spartonette M nickel have been discontinued. Sparton gasoline vacuum systems are quoted at $13.50 each list. Discounts 25 per cent. in less than six; quantities of 6, 30 per cent.

Electric Lantern Lists Are Higher

Toronto.

HAND LANTERNS.—List prices on Mescolite hand lanterns show an increase of 15c to 25c. Lantern complete with battery, 1½ volt lamp, is quoted at $2.25, while 3-volt with 2.8-volt lamp is quoted at $2.85 each. In quantities less than 50 the discount is 25 per cent., and quantities over 50, 30 per cent. discount.

Inner Casings Show Higher Range

Toronto.

INNER CASINGS. — Considerably higher prices have been announced on Interlock inner casings. New lists give following prices: 3-inch, $8.50, an advance of $1.95; 3½-inch, $10, an advance of $2.20; 4-inch, $15, an advance of $3.30; 4½-inch, $17.25, an advance of $3.75; 5-inch, $20, an advance of $4.65; 5½ inch, $22, an advance of $5. Discounts apply as follows: Less than 12, 25 per cent.; quantities of 12, 30 per cent.; quantities 48, 35 per cent.

Readjustment In Vulcanizer Prices

Toronto.

VULCANIZERS.—A readjustment in price of Adamson vulcanizers has been made on certain styles, Model M is quoted lower in price by 25c, at $1.50 list; Model T is quoted 50c lower in price at $2; Model S is quoted unchanged at $15; Model U is quoted lower by 50c, at $3 list; Model E is unchanged at $1.50 list. Patches in boxes of 12 also hold unchanged at 25c list. In quantities less than 12 discount is 25 per cent.; quantities of 12, 30 per cent.; quantities 48, 35 per cent.

Prices on Radiator Hose Are Announced

Toronto.

RADIATOR HOSE,—New prices on Testoid radiator hose have been announced to trade at list prices given below. Prices here given are subject to discount of 25 per cent. in small quantities, 30 per cent. box lots containing six pieces three feet in length, or 18 feet in all. In 10-box lots discount is 35 per cent.

	Two-Ply	Three-Ply

2¾-inch	0.75	0.83
3-inch	0.83	0.90

Screwdrivers Go To Higher Levels

Toronto.

SCREWDRIVERS. — Higher prices prices have been made effective in Perfect handle screwdrivers, following prices prevail: 4-inch, 55c each, list; 6-inch, 80c each, list; 8-inch, $1.10; 10-inch, $1.35; 12-inch, $1.60 each. Perfect handle machinists' screw drivers have been advanced 20c to 25c on list prices

as follows: 4½-inch blade, square shank, $1.60; 5½-inch blade, square shank, $1.75 each. Quantities less than 24, discount 25 per cent.; quantities 24, 30 per cent.; quantities 96, 35 per cent.

Combination Pliers Increased In Price

Toronto.

PLIERS.—Combination wire cutters, pincers and pliers have made substantial advances in price, ranging from 10c to 25c each on list prices. Prices prevailing now are: 6½-inch, nickel, $1.20; 8-inch, nickel, $1.50; 5½-inch, nickel 65c; 6½-inch, black, 75c. Long square reamer nose side cutting plier, 7-inch, is now quoted at $1.90 list; Universal combination plier is quoted, 6-inch, $1.30; 8-inch, $1.75; Victor Universal pliers are quoted $1.60 for 7-inch. Discounts from above prices: Less than 24, 25 per cent.; quantities 24, 30 per cent.; quantities 96, 35 per cent.

Valve Spring Lifter List Advances 15c

Toronto.

VALVE SPRING LIFTERS.—An advance of 15c on list price of valve spring lifter with Perfect handle. Device is used for compressing valve springs on automobile and other gas engines in order to permit easy removing and replacing valves. Where former list price was $1.75 each it is now $1.90. Quantities less than 6, 25 per cent.; quantities 6, 30 per cent.; quantities 24, 35 per cent.

Assorted Springs Decline In Price

Toronto.

SPRINGS.—A decline in the price of assorted springs for use on brakes, pedals, cut-outs and similar places has been recorded. List price for 25 assorted sizes of springs is now 55c, former price being 85c. Discounts: Less than six sets, 25 per cent.; quantities of 6 sets, 30 per cent.; quantities of 24 sets and over, 35 per cent.

Pulling Devices Go To Higher Levels

Toronto.

AUTO ACCESSORIES.—An advance of $10 on list price of No. 1 Pull-U-Out has been effected, making price now $27.50 each; No. 2 size has been discontinued. Device is equipped with 40-foot steel cable, two 7-foot chains and three stakes. Multipull pulling device has been advanced to $13.75 list, an increase of $3.75. Pull-U-Out carries discount of 20 per cent. in quantities of less than 6, and 20 and 5 per cent. in quantities of 6. Discounts on Multipull: Less than 12, 20 per cent.; quantities 12, 20 and 5 per cent.

Other Makes Of Brushes Firm

Toronto.

BRUSHES, WOODENWARE. — An advance was recorded in the Boeckh line of brushes last week and intimations have been made that while the Simms line has not yet been advanced there is a strong probability that a change may be made effective March 1. Woodenware is in strong market, particularly manufacturers' packages such as shellac containers and pickle pails. Manufacturers are not taking contracts on these lines but are taking business only on basis of immediate sale.

Tinned Pipe Straps And Draw Knives Up

Toronto.

PIPE STRAPS, DRAW KNIVES.—An advance of 10 per cent. has been made effective in tinned pipe straps, which now makes the price 21c per pound. Draw knives of P. S. & W. pattern also show an advance. Nine-inch size is now quoted at $7.85 dozen, and 10-inch at $19.40 dozen.

"Go on or go Under!"—Lloyd George.

Socket Firmer Chisels Advance 10%

Toronto.

CHISELS.—Higher prices have been made effective on P. S. & W. socket firmer chisels, both plain and beveled. Following are prices on plain chisels: ¼-inch, ⅜-inch, ⅛-inch, $8.05 per dozen; ⅝-inch, $8.90; ¾-inch, $9.20; ⅞-inch, $10.35; 1-inch, $10.60; 1¼-inch, $11.75; 1½-inch, $12.65; 1¾-inch, $13.75; 2-inch, $14.35. Bevelled chisels are quoted $1 per dozen higher in each instance than above prices.

Sashcord, Cotton Rope, Awning Cord Go Higher

Toronto.

COTTON PRODUCTS.—An advance has again been made effective in cotton goods, the increase amounting to 2c per pound on sashcord. Continued firm position in the raw cotton market has been responsible for the increase in price. Following is the price on sashcord: No. 6, 67c to 69c lb.; No. 7, 66c to 68½c; Nos. 8, 9, 10 and 12, 65c to 67½c lb. Cotton rope is quoted as follows: ⅛-inch, 65c to 70½c lb.; 5-32-inch, 64c to 69½c lb.; 3-16-inch, 61c to 66¼c lb.; ¼-inch and up, 60c to 65c lb. Awning cord, white: No. 3½, $1.95 to $2.05; No. 4, $3.15 to $3.25; No. 4½, $4.30 to $4.45 per dozen hanks. Awning cord, drab: No. 3½, $2.35; No. 4, $3.50; No. 4½, $4.70. Cotton clothes lines are quoted: 40-foot, $2.80 dozen; 48-foot, $3.40 dozen; 72-foot, $5.05 dozen; 100-foot, $7 dozen. Candlewick is now quoted at 70c lb., and cotton bag twine at 81c per pound. Cotton plow lines with snaps are quoted at $7.35 dozen.

Demand For Coal Oil Still Heavy

Toronto.

GASOLINE, OILS.—The market for gasoline held steady in price during the week. There is a much firmer market for crude oil in the United States. Advances have been recorded in the Pennsylvania, Ohio, Indiana and Illinois fields, and there is general expectancy that the price of Mid-Continent crude oil will advance. The oil from the latter field is the one which primarily affects prices on Canadian refined oils. With an advance in Mid-Continent crude oil there is every chance that some of the refined products at least may advance. Quotations are still made on the basis of 31½c per gallon for gasoline and 17c for coal oil. Other refined oils held in a steady market.

Stove Business Making Satisfactory Progress

Toronto.

STOVES, ENAMELWARE.—There is a satisfactory business in stoves at the present time following the recent advances recorded. Dealers report that booking orders are up to expectations for this season of the year. Business, however, is confined mostly to sorting orders. Demand for oil heaters still exceeds the supply. Volume of enamelware business is fairly good, with booking business promising. Prices on these various lines hold unchanged.

Rumors Of Price Fixing In United States

Toronto.

ROPE, TWINE.—Some rumors were current during the week that the United States Government had fixed the price of fibre at lower prices than those recently prevailing. Confirmation of this report was not to be had at the time of writing. If it turns out that prices have been fixed at a lower level such action will probably forestall an advance for rope on the part of Canadian manufacturers. The trade was in an expectant mood during the week pending further advice on the matter. In the meantime prices held unchanged, with Spring business not yet started to open up to any appreciable extent. American

manufacturers are all busy, and any available supplies of hemp are keenly taken. There is expectation that the price on binder twine will be announced by the United States Government some time this month. In the meantime prices on rope in this market are firmly maintained in view of the high prices which manufacturers have had to pay for their raw materials.

Cannot Accept Orders For Wire Rods In U. S.

Toronto.

WIRE, NAILS.—Some of the Canadian nail manufacturers have been advised by concerns in the United States that they are unable to accept any orders at present for wire rods. Whether this is to be a permanent condition remains to be seen. It would seem to come as a natural sequence to the announcement made in these columns last week that the United States Government has prohibited the rolling of steel products except where licence is secured. If the embargo becomes complete it will in all probability throw such a heavy demand on Canadian manufacturers of wire rods that they might not be able to cope with it. The same holds true with respect to wire products of all kinds. Price was maintained during the week at $5.20 per hundred pounds base for standard steel wire nails.

Shipments Of Steel From United States Nil

Toronto.

IRON AND STEEL,—With the unprecedently tight situation on the railroads of the United States which has caused a big reduction in the output of all steel mills, there has been practically no shipments to come forward to Canada within recent days. Trade is depending upon stocks in store and on supplies from Canadian mills. There has been a fair local demand, with prices holding unchanged.

Embargo Does Not Apply To Light Sheets

Toronto.

SHEETS, PLATES.—It was announced in these columns last week that the United States had placed an embargo on all gauges of black sheets, but since the original order was issued a modification has been made with respect to black sheets, in that the embargo applies only to No. 10 gauge and heavier, which was the condition prevailing before the recent order went into effect. The order, however, apparently still holds good with respect to all other steel products. Lighter gauges of black sheets and galvanized sheets are therefore in the meantime to be allowed to come forward as in the past. This information gives a measure of relief to the situation as an acute condition would have resulted with the shutting off of supplies from the United States. Galvanized sheets were in weaker market in certain quarters during the week, a decline of 25c per 100 pounds having been recorded, making the basis for 10¾ oz. sheets $9.25.

Demand For Boiler Tubes Is Insistent

Toronto.

BOILER TUBES.—Dealers in boiler tubes report there has been a good demand for boiler tubes so far and that they have been able to come within the requirements of the Government as to where sales should be made. There are no further supplies coming forward from the United States at the present time owing to the difficulties on transportation lines.

Firmness Of Tin Makes Products Firmer

Toronto.

LEAD AND ZINC PRODUCTS.—There is a firmness in the market for lead and zinc products due to the strong position in ingot tin. In the local market tin showed an upward tendency by 2c per pound, with a strong market in London.

Lead pipe, lb.	0 14	....

Zinc sheets, per lb.	0 26	....

Old Brass And Copper Show Upward Tendency

Toronto.

OLD MATERIALS. — There was a stronger tone to the market for old materials during the week, principally in brass and copper products. Red brass was quoted up 2c at 22c per pound, light brass was higher by ½c at 9½c per pound, heavy copper was 1c per pound higher. Old cast iron was in firmer market and was quoted from $1 to $1.50 per ton higher. No. 1 railroad wrought iron is quoted at $26 to $27 per ton, an advance of $1 to $2. The scarcity of tin is affecting the price of products into which it enters such as brass and copper. The market for cast iron was higher on account of the difficulty in loading, slow delivery of freight and embargoes which have been put on certain commodities.

Tin Goes To Higher Levels; Market Firm

Toronto.

INGOT METAL.—Interest in ingot metals centred around tin during the week, in which both primary and local markets were higher. Supplies of this commodity are dwindling. Other metals held in steady market.

COPPER.—Copper is one commodity that has not been seriously affected by recent railway tie-ups in the United States. Distribution is proceeding without inconvenience and is being skillfully handled. There is a steady demand in local market. Prices held unchanged at 30c to 32c per pound for casting copper.

TIN.—Quotations advanced 2c per pound in the local market sales being made on the basis of 80c to 82c per pound. London market was higher and intimation was made that amount available for Canada might be still further restricted. Stocks on the local market are getting within narrow compass. Demand has been active during the week.

SPELTER.—The market held in a steady position with prices unchanged at 9¾c to 10½c per pound.

LEAD.—The firmer undertone in the lead market noted last week has worked out toward slightly higher prices at primary points although quotations locally were unchanged at 9¼c to 9½c per pound. Demand for this commodity is light at present. One of the factors that is operating toward a firm undertone is primary markets is the difficulty in moving stocks from Western producing points.

ANTIMONY. — The market held steady with a slightly firmer undertone in primary markets. Locally there was a better demand noticeable but quotations were unchanged at 16c to 18c per pound.

ALUMINUM.—There is a somewhat easier feeling in the primary market but conditions locally are drifting in a state of quietness. Quotations held unchanged at 60c per pound.

PIG IRON.—Operations have been greatly restricted in the production of pig iron within recent days, but an improvement is reported by United States producers. One of the large American producers with plant in Canada were compelled to close their furnaces in this country for a week owing to failure of coke supplies. Prices held unchanged at $49.50 per ton.

LONDON MARKETS

LONDON, Feb. 14.—Business in London and surrounding district continues seasonably good. Most winter lines are in good demand. Prices continue firm and deliveries on goods are very slow. The loss of business caused by the heatless days was, of course, felt by the London merchants, although Friday of last week was turned into a very fair Saturday's business by the usual special advertising.

Iron Pipe Shows Advance $2 Ton

London.

IRON PIPE.—An advance of $2 per ton has been made effective in the price of wrought iron pipe. Manufacturers are finding it difficult to get supplies of raw materials through from the United States. New prices will be found in panel form elsewhere in this issue.

Post Hole Diggers And Slide Rules Up

London.

DIGGERS, RULES.—Higher prices have been announced for Universal post-hole diggers, new prices prevailing being as follows:—No. 1 by 5-foot handle, $26.50 dozen; No. 2 by 6-foot handle, $28 dozen. Master slide rules also show an upward tendency, advance providing for following prices:—4-foot, 80c each; 5-foot, $1 each; 6-foot, $1.20 each.

Table Cutlery And Fish Poles Up

London.

CUTLERY, FISHING POLES.—Another advance has been recorded in the Joseph Rodgers line of table cutlery amounting to approximately 10 per cent. This advance follows one recently made. Straight bamboo fish poles show a higher range in prices as follows:—12-foot, 90c dozen; 14-foot, $1.10 dozen; 16-foot, $1.40 dozen; 18-foot, $1.75 dozen.

Leather Soles And Heels Down 20 Per Cent.

London.

SOLES, HEELS.—A decline of approximately 20 per cent. has been made effective in the price of leather soles and heels. Lower price has been induced by reason of the heavy stocks being carried by manufacturers at present time. Prices on some of the popular sizes when figured on new basis are as follows:—Men's No. 121, assorted sizes, $4.20 dozen pairs; men's No. 122, assorted sizes, $4 dozen pairs; men's No. 123, assorted sizes, $3.80 dozen; men's No. 122, all size 11, $4.50 dozen. Boys' No. 31½, $2.85 dozen pairs; ladies' No. 37½, $2.25. Heels—Men's No. 51, $1.25 dozen pair; No. 52, $1.10 dozen; ladies' No. 80, $1 dozen; No. 81, 90c dozen pairs.

Crosscut Saws Go Higher By 10 Per Cent.

London.

SAWS. — Simonds' brand crosscut saws show an advance of approximately 10 per cent. during the week. Prices for Nos. 13, 22, 77, 113, 133, 315, and 325 are as follows:—5-foot, $4.95 each; 5½-foot, $5.85 each; 6-foot, $6.60 each.

Oil Heaters Steady

Prices were maintained on oil heaters during the week in the face of a good demand. Perfection No. 520 is quoted $6.25, No. 525 at $6, and No. 530 at $6.50. Discount to retail trade 25 per cent.

Cotton Goods Again Up Approximately 10%

London.

COTTON GOODS.—A further advance of approximately 10 per cent. has been made effective on such cotton goods as sash cord, cotton rope, seine twine, bag twine, candlewick, clothes lines, awning cord. Following are prices prevailing in this market:—Sash cord—No. 6, 67c lb.; No. 7, 66c; Nos. 8 to 12, 65c lb. Cotton rope—3-16 in., 61c lb.; ¼ in. and larger, 60c lb. Seine twine—No. 15 and smaller in 1-lb. cones, 77c lb.; No. 18 and larger, 1-lb. cones, 76c lb.; No. 15 and smaller, ¼-lb. cones, 78c lb.; No. 18 and larger, ¼-lb. cones, 77c lb. Cotton bag twine, 76c lb. Candlewick, 64c lb. Twisted cotton clothes line—30-foot, $2.35 dozen; 48-foot, $3.45 dozen; 60-foot, $4.25 dozen. Star braided cotton clothes lines, 50-foot, $4 dozen. Braided white awning cord—No. 3, $1.80 dozen; No. 3½, $2.10 dozen; No. 4, $3.20 dozen; No. 4½, $4.35 dozen.

Snowshoes and Foot Warmers

With the heavy snowfalls of the past winter there has been an excellent sale of snowshoes at following prices:—Ladies' 11 by 36, $2.85 pair; men's 12 by 42, $3.25 pair; men's 14 by 42, $4. There has also been a good sale of foot warmers at following prices:—No. 5B, $1.95 each; No. 7D, $2.50 each; coal for warmers, 80c dozen.

Netting and Screen Wire Unchanged

Prices on poultry netting hold unchanged at 15 per cent. off list for Canadian 2-inch and 1-inch mesh. Screen wire painted in 100-foot rolls is quoted at $3 per 100 square feet, while bronze screen wire is quoted at 14c per square foot. Harvest tools are unchanged at 25 per cent. discount off list. Spades and shovels are also steady in price, firsts being quoted at 30 per cent. discount, seconds at 20 and 2½ per cent., and fourths at 5 per cent. discount. Blue ribbon poultry fence, 10 rods to a roll, are quoted as follows:—24-inch, $4.30 per roll; 36-inch, $5.50 per roll; 48-inch, $6.50 per roll; 60-inch, $7.65 per roll; 72-inch, $8.75 per roll.

Lawn Mowers Soon in Use

Dealers are beginning to look forward to the trade in lawn mowers now that spring seems measurably nearer. Discounts on various lines are holding steady at 40 per cent. off list. Screen door spring hinges No. 20 are quoted at $17.75 gross pairs.

Borax Goes Higher; Rope Prices Firm

London.

BORAX, ROPE.—An advance in the price of borax has been made effective during the week, lump now being quoted at 14½c lb. and pulverized at 15c lb. Prices on rope are in strong market, but quotations are unchanged during the week at 39c lb. for pure Manila, 33c for British Manila and New Zealand hemp ropes, and 27½c lb. base for sisal rope.

Nails Firm; Staples Steady

Prices on standard steel wire nails are firmly maintained in view of the inability of some manufacturers to get quotations on wire rods from manufacturers in the United States. Wire nails are quoted at $5.20 per 100 lbs. base and cut nails at $5.60 base. Fence staples are holding steady in price, bright in kegs being quoted at $5.50 per 100 lbs. and in 25-lb. boxes at $5.75. Galvanized staples in kegs are quoted at $6.25 and in 25-lb. boxes at $6.50 per 100 lbs.

Linseed Oil Firm; Turpentine Steady

London.

LINSEED OIL, TURPENTINE.—Although a firm market prevails for linseed oil quotations held unchanged as follows:—1 to 2 barrels, raw $1.55 gallon, boiled $1.58; 3 to 5 barrels, raw

$1.54; boiled $1.57; 6 to 9 barrels, raw $1.52, boiled $1.55. Market for turpentine holds steady at 73c per gallon in single barrel lots and 72c per gallon in 2 to 4-barrel lots. In 5-gallon lots turpentine is quoted at 83c per gallon.

White Lead in Oil Unchanged

Quotations on white lead in oil hold unchanged at $15.70 per 100 lbs. in ton lots, and $16.05 in less than ton lots.

Glass Very Firm

The glass market is very firm, with indications pointing to higher prices. Quotations are still made on the basis of 40 per cent. off list for single and double diamond and 25 per cent. off list on cut lights. Putty gives no evidence of change in the near future. Standard in 25-lb., 50-lb. and 100-lb. drums is quoted at $5.15 per 100 lbs., with pure putty $1.75 higher than standard.

WINNIPEG MARKETS

WINNIPEG, February 14. — Changes for this week show numerous lines all on the upward trend and include blow torches, fire pots, barn door hangers, putty, pine tar, coal tar, lamp black, saw vises, plow pulleys, barn door latches, reel heads, harness hooks, implement brackets, whip racks and swivel plow clevises. Business for the past week shows the usual activity; country orders will no doubt fall off for the next week or ten days owing to the fact that many of the dealers will be in attendance at the bonspiel.

The new freight embargo placed on shipments during Saturday, Sunday and Monday of each week has just gone into force to allow the freer movements of food and coal. Shipments will therefore be somewhat delayed but it is felt no hardships will result and conditions will readjust themselves as weather conditions improve.

Blow Torches Advance Barn Door Hangers Up

Winnipeg.

BLOW TORCHES, FIRE POTS. — New prices just issued show an upward trend in prices on Clayton & Lambert torches and fire pots due to increases in raw material. New prices are quoted herewith on a few of the more familiar numbers:

Blow torches, No. 38, $7.40 each; No. 32, $8.25 each.

Fire pots, No. 71, $14 each; No. 72, $10.70 each.

Prices on barn door hangers generally hold firm with the exception of National which this week show an advance of approximately 10 per cent. and are quoted to-day at $13.80 doz. prs.

Pine Tar And Coal Tar Go Higher

Winnipeg.

PINE TAR, COAL TAR.—New prices have just been issued covering pine and coal tar and show a considerable increase over former prices, due to increased costs of production and the exceptionally high prices being demanded for cans. Prices ruling to-day are quoted herewith:

Pine tar, barrels, 70c gal.; 5 gal. cans, 85c gal.; 1 gal. cans, 95c gal.; ½ gal. cans, 54c each; ¼ gal. cans, $3.40 dozen; ⅛ gal. cans $2 dozen; 1/16 gal. cans, $1.30 dozen.

Coal tar barrels, $6 each; 5 gal. cans, 45c gal.; 1 gal. cans, 55c gal.; ½ gal. cans, 35c each; ¼ gal. cans, $2.25 dozen; ⅛ gal. cans, $1.35 dozen.

Lamp Black Up 30 To 50 Per Cent.

Winnipeg.

LAMP BLACK.—One of the heaviest advances reported in paint sundries of late is shown in prices just effective on lamp black which shows increase of from 30 to 50 per cent. over former quotations. New prices are quoted herewith:

1 lb. packages, barrel lots, 25c lb.; ½ lb. package, barrel lots, 30c lb.; ¼ lb. packages, barrel lots, 35c lb.; assorted sizes, barrel lots, 30c lb.

For less than barrel lots .01c per lb. advance over the above mentioned prices.

Bar Iron And Steel Remain Firm

Winnipeg.

BAR IRON AND STEEL.—The markets on bar iron and steel continue firm with only an occasional change during the past few months. The demand continues fair while stocks in general are fairly well assorted. Prices ruling today are quoted below: bar iron 3/16, ¼ and 5/16, $8.05 base, other sizes $5.60 base, band iron, 1¼ in., $6.30, 100 lbs.; 1½ in. $6.30 100 lbs. Sleighshoe steel, $5.80 base, common plow steel, $6.50; crucible plow steel, $7.50 100 lbs.; angle steel, $5.35; harrow tooth steel, $5.50 base, cast steel octagon 18c base; square tool steel 18c base; spring steel $7.50; machinery steel, $8.00 base; tire steel, $5.60 base; mild steel, 3/16, ¼ and 5/16, $8.05 base; other sizes, $5.80 base.

Hinges Steady; Advance Possible

Winnipeg.

HINGES.—Although prices still remain steady on all lines of hinges, reports indicate that further advances are imminent and no doubt will be effective during the month. Prices in the meantime remain firm as quoted: Light tee and strap 10 per cent.

Corrugated strap, 4 in., $1.70; 5 in., $2.10; 6 in., $2.85; 8 in., $4.60; 10 in., $7; 12 in., $10.75 doz. prs.

Corrugated tee, 4 in., $1.90; 5 in., $2.55; 6 in., $3.25; 8 in., $5.65; 10 in., $8.75; 12 in., $12.40 doz. prs.

Putty Advances 50c Per 100 Lbs.

Winnipeg.

PUTTY.—Prices on putty have moved up 50c per hundred lbs. This is the first advance in many months and is due to increased costs of containers and present high price of linseed oil. Bookings are now being taken for fall shipment at the following prices:

100 lb. drums	$5.50 100 lbs.
50 lb. drums	$5.65 100 lbs.
25 lb. drums	$5.80 100 lbs.
12½ lbs tins	$6.00 100 lbs.
5 lb. tins	$6.10 100 lbs.
Bladders	$6.25 100 lbs.
1½ lb. tins	$1.20 dozen

Linseed Advances 8c Gal.; Turpentine Steady

Winnipeg.

LINSEED OIL, TURPENTINE.—The linseed oil market which has been gaining in strength for some time due to flaxseed prices has again advanced and shows an increase of 8c per gallon over prices formerly quoted making to-day's price on raw, $1.73 gal.; boiled, $1.76 gal. No change is reported in turpentine with the market still very firm. Shipments at present continue light. Prices ruling at present are as follows: Barrels, 80c gal., ½ barrels, 83 gal.,; 5 gal. lots, 85c gal.; 1 gal. lots, 85c gal.; plus the usual extras for containers.

Miscellaneous Lines Show Advances

Winnipeg.

MISCELLANEOUS HARDWARE. — The following miscellaneous lines of hardware have just been advanced in accordance with new prices named by the manufacturers and show increases of from 5 to 20 per cent. over old quotations:

Saw vises No. 80, $8.25; No. 105, $15 dozen.

Plow pulleys, No. 3, $1.10; No. 2, $1.10 each.

Barn door latches, No. 9, $5 doz.

Clothes line reel heads, No. 1, $17.40; No. 2, $19.80· Adams, $22.20 dozen.

Harness hooks, No. 16, $2.25; No. 18, $5.50 dozen.

Implement brackets, No. 29, $6.40; No. 31, $7.50 doz.

Whip racks, No. 74, $1.90 dozen.

Swivel plow clevises, No. 2824, $3.20; No. 2839, $5.40 dozen.

CAR SHORTAGE MEANS CHARCOAL FAMINE

MERCHANTS in most of the cities both in Ontario and Quebec, who have built up a considerable trade in charcoal, are having a good deal of difficulty in explaining to their customers just why it is that charcoal is not to be had. The reason is that charcoal manufacturers with abundant supplies available at their mills are unable to get a car to move the accumulating supply. As a result something like a charcoal famine has developed.

WEEKLY PAINT DEPARTMENT

Preparing for the Big Spring Drive

Outlook Promising—The Real Value of Paint—Selling Paint Insurance—Paint an Investment, Not Expense—Conservation and Paint Allied

PREPARATIONS are already being made for the big spring drive on paints. This is evident from the number of merchants who have already received shipment of their Spring orders and the fact that manufacturers are busy getting goods on the way to all their customers.

Outlook is Promising

Prospects for spring business this year are very bright. There are many who have, during the past two or three years, put off painting on account of the war—until conditions would seem to warrant the expenditure of the necessary money. These property owners have now reached the point where they must paint or suffer severe loss from deterioration. There is no greater preservative than paint—there is no better method of maintaining property values than by renewing with good paint.

Make Plans Now

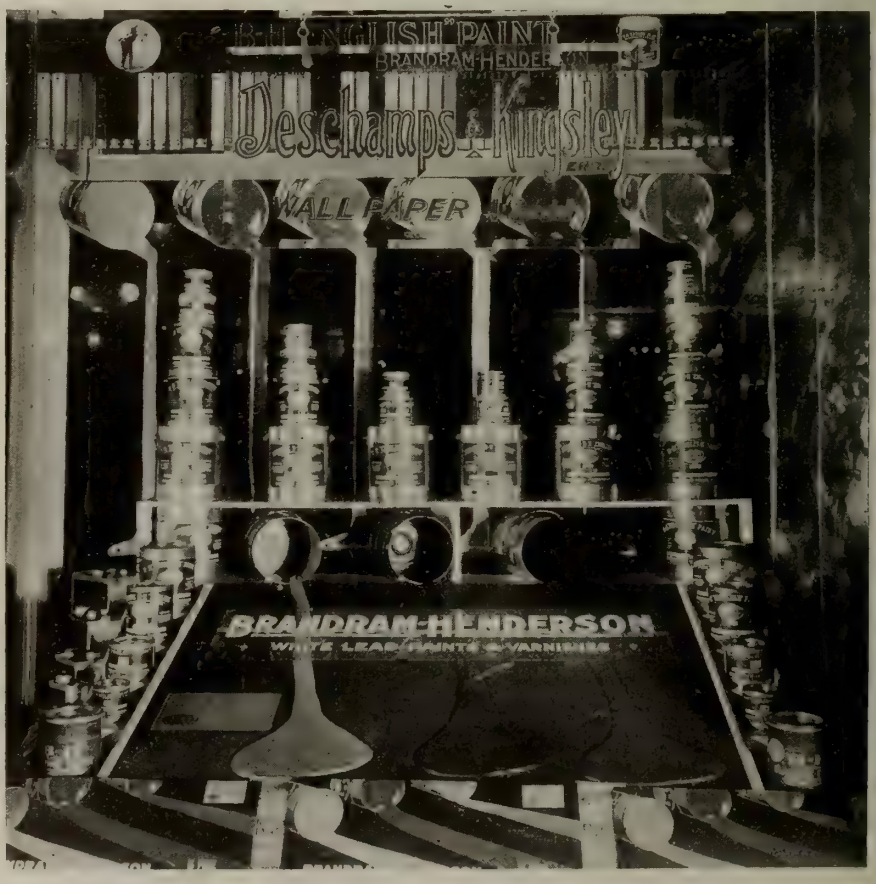
Hardwaremen then should prepare for big business this spring. Already plans should be formulated to cultivate business for the paint department. A campaign of education should be started now to show the property holder wherein the greatest possible economy is exercised by spending money for paint.

The Real Value of Paint

Any merchant to be successful in selling paint must realise its value—must know wherein the difference lies between buildings that are painted and those that are not—must be able to show how farm machinery that is painted outlasts many times that which is never, must point out to the employer of labor the stimulating effect a bright, clean interior has on the work of his employees as against dingy surroundings. These are only a few angles of situations which may develop in the sale of this necessary commodity, but each point from which a prospect can be approached should be studied carefully and business solicited on that basis.

Selling Paint Insurance

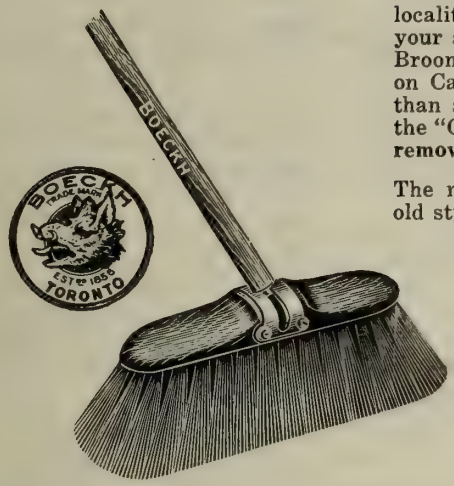
Why is it the life insurance companies flourish—why is it that ever since the war has started their business has grown so remarkably? Because they are selling a service—and this is a point which the successful paint salesman must bear in mind—he is selling a service. Every paint salesman has paint insurance to sell, and once this idea is firmly implanted and his line of attack based on accurate knowledge, he will go "over the top" with decided gains in the amount of his sales slips.



Paint an Investment—Not Expense

When any man spends two, three, five, or ten thousand dollars or more in building a house, putting up an office building, or erecting an industrial plant, is he going to let that property deteriorate if he realises the value of paint insurance? Not by any means, but the average individual thinks only of paint as an expense in dollars and cents; he doesn't realise that one hundred dollars' worth of paint will save and increase the value of a five or ten thousand-dollar property. Are you, as a merchant, as a distributor of paint, emphasizing this point strongly enough?

Big Field For Action



The hardware merchant in the average community has a big field for sales of paint. The house in town, both inside and out, the garage, the office, the factory, the store, are all good prospects. Then where a farming community is served there's the farm house, the barns, implement sheds, farm machinery—in fact it is only when the merchant gets down to an analysis of the possibilities of his trade that he sees how much he can solicit business on.

Walk through your town, drive through the country and what do you see? Any number of buildings with no

The window display is one of the most effective means of creating paint interest. Keep the public watching for your window displays and work in paint often. The paint department is bound to benefit.

When they know what the "Clean Sweep" Brooms will do

As soon as the "Clean Sweep" Broom, that sweeps cleaner and lasts longer than corn brooms, becomes known in your locality, you'll have plenty of sales. What is required is your assurance to your customers that the "Clean Sweep" Broom will do a cleaner, more sanitary job of sweeping on Carpets, Linoleums, Oil Cloths, Hardwood Floors, etc., than any corn broom made. You can tell them, too, that the "Clean Sweep" Broom is as dustless as an oily mop, but **removes the dirt instead of rubbing it in.**

The material does not break off as is the case with the old style Corn Brooms.

"Clean Sweep" Brooms are made with adjustable "Screw Lock" handles, which allows the Broom to be placed in different positions, according to the height of the user and for convenience in sweeping.

Get our prices, they'll interest you.

Toronto

Point your customers to Muresco

Greatly increased prices on wall papers and higher cost and scarcity of labor combine to fill the mind of the average householder with misgiving on the question of home decoration. It's going to cost considerably more than usual to hang wall paper this Spring.

With profit to yourself you can help your customers out of their dilemma by bringing to their attention the merits of Muresco as an artistic decoration for walls and ceilings. Muresco offers a wide choice of tints from which many pleasing combinations can be evolved. Muresco is economical, sanitary, pleasing. Boost Muresco.

Benjamin Moore & Co. LIMITED

WEST TORONTO

paint on whatever, others that had a coat of paint at time of erection, but none since, others again which have been painted at regular intervals.

Examine the Property Yourself

There in those three types the merchant has a means of comparison, and it often takes a close-up view of these to bring the need and value of paint home even to the dealer. Any merchant who will examine three buildings erected about the same time and that have been treated as mentioned above will not need further evidence on the question of how quickly deterioration develops. This phase of the paint business can be made one of the strongest arguments the salesman can use, and will show what is really meant by paint insurance.

Selling Value in Paint

Too often does the question of price worry the dealer. A customer who has been sold on the real merit of the paint, on its value to his property, both from the standpoint of appearance and preserving qualities, will not let the matter of a few dollars stand in the way of his purchase.

Should, however, the question of price be a big factor in the sale, and it sometimes so happens, it could be pointed out to the prospective purchaser that the paint really only represents about twenty-five per cent of the total cost of the average job, seventy-fie per cent being labor. It might be thought that this would surely stop the buyer from making the purchase, but when he is sufficiently interested to inquire for paint, this man has usually considered the cost of labor and not found it prohibitive.

Maintaining Property Values

The high cost of materials and the shortage of labor will have a tendency to restrict building operations. However, those buildings which are already up need paint, and it is when slackness is apparent in the number of new buildings going up that the merchant has an opportunity to impress on his customers how essential is the use of paint in keeping present quarters in prime condition.

Conservation and Paint

Conservation has never been urged so strongly nor its real meaning divulged to its present magnitude prior to the war. It is the watchward of the allied nations, it has a real message to the dealer in paints. Are you taking advantage of the cry for conservation?

Conserving property is essentially one of the most important duties devolving on the citizens right in your own community. One of the surest ways to conserve property is to have it properly painted. Conservation and paint in relation to property are closely allied, they work together only, never apart. The use of paint means conservation, conservation is possible only through the use of paint.

Ammunition For The Big Drive

Looking on paint in its value as insurance and as a conservation measure, the merchant has two strong weapons to wield in his sales campaign. And the present is none too soon to begin.

Studying the Field

Many merchants have already gone over their mailing list to bring same up to date. Others are now busy in getting same ready for use. Paint is one line which can be sold to virtually every customer on that list. Get your advertising matter ready and start it working for you now.

Use the mails, use the newspaper, use the window, use the store interior. Four mediums which can be worked together in such a way that the people will become curious about all you say and show and when enquiries start it is the salesmen's duty to follow up in such a manner that sales are made.

Paint insurance is a mighty good thing to sell. Conservation of property is only possible through the frequent use of paint.

PAINT MANUFACTURERS INCORPORATED

Stewart & Wood, paint manufacturers, Toronto, Ont., have been incorporated with a capital of $100,000, E. T. Dean being managing director.

The firm was established in 1884 by W. D. Stewart and R. A. Wood, both now deceased. The present incorporation reveals executive positions being held by three members who have been associated with the firm for a great number of years.

E. T. Dean is managing director and treasurer, and dates his connection with the firm back to 1885. Mr. Dean states that an aggressive selling policy will be adopted and the principles on which the business was originally based maintained.

H. G. White, vice-president, started with the company in 1886. W. W. Schoales, secretary, has about 15 years' of service to his credit.

In speaking of business conditions, Mr. Dean stated that the difficulties which their travellers experienced in covering their territories owing to severe weather conditions and restricted railway service, had had a tendency to delay shipments somewhat, but he was by no means pessimistic about the outlook.

SIXTH ANNUAL CONVENTION

(Continued from page 36)

Regular production of business, cooperation, trade and its prospects in Nova Scotia and New Brunswick, &c.

Plumbing in all its various details was a long seesion.

Then followed a visit to the lead pipe presses and lead pipe of all sizes, taps and bends, &c., were made.

Another session was taken up giving practical demonstration of the manufacture of brass goods, such as soldering nipples, brass ferrules, &c.

One evening was given over to a smoking concert held in the large showroom at the head office and at which, in addition to the salesmen, the whole office staff and the foremen of the various departments were invited. This was a great success and the fun was fast and furious and when the convention song was sung it made the rafters ring and was only second to the hearty way in which the National Anthem brought the concert to a close.

At the conclusion of the convention votes of thanks were given to Mr. W. G. Harris, Sr., Mr. W. G. Harris, Jr., and Mr. H. C. Crow. Mr. Harris, Sr., in response stated that even though it meant a tremendous amount of thought and care to prepare and carry a convention to such a successful issue, it was labor well worth while when every one took such intense interest in it and he hoped that each one would go away feeling that a greater knowledge of the goods manufactured by the Canada Metal Co., Ltd., had been gained and that they would feel satisfied that the aim to give service and maintain the reputation for denpendability was well backed up by equipment in each department being the best that money and brains could produce.

CONVENTION PROGRAM NOW COMPLETE

(Continued from page 31)

ers' Convention in Hamilton on February 19, 20, 21, 1918.

Purchase a one-way ordinary first-class adult fare ticket (fare not to be less than 50c.) to Hamilton and obtain from ticket agent a Standard Convention Certificate (Form 24.)

At first meeting you attend hand your certificate to the secretary of the association for endorsement and for validation by the special agent of the railway lines.

After validation, the certificate will be returned to you on payment of fee of 25c. and must be presented to ticket agent to obtain return ticket at least thirty minutes before the departure of train.

After paying 25c. validation fee, the return fares will be as follows:

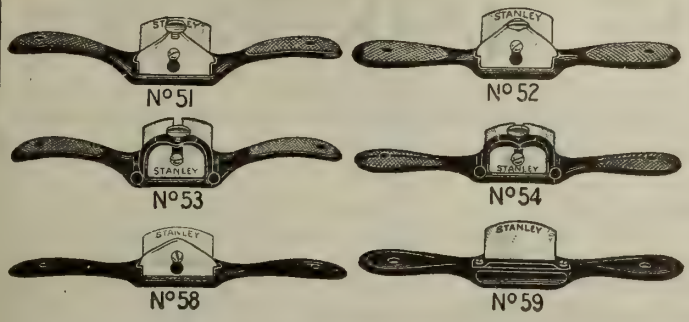
If certified attendance is 99 or less, two-thirds one-way ordinary first-class adult fare.

100 to 299, one-third one way ordinary first-class adult fare.

300 or more, return trip ticket without further charge.

Special Notice

Don't fail to ask for standard convention certificate when buying your ticket.



Don't fail to deposit same with secretary of association at first opportunity.

Don't fail to exchange certificate for a return ticket when you are leaving Hamilton, and at least thirty minutes before train departs.

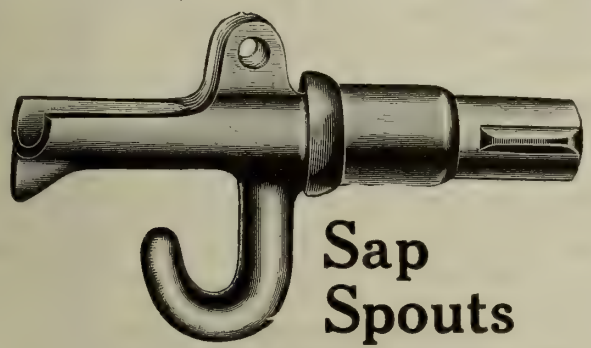
Going tickets may be purchased Feb. 15 to 21.

Returning tickets may be purchased up to Feb. 25 inclusive.

Stanley Tools

"Bailey" Iron Spoke Shaves

MADE IN OUR CANADIAN WORKS



Only a few of the numbers manufactured are shown in the illustration. The cutters of all numbers are made from a high grade of steel, well tempered and sharpened ready for use.

Made with two styles of Handles, raised and straight, and through each a hole is made so that when not in use the tool may be hung up out of the way.

You cannot do better than stock this line.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Feb. 14.—Paint men are very busy grinding the quantities of paint that will soon have to be shipped out. There is a certain activity in sight, as retailers are beginning to realize the delays that are inevitable these days in getting shipments through, and it is thought there will be an earlier painting season than usual. Linseed oil's strength is shown in an advance of 2c per gallon, and at this it is very scarce. Some are still withholding quotations, and there is little desire to sell. It is hoped that the weather will soon permit of better movement of seed, which will be welcomed. Turpentine holds in a steady market locally, as does also white lead in oil. Glass is scarce and orders for import are not being accepted in some quarters. Putty is held unchanged.

Continued Shortage Sends Linseed Oil Up 2c

Montreal.

LINSEED OIL.—The increasing congestion has not improved the crushers' market, and oil is not only firm, but the price has advanced 2c a gallon. None of the jobbers are seeking business, and there is an inclination to defer deliveries in view of the difficulty of getting further stock to use in paint manufacture. Prices have been withdrawn entirely in some quarters for the time being, although a few barrels are sent out occasionally where the need is great. Seed movement is very confined, and while the various manufacturers are helpful of relief within a short time, there is nothing that can be banked on that will give them assurance of better conditions in the immediate future. There is a firm tendency in the southern markets as well.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1 54½	$1 56½
5 to 9 barrels	1 53	1 55½
10 to 25 barrels	1 52	1 54½

Turpentine Holds Well In Local And Primary Points

Montreal.

TURPENTINE.—In view of the fact that deliveries have been so poor for me weeks, it is to the credit of the dealers that stocks have been of e to prevent any great short- etail demand being light in ths has assisted in the n continuing fairly re steady. In the primary markets there is a steady condition. It is stated that the prices will very likely be firmer in the near future as soon as trading begins to be active.

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.69-$0.72
1 barrel lots	0.70- 0.73
Small quantities	- 0.83

Mixed Paints Being Booked Quite Freely

Montreal.

MIXED PAINT.—From all sources there are good reports regarding the outlook for spring business. In view of the seriousness of transportation some of the dealers outside are writing in to their paint firms asking that shipment of spring orders be made promptly and in some cases shipments are now being arranged for. It is felt that the painting season will begin early, if weather conditions permit. This will mean that business will soon be very brisk, and that the retail trade will probably be planning for the selling campaign that usually comes toward late spring well in advance. It is felt that a good deal of satisfaction will be felt regarding the recent decisions as to the number of colors to be manufactured later.

Glass Very Scarce; Putty Holds Firmly

Montreal.

GLASS AND PUTTY.—The glass situation is characterized by much firmness. One large importer stated that no orders whatever were being taken by his firm for import, and that all orders were being filled from stock. Of these orders for immediate delivery there is a fair number, and while spot stocks are confined orders are being filled. There is some likelihood of a firmer price basis if the outlook as to import and general transportation is not bettered. Putty is holding with a firm undertone, but without change. Prices for this are as follows:

Standard Putty—	100 lbs. per 5 ton	1 ton	Less
Bulk, in barrels	$3.75	$3.90	$4.10
Do., ½ barrels	3.90	4.05	4.25
Do., 100 lb.	4.60	4.75	4.95
Do., 25 lb.	4.60	4.75	4.95
Do., 12½ lb.	4.85	5.00	5.20
3 and 5 lb. tins	6.60	6.75	6.95
1 and 2 lb. tins	7.10	7.25	7.45

Pure linseed oil putty—$1.75 per 100 lb. advance on above prices.

Glaziers' putty—$1.35 per 100 lb. advance on above prices.

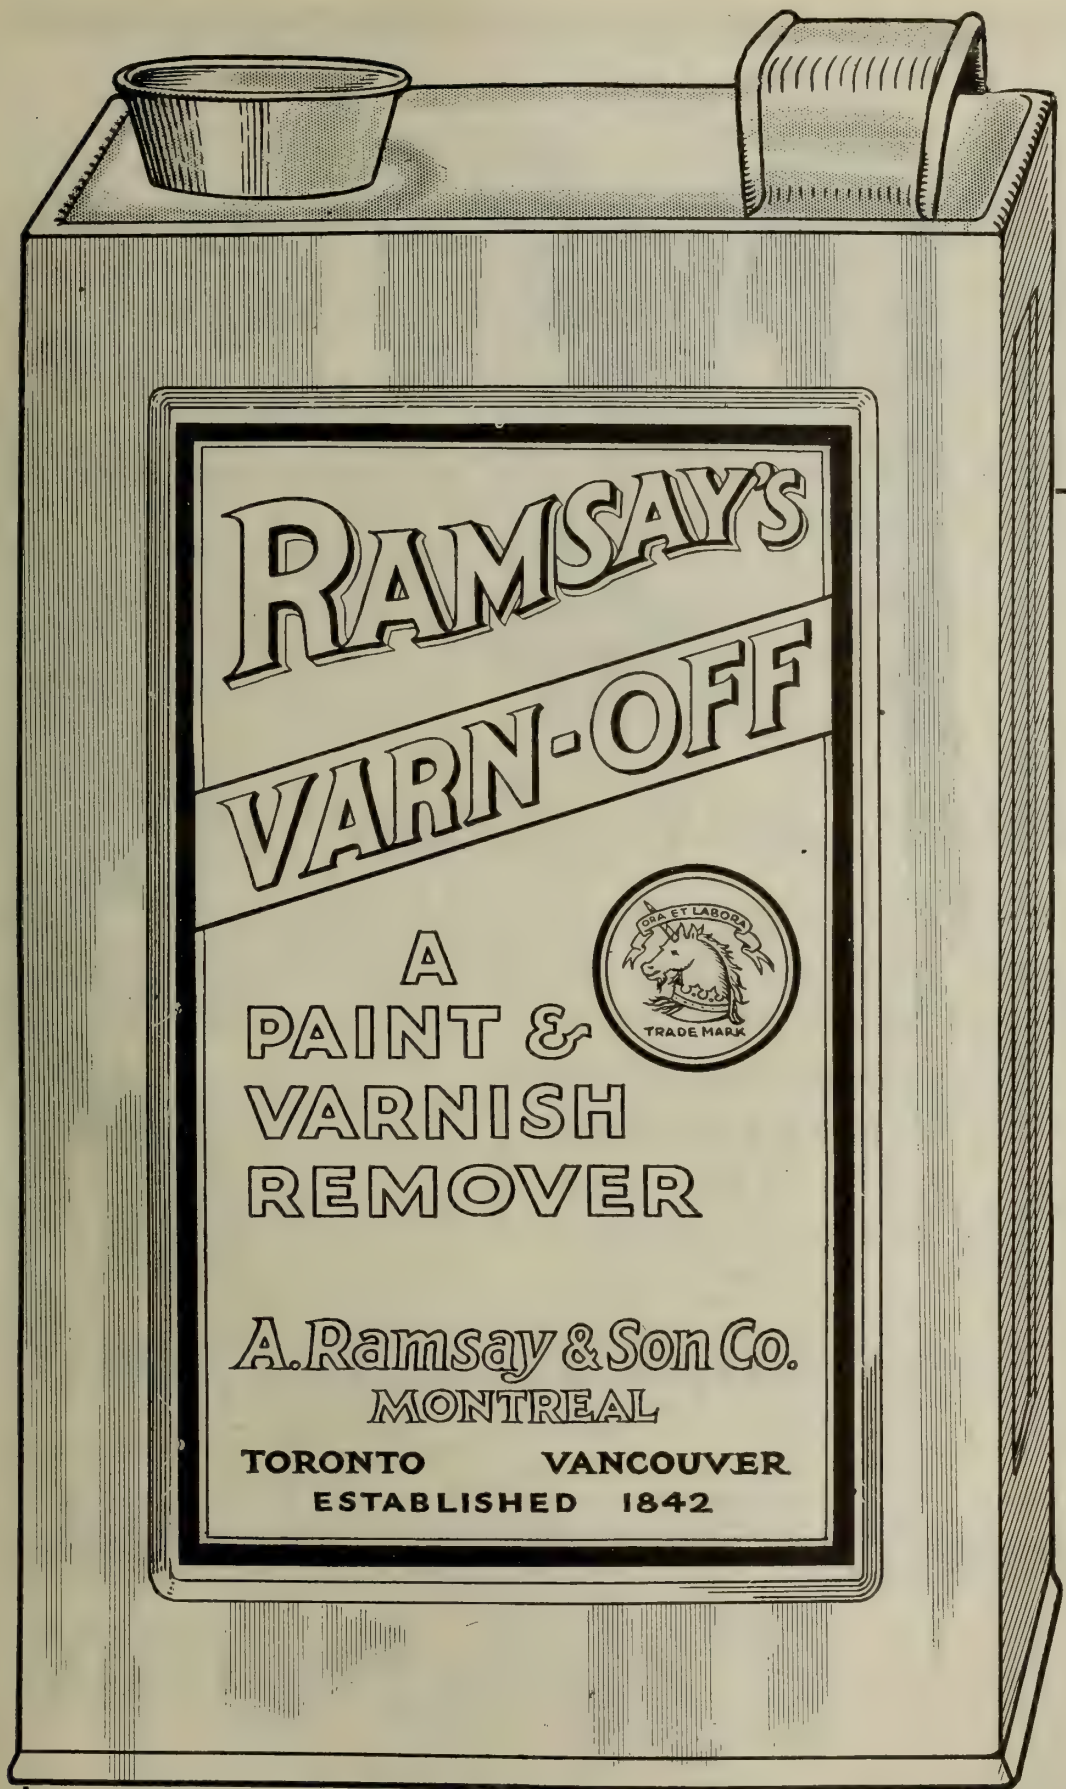
White Lead In Oil Holds And Some Bookings Taken

Montreal.

WHITE LEAD IN OIL.—The amount of business for this product is very good when considered in the light of spring bookings. For immediate shipment the sales are light. Prices have been maintained, and these are as follows:—Five-ton lots, $15 per 100 lbs.; ton lots, $15.50, and smaller quantities, $15.85 per 100 lbs. All dealers seem agreed that prices will be well maintained.

TORONTO

TORONTO, Feb. 14.—Greatest interest centred around the linseed oil situation during the week. There has been keener inquiry for oil but dealers have been unable to secure supplies to meet the requirements of the trade. The tight situation revolves around the difficulty of crushers to get their shipments of seed from the Canadian West. Turpentine held steady. Glass is in strong market. White lead in oil holds in steady position in the face of a light demand. Business conditions generally in the paint and oil trade are quite encouraging but wholesalers are handicapped by reason of the freight situation.



Linseed Oil Firm With Upward Tendency

Toronto.

LINSEED OIL.—There was a continuation of the strong market for linseed oil during the week with prices showing a higher range from the low quotations of last week. Range of prices on single bbl. lots is now narrowed, $1.54 to $1.55 being quoted for raw oil. Crushers are still in a difficult position with respect to seed, as arrivals for East have practically been nil during the week. There is plenty of seed purchased and in the elevators at the head of the lakes but the difficulty lies in getting the railways to move it eastward. Flaxseed in the West was slightly higher during the week, the May option being quoted on the basis of $3.32 on Wednesday of last week and at $3.34⅝ on Wednesday of this week. Oil cake is in excellent demand and any available supplies find a ready market. Dealers report a keener interest in linseed oil as inquiry has been more noticeable during the week. Stocks are light and insufficient to meet the demand.

	Raw, Imp. Gal.	Boiled, Imp. Gal.
1 to 2 bbls.	$1.54-$1.55	$1.56½-$1.58
3 to 5 bbls.	1.54- 1.54	1.56½- 1.57
6 to 9 bbls.	1.53- 1.52	1.55½- 1.55

Less than barrel lots 10c per gallon higher than single barrel price.

A Paint or Varnish Remover that removes rapidly and does not hurt the hands or wood.

Toronto MONTREAL Vancouver

Turpentine Production May Decrease This Year

Toronto.

TURPENTINE.—The market for turpentine held in a steady position during the week, there being no disposition to change prices. From the producing sections of the South comes the echo that production is likely to decrease from 25 to 40 per cent. for the present year as compared with last year. The grounds for this belief are stated to be the light purchase of axes and cups up to the present. This is the time of year when factors begin to prepare for the new crop. There is expected to be a shortage of labor in the South this year as inducements may be held out to the able-bodied negroes to go North and West to handle freights. Prices of turpentine have held at a comparatively low figure during the past season and factors of the South seem not inclined to exert themselves toward production this year. With a decline in production prices might ultimately be given an impetus toward higher levels. Stocks in the local market are light, quotations holding unchanged on the basis of 70c to 73c per gallon in single barrel lots.

	Imp. gal.
1 barrel	$0.70-$0.73
2 to 4 barrels	0.69- 0.72
5 gallon lots	0.77- 0.83

White Lead In Oil Movement Is Slow

Toronto.

WHITE LEAD IN OIL.—Dealers report that the movement in white lead in oil is not active. Concessions have even been made in certain instances in an endeavor to move stocks but efforts along this line have been unavailing. With the coming of spring it is anticipated a greater stimulus may be given to purchasing. Linseed oil holds in very firm market and pig lead shows an undertone of firmness with slightly higher prices in the primary market during the week. With basic conditions as they are at present it would seem that white lead in oil is likely to hold steady in price in the immediate future. Quotations were made on the basis of $15.70 per hundred pounds in ton lots and $16.05 in less than ton lots.

Putty Market Steady; Glass In Strong Position

Toronto.

PUTTY, GLASS.—There was a steady market for putty during the week. There has been a fairly good demand for putty in 100-lb. drums within recent weeks and prices quoted at $5.05 are likely to disappear after the present week. Quotations will in all probability be made quite generally on the basis of $5.15 per hundred pounds in 100-lbs. drums. Manufacturers are having difficulty in getting sufficient supplies of whiting to keep their plants running, but higher prices are not anticipated in the immediate future as a result of this condition.

Glass continues in a very strong market with indications that higher prices are quite probable in the not distant future. Conditions of manufacture in the United States show no signs of improvement and stocks of glass in the local market are getting within narrow compass on many sizes. Discount holds unchanged at 40 per cent. on box glass and 25 per cent. on cut lights. A further advance by the United States manufacturers has been announced amounting to 15 to 20 per cent. There has been a good demand for glass in the local market to help in the rebuilding of Halifax. This has naturally reduced stocks greatly. Plate glass is also in strong position. There is every likelihood that both box glass and plate glass will advance in the near future.

Conditions In Paint Trade Are Promising

Toronto.

MIXED PAINT.—Business conditions in the mixed paint trade continue to be quite satisfactory. Manufacturers' representatives are finding their operations hampered through the difficulties attending railway travel these days. Usually they find when they reach a town they have no trouble in inducing dealers to take fairly good sized orders. Sorting business for immediate delivery is seasonably light. Conditions in the railway world would prevent free shipment even if there was a demand at this season. An advance has been recorded in Muresco which now makes the price in 5-lb. packages for tints $7.80 and white at $7.20 per 100 lbs., an increase of 60c per 100 lbs.

PIG IRON PRODUCTION REDUCED 50 PER CENT.

The pig-iron statistics for January give a measure of what the steel industry has suffered from the unparalleled weather and transportation conditions of the past month, says the "Iron Age" of February 6. Output fell to 2,411,768 tons, or 77,799 tons a day, against 2,882,918 tons in December, or 92,997 tons a day. January production was thus the smallest since May, 1915.

On Feb. 1 the number of active furnaces was 310, while on Jan. 1 it was 321 and on Dec. 1, 345. How repeated bankings have crippled operations appears from the fact that in May, 1915, only 200 furnaces were at work to produce 73,015 tons a day, whereas last month it took an average of 315 furnaces to produce 77,799 tons a day.

To-day's situation is much more discouraging than the January figures show. Severe cold suddenly swept down this week on the Middle West, the heart of the iron and steel producing section of the country, and for the first six days of February pig iron production has probably been at less than 50 per cent. of capacity. In January it was at the yearly rate of 28,700,000 tons while the total for 1917 was about 38,600,000 tons. To-day the rate is probably under 22,000,000 tons a year.

It is quite certain that more furnaces in the Pittsburgh and Youngstown districts will bank this week. No cars were loaded with Connellsville coke on Tuesday and the movement of bituminous coal to manufacturing plants in the week has been not far from 40 per cent. of normal.

The steel industry of the country, according to the best data obtaining, is operating on a 50 per cent. basis, and some plants at no more than 25 per cent. No decided improvement is to be expected for several weeks, so serious is the derangement of every part of the machinery of transportation both in raw and finished materials. Producers will be many days working out of the glut of their own output which now prevents any measurable increase in rolling mill operations. At some plants the situation is simply chaotic.

PRACTICAL SHEET METAL WORKS

(Continued from page 37.)

in line with the stretchout shown in Fig. 3 from the various intersections on joint L M N in the elevation Fig. 1, until all the stretchout lines have been crossed in Fig. 3.

Now draw the curved lines from N to M. M to F. F to M and M to N. Crossing each point already crossed as shown at 1,2,3,4,5,6,7, et. The outline MFM. N N O O is the pattern for the branch piece required.

An allowance must be made for seams and joints, these to be determined by the person making the pipe. If a riveted joint, only one width of caps would be necessary, but if a locked seam is required it would be necessary to allow three times the width of the lock.

Can You Imagine a Man or Boy

Who Wouldn't Like to Own This Kit?

No matter what a man's occupation may be, he will find daily use for the "So Handy" Pocket Knife Tool Kit. Autoist, Sportsman, Hunter, Farmer, Boy Scout—these, especially, will find it a pleasing and practical pocket companion. Excellent, too, for use around the home.

Outfit comprises a splendid Jack Knife with cocoa handle and an exceptionally good blade, and the following tools which can be instantly attached to the knife handle: File, Chisel, Reamer, Screw Driver, Bottle Opener, Gimlet and Rule, all made of high grade steel, carefully hardened and oil tempered.

The So Handy Kit is made in five styles. Jobbers—get posted about this good specialty.

RETAIL PRICE $1.50.

JAMIESON'S

CROWN

ANCHOR

PREPARED PAINTS READY TO USE

The line of paint that you make your leader either credits or discredits your business ability and integrity. Your customer buys by promise, but he judges by performance. What the paint actually **does** accomplish will be weighed against what you and the maker **claim** for it.

Consider your own interests

We are so certain of the performance of Crown and Anchor Paint that we guarantee it. You are thus assured that the promises we make through you will be literally carried out by the paint itself.

Consider your own interests as well as your customer's, and have as your leader this paint whose performance justifies your promises.

Terms 2% 30 days, approved credit.

Prices—Ontario, Quebec and Maritime Provinces.

While the foregoing prices on iron pipe are the nominal prices, it has been found in practice that prospective buyers should ask for quotations on sizes 2½ inches and larger on account of the shortage of these sizes and the extra difficulty of procuring supplies.

WANTED—COMMISSION AGENTS LOCATED in Sherbrooke can handle two or three more specialty lines to sell to hardware and manufacturing trade in Eastern Townships, Province of Quebec. Address P.O. Box 357, Sherbrooke, Que.

POSITION WANTED

WANTED—POSITION AS MANAGER FOR retail store, in city or country, or as city or country salesman; 15 years general hardware experience. Box 737, Hardware and Metal.

WANTED — POSITION IN CONNECTION with buying and managing of large retail hardware or hardware department in department store, or buyer in mail order. Have had wide experience. At present well employed, but wish a change to larger possibilities. Winnipeg or further west preferred. Box 793, Hardware and Metal.

FOR SALE

FOR SALE — HARDWARE STOCK AND buildings, living rooms over. Machine agency in connection. In Saskatchewan. Stock about $5,000. Good terms to right man; must have some cash. Good reasons for selling. No city property wanted. Apply Box 732, Hardware and Metal.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

FOR SALE

FOR SALE — HARDWARE, FURNITURE, stove and tin business. Good farm trade. R. McClanahan, Belwood, Wellington County.

HARDWARE BUSINESS FOR SALE—IN AN Ontario marine town; $4,000 stock at a discount. Owner wishes to retire. Box 735, Hardware and Metal.

Wa-ko-ver Stain makes permanent friends

Wa-ko-ver Stain has the happy faculty of improving on acquaintance. To the householder who has never before used it the first application is a distinct revelation. The ease with which it is laid and its evenness of shade make a very favorable impression that is heightened by the brilliant gloss finish.

Once Wa-ko-ver has been applied it seems almost impossible to wear it out. Whether on floor or woodwork it continues to display a beautiful clear finish that is always "just like new." Wa-ko-ver holds the friends it makes by durability and permanence.

You can have Wa-ko-ver making permanent friends for you if there is no Stephens' Agency in your locality. Write us to-day about our interesting proposition.

"There, John! That's what Sells Pratt & Lambert Varnishes for Us."

SMASH! SMASH! One after another the big full-page advertisements of the Pratt & Lambert Spring Campaign are going to hammer their message into the mind of the American public. This is not to be a campaign with a mere handful of page advertisements bolstered up with a lot of small space. Practically every advertisement occupies a full page — and all are in publications of largest or most exclusive circulation, such as the Saturday Evening Post, the American, the Ladies' Home Journal, House Beautiful and Country Life in America. The opening gun of the campaign is a

FULL-PAGE PRATT & LAMBERT ADVERTISEMENT IN THE SATURDAY EVENING POST ISSUE OF MARCH 2ND

Buy a copy. If you're a Pratt & Lambert dealer already, read it through. See if it doesn't give you a feeling of confidence in the goods you're selling — a feeling that the makers of Pratt & Lambert varnishes are willing to *stand back of their product.*

Then tear out the advertisement and paste it in your window.

If you haven't yet stocked the P&L Line, read this Post advertisement. Estimate for yourself the benefits that have accrued to the paint and hardware dealers who have been getting the benefit of this constant, powerful advertising, every season for *ten years.* Then imagine the sales value to you of a line of varnishes backed by ten years of cumulative publicity — products resting on sixty-nine years' experience and a full decade in the continual searching spotlight of national advertising.

Then write for the Pratt & Lambert Dealer Proposition.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

THE GREATEST OPPORTUNITY

will present itself to all Martin-Senour dealer agents during the year 1918 for making a big increase in their paint and varnish sales.

Economy and Conservation

have become an absolute necessity. This truth is being impressed upon us from all sides. The urgent need for the conservation of what we have is bound to create an extra demand for good paint because of its great protecting and preserving qualities. Good paint is the only weapon ever devised that will successfully withstand the unceasing attack of time and weather on all exposed surfaces.

MARTIN-SENOUR
PAINTS AND VARNISHES

with their absolute guarantee for quality, will put you in a front rank position to meet this extra demand. See to it that you are fully prepared with a complete, well assorted stock of Martin-Senour Paint and Varnishes to take advantage of this opportunity. Martin-Senour co-operation for 1918 in the way of strong selling helps, special mailing campaign, and wide national advertising, will be the greatest we have ever attempted, and will also help materially in bringing to your store every paint prospect in your locality.

If you are not already one of our successful Dealer Agents, become one at once.

SHERWIN-WILLIAMS
VARNISH STAIN

The Stain Your Customers Want

Is a stain that is made with a high-grade varnish, producing a finish on old or badly scratched furniture that makes it look like new. It is made in beautiful shades, permanent in color and of beautiful tone.

A Combined Varnish and Stain for Use Around the Home

Furniture and wood-work in the home need touching up now and then. Naturally the housewife wants a stain she knows will produce satisfactory results, that is Sherwin-Williams Varnish Stain, and will insist on using no other.

Be ready to meet this demand created by the well-known quality of the goods and our extensive advertising campaign.

If you have not a good stock of Sherwin-Williams Varnish Stain on your shelves order now.

WANTED IMMEDIATELY
Advertising Manager

A MANAGER is wanted by HARDWARE AND METAL to work in Montreal. Successful applicant will be paid a good salary, and will have a very fine opportunity to improve his position.

The successful man will be one who has a good knowledge of advertising theory and practice, and will have salesmanship ability in goodly measure. He ought to be able to devise advertising campaigns for HARDWARE AND METAL for advertisers called on. We do not believe in calling on and taking up time of advertising prospects unless we have definite and constructive suggestions to assist them in their sales problems. For this reason our salesmen are always welcome. If he can make good copy suggestions and put up good ideas, so much the better.

The position is an important one. The field to be covered is rich with good prospects. The classes of firms who can use HARDWARE AND METAL are experiencing prosperous times.

Give full particulars in first letter so as to cut down time-consuming correspondence. State past experience and connections; age, married or single; salary previously earned, and other information which an employer desires to know.

SAGER AXES always make Satisfied Customers

because of their sterling quality and excellent design. Our "Sager" special chemical process of tempering gives Sager axes their individuality.

Soo Line Logging Tools

Lumbermen prefer Soo Line Logging Tools because of the careful attention given to the design and their dependability when subject to hard usage.

We desire to impress upon the Merchants the necessity of placing orders NOW for Peavies, Pike Poles, etc., for Spring trade, as otherwise they may be disappointed in being unable to obtain deliveries.

Mr. Dealer: Sell This Fence

Establish a trade that will stay with you and at the same time will show a substantial growth. Compare this strong, rustless, unyielding fence alongside flimsy netting, and every poultry raiser will flock to your store. Note the close spaces at bottom that turns the small chicks and keeps out intruders.

SEND FOR LITERATURE

Get our catalogue of fencing for all purposes. Every foot of it guaranteed. Write today for agency in open territory. Our fence in every instance backs up our advertising.

Separators a Paying Line for Hardwaremen!

Cream separators are a **staple** article, used in the majority of farm homes. You are overlooking a worth-while opportunity if you neglect this profitable part of dairy equipment. But, above all, handle a machine that will give every-day satisfaction, since separators are used twice a day, and three hundred and sixty-five days a year. Many a

SHARPLES
SUCTION-FEED
CREAM SEPARATOR

has not cost a dollar for repairs in 15 years—convincing proof of their satisfaction-giving qualities, and their rugged durability.

Again, Sharples outstrips all competition, since it is vitally different in construction from any other separator on the market. Nor can other separators approach it in performance or construction, since the principles on which it is built are basically patented.

Sharples differs from all others because it skims clean and delivers even cream at *all* speeds; because you can turn faster and skim quicker; because of discless bowl (just *one* piece in it); because of knee-low supply tank and once-a-month oiling system.

Sharples will earn you as high as 45% on your investment. Write to-day for detailed description of sales methods.

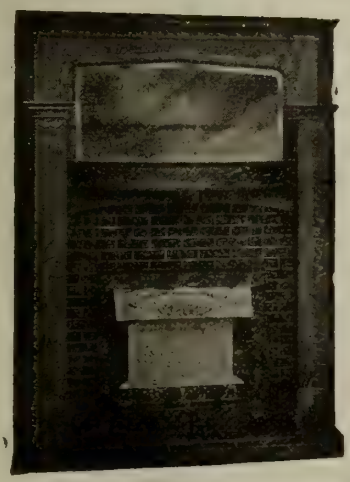
There are no dissatisfied owners of Reliable Churns

The Reliable Churn was designed to give women who churn just exactly the churns they think best. It has been amply demonstrated that the dash churn gives by far the best results. Many women are to-day still using the old-fashioned dash churn because no one has show them a better.

So the old dash idea has been adapted in the Reliable Churn. Linked up with a crank mechanism it gives the same dependable results but eliminates practically all the labor.



It gives also, greater capacity. For instance, a 5-gal. "Reliable" will work perfectly 4 gals. of cream. No other churn can approach this.

Because "Reliables" do all and more than their owners ask of them, there is never any dissatisfaction. They who sell "Reliables" experience no kicks and have no apologies to make. Everybody's satisfied.

Reliable Churns bring good profits to dealers. Better find out about them right away.

The Reliable Churn Company, of Canada

T. W. FOSTER, Mgr. 141 King St. E. TORONTO

WHAT WE MAKE WE GUARANTEE

AUTO ACCESSORIES

For Quick Sales

Recently a hardware dealer in Western Canada became overstocked with shotguns. He placed a want ad. in Hardware & Metal. We learned eventually that he not only disposed of his stock, but received several orders that he could not fill. If this man had kept this stock away, it would not only have deteriorated in value, but he would have had to pay taxes, insurance, etc. on it. If you have anything on hand which you wish to dispose of quickly advertise it in our want column. The quick results will make the first cost negligible.

Stockdale Lectures for You!

These lectures throb with vitality, solving many problems which confront all lines of business.

Under the following captions one of America's foremost Retail Merchandising Experts gave in a clear, lucid style the why and wherefores of the success and failures in retail stores:

"Many Businesses Wrecked by Details"
"How to Make Figure Facts Earn Profits"
"How to Measure the Value of Turnover"
"How to Get the Information the Customer Wants"

We had these four lectures printed in pamphlet form for distribution among the trade.

Send for your copy TO-DAY. The supply is limited.

The MacLean Publishing Co., Limited

153 UNIVERSITY AVENUE, TORONTO

We Are Losing The War!

OUR war aims have fallen from their original elevation. You may say they were too high at the beginning—when first formulated. Perhaps they were, but the real reason for their toning down, as Colonel John Bayne Maclean sees it, is because we have lost many things to Germany which can never be recovered—and lost them by the bungling of incompetent Cabinet Ministers. He instances the failure to make contraband cotton in 1914, when, had this war material been made contraband, the war might have ended in the year in which it was begun. He instances the Dardanelles fiasco which almost drove Australia out of the war. Colonel Maclean shows how Russia might have been saved as an aggressive ally, and how Bulgaria might have been made an ally at the cost of a million dollars. It is startling material which Colonel Maclean provides, and will cause world-wide discussion. We are losing the war, he affirms, but he does not say we have lost it. How it can be won he tells also. Read what he has written in

MacLean's Magazine

for FEBRUARY

In this issue are short and long stories by Alan Sullivan, E. Phillips Oppenheim, Archie P. McKishnie and Ethel Watts Mumford. There is a war poem by Alfred Gordon. The special Business articles which are a feature of every issue of MACLEAN'S MAGAZINE, and the department of Women and their Work, are present.

The Review of Reviews Department contains satisfying presentations of literary and descriptive articles taken from the leading magazines of the world. The story of Hon. Henri Beland, Canadian prisoner of war in Belgium, is told in this number of MACLEAN'S MAGAZINE. There are biographical sketches of Thomas Findley, President of Massey-Harris Company, and of George J. Desbarats, C.M.G., who has done so much for Canada's development of her Naval service.

MADE IN PREMIER CANADA FACTS!

SERVICE

In spite of shortages in fuel, labor, raw materials — and crippled railway service, "PREMIER" GALVANIZED SHEETS show increased shipments, viz:—
Increase Dec., 1917, over 1916 .....112%
Increase Jan., 1918, over 1917 .....142%
HOW'S THAT FOR REAL SERVICE?

PRICE

Our policy of selling "PREMIER" SHEETS at the reduced prices fixed by U.S. Government was entirely voluntary on our part. Other producers were forced to follow our policy, and it means lower prices this year for all Canadian buyers. Pass it on to your customers.

QUALITY

We are sending out hundreds of tons on war work—shipbuilding — railway orders—everybody pleased with "PREMIER" quality. Soft, workable sheets, uniformly and thoroughly coated. Your jobber has "PREMIER" in stock.

BOOK YOUR SPRING ORDER FOR "PREMIER" GALVANIZED SHEETS NOW. ASK YOUR JOBBER.

You'll find "National" Hinges easier to sell

Place a "National" Strap or "T" Hinge alongside one of any other make and you'll quickly recognize the added selling value of the "National." The same evidence of care and attention to detail that has earned "National" Hardware the preference with competent builders everywhere is seen in these goods. They are well-balanced, easy working, nicely finished, and the screwholes are sharply cut and well counter-sunk.

The superiority of "National" Hinges is so apparent as to materially assist in the selling.

"National" Wrought Strap and "T" Hinges are made in four styles:—Plain Steel, Japanned, Sherardized and Sherardized with Brass Pin. Strap Hinges pack approximately from 10 dozen pair per barrel in the 14-inch size to 250 doz. pair in the 3-inch size. "T" Hinges pack approximately from 7 dozen pair per barrel in the 14-inch size to 200 dozen pair in the 3-inch size. Also packed, if desired, one pair in a box, with screws.

If you had a "National" Catalog you could find a number of good reasons why you should stock "National" goods.

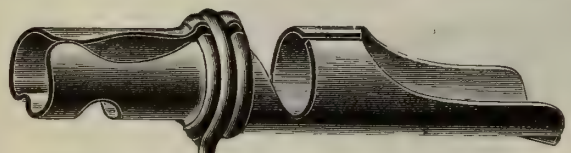
Ward & Payne

W P
WARD

Sheffield

No. 5417—Garden Shears. Guaranteed "Fast Handles."

Why this Garden Shear is Preferred



Amateur or professional, nine out of ten gardeners will take the W. & P. Shear in preference to any other. The reason is simply that W. & P. Shears give an unusual amount of service, are easy and quick in operation and give no trouble. The spring washers give elasticity and ease of movement, the famous Fast Handles never come loose and the high grade steel holds its edge well.

Stock W. & P. Anvil Brand Shears and get the bulk of the business in your locality. Full particulars will be given at any time by our Canadian Agents:—

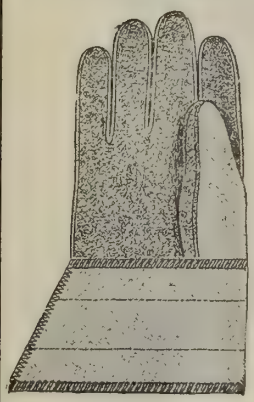
THE "MORRISON"

A Cellar Drainer

Without an Equal

Automatic in operation, and dependable. Requires no attention when once adjusted, the water turned on and put into operation, being actuated by the raising or lowering of float as the water level changes. It operates purely by water. It works under a far greater range and gives much larger capacities than any other device on the market, so far as we know, operating as low as 10 lbs. water pressure.



The operating limits of most types of cellar drainers range from 15 to 18 feet lift. The Morrison cellar drainer will lift as high as 30 feet at 60 lbs. pressure.

All working parts above water. Nothing to get out of order.

Stewart Clipping Machines

Always make good for dealer and user.
The steady increase in sales is the result of real merit.

Stewart Horse Clipping Machines have been a consistent profit-maker for dealers for twenty-five years —each year sales increase and 1917 showed a remarkable gain over all previous seasons.

The Stewart No. 1 Ball Bearing Enclosed Gear Machine

Every dealer in Canada can sell Stewart Machines

and failure to stock them means an actual loss of profit to the dealer.

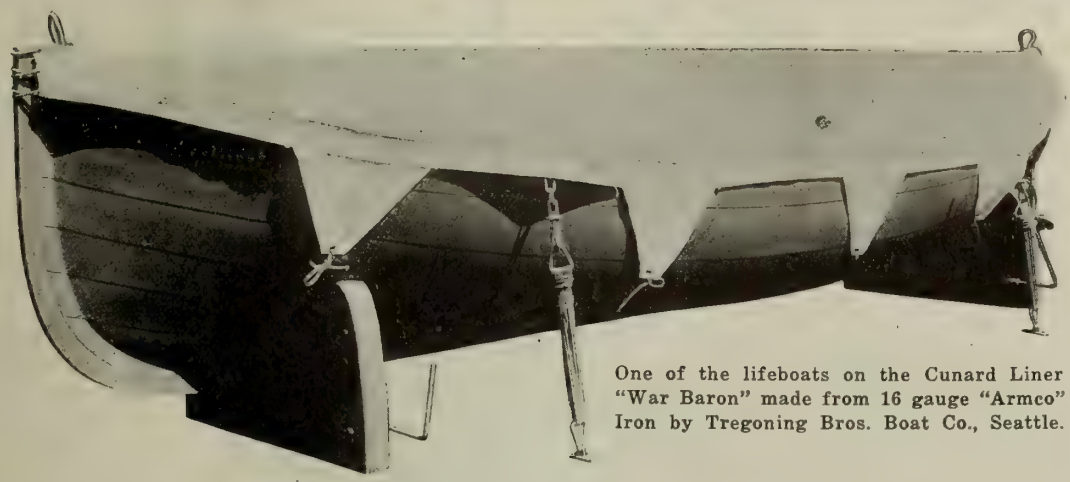
Heavy purchases for war purpose and a big advance demand from the trade are taxing the capacity of the manufacturer.

Order from your Jobber now while he has the stock to supply you.

Get in some Stewart No. 1 Machines and display them—don't depend on special ordering this season.

Horse Clipping starts with the first spring weather.

ORDER NOW



We are now in our new plant where we have everything in the way of latest machinery and larger space for manufacturing and shipping to continue our reputation for quality and service.

Chicago Flexible Shaft Company

Pure Iron For Long Service

One of the lifeboats on the Cunard Liner "War Baron" made from 16 gauge "Armco" Iron by Tregoning Bros. Boat Co., Seattle.

Purity, Evenness and Density

From a photograph of nails taken from the hull of the Steamer "Silver Lake," sunk in the Osage River in 1863. Sound and strong after more than half a century in shallow water. Analysis shows 99.834% Pure Iron —very low contents of Carbon, Copper, Sulphur, and Manganese.

are now, as always, the qualities of durable iron.

In these, Armco (American Ingot) Iron is unequalled among the products of modern furnaces. Its composition is practically the same as that of the pure, old fashioned iron of our grandfathers' days. The experience of thousands of users during the past ten or twelve years points to the conclusion that it will render similar service.

AMERICAN ARMCO INGOT IRON

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

The American Rolling Mill Co.

MIDDLETOWN, OHIO

To laymen, all files look alike, but skilled mechanics will tell you they prefer to work with "Famous Five" Files.

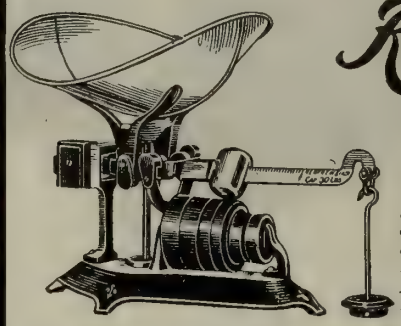
The steel in them is made from special formulas, which have proven best after years of investigation and practical experience.

Each file is well balanced, sharp and hard. Consequently it will cut efficiently, and last long.

There is such a wide variety of grades, that a buyer can select a file for any grade of work and know that it will fulfill his requirements exactly.

That's why you can always satisfy a customer with "Famous Five" Files.

Specify them when ordering from your jobbers.



Show Her the Way

FOR goodness' sake, cries the average housewife, show us how to save money out of the deluge of sky-high prices for meats, sugar, flour—everything. And seldom a thought has she of what a tidy sum can be saved every little while by checking up the honest mistakes of grocer, butcher, etc. Show her.

Just a bit of enterprise, pushing the Renfrew Scale to the front—displaying it—and showing her how it soon pays for itself will stir up a tidy lot of sales worth while. Right now is the "psychological moment."

Clinch your sales by showing the Government Inspector's Certificate of correct weights accompanying every Renfrew Scales supplied in black or all nickel-plated finish. The

Renfrew

HOUSEHOLD SCALE

Capacity ½ oz. to 30 lbs.

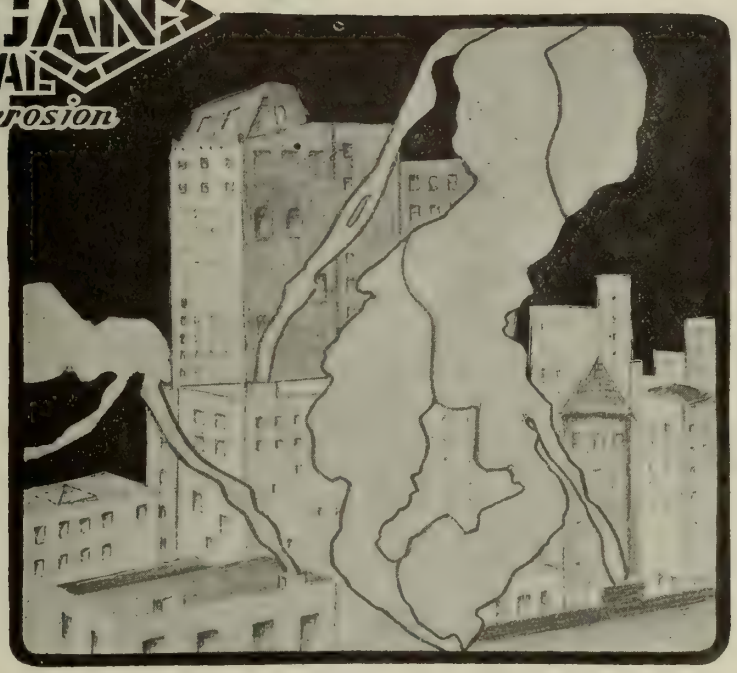
"White" MOP WRINGERS

EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.



Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use—often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.

White Mop Wringer Co.
FULTONVILLE N.Y.

TONCAN METAL
Resists Corrosion

The Exterior Sheet Metal Work
And the Punishment it Gets

The Sheet Metal man who has his customer's interest at heart (as well as his own) will use sheet metal that will resist the severe punishment it is bound to get on the exterior of the building.

The ventilators, skylights, window frames, conductor pipe, eavestrough, cornice flashings, roofing and siding must be able to withstand the severe corrosive influences constantly present in the atmosphere. Otherwise, they are a constant expense and a nuisance.

Therefore, be sure that the sheet metal is durable. It will mean a saving in the end.

Toncan Metal Sheets resist corrosion. Years of service have proved that there is no sheet metal made from iron ore that is more durable or more economical than Toncan Metal.

Toncan Metal owes its extreme durability principally to its purity, homogeneity and scientific processes of manufacture. It is a modern metal sheet designed to withstand modern atmospheric conditions.

Practically anything that can be made out of sheet metal can be made out of Toncan Metal Sheets. Both, black and galvanized Toncan Metal is procurable, and it can be bought formed up into any of the above mentioned products, ready for use.

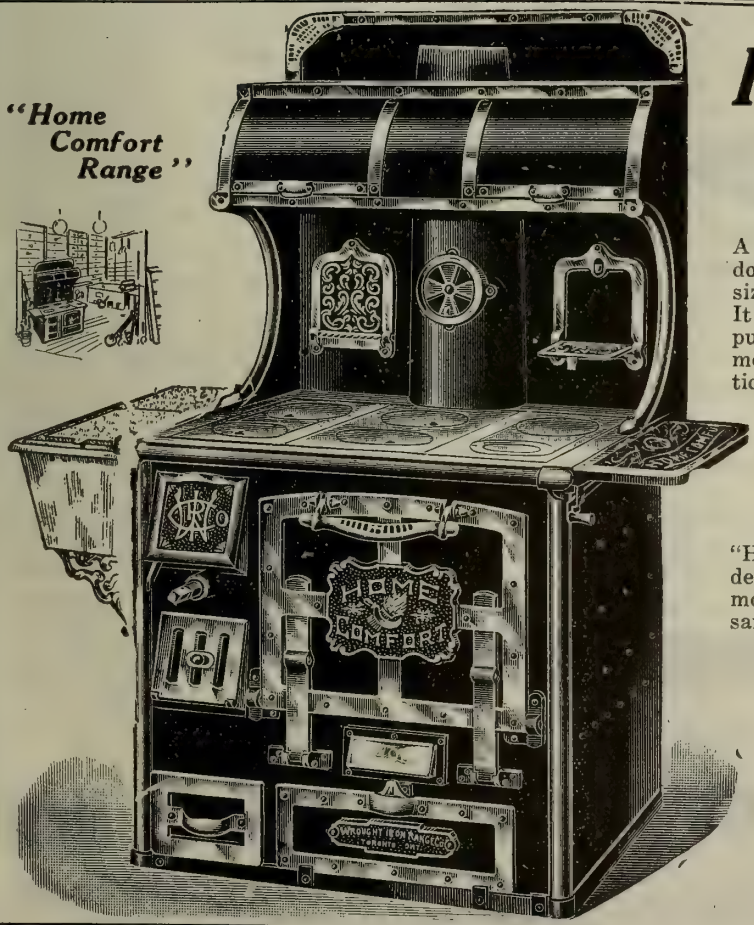
SPRING HINGES

A SUGGESTION

Have you a stock of Spring Hinges that have distinctive selling features which your salesman can offer and which would make the prospective purchaser buy them and no other?

Chicago "Triplex" Spring Butts



offer this advantage to you. The appearance, durability and finish of this article are unsurpassed, and in consideration of prices that are conservative in respect to value, the up-to-date dealer cannot afford to neglect this profitable business.

Send for Catalogue M. 32. It fully illustrates and describes the most complete line of Spring Hinges manufactured.

Chicago Spring Butt Company.

CHICAGO TRADE CSB CO MARK **NEW YORK**

"Home Comfort Range"

It's Wise to Sell a Single Model

A dealer acting as agent for the "HOME COMFORT" doesn't have to keep a big stock. We make only one size and one style. This simplifies matters a whole lot. It used to be, and still is, the custom for the dealer to put forward on his floor the simplest and cheapest model of a range, and to sell his customers this particular range. Then having made the sale, the dealer would proceed to induce the customer to buy extras. For this purpose, the more expensive models kept in the rear would be used for the purpose of demonstration.

Experience has taught a good many dealers that it is wiser to sell but one model, a model like the "HOME COMFORT." It saves time and money—dealers do not have to carry a large stock. This single model plan pleases the customer, too, and makes it safe and easy to make a choice.

We have made the "HOME COMFORT" the most easily sold range on the market. Write for agency proposition. It's a good one.

Mr. Hardwareman

Have you ever considered the advantages of advertising your wants in HARDWARE AND METAL? One of the most important of these is the fact that there is no waste circulation. HARDWARE AND METAL goes only to the people who are directly interested in the trade. We have offices in Montreal, Toronto, and Winnipeg. If you like you can have a box number in care of either one of these offices, whichever is nearest to you. We will then notify our representative there and he will promptly forward any replies which may come in answer to your ad. Remember, Thursday noon is the latest for receiving want ads for the current issue.

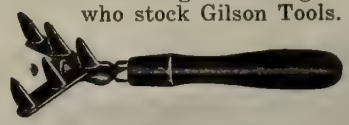
Everybody will be Gardening this Spring

No. 21 Liberty Adjustable Cultivator-Weeder



Patent Applied For.

The High Cost of Living will combine this Spring with Government Back-Yard Garden Campaigns to make many new gardeners.

These inexperienced as well as the experienced tillers of the soil will be particularly pleased with the labor-saving features of Gilson Garden Tools and will buy them in preference to the ordinary kind. You will in particular sell many Liberty Adjustable Cultivator-Weeders because this double-efficiency tool is just the one to keep garden soil in perfect condition with the least labor.

If you want to carry the best line of efficiency garden tools ask your jobber about Gilson Tools. If he can't tell you, write us direct.

Through our advertising space in these publications readers of MacLean's Magazine and of Farmers' Magazine are learning why these tools are best. This advertising will bring business only to dealers who stock Gilson Tools. Stock quickly.

"Delta" Files

—we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try so write and get full particulars.

ANNOUNCEMENT TO THE TRADE

Our new "WAKYTE" models are ready for distribution. Photographs and prices are in the hands of all wholesale hardware travellers, who are now booking orders for fall delivery on "WAKYTE" closets, chemical, barrel trucks, etc. We strongly recommend your placing your order without delay.

The quality of "WAKYTE" goods is not equalled at any price. They not only guarantee you a substantial profit, but enable you to give your customer more value for his money than he can get anywhere else. The 1918 "WAKYTE" products show a decided improvement over anything heretofore offered to the trade.

WAKYTE POWDER CHEMICAL:

To eliminate all loss and annoyance due to defective cans, etc., we are now putting our chemical up in powder form as well as liquid. We recommend your ordering "WAKYTE" POWDER CHEMICAL as it costs less money, goes further, and may be shipped under any weather conditions. It is packed in containers having same capacity as one-gallon cans.

"WAKYTE" BARREL TRUCKS:

You can save yourself considerable time and money by equipping your store with "WAKYTE" BARREL TRUCKS. They are inexpensive and will last practically a life-time. Prices and particulars from your jobber, or direct from us.

Our service this year will be better than ever. By placing your order now you are protected against any advance in prices, and are assured of getting the goods at the specified time to take care of your trade.

For the convenience of our customers, complete stocks of "WAKYTE" goods are carried at Winnipeg, Edmonton, Calgary, Saskatoon, and London, Ont.

ADVERTISING
—and the O-Cedar Dealer

ADVERTISING puts goods in the spotlight and under the searching scrutiny of the buying public. Only goods with merit can be successfully advertised. The O-Cedar Products have exceptional merits and the extensive advertising of these merits has created a great demand.

You can direct this demand to your store by displaying O-Cedar in your window—about your store, and through local advertising in your newspapers. People like to buy advertised goods, because the price and merits are known.

We have a series of newspaper ads that help **O-Cedar** dealers to sell other merchandise they carry, as well as

O-Cedar Polish

These are illustrated in our booklet "O-Cedar Sales Helps." This booklet also shows the other O-Cedar Dealer Helps—the O-Cedar electric signs, window trims and Counter and Floor Display Stands. Send a post card to us to-day. requesting the booklet.

It is supplied free to O-Cedar dealers.

Hamilton Convention Great Success

Most Practical Program in History of Association—Good Attendance of Retailers—Complete Report in This Issue

THOSE who attended the thirteenth annual convention of the Ontario Retail Hardware & Stove Dealers' Association were unanimous in declaring that from the retailers' standpoint it was the most successful in the history of the association. The many practical addresses, the hearty welcome of Hamilton manufacturers and wholesalers, and the ideal surroundings for holding a convention of the kind helped to make the convention one of real practical value to all who attended. To those who were not privileged to attend this year, owing to shortage of help, etc., the complete reports which follow will supply abundant food for thought in these trying times.

THE OPENING MEETING

The afternoon of Tuesday, February 19th, saw the Convention fairly opened, and off with a swing to a good start. A representative attendance gathered in the assembly room of the Royal Connaught Hotel where Mayor Booker and the trade association representatives welcomed the Convention members to Hamilton.

The Mayor's Welcome

Enthusiasm for the merits of Hamilton as a thriving industrial centre, and city of handsome buildings, and well laid out streets characterised the Mayor's address. He promised the Hardware Association every facility in their business in Hamilton. The freedom of the city was theirs to enjoy. They would find Hamilton a city not of stone and lime, not of streets and stores merely, however handsome, but a city in which the people count above all else. "The people —the soul of Hamilton," he said, "welcome you members of the Ontario Retail Hardware Association."

Wholesalers' Welcome Extended

On behalf of the Wholesalers' Association of Ontario, S. H. Alexander, of Wood, Alexander & James, gave the Convention members a hundred thousand welcomes to Hamilton. He referred to war's effects in industry, mentioning that of 70 employees of his own concern 40 were in khaki (cheers). Boys little more than fresh from school were being now entrusted with work which had formerly been entrusted only to men of long years' experience, and with supervision they were doing wonders. But production was the problem of the hour, and it would take some solving. That, however, did not in the slightest interfere with the warmth of the welcome extended to the hardwaremen.

Hamilton Manufacturers' Welcome

President Marsh of the Hamilton Branch of the Canadian Manufacturers' Association in a brief breezy address bade the Convention welcome, and promised them every gratification for all the thirst for knowledge of manufacturing methods they might evince, though since prohibition had come in he could suggest no other kind of thirst to them (laughter). Referring to the unfair charge made in expert quarters that the manu-

Bird's Eye View of the City of Hamilton, Canada, where the Convention of the Ontario Retail Hardware and Stove Dealers' Association was held this week.

facturers were taking advantages of war times to advance prices and take exorbitant profits, Mr. Marsh drew attention to the cost of raw materials and labor, and said the firms able to keep up manufacturing production at all feel themselves lucky with small idea of profits. Though some few cases might exist of profiteering in certain isolated lines, the charge of systematic profiteering was absolutely untrue.

Hamilton Hardware Manufacturers

The Hamilton Hardware Manufacturers in particular expressed through Mr. H. P. Hubbard their welcome to the Convention members, Mr. Hubbard briefly but cordially voicing the sentiment.

The President's Address

Then followed the president's address, in which President J. N. MacGregor expressed himself in the following terms:

Mr. Chairman, members Ontario Retail Hardware and Stove Dealers' Association—It is a pleasure for me to welcome you to the thirteenth annual convention of our association. We had

J. N. McGREGOR
Retiring President, O. R. H. & S. D. A.

hoped at our last convention that before another convention the war would be over and that peace would have been restored.

We find, however, that the problems to-day are greater than any which have confronted us in the past, and in the convention sessions which are to follow we will have to consider many problems which have been raised by events of the past year.

I feel sure that you will agree with me that during the past year more than ever before we, as retailers, have felt the need of co-operative effort. There was a time when a competitor was looked upon as an enemy, snatching business from our grasp and literally taking the bread right out of our mouths. In the new order of business competitors are simply men in the same line of business, inspired perhaps with the same high ideals that we have. They serve a most useful purpose and keep us keyed up to our best efforts. While we may not always approve of our competitor's methods, we must admit that competitors are necessary in order to keep us more efficient. If for no other reason we should feel kindly disposed towards our competitors for what they do for us.

The modern feeling of co-operation, which is showing itself in trade associations, conventions and trade meetings, is doing a great deal of good. I feel sure that when this convention is over all of our members, both old and new, will feel that they have been greatly benefited by the convention proceedings, by the many addresses and discussions on business problems, and by the knowledge they will gain through their associations with other men who are also present at these meetings.

I would like to urge that every member take an active part in the convention proceedings, and that he also endeavor to be present at all sessions.

The officers have tried to produce a programme this year which will appeal to all retail hardware merchants and one that will prove of real practical value to them.

Owing to conditions created by war and to the curtailed train service, and also to the fact that there is a great shortage of help, it is impossible for some of our members to be present. We feel sure, however, that those who have been enabled to attend the convention will go back to their stores better equipped to carry on their businesses in competition with other forms of merchandising with which they have to contend. I also trust that the retail merchants who are present here will not fail to pass on to their sales staffs any new pointers or information which will assist the staff in becoming better salesmen, window trimmers or display men. Our sales results will be in proportion to the time and effort we spend in training our sales staffs, and this is an important feature of every business which is sometimes overlooked.

I believe that you will agree with me that the programme which we have prepared this year is one of the most practical that we have ever presented to you.

You will recall that following our convention last year we were criticized, in a friendly way, of course, by HARDWARE AND METAL for the manner in which our last convention was conducted. HARDWARE AND METAL at that time through the columns of the paper opened a discussion of association affairs and many splendid suggestions were sent in by members and ex-members.

Acting upon these suggestions the officers have prepared the programme for this convention.

There are many features in the programme which I believe will appeal to you and which will prove of great interest to all those in attendance.

Our meetings this year will be carried out according to schedule and our election of officers will be made by ballot.

The question box session and the discussion following the various addresses should prove among the most interesting features of the convention, and I again urge every member to take a prominent part in these discussions.

There is also another matter which I believe we should take up at this convention, and that is the question of increasing the membership fee.

As you are probably aware, our association has been doing valuable work through the secretary, Mr. Macpherson, who has supplied all members with a splendid cost book and net cost sheets from time to time.

Our Exchange Bureau is another department which has already proven its value. There are also our collection letters and a number of other services which are free to members.

When you consider that all these are available at a cost of $3 per year under

W. F. MacPHERSON
Prescott, Ont., Re-elected Secy. O. R. H. & S. D. A. by acclamation.

the present system, you will readily see that our fees are altogether too low. I would suggest that this question be taken up for discussion at one of the meetings with a view to increasing the membership fee at a future date, as I believe that membership in our association is worth a great deal more than what is charged at the present time.

I wish to express my appreciation of the co-operation of the officers of our association during the past year, the trade papers and to the manufacturers, wholesalers and exhibitors who have co-operated with us. I trust you will all have a pleasant and profitable time at the convention, and that you will leave at the close of the convention feeling that you have profited by your attendance, and that you will do your share towards making our association bigger and better than ever.

Secretary's Report

Secretary W. F. Macpherson then pre-

sented his report to the Convention as follows:

Prescott, Feb. 18, 1918.

Officers and Members C. R. H. & S. D. A.:

I beg to submit you herewith my report as Secretary covering the year 1917.

Membership:—

Total unrenewed and paid up for 1917 as on last report was 267. This included 160 unrenewed members.

My present membership roll shows paid up members for 1917—263.

I regret not having been able during the past year to take much time away from my business to make a personal canvas of some of the larger centres, owing to shortage of help and other considerations, and new members secured to replace the lapses which always occur were by means of correspondence.

Exchange and Sales Bureau:—

This bureau was inaugurated early in the year and met with considerable response. Two mailings of lists were sent out and results obtained were most satisfactory to both

F. H. WHITTON

General Manager, Steel Company of Canada, Hamilton, who addressed the retail merchants on conditions in the manufacturing industry.

sellers and buyers, some lists of goods being entirely disposed of. This feature is a good one, and our members are invited to avail themselves more fully of it. During this convention a clearing house for overstocks will be conducted, and we hope lists will be investigated by all our members.

Change Sheets:—

Various net cost sheets were issued during the year as well as two new lists for binders, covering hinges, butts, barn door fittings, etc. A net cost sheet per each on malleable fittings was also issued.

Collection Bureau:—

Evidences reach me from time to time through receipt of remittance from delinquent debtors that these forms are being used successfully by some members, and I would again urge the use of the forms as a capital way in which to secure payment of outstanding overdue accounts.

Exhibition:—

The manufacturers, whose exhibits are found in the hotel at this convention, are worthy of your attention. It is to be hoped that not a member will miss visiting each exhibit and place orders where possible, but visit and examine the display anyway. They are here for your benefit and those exhibiting under our auspices deserve every recognition.

Your Advisory Committee recommend adoption of new system in nominating and electing your officers for the coming year, which will be submitted for your approval.

In conclusion, I would urge every member to be loyal to the association, to use every effort to obtain new members. As I have stated before, increased membership means increased service. Respectfully submitted,

W. F. MacPherson.

Report of Treasurer

Treasurer John Caslor's report was presented showing balance on hand at December 31st, 1917, of $178.87. Total cash on hand and cash received being at that date $1,295.78, and total expenditures (as per detailed statement submitted to the members) $1,116.91. The treasurer's report concluded with the following statement: The books have been examined by your auditors, Messrs. J. W. Peacock and G. Matheson, and certified correct. I would further advise you that the account of the association is now carried in the bank under the name of this association, and withdrawal only obtainable by official cheque, signed by president and treasurer and countersigned by secretary.

Membership Fee Too Low

That while a balance to the good was shown by the report, the experience of the secretary, president and treasurer in carrying on affairs during 1917 indicated that the membership fee was too low for practical purposes of the association was a view expressed by the president.

Executive meetings had been dispensed with on account of their extra expense ($80 to $90 each), stated the Secretary, and in order to secure the results, issue the change sheets often enough, and in sufficient detail, and otherwise carry on the work of the association successfully either a much more numerous membership or a higher fee for membership would be necessary. The point would be discussed as occasion offered during proceedings, said the President.

Committee on Resolutions

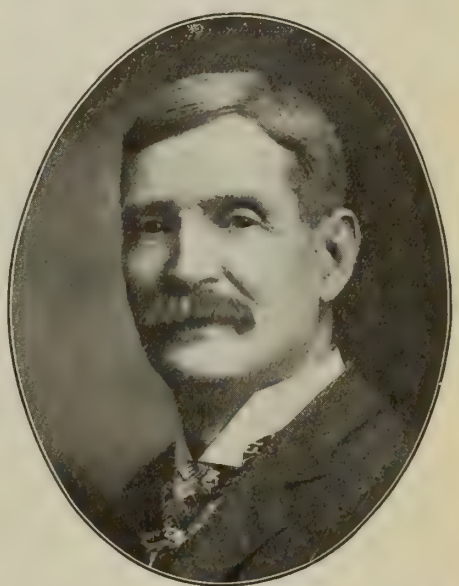
Following Committee on Resolutions was then appointed: A. M. Oldham, Weston, Chairman; S. B. McClung, Trenton; F. F. Balsdon, Cargill, Ont., and F. A. Coons, Winchester, Ont. It was at first proposed that Mr. W. A. Rankin should be Chairman, but he found it impossible to act owing to pressure of affairs, and was excused "with reluctance," as the President expressed it, Mr. Oldham being appointed with unanimous approval in his stead.

A Paint Protest Renewed

It was after the President had recommended the exhibits of the various manufactures on view in the hotel to the members of the convention, that a member, Mr. Phillips, raised a protest against consideration of the exhibit of a certain manufacturer of paint because of a former difficulty occasioned through the handling of paint manufactured by this firm by a department store in manner to menace the interests of the retail hardware trade. Discussion followed. The member making protest was commended by the President on his pertinacity in sticking to his ground on this grievance of some years ago.

An opinion voiced and supported was that nearly all manufacturers who sell to the retail hardware trade also sell to department stores doing mail order business, and the President very tactfully and quietly brought the incident to a close. He pointed out that while an injustice might exist, and the association was always steadily at work to remove such obstacles to fair dealing, still much valuable time at conventions might be lost in discussing what could not be altered by mere discussion, while the time could be better employed in studying the subjects capable of giving great benefit to the trade by leading to concerted action. This attitude was generally approved by the meeting.

Question of Higher Fee



On the question of higher membership fee further progress was then made by a short discussion. The fact that higher fees for similar association membership are charged in the States was pointed out. The need for more financial strength to carry on the association's work was indicated. The possibility that a higher membership fee might defeat its purpose by reducing membership was not overlooked. Finally it was moved and seconded that the membership fee be $5, and associate membership be $3. To this objection was taken in amendment that associate membership remain as before, and an amendment to the amendment suggested $2.00 as associate membership fee. The matter finally was left in the hands of the Committee on Resolutions.

Office Bearers by Ballot

In preparation for election of officers, to take place the following day, it was moved by D. A. MacNab, and seconded by Mr. Wideman, that election of officers be conducted on the basis of written nominations and vote by ballot, nominations to be in by noon of Wednesday.

This was unanimously carried, and nomination papers distributed.

Mr. Jas. Hardy, secretary of the Whole-

JOHN CASLOR

Toronto, Re-elected Treasurer O. R. H. & S. D. A.

sale Hardware Association, also addressed the opening meeting.

"I wanted to be here," he said, "and I am here." (Cheers.) Mr. Hardy expressed approval of the idea to advance membership fees, as he felt the executive could render better service to the members of the association in this way.

As regards the outlook in the hardware business, he indicated great uncertainty as to supplies of goods in the year ahead owing to difficulty of getting raw material. He indicated every probability of radical changes in manufacturing business methods in the direction of standardization and united effort to avoid reduplication of processes and to reduce unnecessary transportation of materials and finished products. "In the States they have standardization methods at work," he said, "and due to the presence of the War Board at Ottawa this may be coming here also. It is only surmise on my part, no one can tell what is to happen. But it is wise not to buy too heavily at present, although in view of the shortages of materials I think it would be better to have bought heavily than to have no goods at all through holding off from buying until too late to get deliveries at all."

The Committee on Resolutions then con-

vened for business, the general meeting adjourning.

From Manufacturers' Standpoint

On Tuesday evening convention members were entertained to a banquet by Wood, Alexander & James, formerly Wood, Vallance & Co., and an outstanding event of the occasion was the address given by Mr. F. H. Whitton in the concluding half-hour of the banquet session. Complimentary speeches were given by President MacGregor and Mr. MacPherson, secretary of the Ontario Hardware and Stove Dealers' Association, and by the hosts of the evening—and the banquet was a very outstanding success.

Mr. Whitton's Address

Speaking, as he announced in opening, not only for the Steel Company of Canada as particularly interesting hardwaremen, but also for all manufacturers, more or less, at this time, Mr. F. H. Whitton delivered to the banquet gathering a forceful address on present conditions in the manufacturing industry of Canada and the United States as affecting Canada.

An Important "Trinity"

"First of all," he said, "I should like to point out to you the union of interests existing between the manufacturer, the wholesaler, and the retail hardwareman. I consider that three-fold arrangement the best for distributing goods at the least possible cost," he said.

He went on to refer to the importance of association membership to every merchant. "I have spoken to the leader of your association," he said. "The men who become members of associations of this kind are amongst the most thoughtful of their circle, their leaders the most thoughtful and far-sighted of all. An association gives stability to trade. It regulates and produces fair prices for all commodities. There need be no fear of exorbitant profit taking. Competition in business will always take care of that.

Public Poorly Instructed

"As regards co-operation in business for the fair interests of any group of business men in any one line, there exists a misapprehension on the part of the public," said Mr. Whitton. "The public has been unfortunately educated to wrong ideas of co-operation, largely by the daily press. They have come to think that co-operation of this kind is an evil feature. As a result the government has been moved to take steps to restrict co-operation in this way. But the benefits of having united forces of this kind were overlooked. Big interests in the United States made money not through excessive profits, but because their united organization enabled them to operate with the maximum of economy.

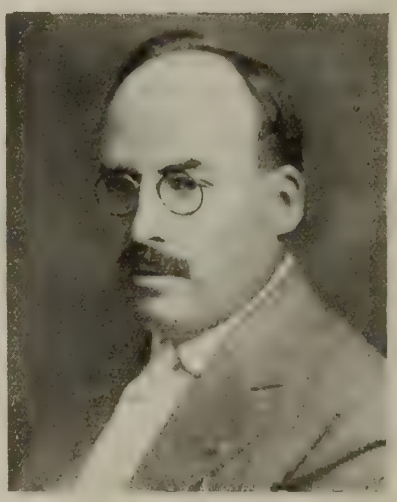
Socialistic Tendencies To-day

"The socialistic tendencies of the day are to be regarded seriously," said Mr. Whitton. "They fail to take into account the function of co-operative organization in industry and business. The Canadian manufacturers, for instance, have been accused in a general way by the people of having taken advantage of the war to enrich themselves. To the contrary the manufacturers of Canada by their organization to effect production economically in these times of stress have proved themselves a tower of strength to Canada and to the British Empire and Allies during this terrible war. Were it not for Canada's part in the war through her organization of industry for manufacturing munitions, her steel industries and other concerns, trade could not have been kept alive as it has been in the Dominion and countries in trade touch with the Dominion. Australia, New Zealand, South Africa, Russia, France have been supplied with Canadian steel products they required, rails and munitions of war, and other manufacturing industries of Canada have done equally well, and contributed their products to the Allies."

Government Regulation

Mr. Whitton referred to government regulation. While not in any way desirous of disparaging the principles in view, and while expressing the whole-hearted effort of industry to conform with all measures for the Allied good, he pointed out that government regulation is not by any means a general "heal-all." He exemplified the licensing system for exports and imports between the United States and Canada, and the transportation difficulties, and the difficulties of heatless days hard to administrate without hitches of many kinds. He predicted that taxation on a heavy scale must continue for many years, and advised business men, especially in associations, to talk together much and compare opinions on all these questions, with a view to obtaining the best co-operative results. While manufacturers are looked on as the special mark of the public press in criticism, Mr. Whitton pointed out that shareholders are entitled to some returns, that depreciation is enormous and costly to take care of, but that these things must be maintained or the whole manufacting industry, and with it the business of Canada, would fall behind in the world race for commercial standing.

After the War Trade



After the war all countries would be struggling to produce to export and to maintain favorable trade balances. No country will want to import what it can produce itself. Labor will cost more and industry will be on a new basis. Farm products will be scarce and higher than ever in cost perhaps, and perhaps for a long time, and "the poor farmer" will be amongst the best off in the community. Enormous outlays will be required to maintain and improve railways. Shipbuilding will be prosperous in Canada also. Canada has enjoyed prosperity up to now, and even in the war years to a wonderful extent. Mr. Whitton concluded his rousing address by a forward outlook towards more prosperity based on Canada's great resources, "perhaps a prosperity greater than that of any other country in the world."

High Prices, Efficiency, Fair Profits

In Dealing With the Outlook For White Lead and Linseed Oil For 1918, H. M. Ashby, Managing Director, Sherwin-Williams Company, Inspires Ontario Hardware and Stove Dealers' Association Members With Call to Efficiency in Business

H. M. ASHBY, managing director of the Sherwin-Williams Co,. on the programme for an address on the linseed oil and white lead situation came with an address which went keenly into the matter of his subject.

"The large manufacturer and large distributor," he said, "can hardly think of anything but of high prices, and of how much higher prices may go. As a man connected with one of the largest corroders of lead on the continent, I may be fairly considered to know something of the situation with which I am in touch. Frankly, gentlemen, I don't see any prospect of any drop in prices of white lead. These times are uncertain, and no man—I don't care who he is—in the United States, may give an opinion to-day which may not to-morrow be confounded by change of conditions. As I see it, however, we do not see any chance of a drop in the market for white lead for some time. We believe that the bottom of the market was touched some time ago, and that there will not be any change except a steady advance for some time to come. What will happen after the war we cannot be certain of, but if the war soon closes will there be an immediate drop in prices? I think not. I believe that with reconstruction which must follow, and bring about increased consumption of metals, this will produce a demand which will prevent a drop. I firmly believe, and I am backing my belief with the money of the company, that following the war there will be an increased demand, and markets will be consistent. When you consider that the corroder of pig lead has to put his money out very much in advance—even as much as a year ahead of the time he can get his returns—then you can see what that means in my opinion. It means a continued steady market in pig lead and white lead.

H. M. ASHBY

Managing Director, Sherwin-Williams Co., Montreal, who delivered address before Ontario Retail Hardware and Stove Dealers' Convention on "The Linseed Oil and White Lead Situation."

The Look-Out in Linseed Oil

"Now as to linseed oil, which touches paints and a good many other things—I wish I knew. (Laughter.) I suppose many of you gentlemen are more familiar with the linseed oil situation and flax situation than I am. This I do know, however, that the continent of North America has not produced enough flax to last until the end of May. Any relief must come through the Argentine, and ships are scarcer than the most doubtful of us ever anticipated. I would not contract to supply linseed oil at ten cents a gallon over present prices as prospects are at present. The carrying capacity of ships is important in this matter. The prospects are for more trouble and for higher prices rather than for lower prices. Briefly, gentlemen, that is my opinion and the feeling of our organization as to these two products.

Two Points of Importance

"Now, having touched on these matters on which I have been expected to speak, I should like, if time is allowed me, to speak on two points which I consider of exceptional importance at this time. Anyone who is responsible for a large volume of business spread over a wide area has to face to-day the exceedingly difficult questions arising out of the present conditions, and everybody in this room has to face them in just the

same way, only the degree being perhaps different.

"There is no question about the fact that each one of us has the feeling that we have to charge more than we feel the stuff is worth. We all feel that the price is high. We smart under it when we pay it out, and yet we have to charge these high prices when we are selling. There is not a man in the room but feels that. What are we to do about it? Well, here is how I feel about it:

"I don't believe that we are going to see the drop in prices when the war closes, that has been prophesied. I don't believe that we shall have peace declared one day, and prices down the day after. The downward trend of prices will be much slower.

"Every one of us, manufacturer, jobber and retailer, must now, of all times, see that he is working on an efficient basis. We must be absolutely certain that the cost of the product is right to give the best quality of service necessary. I don't believe this continent has ever done this. It has never been done either in Canada or in the United States. It has been done in some cases in other countries, and in these few cases the result has been world-wide supremacy for the business doing it.

I speak to include ourselves, and I think that you might well apply this to yourselves. We must all see that we don't lose any motion in any way. We must not make things which are not really necessary. The higher prices go, the more we must strive to give the best possible value under the circumstances. The Paint Manufacturers' Association has done a good deal on that (of which Mr. Penberthy may tell you more) in the way of service and effort. We have gone into the question of packages. We have gone into the question of eliminating unnecessary expenses putting up goods where the expense did not directly benefit the consumer. But we have not yet gone as far as we should.

We are all working in harmony with each other, however, in this effort, and shall devise yet other means of cutting out waste. When each one of us has put his business on just as efficient a basis as possible we shall have achieved a good deal. It is as important a duty to country and flag to do this as if you were to go to the front and fight if called up.

"The future of Canada demands that every manufacturer, wholesaler, and retailer put out every effort he can to the end of absolute efficiency. If we don't do it we shall not be able to compete with Germany after the war. That efficiency must be reached as a duty to our country if not as a duty to ourselves.

"Now there is another duty the retailer must look to. That is that he gets a fair profit after having arrived at a state of real efficiency. That you should do this is a matter of duty to yourselves and a duty to your country as well. Put a fair price on your goods. Every man must determine for himself what is his necessary profit as regulated by the conditions of his business, but see that you get your fair price and profit.

"We in our own concern believe most strongly in cost accounting as the basis of real efficient business. We believe that you must know exactly what it costs to make goods and to sell goods. It is just as much a patriotic duty to make a fair profit. You owe that to your country. You absolutely must make a fair profit. It should not be an excessive profit. It should be rightly graded. Without efficiency you cannot make a profit fairly and still meet competition. See that you are making, buying, or distributing stuff right, make sure that there is no lost motion anywhere, and then put your right, fair profit upon it.

In England, in the States, and also in Germany (where I went in connection with my work buying dyes) I have seen the methods of business employed. I am familiar with the German dye situation and know these great dye concerns which used to control the world and still to a certain extent control the dye business. They had such a grasp of it that their hold is not yet entirely broken. When I think of those great concerns I have a picture before me of the efficiency they achieved first, and then a picture of profit making based on that efficiency. With that picture before you, gentlemen, I can now only urge upon you, and ourselves included, first that every one of us should pay every possible attention to getting up our standards of efficiency, paying every possible attention to it in every aspect. If you who are dealers are making two deliveries where one would do, avaid this. See that the sales effort in your store is correctly applied to get results. Don't waste time and power.

"There are things in the paint trade which have been graded and brought into line with this end in view. We have cut down the number of sizes of tins, and number of shades of paint where there were unnecessary sizes and shades that were simply lying on our shelves and on yours gentlemen. That means that you won't have to tie up money in these things. We must, and will put, and we are putting our proposition in shape so that the turn-over will be easier, and our products will be easier for you to sell. That is our end of it. Your end in many ways can be worked on, and no doubt in many ways can be improved.

"When you have done that don't be afraid to put a fair profit on your proposition. If you are afraid to do that you will inevitably lose. But if you do that, then when you have done it both you and your country are going to take their proper place in the world."

Labor Affects Saws and Tool Situation

A Suggestion That Fewer Styles of Saws Would Materially Help Production Made by H. P. Hubbard, General Manager, E. C. Atkins & Co., Hamilton

"THE Saws and Tool Situation" was the subject of a ten minutes address by H. P. Hubbard, General Manager of E. C. Atkins & Co. He followed Mr. Enlow who dealt with

H. P. HUBBARD

General Manager, E. C. Atkins & Co., Hamilton, who delivered address before Ontario Retail Hardware and Stove Dealers' Convention on "Saws and Tool Situation."

sheet metals, and opened with an explanation to the effect that while the steel situation governed everything made of that metal, the same sheet metal that goes to plates does not enter by any means into the matter of saws and tools.

"Tool steel," he said, "is increasingly difficult to obtain, even what there is of it is hard to get. In regard to prices, we have raised our prices always just a little behind the rising market for the materials. Now we think we ought to raise them again. That is good news for you, boys," he said, as a sensation passed around following announcement of a further advance ahead. "There is going to be an advance in prices even though the war should cease. It is just as well to get the advance on the goods in stock now, though you did buy them much below present prices." He cited the case of a hardware man who was content with making a little on a very early purchase in saws when the advance was far beyond his prices.

Cost of labor besides the cost of materials became an increasing factor in the market now, stated Mr. Hubbard. Skilled labor was from 30% to 40% higher in market, and in saw-making it was hard to retain the help in Canada against the attractions of the United States, with their wage scales high also.

As to cost of materials, Mr. Hubbard gave contrasts. Billets formerly $28 a ton are now $40. Sheets once $1.90 a hundred are now $8.50. Nails formerly $2.00 are around $5.00, advances of several hundred per cent. as he pointed out.

"Advances in saws to date," said Mr. Hubbard are only about 85% to 100% in some instances. As a matter of fact saws have been sold here in Canada as cheap as in United States, and sometimes a little cheaper." Yet, as Mr. Hubbard pointed out, war taxes on materials in Canada placed the Canadian manufacturer at a disadvantage as compared with the United States maker. Factory costs in Canada he held to be 20% to 25% over United States costs. "Thus you see," he went on, "the saw manufacturer is not making any money to speak of, even if he may look prosperous. (Laughter.)

"The labor proposition," said Mr. Hubbard, "is the most serious we have to face. Laboring men are determined to have a larger and a stronger voice in industry than they have ever had in the world's history. When the boys come home from the war they will not take their old jobs up again to any great extent at anything like their old wage scale. There will be a higher scale of wages I think for years after the war ends.

"I believe I have outlined in these few words the situation as regards saws. We are not ourselves in position to want any great rush of orders. We are pretty well loaded up with all we can see our way to make, and what with government special applications to get O.K.'d it is pretty annoying to carry along business for saw-makers as well as the rest of you. As far as I know we have now about all we can handle. and as to the future I think that saws will advance very shortly."

In reply to a question as regards the adoption of efficiency methods in saw-making and how these would affect production and cost, Mr. Hubbard said:

"We are all quite agreed on that matter to try and cheapen our product, but the fact that we have to make a great many different types of saws reduces the chance of efficiency promotion to some extent. If you change work over from one type to another you cannot do it as efficiently. You gentlemen buy a great many different styles of saws. If you could only get along with about four grades we could give you in every case a better saw. Just now we have 48 grades with many different points, and many of these have to be hand-worked by specially trained men. Fitting has to be done individually. We study these things in our factory as far as is possible in a moderately-sized plant, but it is hard to get the maximum efficiency from moderate-sized plants turning out these many different styles of saws."

Shovel Situation, Present and Future

Consider Usefulness Before Attractiveness—Polished Shovel Offers no Advantage in Use—Opinions Voiced by W. E. Skelton

IN dealing with the "Shovel Situation, Present and Future as We See It," W. E. Skelton, assistant manager Canadian Shovel and Tool Co., Hamilton, Ont., alluded to present manufacturing difficulties and made suggestions to remedy same. His remarks follow:

"This is the subject on which I have been requested to make a few remarks. I am not quite sure if the gentleman who assigned this subject to me was purposely or unconsciously intending to play a practical joke or not, for the situation to-day is not what it was yesterday, and of to-morrow it would be hazardous for any mortal to predict.

W. E. SKELTON

Assistant Manager, Canadian Shovel & Tool Co., Hamilton, who delivered address before Ontario Retail Hardware and Stove Dealers' Convention on "Shovel Situation, Present and Future, as We See It."

"The exigencies of the steel market, subject to war and Government requirements, together with railroad embargoes and weather conditions, all combine to make uncertainties for the manufacturer to grapple with. No less perhaps than the steel proposition is the fuel situation. To those who have so far been favored with natural gas the severe weather of this winter has been very hard, and a change has been necessitated to fuel oil. Here again the sudden and abnormal demands have added further difficulties to those of transportation. Speaking from a manufacturer's standpoint who has experienced all of these troubles, my advice, if I may be permitted to give advice to hardware dealers, is to order their goods well in advance and be prepared to take the goods whenever and as early as the manufacturer can deliver. The old school book maxim that 'procrastination is the thief of time,' was never more true than it is to-day. I desire to emphasize this statement and repeat that the dealer is a wise man who takes his goods when he can get them.

"Gentlemen, I don't think I need to add one more word on this immediate topic. While the manufacturer has a great deal of trouble these days, there is no doubt also that the dealer has his time of worry when his goods are unreasonably delayed. Therefore, as you are all so intimate with these conditions, I will turn for a few moments to another side issue, which is of considerable importance at this time, aggravated as it is by this awful world-wide war.

"The issue I refer to is contained in the word 'conservation.' There are many classes of goods which are made more expensive by addition of work upon them, intended to make them simply attractive for sale, apart from any utility of the article. Indeed in some articles these embellishments, if I may so call them, tend rather to depreciate in real value the article embellished. Lest I should tread on others' corns, I will confine my suggestions to shovels and scoops, with which I am most intimately connected. Most, if not all, hardware dealers have been accustomed to buying and selling these goods polished, so that polishing is one of the details in the art of shovel making, and as one of the details, the manufacturer has to see that a sufficient charge is made to cover costs and insure a small profit.

"Well, now, I want to ask what advantage does a purchaser get by buying a polished shovel? I will answer that question by a direct negative, and say, none. In fact, I will go further and say he actually pays more money and buys an inferior shovel, than if he bought it black. When I use the term black, I do not mean that it is painted or varnished black, but I refer to the natural condition of the steel after it is forged or rolled. Any one with a technical knowledge of steel will understand that the outside surface of steel after rolling is of a harder nature than the inside, and therefore, to effectively polish the shovel it has to be pickled in a bath of sulphuric acid to eat away the hard surface, after which it can be more easily polished. You will readily perceive, therefore, that the purchaser of a polished shovel, for instance, pays more for a really inferior tool.

"Some people say that a polished shovel or scoop will work easier, this statement might possibly apply to a tool that had been crudely manufactured, but any modern manufacturer, with up-to-date machinery can make an unpolished shovel practically as smooth as a polished shovel when proper care is used. It would ill become me to be personal in my remarks here, but an instance which so aptly illustrates my words came to my experience some time ago that I feel it might be instructive to relate. A manufacturer of shovels from another country (I won't say where) asked the courtesy of going through a modern factory with which I am acquainted, and, in passing by some goods, his attention was struck by the smooth finish, and he asked Mr. Blank, 'how the dickens do you manage to make the goods so smooth and bright—have you some secret process?' Now, this was rather a pertinent question for one manufacturer to ask of another, and was not, I am afraid, clearly explained in reply, but to you here I may say, what struck the imagination of this visitor (accustomed to old style methods) was not something that had been done, but really was something that was left undone; in other words, the scale or surface of the steel had not been destroyed by imperfect working.

"And now, leaving preaching, I will show you in the matter of handles how we practise conservation in lumber. You all know the old style wood 'D' handle, to make which cuts pretty badly into a plank of ash timber, as compared to the way we now make handles. As ash timber became more scarce it was necessary to effect a change, and the band saw was made use of by cutting the blanks, heads and tails as it were, and, following nearly the shape of the D roughly. From time to time attempts were made to save this timber by splitting a straight stem, but for want of proper fastenings, and to some extent following the lines of the old D, was not successful until some years ago two patent applications were granted, both of which are now being used more or less. In fact the one owned by the company I represent has been well received by the trade, and is acknowldged to be fifty per cent. better handle than the old style D. The new patent D is not so subject to weather conditions, and the grain of the hand-grip, being in a lateral form instead of cross grain, does not crack by drying in the sun as does the old D."

Vagaries of Metal Market

Most Uncertain of Uncertainties—Copper, Tin, Lead, Zinc and Antimony Reviewed by W. G. Harris, Sr., President Canada Metal Co., Toronto

THE situation in reference to the various metals was thoroughly covered by W. G. Harris Sr., president Canada Metal Co., Toronto, who struck the keynote in his opening sentence when he said:

"The metal market of 1918, I suppose, is one of the most uncertain of uncertainties, particularly so of the kinds of metals, copper, tin, lead, zinc and antimony, around which my work centres. You can understand this, when you know that the ordinary price of tin is thirty-five to forty cents per pound, and it now stands at eighty-five cents per pound, and is scarce, and that for antimony the ordinary price is seven cents per pound, while during the past three years it has varied from this mark to forty cents.

"Copper, regular price of which would be twelve cents per pound, has varied up to thirty-eight cents. The Government of the United States has established a state of stability at present by making a firm price of twenty-three and a half cents on this.

"Lead, usual price three and a half to four cents, was sold in Canada last year around fourteen cents, then declined to seven cents and is now about eight and a half cents.

"Zinc.—We bought the last car of best grade V. M. spelter coming out of Belgium just before war was declared, five cents per pound laid down in Toronto, later we paid twenty-eight cents for ordinary grades of Prime Western spelter, not near as good quality, now eight and a half cents.

"Copper is a war material, and Canada was a most heavy user. During the first three years of the war our company bought a thousand or more tons, it being used particularly for parts connected with shrapnel fuses, bands for outside of shells, bronzes and brasses connected with ammunition plant installation and shipbuilding, and a general increase in ordinary business, but when the Government shut off on these shrapnel shells, the copper market declined quickly. Copper prices will likely be higher, for owing to the United States getting into shell making in earnest, large contracts are being placed. I, therefore, will believe it will advance.

"Lead.—The Canada Metal Company made thirty thousands tons of shrapnel balls, we bought our lead, first lots at four dollars and forty cents per hundred pounds, and then all the way up to ten and half cents on the American market. You can easily understand that this large tonnage, which is only a portion of that bought, would increase the price materially. The Canadians were the heavy users, and when the Canadians stopped buying there was a slump from ten

and half cents to five and half cents, making big losses to those with heavy stocks. However, since then there has been a slow but noticeable advance. The largest lead smelters are in America, and Canada has a very fine one at Trail, B.C. They smelt lead quickly and cheaply. Lead is therefore close at hand, and while due for higher prices owing to American business, will be affected quickly on any intimation of peace, therefore I mark lead for steady or higher prices, but it is well not to overload, for a decline to five cents would not surprise me if the dove of peace showed any intention to find a perch.

"Antimony is absolutely a war metal from the standpoint of tonnage. Ordinarily it is used for hardening newspaper metals, Babbitts, some lead pipe, Britannia metal, sheet lead, and some other domestic articles. Pre-war price was seven cents, war price up to forty cents, now thirteen cents. A good metal to let alone at present prices, except as a bullet hardener, twelve and half per cent. being used in British and American shrapnel now as the British and Americans are using more and more high-explosive shells, shrapnel is not in demand. We had a large tonnage bought at around thirty-three cents, when it dropped to seven cents, but later, with heavy purchases, it advanced quickly to ten cents, and at twelve cents some three thousand tons were bought; this left the market bare, with the result that it jumped to thirty-five cents, many cars being sold at around this figure.

"Spelter or zinc goes with copper in the manufacture of brass. Was five cents before the war, but after war started it advanced quickly to twenty-eight cents. Large manufacturing firms bought carloads a few months after the war started at close to thirty cents to be sure they would have metal for their galvanizing needs. The present price of eight and half cents is not high

W. G. HARRIS, Sr.

President, Canada Metal Co., Toronto, who delivered address before Ontario Retail Hardware and Stove Dealers' Convention on "The Metal Market."

under present conditions, and it is safe to have some of this around as there is not likely to be much change in the market. Large smelters having been built on a twelve to twenty cents price, they must run or close down and sacrifice their investment, small profits rather than none being their present motto. Do not expect zinc for these reasons to run to high levels during 1918.

"These are my own ideas of the value of these metals, formed from the experience of the past thirty-five years, and the intensive, close, every-day touch with the market, but none of these ideas are infallible, for I could tell you experiences for hours, success and failure of profit and loss.

"Tin.—The aristocrat of commercial metals. I can remember when I first became acquainted with tin, bought the first tons at twelve cents per pound. This was at the low, and refused to put in any stock at fifteen cents, then seventeen cents, but at twenty cents bought. Lost my first money, some five hundred dollars on tin, when it declined on a bull purchase from £62; today it is quoted in London at £327, and owing to the sinking of ships containing one thousand tons, the London Tin Committee refuse to allow any shipments either to Canada or the United States; this is to-day's condition. Therefore, would advise you to cover your requirements, but as there is an old saying, 'Whatever goes up is sure to come down," do not overload. I do not expect to have lower prices on this metal for some time. Tin is mined in places at a great distance, and ships are scarce, and apparently getting scarcer, they being required to carry men and food. Coal, you all know about. I have seen hundreds of people with bags and money begging for fifty pounds of coal in a city not as far from the coal fields as Hamilton. This is the idea so far as tin, and to those using it, it is as well not to be too short. The heaviest use for this today is for tinning sheets, canners and can making, genuine Babbitt for warships, machinery and solder wire or half and half.

"I have only skimmed over the subject, but I am sure you do not wish me to give you a lot of detailed figures, you can get these from your trade papers, but I feel that as my interests are your interests, you appreciate the ideas of one who risks his money and gives every hour of the day checking and counter-checking the variations in the pulse of the metal market.

"In summing up the metal market, you will understand there are London, Singapore, New York, Toronto, and your city or town metal market, all with different conditions. The difference is so great that they must be taken into serious consideration, freight congestion, embargoes, etc, make it that the man who has the goods can sell them and get his price, whereas the man who holds off gets nowhere. Many times I have been conservative and refused to stock up, but have learned the lesson and want to have a stock regardless of what the market may be in the future."

The Ready Mixed Paint Outlook

Optimism Must be Ruling Spirit For 1918—Believe in Value of Merchandise and Make a Profit—Message of F. J. Penberthy, Manager Lowe Bros., Ltd., Toronto

ILLUSTRATING many of his points by the use of charts was a feature introduced into the address given by F. J. Penberthy, manager Lowe Bros., Ltd., Toronto. Mr. Penberthy dealt with the "Ready-Mixed Paint Outlook," and on the charts, which were hung up across the hall, showed where advances in the manufactured product had by no means reached the percentage of increase recorded in raw materials. Mr. Penberthy outlined the situation as follows:

"As a foreword I wish to say that the ready-mixed paint outlook for 1918 depends entirely upon the state of mind of the merchant. Optimism must be the ruling spirit for 1918. Remember the general truth, 'As the thought, so the feeling.' Make the quality of the thought optimistic and constructive and the feeling is optimistic and constructive; make the quality of the thought pessimistic and destructive and the feeling is the same, hence the great importance of acquiring the spirit of optimism.

"In order that the state of mind be tuned to a degree of optimism, it is necessary for the merchant, first, to believe that the level of prices now ruling is warranted, and, secondly, to see a profit to the credit of his paint department at the end of the year.

"The ten minutes given me is not sufficient to verbally go into details regarding the present level of prices made necessary by the increased cost of raw materials—the extraordinary high cost of production—a scarcity of many materials essential to paint manufacture and reason for same, although all of these are the influences that govern the manufacturer in establishing the selling price of ready-mixed paint.

"The charts I have arranged show the percentage of advances on a number of important articles used in manufacture of paint and varnish. There are innumerable advances not shown on the chart exhibit that also have an influence on the cost of the finished product. These percentages are based on the market price of these materials on January 1, 1915, and January 1, 1918. Since that time further advances have taken place in practically everything shown on these charts.

"By studying these charts you must recognize that the paint manufacturer has not been inconsiderate in establishing his selling prices. You also must realize that in trying to decide upon an advance he has taken into consideration the effects of such an advance on your trade. From my experience in making the advances which have been found necessary, I am inclined to think that we, that is you merchants and we manufacturers, have approached this condition with fear and trembling instead of looking at it boldly as an inevitable condition, and we have gone on making small advances when we should have made greater ones; we have been afraid to advance our selling prices to a level that would give us the profit warranted on our investments. In other words, we have lacked courage.

"A recent report made by Trade Commissioner Edward Hurley, of the United States, stated that there were 250,000 corporations in the United States in the year of 1917.

"Of these 250,000 concerns, 100,000 declared no dividends whatever—in other words, they failed; 90,000 declared a profit of only $5,000 or less, and the small minority of 60,000 made a profit on their investment of $5,000 and over.

"Commenting on this report, a business expert stated that conditions in Canada were even worse than these figures show, and this astounding state of affairs was not brought about by any lack of capital, shortage of labor or material, but it was brought about by lack of man power. The term was used in this sense to apply to ability and courage—in other words the failure was attributable to a lack of courage and efficiency to procure a fair profit on the investment.

"If, as we know, man power is the greatest asset we have in the world to-day, and if man power is to adjust the world's affairs through its activities, research, knowledge and courage, why not develop your man power and change the state of affairs existing in Canada whereby nine-tenths of the corporations in this Dominion have not made any money on capital invested?

"Courage is defined as that quality of mind which enables one to encounter difficulties with firmness, or without fear or depression of spirit, boldness, bravery, spirit, daring resolution. It is the absence of this quality which accounts for the "failure," and "hand-to-mouth man."

"The outlook for the paint business in 1918, gentlemen, is just exactly what you

make it. Paint will be used, and the price will be paid for either good paint or cheap paint. You can follow the line of least resistance, building up a business on a cheaper line of paint, but to follow this line of least resistance is not necessarily advantageous; it is more often the opposite, and, indeed, applied to the question at issue, it is disastrous.

"If to you the paint outlook for 1918 is unpleasant, do not blame conditions, blame the man on the lookout. If I could impress upon each one of you the big part that manpower plays in your business, and you applied the great force that is inherent in you, then I could safely guarantee the success of each and every one of you.

"Courage is the weapon that the successful business man uses against the tendency to follow the line of least resistance, when that course is unprofitable. To ask the price to which you are entitled for high quality and thereby make a sale, not only profitable to yourself, but also to your customer; to establish your business on a firm foundation, one which will withstand the ravages of war, financial depression, crop failures, or any other business condition which might affect a business less firmly established than your own, requires that enviable quality—courage.

"The manufacturers have given money, time and man power to the building up of a selling service in order to assist you in marketing the goods of their manufacture which you handle, and, bear in mind, that in making this statement, I am a representative practically of all the paint manufacturers in the Dominion of Canada. I am not giving this message from an individual firm, but from all of them, and all of them have within their institutions that man power which builds up this selling service.

"Are you taking advantage of it? Do any one of you on a cold winter's day or a wet Spring day, when customers are not coming to your store, go to the telephone and call up John Smith in the country and say, "John, do you intend to paint your house this year, or your barn, or your wagon or your buggy?" and do you add, "Well, how about your neighbor Brown's house, have you heard him say anything about paint?" Do you get one or two dozen such prospects over the telephone on business days when customers are not coming to your store, and do you send the names of these prospects to your supplier so that he can bring business to you?

"Remember the other fellow out in the country, even though a great many of you here to-day enjoy a splendid city business. He is worth going after, and he has no argument to advance as far as price is concerned. Paint to-day is cheaper to John Smith out on the second concession than it was in 1914. At that time, when John drove into town he had to bring twenty-five bushels of wheat in order to get ten gallons of paint. To-day John can get ten gallons for sixteen and a half bushels of wheat, so, in reality, paint is cheaper proportionately speaking to-day than it was in 1914.

"Knowing that as soon as snow begins to disappear your customers are going to think of painting; did it ever occur to you to stack up your entire ready-mixed stock in the front of your store where your customers would have to walk around it in order to get in to buy some small piece of hardware? This was done successfully by an aggressive merchant in a town of 1,200 inhabitants.

"About the first of March he would stack all his gallon, half-gallon, and quart cans in a pyramid in the front of his store. Everyone entering or leaving the store would be forced to walk around this obstruction of paint. Each one passed a joke about it, but when Spring opened up everyone that had a painting thought in mind identified this merchant's store as the paint store of the town, and he built up in three years a business amounting to one gallon of paint or its equivalent for every man, woman, and child in the whole township, which means that he sold the equivalent of 2,000 gallons of paint a year.

"I know another merchant who, I believe, is present here to-day, in the farming community who always kept a can of red waggon paint open on his counter. Each farmer that came into his store would be invited to look at this can of wagon paint. Needless to say this merchant sold enormous quantities of red wagon paint.

"Another merchant friend of mine seemed to run to wagon paint. I never knew exactly what his thought was except that he believed that every farmer's implements should be painted, and he placed his opinion before every farmer that came into his store, and he everlastingly talked wagon paint. The consequence that he would order a hundred quarts of wagon red in one order.

"These instances are not remote. Our worthy secretary, I understand, had his town paper knock up about a dozen newspaper electrotypes and run off a number of sheets which, when cut up, produced several hundred attractive circulars at a very low cost. These were distributed as hand bills and produced results.

"There are hundreds of ways where aggressiveness and individuality can be demonstrated. It is all just a case of state of mind, gentlemen, psychology, salesmanship, optimism, anything you want to call it so long as it does the business and the merchants mentioned and the towns are not any different from you merchants and your towns.

"The paint situation is just exactly what you make it. If you go after business you will get it. Throw the whole weight of your personality, your personal power, against those disturbing elements which seem to force themselves to the surface, put forth a forceful aggressive campaign to your paint department this coming year and it will be surprising what you can achieve when you have awakened those latent forces which you possess. Take away your business and leave you, it will only be a matter of time until in one field or another you will be reinstated as a business man, but take away you, the man-power, and the goods, equipment and business will rust."

"When you feel down in the mouth, remember Jonah; he came out all right."

The question was asked Mr. Penberthy why manufacturers did not confine their energies to high-grade paint only, getting away from the cheap lines. His reply indicated that this must be a gradual process, but that the manufacturers were working towards that end. "The customers get just what they pay for it," Mr. Penberthy said, "and the firm selling cheap paint is not fooling the public."

The charts which Mr. Penberthy used will be reproduced in HARDWARE AND METAL.

F. J. PENBERTHY

Manager, Lowe Bros., Ltd., Toronto, who delivered address before Ontario Retail Hardware and Stove Dealers' Convention on the "Ready Mixed Paint Outlook."

A Forecast on Sheet Metals

Canadian Imports and Production — Future Prospects Excellent

Address by A. T. Enlow, President, Dominion Sheet Metal Co., Hamilton, Canada.

SHEET metals have had a very prominent part in the upbuilding of industrial and agricultural Canada in past years. They are playing a good part to-day, although not regarded as in the war munition class, and after peace returns they will again come into their own and the consumption will reach unheard of totals. This statement is made with the full knowledge of what Canada formerly used and is using to-day.

Prior to war times the consumption of galvanized sheets in Canada was about 55,000 tons per year, in addition to 65,000 tons black sheets, making a total of 120,000 tons.

TABLE SHOWING CANADIAN IMPORTS BLACK AND GALVANIZED SHEETS (net tons).

Fiscal year	Black Sheets from U.S.	Black Sheets from England	Total	Proportion from England
1913	66,063	7,377	73,440	10%
1914	39,125	15,954	55,079	29%
1915	29,054	7,260	36,314	20%
1916	46,512	1,333	47,845	3%
1917	50,784	2,258	53,042	4%
	Galvanized Sheets from U.S.	Galvanized Sheets from England		
1913	28,111	28,095	56,206	50%
1914	16,996	33,758	50,754	66%
1915	15,130	20,185	35,315	58%
1916	17,441	6,542	23,983	27%
1917	10,529	455	10,984	4%

CANADIAN PRODUCTION GALVANIZED SHEETS (net tons).

	Tons	Comparison with total imports
1915—5 monthly only....	2,791	8%
1916	7,037	30%
1917	10,895	99%

The farmer has been the largest user of galvanized sheets in Canada, with the building trades one of the principal consumers of black sheets. Last year and at present the farmer practically dropped out of the sheet market, and after the completion of existing building projects that item was also reduced to a minimum as a consuming factor. The railroads have always been large users, and they too have reduced purchases to a minimum, so that you will agree that the present consumption represents that part which is indispensable. Estimated from Customs records for a portion of 1917, the present consumption of galvanized sheets is from 20,000 to 25,000 tons per year, and black sheets about 50,000 tons. The prices in 1917 represented practically three times the normal price to the consumer, thus indicating conclusively that there is no satisfactory substitute for steel sheets.

It is interesting to note the reasons why

a large portion of buyers changed their source of supply, notwithstanding their sentimental preference for England, and this apparently has been due to the very important factors of reduced time required for shipment, the very considerable reduction in damaged goods, and the fact that it was unnecessary to tie up so much capital as would be required by purchasing a half-ton case of sheets in one gauge and size. The writer appreciates that to-day some dealers still argue in favor of crate shipments, but it is equally true that

A. T. ENLOW

President, Dominion Sheet Metal Co., Hamilton, who delivered address before Ontario Retail Hardware and Stove Dealers' Convention giving "A Forecast on Sheet Metals."

there is still a ready sale for old-fashioned razors and "Teddy Bears."

Many makers in the U.S. very naturally regarded Canada as a sort of "dumping" ground, to be used when business was slack and they wanted to stimulate tonnage production, and on the contrary as promptly forgotten and neglected when their order books were overflowing with domestic business. They were forced to compete against very low prices made by English mills, with a much reduced scale of wages, and in addition the 5% duty existed, whereas English sheets came in free of duty, consequently sold at an average lower price, all of which indicates that the Canadian buyer would really prefer to buy sheets made on this side of the water.

At the present time the supply from England is almost entirely cut off, and until the beginning of 1918 Canada has depended on the U.S. for her supply of black sheets, but now there is a Canadian mill producing these at the rate of 20,000 tons per annum, and they state that if the demand warrants doing so they can double the output, provided, of course, that the cessation of war would release a sufficient quantity of steel now largely used for war requirements.

It is a big proposition these times to get together a sheet mill organization in Canada, because American sheet mill workmen are the highest paid manual laborers in the world, many of them earning from seven to ten thousand dollars a year, and it is absolutely necessary to have experienced men. Under these conditions our friends who are embarking on this business should have the support of Canadian buyers, because notwithstanding their best efforts they will inevitably sustain a loss for some months to come, and in this connection we are glad to be able to say that the quality of their sheets, both as to working up quality and finish compares very favorably with the best brands from the United States or England.

Most of you are aware of the fact that galvanized sheets have been made here in Hamilton for three years, the shipments within that period having aggregated nearly $3,000,000, although a small portion of this was for shipment to British possessions outside of Canada.

The production of galvanized sheets—an entirely separate and distinct process from making black sheets, is at present at the rate of 12,000 tons per year, which could be increased under favorable conditions to 20,000 tons.

It might be a matter of considerable interest to hardware dealers and sheet metal workers in Canada to know that prices of galvanized sheets in Canada during the year 1917 actually averaged less to the trade than in the United States, notwithstanding the duty and war tax. It was our good fortune to have some advance knowledge of conditions, which enabled us to protect our jobbing and manufacturing customers well in advance, and at favorable prices, and they in turn played fair and gave to their customers a very considerable portion of this benefit.

In addition, we have from time to time enacted the trying role of general trade advisor through the advertising pages of Hardware and Metal, warning our friends in the trade not only when to buy prior to advancing markets, but in one period during 1916 emphasizing the fact that sheets could shortly be bought at lower prices, which eventually saved many dollars to the readers of this very admirable publication.

From the foregoing it will be clear to you that Canada has made a start in the matter of producing a good portion of her own galvanized sheets requirements, and we have always been of the opinion that the Canadian buyer will give preference to the home product, price and quality being approximately equal to the imported article.

As to the possibilities of future consumption of sheets in Canada, it would appear that when the farmer and builder get back into the game with their large reserve buying power there will be an avalanche of business in these commodities, as the buying power of the average individual who is normally interested in the purchase of sheets has been greatly enhanced within the past two or three years, and it will only require a reasonably low price, which we predict will not be anywhere near the low prices existing immediately prior to the war period, to bring out these buyers.

For the immediate future supplies of both galvanized and black sheets will be small, not so much on account of insufficient producing capacity, but due to the fact that the production of steel is insufficient to cover urgent war requirements, and to allow full production in articles of a more peaceful nature. Naturally the war products will have preference which will extend also to transportation, the worst feature at the present time.

The recent order issued by the United States Government making it necessary to secure a license to export sheets and other steel articles was modified to exclude black sheets, but advice now at hand indicates this order has gone into effect again and will very likely stay this time. This will work out to a point where a virtual famine will exist in sheets in a very short time, and no surplus whatever may be looked for.

The tinsmith and sheet metal worker will be able to help greatly at this time if he will carry only moderate stocks, and especially if his specifications can be simplified by cutting down the number of gauges and sizes. Various parts of the country have peculiarities in this respect, and it now requires about one hundred and thirty different gauges and sizes to fill these orders, whereas at least half could be eliminated with great resulting benefit to both the producers and consumers.

Canada heretofore has been prone to sell her low-priced raw materials and buy the other fellow's finished products, incidentally accepting the role of chronic borrower to enable her to pay the difference in price. It is the general opinion that this condition will disappear with the war and that Canada will hereafter produce a much larger proportion of finished products, including sheets, and that as a result her favorable trade balance will be the envy and admiration of the rest of the business world.

The present unprecedented conditions have demonstrated that we have the finest Government extant; a "Premier who sits steady and refuses to allow anyone else to 'rock the boat'"; railways that have solved the bulk of their troubles and are all capable of handling much larger business; a supply of unfailing Hydro-electric power, sufficient when developed to enable us to forget coal; and manufacturers who have improved their financial position during the war period and will thus be able to independently develop many lines of remunerative trade with great benefit to all who make Canada their home.

Hinges and Wrought Hardware

Elimination of Many Sizes Advocated—Organization Basis for Great Good, Opinion Voiced by A. F. Hatch, Manager Canada Steel Goods Co., Hamilton

SPEAKING on "Hinges and Wrought Hardware," A. F. Hatch, of Canada Steel Goods Co., referred in opening to the advantages of organization, and said:

"Gentlemen, you have one of the most important and far-reaching organizations connected with the trade of Canada. There are some men, bright business men, who are as yet not members of your organization. I never can tell why they are not members. I am no believer in combines, but I am a great believer in organization, and I think if this were always impressed on you strongly by your trade journals, still greater results would be secured. Records show that there are fewer failures in the hardware business as compared with all other trades in the world. There are certainly fewer failures in the hardware business than there are in any other line of business in Canada. Shakespeare has said that there is a tide in the affairs of men, which, taken at the flood, leads on to fortune, and I would point out to you gentlemen present, that the flood tide in the hardware business is setting in now. Taken advantage of, it will lead you to still greater success. A few words more on this matter of organization, gentlemen, and I will proceed with my subject. You have in your body, brisk, brainy business men. These should take more to do with affairs of the association. That will make it an even greater success. I note that the officer bearers are often about the same from year to year, they may just change jobs around. There should be an opportunity here for others to take part. Is it because of a reluctance to act, or just a desire to leave the work to others that this happens? However, I have not any doubt but you have many critics whose only power lies in the direction of the convert who had been a very fault-finding fellow, and whose first prayer on conversion was to be on the subject of service to others. Everyone who

knew him wondered what he'd say. His prayer was, 'O Lord use me in an advisory capacity' (laughter).

"We are here, in Canada, gentlemen, to make a living, but we are here to do more. We are here to make our country. We have

A. F. HATCH

Manager, Canada Steel Goods Co., Hamilton, who delivered address before Ontario Retail Hardware and Stove Dealers' Convention on "Hinges and Wrought Hardware."

a duty to our country. Homes have to be built here, and it is the business of the manufacturer to help build the homes. Here is where, at this time, the manufacturer has a special duty and field of effort, the business of finding materials to make the goods you gentlemen are to sell.

"The thought most prominent in your minds just now, I think, is whether goods are going to be any cheaper. Is wrought hardware going to become cheaper? Gentlemen, I say no. It is going to become dearer, I will tell you why. There is a tremendous amount of detail in making a piece of wrought hardware. I always envy the man who has only a stove to make, and can just pour a little iron into a hole in some sand and get out a stove (laughter). But there is far more detail than that to consider in turning out a piece of wrought hardware. In the first place we must have for it a piece of metal of a quality which is hardly made to-day at all, that is low carbon steel.

"Nearly all the mills in the United States making steel at all to-day are making steel for munitions purposes, shell steel, which contains 55 per cent. of carbon, and a great deal of scrap which has to be re-sold to manufacturers who do not need a steel that will bend to make their product. As a result this soft low carbon steel is very scarce, and as it is used in immense quantities for products made from it the demand is very strong. We could sell our low carbon scrap at as high as $30 a ton.

"Take a hinge now as an example of the product. You think of it as a little bit of hardware, in a box it may be, for which you pay 25 cents. You mark it 40 cents and get it across the counter to a customer, and there's all you need care about it you may think. Well, there's more than that. We make 43 different kinds of hinges and in 441 different sizes at that, and I really think that in these days of economy it is a positive disgrace that the retail merchant does not throw out the sizes he handles that are unnecessary.

"Many of you gentlemen seem to be afraid to say to a customer that you have not the special size he wants, and to get him to use a size that would serve him every bit as well. Take butts again. If you would only get into the way of handling butts in about six sizes, cut out all the quarter sizes and unnecessary numbers, and let us use the metal left to spare to much better advantage, that would mean that we manufacturers would no longer be getting into disgrace with you for not being able to deliver special numbers and sizes in these times, for you would be saying to your customers, 'Use standard sizes.'

"Soft steel is scarce, very scarce. Let me tell you gentlemen, you are going to find that a lot of the wrought metal hardware you could formerly buy is soon going to be impossible to buy at all. A lot of agents have been going around the country picking up hinges, etc., a half dozen here and a dozen there, and where have they been going do you think? To wholesale houses across in the States to be sent to fill the great demand of countries which formerly got their supplies from Germany.

"We could send out any amount of hardware to meet foreign demand, but we make it a principle to fill our home trade's requirements first in every case (cheers). We have an order for $1,800 worth of hinges for India which we have had on the books for some time, for it was accepted only with the clause in the contract that it would not be filled until home trade requirements were first met.

"The matter of steel is going to be still more troublesome with the United States now fairly into the war. When the U. S. entered the war the books of the steel trade in that country showed that 82 per cent. of the output would be needed for the war. It looked as if we might expect a little share over for our needs. But what with transportation and other industrial delays it turns out that the U. S. steel industry has its output reduced by 50 per cent. That indicates to you how much we can expect from there in the way of steel."

As indicating what the outlook is to be, Mr. Hatch called attention to the drop in railway stocks. The reason for that is the heavy depreciation in rolling stock and roadbeds. Actually since the war the U. S. railways have not done more than replace outworn rolling stock, locomotives included, not a single new unit has been added. All this will have to be re-supplied, and the depreciation, referring to taxation ahead, Mr. Hatch mentioned the estimate of $800,000,000 made by the Finance Minister at Montreal, and stated on good authority that the war tax on imported goods, hardware included, would certainly be materially increased. This fact was heard with evident interest by the gathering, and made a great impression.

"After the war the banks might be expected to call in their out-standing money. Men who have been borrowers will do the best they can," said Mr. Hatch, and he concluded with these words:

"My strong recommendation to you all is to make sure you have enough material to supply the people. Then have a good stiff backbone and point out to them that you have to pay more for your goods, and do not give your goods away."

Outlook From Wholesalers' Standpoint

Manufacturers' Outlook is Jobbers' Outlook—Am Ardent Supporter of Profit, States T. B. Williamson, H. S. Howland, Sons & Co., Toronto

IN opening his address, T. B. Williamson, H. S. Howland Sons & Co., Toronto, said: "There is not a great deal that I can say as to the outlook for 1918. The men who have preceded me have covered the field very thoroughly and it must be remembered that we are jobbers, who depend on the manufacturers for our goods. The manufacturers who have addressed you have given you an insight as to the difficulties they have to encounter in producing goods and there is not any more that I can add."

"It must be remembered," Mr. Williamson continued, "that we have not only the lessened production by manufacturers to face, but transportation is such that we cannot even estimate when our goods may arrive. This is likely to result in 'short lists,' which may grow longer than the invoice.

"The manufacturers' outlook is really our outlook; we are distributors of merchandise, and it is impossible to predict what may happen. Just at present I feel like buying everything we can get, not for speculation, mind you, but for normal trade with an average year's increase allowed. In fact, I may say that we have bought heavily, goods for the Spring and Summer trade, and where possible, have placed orders for Fall delivery. But it must be remembered, gentlemen, that we have not yet received all of the goods on order and have no guarantee that we will be able to secure delivery. The buying spirit is predominant now, but with conditions changing so rapidly, next week or next month we may be sitting tight.

"Might I offer a suggestion here to the retail merchants, which will not only benefit the retailer, but will enable the jobber to maintain a satisfactory service. Knowing conditions as they are, how difficult it is to secure a great deal of the merchandise from the manufacturers, will you, Mr. Retailer, help relieve the situation to this extent: When you give a representative an order or send in an order by mail to your jobber, permit substitution as a means towards securing and upholding satisfactory service.

"When you place an order for 'bent strapped' hay forks, indicate whether plain ferrule will do; when you order two-inch butts, state whether one and three-quarters or two and one-quarter inch will answer; when you select a padlock priced at $2.00 per dozen, advise whether another style at

T. B. WILLIAMSON

H. S. Howland, Sons & Co., Toronto, who delivered address before Ontario Retail Hardware and Stove Dealers' Convention on the "Outlook From the Wholesalers' Standpoint."

the same price will answer your requirements. In this way, gentlemen, you will permit the jobbers to render you a very good service, otherwise, with the shortage of goods now existing, service must be curtailed.

"There is another point I would like to discuss, gentlemen, and that is the matter of profit. I am an ardent supporter of profit, for without profit, no business can continue for long. During the first year, yes, even two years of the war, it was evident that many retailers did not follow the market in marking up their stock. They sold goods on the basis of old cost, and this in view of the fact that their overhead expenses, in fact all expenses were climbing rapidly, and that the profit at which this merchandise had been marked was insufficient in war time. I don't think, gentlemen, that any of you to-day are following that policy, but if so, I would bring to your notice one or two matters which may give you food for thought.

"In pre-war times goods costing $2.00 and even $2.25 per dozen, usually sold at 25c each. Those same goods to-day would probably cost you $3.00 per dozen, but a selling price figured on former margin making $4.50 would be insufficient now.

"You labor is higher, your freight and cartage higher, your delivery charges higher, in fact there is not one single item entering into the cost of doing business which is on a level with what I might almost term pre-historic days. Are you considering these points in determining what you selling price will be? If you are not, gentlemen, you are not watching those details which make for profit in business. A margin of profit sufficient three years ago is inadequate now, so by all means look into the question seriously.

"There is taxation to be considered as well. As one of the speakers indicated to you, this is going to assume enormous protions, and you must be prepared so that it won't swamp you. And it will continue for some time after the war. I tell you, gentlemen, that unless you provide against the lean years which are to come when business will be curtailed and you will be carrying a heavy burden of taxation, unless you take advantage of the opportunity to make profit on a rising market, I say to you most emphatically, 'God help you, for the bankers won't.'"

Building Prospects for 1918

Standardization in Construction of Homes Suggested in Address by G. T. Barrett, President, Bishopric Wallboard Co., Ottawa

"THE Building Prospects for 1918" formed the subject of the address given by G. T. Barrett, president, Bishopric Wallboard Co., Ottawa. Mr. Barrett outlined influences which had caused depression in building operations and suggested standardized homes to overcome some of overcrowding in cities and manufacturing communities. His remarks are given herewith:

"It is certainly a great pleasure to me to meet this large and representative body of the Retail Hardware Dealers' Association of Ontario, and it is a pleasure to note that the hardware men of Ontario recognize the value of co-operation and exchange of views on matters pertaining to their own particular line of business.

"It has been suggested that I say a few words to you along the line of the building prospects for 1918, and I wish I could predict, with even reasonable certainty, what 1918 has in store for us as regards building. On looking back to the banner year of 1912, we find, in thirty-five of our larger Canadian cities that the building permits issued totalled one hundred and eighty-five millions, while in 1917 the total permits issued in the same cities were only thirty-five millions, a reduction of one hundred and fifty millions, or approximately eighty per cent, but I firmly believe the minimum has been reached.

"The war was the primary cause for this falling off in building, yet to-day the increased cost of raw materials and labor, amounting to forty or 50 per cent. or more is having a great effect upon present building operations. I am convinced that, in order to offset this extra cost, prospective builders, as well as manufacturers and dealers, should study the tendency to standardize building construction. This is one method of reducing the cost, as by adopting proper designs, much material and labor could be saved.

"It behooves us, as business men, to consider very carefully the housing problem for this particular class of workmen. Some of our larger industrial corporations are erecting homes for the men employed by them, and these are rented to them at a moderate rntal. This proposition should not be confined to the larger industries, but the smaller manufacturers and the farmer should also take up this work if we are to get efficient and satisfactory results from our employees. It is essential that we look after their interest in this respect, by providing them with homes that are warm and durable, and at a cost within their means.

"We are well aware that the most important thing we have to do is to increase production. In this way Canada can, and is doing, her share towards winning the war. The next important from my point of view is the construction of modern homes. There is always a certain amount of labor unsuited to farm work which is available for this other important point.

"What are we going to do to construct homes for ourselves and our employees which can be rented to our working classes at a rent which they can afford to pay, and yet give a reasonable return on the capital invested.

"In order to do this we must substitute materials which are being manufactured to replace those materials formerly used in construction, and all of these substitutes have their merits, and can be used in practically every class of construction. There are those that are made for interior work only, but others can be used successfully for exterior work and from information received from some of the leading architects and contractors, the use of these substitutes will reduce from twenty-five to forty per cent., the present cost of building. In other words, with these building materials a building can be erected to-day at the same cost as in 1912, and at the same time, a warmer, better, more durable and artistic building can be had. In connection with this saving there is also a large saving of time and labor, and this is a time when the saving of labor is a most essential point.

"The hardware man or the hardware dealer is the first man that the builder gets in touch with when he anticipates the erection of any building, particularly in the smaller town or rural district where there is no permanent architect. The hardware dealer is in on the ground floor in this respect, as it is to him that the contractor or home builder goes for information as regards the cost of cement and materials that he may require in connection with his excavation work. I am sure that the manufacturers of these various materials will co-operate with you in every way, and by this co-operation the building permits for 1918 will show a large increase over those of 1917.

"I leave these few remarks for you consideration, hoping that some of the points brought out will be of some material assistance to you during the year."

THOSE IN ATTENDANCE

A partial list of those in attendance at the convention follows:

J. W. Birch, Beamsville; W. F. Macpherson, Prescott; J. N. McGregor, Oakville; Jno. Caslor, Toronto; A. F. Wright, Hamilton; Albert Wademan, Markham; A. E. Bottom, Bobcaygeon; James McGregor, Caledonia; Nelson Mills, Hamilton; E. T. Carter, Jarvis; N. R. Pond, Jarvis; Fred G. Murray, Cayuga; Geo. D. Hubbard, Barrie; Fred W. Otton, Barrie; W. A. Rankin, Ottawa; A. M. Oldham, Weston; R. Hadden, Picton; W. H. Lont, Collingwood; F. B. Smith, Belleville; H. E. Fenwick, Toronto; Harry C. Pattinson, Niagara Falls; W. J. Bell, Beeton; Will H. Boyle, Napanee; F. W. Silvester, Stouffville; G. Mathewson, Toronto; W. E. Platt, Toronto; Geo. A. Davison, Woodstock; Christie Bros., Toronto; C. M. Kennedy, Toronto; Arthur H. Lake, Toronto; Blake L. Booth, Welland; John W. Zavitz, Wallaceburg; N. Zavitz, Wallaceburg; W. H. Cuddy, Strathroy; J. C. Kayser, Simcoe; F. E. Hendershot, Mt. Forest; J. C. McFadden, Toronto; D. G. Carter, Picton; J. W. Peacock, Toronto; R. McGregor, Oakville; A. G. Anderson, Port Dover, Ont.; R. J. Carroll, Toronto; E. E. Johnston, Lansdown; F. A. Coons, Winchester; H. L. Myers, Stratford; M. Phillips, Toronto; F. H. Sheppard, Burlington; D. A. Haig, Lansdowne; Gordon Colton, Burlington; S. R. Peash, Rockwood; E. Jeffery, Midland; Chas. Hartman, Midland; R. M. Cleinenk, Milton; R. H. Hillhouse, Clifford; R. McAlpine, St. Mary's; G. McLaren, Port Elgin; Julius Perrault, New Liskeard; John Douglas, Wroxeter; H. E. Moore, Oakville; W. W. W. Morgan, Norwich; B. E Webster, Hamilton; E. T. Coleman, New Dundee; L. C. Lashbrook, Ayr; D. K. Clarke, Hamilton; C. F. Fawcett, Tweed; R. J. Walkem, Tottenham; John C. Dent, Bothwell; Wm. M. Kerr, Dundas; G. E. Baxter, Little Current; Jas. Ivery, Toronto; F. A. Noden, Toronto; Jas. D. Smith, Baysville; J. E. Hewitson, Toronto; Wm. C. House, Trenton.

Letters of regret and apology for unavoidable absence were read by the Secretary from Adam Taylor, president Canadian Manufacturers' Exhibitors' Association; Past President C. W. Conn, Past President M. S. Madole, and Vice-president E. Wanless.

Luncheon Given by Manufacturers

Luncheon was tendered to all the delegates by the Hamilton hardware manufacturers, Robert Hobson, Steel Company of Canada, presiding. Addresses were given by A. F. Hatch, J. N. McGregor, W. F. Macpherson, D. A. MacNab, T. B. Williamson.

At Wednesday evening's session cigars were provided by the Retail Hardware Association of Canada.

HELPED CONVENTION TO SUCCESS

President McGregor Praises the Members for Their Attendance at the Meetings, and Thanks HARDWARE AND METAL and its Editor for Appreciated Assistance

In announcing proceedings of Wednesday evening session to the association members before the afternoon session dispersed, President McGregor took occasion to pay especial compliment to the speaker of the evening, Mr. G. D. Davis, and to HARDWARE AND METAL, of which paper Mr. Davis is editor and manager. "I want to draw to the attention of every member of this organization the magnificent assistance that has been given the Retail Hardware and Stove Dealers' Association of Ontario and this Convention by the splendid advertising given the Convention in HARDWARE AND METAL for the past three or four months," said the president. "I want also to express here my great ap-

Wanted--Business Courage

Advertising an Obligation to Ultimate Buyer—Quickest Way to Strangle Manufacturing is to Shut Off Advertising and Selling—Retailer and Manufacturer Can Work Together

Address by A. A. Briggs, Advertising Manager, Dunlop Tire and Rubber Goods Co., Ltd., Toronto, Canada, before the Ontario Retail Hardware and Stove Dealers' Association.

PASSING, as we are, through the most perilous time in our history, when manufacturing and merchandising are being tried in the great crucible of public opinion, it is but natural that advertising as a commercial factor should be both hailed as a wonder and assailed as a blunder. Because retail advertising is unalterably linked up with manufacturers' advertising, it is important that we have a clear idea of just why manufacturers in general should continue their publicity policies at the present time. This means stating some new truths and restating some old ones.

As we see it, advertising, viewed in the non-competitive sense, is an obligation to the ultimate buyer. By perpetuation it becomes a guide to that buyer and an asset to the manufacturer. Strange as it may seem, often the accompanying good in other directions ensures the greatest benefits to the people from manufacturers' advertising. For instance, take the automobile. The publicity which sold millions of cars also in the end brought thousands of miles of good roads. This, of course, means a help to the farmer. Selling automobiles also effected a tendency to build homes with more ground around, because of the necessity created for garages. This naturally means better hygienic conditions.

Various other industries could be quoted to show the broad scope of advertising benefits, but no man—no matter what little he knows about advertising matters in a technical sense—can deny that this potent force in furthering sales is really the best safeguard the public can have of honest efforts to serve them. Combines, as a rule, do not advertise. If they do it is in a secretive way and, therefore, never reaches the maximum of effectiveness. And whether you, as a dealer, are aware of it or not, manufacturers' advertising unquestionably raises the standards of quality by raising the standards of demand. Likewise it makes for cleaner stores, better help, better hours, and better service in general.

So that battling for place in the commercial war means the manufacturer, who shows his hand in the beginning by advertising, must continue that programme, or leave the public to draw their own conclusions. The statement of this truth obviously means that the manufacturer has no story to tell in the first place, if that story will not stand the searchlight of competitive copy.

Then, again, take the effect on employees of advertised goods. Somehow they come to think their products excel, which belief begets enthusiasm in their

A. A. BRIGGS

Advertising Manager, Dunlop Tire and Rubber Goods Co., Toronto, who delivered address before Ontario Retail Hardware and Stove Dealers' Convention on advertising under the heading "Wanted—Business Courage."

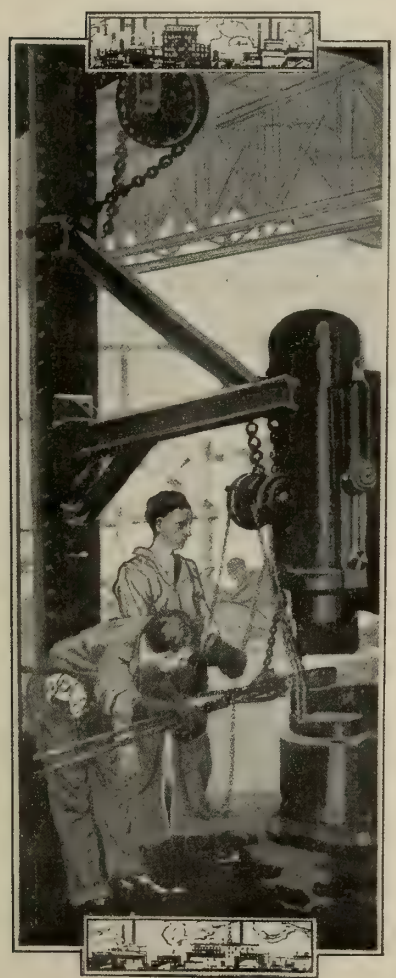
work. A sudden ending of manufacturers' advertising might mean, not only a coming to life of that type of merchant who seems to delight in fly-by-night methods of putting it over the public in the day-time, but also a deterioration in employee zest.

In a limited discussion of a subject with so many ramifications as publicity, our remarks necessarily must deal only with fundamentals. Therefore, because we feel you men are concerned with the larger view of advertising, as well as with the phase immediately affecting your business, we take the liberty of touching on various angles of the question. In a crisis of world affairs like the present these angles bob up here and there as the viewpoint of the outsider becomes hazy. Recently in the States a group of men met for so-called "serious business" and the result of their conclave was this: "All advertising should be discontinued during the war. It is unnecessary expense." If this silly pronunciamento, which has been explained away so many times, were true, it could mean only one thing—that the rest of us who keep on advertising are humbugging you. But the trouble with such like reformers is that they think only in low gear. They are like the foreigner who threw a half-dollar down the crack in a sidewalk to make it worth his while to pull up the board to get the dime he lost. They are they same type of people who, when the United States entered the war, had the remedy for the business void before the void was created. Having all the experience of the other warring nations to pattern after, it looked like apple pie for Mr. Abolish This and Mr. Abolish That, but their own experience did not at all dovetail in with the semi-ready patterns. Ostensibly the one conclusion a sensible man can draw from the above statements is that the only business a man can essay to tamper with is the one he understands the fundamentals of.

Advertising is unnecessary in war time or in peace time only on the same basis that making a crate for the goods, getting a wagon to carry the crate, hailing a train to ship the crated goods on, are unnecessary—the public only want the goods—not the method of sale or the process of delivery, yet which item can the manufacturer leave out and still serve the great concourse of dealers and consumers hundreds of miles away?

We surely all know that the war will be won on the battlefield—nowhere else. We also should just as readily know that we will not help to win it there if we fail at home. The quickest way to fail at home is to strangle manufacturing, and the quickest way to strange manufacturing is to shut off advertising and selling.

What we have stated so far in necessarily brief terms should make clear that the situation governing the manufacturer who advertises is as sound now as it was sound in ante-bellum days. That being the case, the retailers' distribution outlook should be pretty much the same as before.



It cannot be denied that dealers who advertise are in the minority, and the logic of the thing would seem to indicate that advertising in a retail sense is not absolutely essential to successful merchandising.

In our experience as an advertising man for various types of industries—and from our observation of dealer methods in various portions of Canada—we have noted that generally where a dealer shows special aptitude in advertising technique he eventually graduates into the small jobber field. On the other hand, we have been compelled to note that where retail men seem to fail ignominiously in either their newspaper appeals or the preparing of circulars, etc., they certainly were not always failing in getting cash discounts from their manufacturers, or in waiting on their

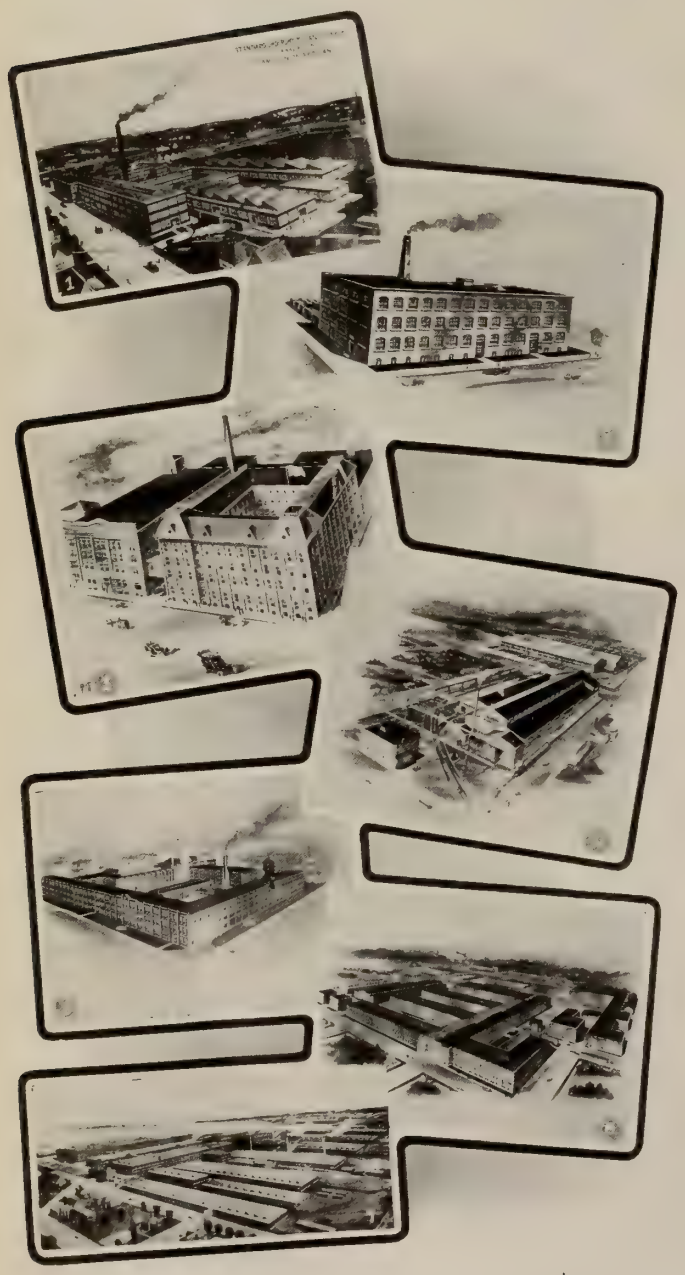
Hamilton's Place In The Sun

ON the foregoing pages appears a report of the Fourteenth Annual Convention of the Ontario Retail Hardware and Stove Dealers' Association, held held this week at Hamilton, Canada.



On the following pages appears announcements of many of the leading manufacturers and wholesalers in the City of Hamilton.

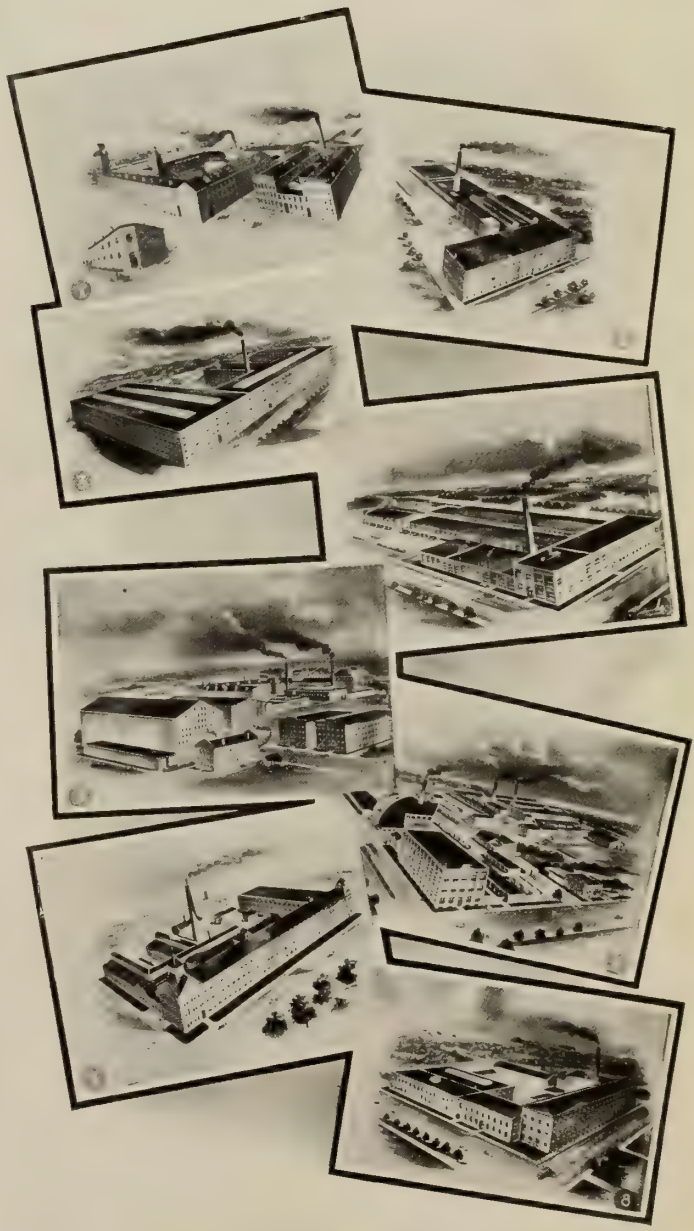
This "Made-in-Hamilton" section will give the Canadian hardware trade some idea of the great variety of hardware lines made in the City of Hamilton, and will drive home the fact that Hamilton is an outstanding City in the production of hardware lines—an industrial centre of great proportions and a logical place to hold a meeting of retail hardware merchants.

The two pages following, give some information regarding the City itself, and the succeeding pages will undoubtedly prove of great interest to the great army of hardware buyers who are readers of Hardware and Metal.

The City of
HAMILTON

where the Hardware Convention was held this week—is situated on the shores of Hamilton Bay, and has an almost perfect land-locked harbor at the head of Lake Ontario.

Many of Canada's most important industries are located in Hamilton. The City of Hamilton has been able to attract a huge amount of outside capital for manufacturing purposes owing to its excellent geographical location, splendid shipping facilities, desirable factory sites, happy home surroundings and many other advantageous features.



From Hamilton Mountain, as it is generally called, a magnificent view is to be had. The city, with its many attractive features, lies immediately below. To the north are the waters of Hamilton Bay; the west a bird's-eye view of Hamilton Valley; and to the east, five miles away is Burlington Beach—Hamilton's famous Summer Resort, separating the Bay from Lake Ontario. To the south-east there is the fruit garden of Canada, a panoramic view seldom equalled and said by many to be not surpassed by any other on the continent.

Approximately, one million dollars of fruit is shipped annually from this section, the greater portion passing through the City of Hamilton. Hamilton has a population of slightly over 100,000; area of city 7,500 acres, and boasts of over 200 miles of water mains, 125 miles of sewers, over 26 miles of asphalt roadways, 200

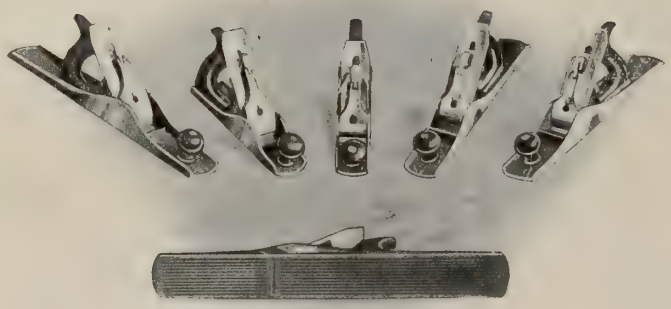
miles of cement walks, 15 public parks, approximately 20,000 houses, 450 manufacturing industries, 7 steam railways, 6 steamship lines, 4 suburban electric railways, 83 miles suburban electric railroad, over 30 miles street railway, 80 churches, 30 public schools.

Hamilton is most favorably situated as regards freight rates. Being an intermediate point between Buffalo and Detroit, they can get their low freight rates from places like New York and Chicago, and on account of being near to the border, pays a low rate on coal, etc. Many factory sites are available where switching privileges may be obtained from the railway.

Among Hamilton's large industries are wire fence makers, agricultural implement works, washing machine and clothes wringer manufacturers, hardware manufacturers, silver-plated ware manufacturers, wire goods manufacturers, blast furnaces and steel manufacturers, plow works and other large industries.

Although a great manufacturing city, Hamilton ranks as one of the most attractive residential localities in Canada.

The manufacturing plants are situated for the most part in the north-east part of the city and in the majority of cases are admirably laid out and are models of practical application of modern methods.

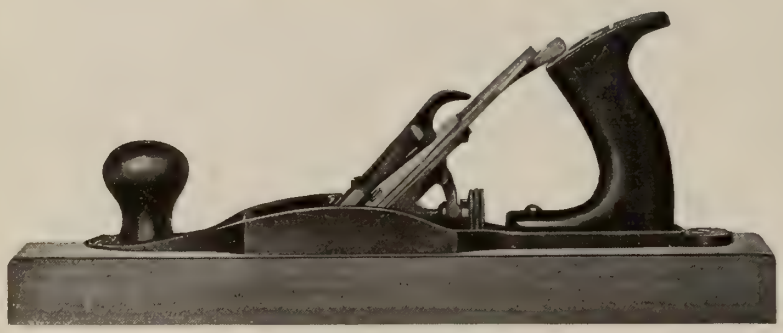


That Hamilton is an ideal city for a convention has been clearly demonstrated by the manner in which large conventions have been accommodated during recent years.

On the following pages will be found announcements of many of the largest firms in Canada catering to the hardware needs of the Dominion of Canada and other countries.

MADE-IN-HAMILTON HARDWARE

NATIONAL

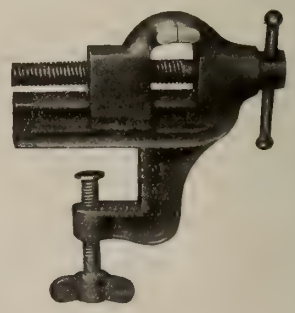


Made-in-Hamilton Hardware

National Adjustable Iron Planes

Made in eight sizes—extra heavy, strong, well machined and finished frames. Blades of best Sheffield steel, very finely tempered, ground and honed to a perfect cutting edge. Adjustable sideways as well as endways. Every plane guaranteed.

Place Your Order Now for Spring or Future Delivery. Prices are Right. Everything we Make we Guarantee.



NATIONAL WOOD PLANE

for those preferring a wooden base plane, heavy pattern, selected, well-seasoned Canadian Beech and knob of hard Maple. Blade, best Sheffield steel, adjustable side and endways. Four sizes.

NATIONAL ADJUSTABLE HACKSAW FRAME

Extra heavy stock, neatly finished and nickel-plated—a strong, serviceable frame, adjustable from 8″ to 12″.

AMATEUR VISE

The handy man should have this small vise. It is made to fill the requirements of the man around the house.

Kingston, Ont., 1914.

The Banwell-Hoxie Wire Fence Co., Ltd.
Hamilton, Ont.

Gentlemen. I thought you would be interested in the use we are putting your wire to The Engineers of Queens University have practical work in the field. This year, under supervision from the Engineer of the Military Department, they undertook to build a bridge.

The stretch is 110 ft., and the bridge is 20 ft. wide. They used 240 rods. They laid the mesh 5 widths side by side, and 5 layers, making in all 25 lengths of 8 wires each or 200 wires in all, binding them up together at every two or three feet, and then putting the uprights on as you see, and then stretching the wire along the top in the ordinary way as protection.

They are now at camp time when the Rurals come into camp, march the artillery across it and put some gun cotton under it and blow it up. They estimate it capable of carrying a load of 60,000 pounds, or a body of soldiers at close marching order.

You can use these photos in any way you see fit, or if you want I could send you the negatives. I remain,

Yours truly,
(Signed) W. A. MITCHELL.

This Is a Military Bridge

The fence that is good enough to serve the Nation's purpose in her loyal efforts to assist the Mother Country, is good enough for every Canadian, is it not?

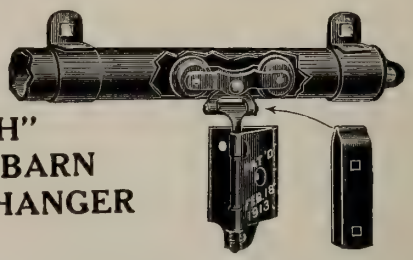
ALLITH DOOR HANGERS

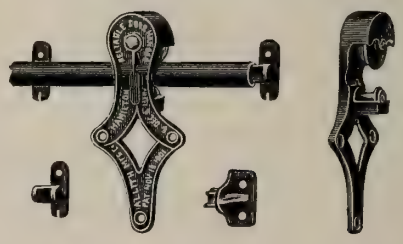
—the altogether satisfactory line—a style for every use



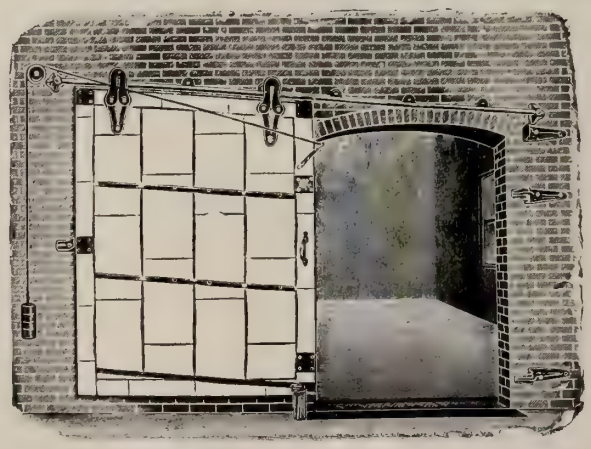
THE "ALLITH" No. 1915

Sectional View of Bearings

To the right THE "ALLITH" FLUSH BARN DOOR HANGER



The only flush door hanger on the market. Door can be made as tight as a house door. Will keep garage, stable, barn or workshop as warm as a house.



Wind-proof, storm-proof, track adjustable. Door hinges into opening.

THE "ALLITH" No. 1915

—a distinctive sliding door hanger with oiling device. (Note illustration.) It has milled wheels, round face, 2¼ inches in diameter, double roller bearing wheels. (Note sectional view.) Has great strength. No side scraping of wheels, therefore easy to operate.

THE "RELIABLE"

Made in three sizes, Nos. 1, 2 and 3; all same design, but for doors varying in weight and thickness, ranging from light driving shed or narrow barn doors to extra heavy mill or warehouse doors, fire doors, etc. The frames are unbreakable—no bolts, rivets or parts to become loose or throw hanger out of line or out of use.

Greater production in rural Canada means more barns built—more hangers used. Now is the time to get in touch with the ALLITH line. Write for particulars.

NUMBER ONE

The WRIGHT BROTHERS

IN 1896, Wilbur Wright and Orville Wright of Dayton, Ohio, decided to abandon several small business enterprises in which they were interested and concentrate their entire force and inventive genius on the perfection of a flying machine. Up to the time they entered the field no one had ever studied the subject with such scientific skill or such undaunted courage.

The Wright Brothers were masters in all their work. After years of concentration they gave to humanity a gift which ranks in importance with the noblest achievements the world has ever known.

The secret of Wright Brothers' success was

CONCENTRATION

The same principle of concentration, which enabled the Wright Brothers to perfect their Airplane, has enabled us to create the Victor Hack Saw Blade—which is recognized everywhere as the last word in Hack Saw Economy.

For twelve years we have focused all our force on the perfection of this one tool—the Victor Hack Saw. We have centered our powers on making exhaustive experiments and on the development of new processes.

Logic told us that by concentrating all our energies on one tool, we were more likely to produce a Hack Saw Blade which would excel all others, than if we tried to perfect a dozen or a hundred different tools.

As a result of this concentration, we have created the most enduring and efficient Hack Saw Blade known to science. There is nothing vague about the economy of the Victor Hack Saw Blade. It has been proven.

The "Seafoam" from Hamilton

—the washer that all Canada will appreciate

HAMILTON is the electric hub of Canada and naturally the development in the Dowswell, Lees & Company washers has been along electric lines.

The "Seafoam" is the outcome of this development—it's practical all the way through, from an electrical standpoint, and from the washer standpoint.

The material and workmanship cannot be improved on. The washer is equipped with Robins and Myres one eight horse-power universal motor.

The "Seafoam" is simple, durable and trouble proof.

If power is available in your town—you can't go wrong to push the "Seafoam" or any Dowswell, Lees & Company's lines.

PROVING OUR STATEMENTS

Winnipeg Automobile Club

208 Scott Block.

22rd. January, 1918

Hamilton Advertisers Agency,
Hamilton, Ont.

Dear Sirs,
In reply to your wire re "Stopglare" lens, I would advise you that this lens was tested before the Committee of the Manitoba Motor League acting on behalf of the Provincial Government, and was fully approved and certified for use in the Province of Manitoba.

Yours faithfully,
A C Emmett
Secretary Test Committee.

Ontario Motor League
Office of Secretary Treasurer
TORONTO

February 2nd, 1918.

Mr. R.O. Carroll,
Hamilton Advertisers' Agency,
Hamilton, Ontario.

Dear Sir,
This is to acknowledge the receipt of your enquiry re Stopglare lens, and to advise you that Marshall Tripp, Inspector in charge of the Mechanical Transport Branch of the Police Commission of the City of Toronto and I, as official observer of the Ontario Motor League, tested a set of Stopglare lenses and found that not only did they greatly diminish the glare but also gave a well diffused driving light, illuminating the crown of the highway, the right of way, fences on either side and some distance beyond.

Yours truly,
ONTARIO MOTOR LEAGUE.
WBH:G
W B Hastings
Official Observer.

Dear Sirs:—
I would advise you that the Stopglare Lens for Automobile headlights, submitted by you at the Manitoba Provincial Government test, was passed as being absolutely satisfactory in every respect, and will comply with the Legislation that will be passed next spring, covering the use of automobile headlights in the province.
(Sgd.) Hon. Dr. Armstrong,
Provincial Secretary.

Dear Sirs:—
I would advise you that your Stopglare Lens for headlights submitted by you for test at the Saskatchewan Motor League official test carried out Tuesday evening, the 11th inst., was passed as being absolutely satisfactory in every respect.
(Sgd.) L. G. Calder (Pres.)
Saskatchewan Motor League.

Dear Sirs:—
I beg to confirm my message to you of the 24th and to advise you that the Stopglare Lens was approved by the Police Department as complying with the present Alberta Statute.
(Sgd.) P. C. H. Primrose,
Chairman of the Board of Police Commissioners for Alberta

STOPGLARE

The Perfect Headlight Lens

A Sure Winner for Dealers

Manufactured in Canada

There can be no question about Stopglare complying with the various non-glare laws in the face of such unqualified endorsements.
Notice particularly that they are not limited by "if the lamps are properly focussed." Any focus is satisfactory for Stopglare and you don't have to be testing the lights of your customers every time they come in from a trip. Spotlight Stopglare gives a range of 400 to 500 feet—ample for any driver. It lights up the ditches and 50 feet on either side of the roadway. Cross-roads, curves and road signs are always clearly illuminated.
Stopglare means a big saving to the motorist. They are dollars cheaper than other less efficient lens. Spotlight—all sizes, $3.00 pair. Plain—all sizes, $2.00 pair.

A liberal margin makes Stopglare the profitable lens to handle. Already 40,000 sets have been sold. Get your order placed now for spring delivery. Write us for prices and further information.

FROST FENCE FIRST

Strength
Service
Security

"It pays to sell it"

The wire in "Frost" products is all drawn to size and galvanized in the above mills owned and operated by this company.

We make all styles of woven wire fence, also gates, plain and ornamental, coiled and plain wire, barb wire, oiled and annealed, and hay baling wire, bale ties and staples.

Hardware dealers should not miss the opportunity of getting in touch with us.

A "Frost" agency will bring a fine farm trade to your store.

Frost Steel & Wire Co., Limited

Hamilton, Canada

customers with that finesse which makes the "Good-day" sound as if the dealer really made it good.

About ten years ago, when we had the privilege and pleasure of addressing this association in this city, we were of the opinion that the retail man should use his local paper to tell his story. We still believe that is good business, but to be perfectly frank with you our honest conviction to-day is that your first move is to tag on to the manufacturers' advertising, and thus get linked up with the "big drive."

In other words, when you are considering an agency or the stocking of any line, figure, we should say that at least 25 per cent. of your problem is whether or not said manufacturer is spending money to send customers into your store to buy that particular line. You cannot very well go out after them. If your place of business is in a town larger than ten thousand people your local advertising is unavailing to a certain extent unless you have an exclusive agency, because the facts go to show that retail business in the larger places is done in zones—no one will go to a west-end store to get the same article that he can get in a near-by east-end store unless, say, the west-end man was formerly in the east-end and through service capitalizes his connection.

All of which, it seems to us, would indicate that the retail man's prime duty to himself—in an advertising way—is to get all he can from the manufacturer in the matter of newspaper and outdoor advertising, and in folders, catalogues, etc. We never knew of a case in our experience where a dealer who wrote in to have his local paper put on the list, or to have some matter imprinted with his name, was turned down. Here is a vast field of opportunity that easily 70 per cent. of Canadian retailers neglect to seize. Naturally the man who grasps the opportunity to have his product advertising done for him by the manufacturer finds he can gain a step on his competitor by adding an advertising programme of his own. He takes space in his local paper to capitalize himself and his methods, and probably to tie up to the big story in the papers paid for by the manufacturer.

And no matter if the retail man switches from this agency to that agency, no person can cut in on the popular opinion of his place that he created by his own enterprise. Only three things can undermine him—the coming of another retailer as clever as himself, a wave of business depression, or death.

Department Store and M. O. Methods

Classifying the Retail Institutions — Personality Great Factor in Overcoming Mail Order Competition—Efficiency Goal of the Merchant Who Would Succeed

Address by Geo. D. Davis, Manager Hardware and Metal, before Ontario Retail Hardware and Stove Dealers' Association

WHEN your president asked me to deliver an address on department store and mail order methods I hesitated, because the subject is one of such vast proportions that it could not possibly be covered in one address or even in several. I will, therefore, only touch on a few phases of the subject, and if any of the members wish to ask questions at the conclusion of my remarks I shall be very glad to answer them to the best of my ability.

There are, as you are probably aware, three types of retail institutions which are growing with astonishing rapidity. There are the chain stores, which are in reality many stores under a single ownership. There are the department stores, which are an aggregation of many stores under one roof; and there is also the mail order house, which sometimes operates as a mail order house only, and in other cases in conjunction with a department store.

These three types of retailers are making such rapid headway that there are many people who are predicting that the time is not far distant when the independent retailers will be practically eliminated. I am not inclined to share this belief, but at the same time I realize that the independent retailers are going to be faced with keen competition for some years to come. It will be necessary for every retailer who wishes to make more than a bare living, to adopt methods as efficient as those employed by larger rivals.

There are more than 50,000 retail merchants in Canada to-day, employing more than 250,000 people. This is a large army of merchants, and there are bound to be some who are inefficient. The general tendency to-day, however, is towards greater efficiency in merchandising. Since the outbreak of the war many of the weaker and less efficient merchants have been eliminated. Many businesses are being conducted on a cash basis, and taken all around the retail merchants to-day are better equipped to meet mail order competition than at any time in the past. There are some merchants who are astounded by the progress which is being made by department stores and mail order houses, but instead of taking steps to combat this competition, they are resting on their oars, with consequent loss of trade to themselves.

GEO. D. DAVIS

Manager, HARDWARE AND METAL, *who delivered address before Ontario Retail Hardware and Stove Dealers' Convention on "Department Store and Mail Order House Methods."*

There are many things I could say detrimental to the interests of department stores and mail order houses, but I feel with the limited time at our disposal we should deal with methods of a constructive nature. In passing, I might, however, refer to a few of the methods which do not always become generally known to the public. That department stores have a great influence over some newspapers, and that department store interests are large stock-holders in certain daily newspapers, is a fact known perhaps to only a few people who have made it a point to inquire into the matter. This probably accounts for the fact that some interesting news items do not get into the daily papers. For instance, some time ago a large firm advertised a product at a price per pound, which was to all appearances a great bargain. The price was so low that retail merchants wondered how the product could be sold at such a price. A Government inspector was sent down to purchase some of the product for analysis. The analysis proved that the article was badly adulterated. This company was summoned to appear in the police court, was fined $25 and costs and so far as I can learn nothing was said about it in the daily papers.

This is only one case tending to show that sometimes these so called bargains are misrepresentations of the goods. At the same time it is not the policy of successful department and mail order houses to run advertisements of this kind. It is usually the fault of some over-enthusiastic advertisement writer or some manager who is anxious to make a good showing of net profits in his department.

It is known that on different occasions when matters of this kind have been

brought to the attention of heads of our largest department stores and mail order houses, that drastic action has been taken to prevent a recurrence of matters of this kind.

The large department stores and mail order houses which we have doing business with us and which have been established for many years, have only been able to build up their extensive connections because they endeavor to give a real service to the public, and to satisfy the customer in every case.

The question is frequently asked "Can the individual retail merchant compete successfully with department stores and mail order houses?" When you make a study of this question you will find that the local merchant has a great many advantages over the department store and mail order house. There are to-day many retail hardware merchants who have benefited by the lessons they have learned from department stores and mail order houses with the result that they are doing better business than ever, and making greater profits.

The retail merchants to-day who are making the greatest headway in combating the mail order houses are those who have succeeded in giving a personality to their stores, who plan well ahead in both buying and selling and also in advertising. They are merchants who are giving a real service to their customers.

You will find in every business, certain merchants who stand head and shoulders over their fellow merchants and point out the possibilities to others who follow in their wake. These merchants have not obtained success through accident. There are good reasons for it. Their success had been achieved by working in harmony with certain principles, which are available to all of us, if we have the energy to carry them out.

The local retailer has many advantages over the mail order houses. The local merchant knows or should know the needs of his community better than the mail order house, which in many cases is located miles away. The local merchant has an opportunity of becoming personally acquainted with his customers and in most cases of making prompt delivery of the goods ordered.

It is true that in a few cases the department store or mail order house has an advantage and is enabled to purchase in large quantities. I have known of cases where a firm purchased 15 carloads of ready roofing at a time, a solid carload of food choppers, and 1,000 cobbler sets. I recall quite well being in a western Canada city where the smallest branch of one of our mail order houses was located and 2 carloads of washing machines came in on Monday and not one remained on Saturday night.

You will find, however, on examining the prices in the mail order catalogue that with the exception of the specials or leaders, the prices are as high or even higher than those which are quoted in the retail store and on which the local retailer is enabled to make a fair margin of profit. On the majority of lines the department store or mail order house does not sell any lower than the local retail merchant and very frequently the prices are considerably higher.

Retailers generally admit that leaders which are featured by the mail order houses bring in many orders, but there is nothing whatever to prevent the retailer from using specials or leaders if he so desires. I believe it is good policy on the part of the retailer to feature certain specials or leaders provided he does not demoralize prices on reputable nationally known lines. Price cutting on goods with a re-sale price has done harm to both manufacturers and retailers. Unfortunately, department stores and mail order houses are the worst offenders in this respect but during recent years a great deal of this deplorable merchandising has been eliminated.

The only merchant who needs to greatly fear mail order competition is the merchant who is inefficient. If mail order competition is going to be met and eventually overcome the merchant must educate himself and his sales staff; he must buy and sell intelligently; he must study the markets; he must keep his stock up to date, he must advertise intelligently. To survive, he must meet mail order competition under equal conditions and he can if he wants to. If he cannot meet competition he will be bound to lose a good portion of his trade.

The average merchant can take a great many lessons from department stores and mail order houses. These stores are keyed up to the utmost limit of efficiency. Their window trims are among the best in the country, they display their merchandise on tables and counters and in special displays where it can be easily seen and handled by customers. They use plenty of price tickets and they mark their prices in plain figures and stick to them.

They work on the principle that stock should be turned rapidly. They clean out old stock promptly. They have training schools for clerks and this is where many retailers fall down. There are very few hardware stores where sales could not be speeded up 40 or 50 per cent. without additional help. There is too much lost time and waste effort in the average store and if the average merchant could speed up the efficiency of his sales staff, and his selling helps, he would greatly increase his income.

The successful department stores and mail order houses are good advertisers. They do not waste space. They use many illustrations, they describe their goods fully and, what is worse, they quote prices. Their advertising methods can be followed with profit by the average retail merchant.

I remember quite well a short time ago noticing an advertisement of a retail hardware firm in which a considerable amount of space was used to show a cut of a coal oil heater the only descriptive matter appearing was as follows: "Oil Stoves, $5.00 to $6.00."

Almost at the same time, which incidentally was during one of the cold snaps of the present Winter, one of our prominent department stores and mail order houses was featuring a stove similar in design. The big department store used half the amount of space that had been used by the retailer, but in this space not only illustrated the stove but told how handy it would prove for the householder in heating up a cold room at the rear of the house or to heat up a bathroom, bedroom, or to supply heat in any corner of the house. The advertisement went on to tell exactly how much coal oil this stove would hold, how long it would burn, that it was safe to use, and odorless, approximate cost of operating and also referred to the attractiveness of the stove itself. In addition to this descriptive matter the price was also quoted. The price, I might say, was the same as the highest price quoted by the retailer.

You can judge for yourself which advertisement would appeal most to the ordinary customer.

The same thing might be said regarding the advertising of department stores on paints or any other lines. When a department store advertises paint, they not only refer to the paint itself but they tell the customer how it can be used to brighten up the home, to paint the floors, to freshen up the verandah furniture, etc. They develop the customer's imagination and in this way create a desire on the part of the customer to purchase the goods.

During the recent heatless Saturday and Monday which we had in Canada, I noticed in several of the small retail stores signs hanging up in the windows on Saturday stating "Closed Saturday and Monday."

Contrast these bare announcements with those which appeared in the department stores and department store advertising. The latter stated that "In harmony with the request of the Fuel Controller, the stores would close on Saturday and Monday."

These instances are typical of many which I might quote to show just where the department store makes a study of advertising from the customer's standpoint. Too often the retailer's advertisement is merely a bare statement while the ad of the mail order house or department store, on the same article, is full of real live information which the customer wants.

In order to illustrate how the department store buyer works, I might quote a little incident that happened some time ago. A manufacturer produced a little machine of which he was very proud. He hired a salesman to go out and sell the device. He coached his salesman on the many excellent features of the little machine. He told him how the best quality of steel had been used in making certain parts, how the parts were splendidly nickel plated, how a certain quality of spring steel was used in making the spring, and loaded up the salesman with a whole lot of technical information regarding the device. The salesman went

out and after a rather poor week he reached a department store buyer. He started in to give this buyer all the technical information which he had secured from the manufacturer. He dwelt at great length on these points and confined his arguments entirely to them. Finally the department store buyer broke in and said, "that is all very well but what I want to know, and what our customers want to know, is what will the damn thing do." One man dwelt too long on the technical details of the machine while the other wanted to know how the article could be used.

The advertising of department stores and mail order houses is always timely; they study the seasons and the changes which take place, and the consequent changes in the needs of their customers.

In their merchandising the department stores and mail order houses take the weather into consideration and this is a matter which is frequently neglected by some of the smaller retailers. The department stores frequently have advertisements prepared in advance so that if a sudden change in the weather takes place, they can have the advertisement inserted on short notice.

Some merchants and their salesmen are too far behind the times in advancing the idea of service, and in so far as this defect is due to laziness the trade deserves to be lost. The time has long since arrived when every retailer and retail salesman should make a study of advertising and selling methods, and in this way, he should be efficient in his calling. A retail merchant if he wishes to develop trade must make his store and service to fit the public, and get away from the idea that the public will fit itself to his store.

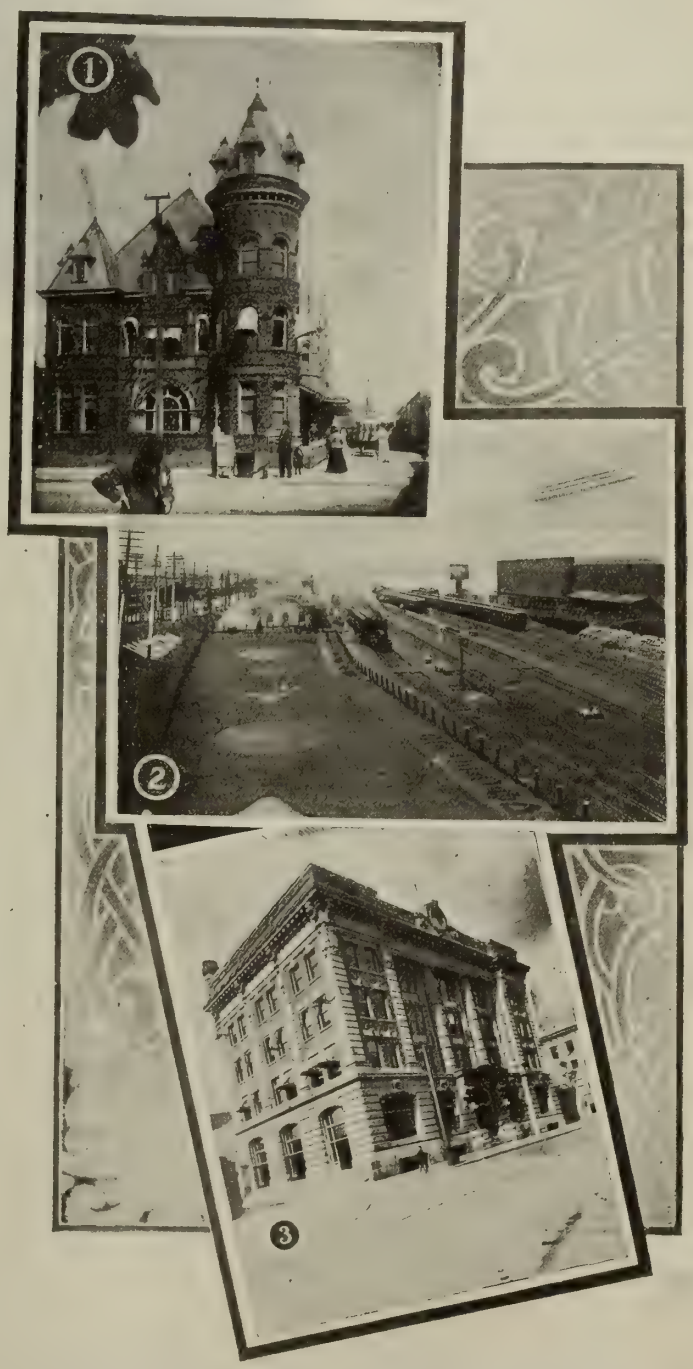
This is not meant as a reflection on the hundreds of merchants who are successfully meeting mail order competition, who are employing up to date methods and have increased their trade by lessons they have learned from larger competitors. It is meant for the dealer who is waiting for some miracle to suddenly put the mail order house out of business, a miracle which will never be performed.

Every merchant must study out his own system. The quality, occupation of customers, their character and temperament, their needs and requirements, must all be taken into consideration. Once a thorough grasp of the needs of each locality has been secured, wonders can be worked in holding trade at home and preventing the mail order houses from securing a foothold. Study how to give good service as well as how to accept the people's money and success will be more easily obtained.

"Question Box" Session

Following the address by Mr. Davis on "Department Store and Mail Order House Methods," both Mr. Davis and Mr. Kirkwood were alternately the targets of incisive questioning on various points suggested by the addresses. Replies to questions were also freely given in practical manner by retail members of the association from the floor of the house, and a good going session of great activity and interest for all minds concerned was engaged in until a late hour.

A Question Box had been provided early in the course of the proceedings, and this was opened when the ideas suggested by the speakers' subjects had been dealt with. This produced a variety of topics of discussion and maintained the interest of the evening in marked manner.



At the close of the "Question Box" session a vote of thanks was heartily accorded Mr. Davis and Mr. Kirkwood, and the members dispersed expressing unabated interest in the proceedings of a most successful Convention day.

THEATRE PARTY GIVEN

Following the banquet given on Tuesday evening by Wood, Alexander & James, Hamilton, the delegates were entertained to a theatre party by the hardware manufacturers of Hamilton.

NEW STEEL PLANT

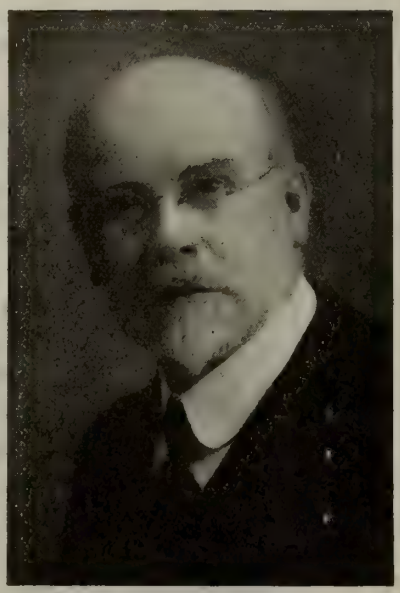
The Page Wire Fence Co., located at Walkerton, Ont., has made arrangements for the construction of a large steel plant at Three Rivers, Que., at a cost it is said, of $1,000,000. The company was recently incorporated with a capital of $250,000. The company will manufacture steel products of all kinds.

Views in the City of Hamilton, Canada, where the Retail Hardware Merchants of Ontario gathered in Convention, February 19, 20, 21.

Making Retailing a Pleasure and a Profit

Summary of J. C. Kirkwood's Address at the Hamilton Convention on the Cost of Doing Business and Allied Themes—A Valuable Presentation of Matters of Vital Concern to Retailers

THE necessity for doing business better, among both big and small firms, grows greater all the time. The tendency in business, and even in agriculture, is towards centralization or community of effort. Instead of each individual man or firm trying to do everything himself or itself, there is a tendency to join together, in a federated or co-operative way for the promotion of common objects, and to join together, in a collective way, to reduce costs of operation, and to speed up production. This tendency, in agriculture, is revealing itself in various ways. Farmers have joined together, particularly in Western Canada, in grain growers' associations to protect themselves against merchant organizations. They have joined together to buy seed and implements wholesale. They have united to sell their wheat at prices which assure them the fullest possible margin of profit. In Ontario, farmers are joining together to buy and sell co-operatively, to buy tractors co-operatively. This movement is certain to grow.



Retailers are likewise joining together, in national and provincial associations, and locally, to promote common objects. Locally co-operative delivery is fast becoming an established method of lowering costs, and of conserving man and motive power, and is even being recommended, if not actually commanded, by the state or government.

These are indications of a newly awakened business sense which aims to do business better—more efficiently and more economically.

One of the most pressing things in business—in retail business particularly—is a knowledge of the costs of doing business, and the conduct of business according to a sound cost system. Another thing of major importance is better merchandising on the part of retailers—a greater and more intelligent effort to sell more goods to more people, and always at a profit.

A Utopian State

Business is a most honorable occupation, and can and will be made more estimable when all those engaged in it are prosperous—making a net profit of thousands of dollars a year over and above operating costs. When all retailers become prosperous—masters of their business instead of slaves of it—then they will be happier, their families will be happier, homes will be better, retailers will become better citizens, travel and culture among retailers will become common, and a new era of better public service and of individual and family comfort and content will be inaugurated.

JOHN C. KIRKWOOD

Business Counsel, who delivered address before Ontario Retail Hardware and Stove Dealers' Association on "The Cost of Doing Business."

Twenty years ago, the cost of doing business was a brand new subject. Indeed, the movement in the direction of applying a cost system to distributing business is just about 10 years old. So it is not to be wondered at, therefore, if our Canadian retailers have not yet given very great attention to the subject of cost accounting as it relates to their own individual businesses. At the same time, it is a matter of great satisfaction that Canadian retailers at their conventions and otherwise are giving this subject of doing business better, as this applies to themselves, very earnest study. In Toronto last Autumn, Frank Stockdale, a widely known business specialist, gave a series of four addresses on better business methods generally, before a body of retailers; and quite recently, in Winnipeg, the University of Manitoba arranged a short course for retailers, on better business methods and practice. In similar spirit, the Ontario Retail Hardware & Stove Dealers' Association, in its annual convention this year at Hamilton, gave large place in its programme to the subject of the cost of doing business, getting a profit from business, and the training of salesmen. Admirable work, in the direction of stimulating and directing interest in better business methods and practice, is being done in the specialized business publications serving Canadian retailers, particularly the six retailers' newspapers produced by the MacLean Publishing Company, Toronto—HARDWARE AND METAL, *Canadian Grocer, Dry Goods Review, Mens' Wear Review, Bookseller & Stationer,* and *Sanitary Engineer.*

The Factors of Cost

Speaking specifically on the subject of ascertaining and recovering the costs of doing business, at the Hamilton Retail Hardware and Stove Dealers' Convention held this week, J. C. Kirkwood, business counsel with the MacLean Publishing Company, itemized the various factors which, singly and collectively, constitute the cost of doing business. These may be grouped as follows:

1. The cost of premises occupied and used.
2. The cost of service—wages, delivery, telephone, taxes, light and heat, stationery, publicity, losses, depreciation, etc.
3. The cost of capital—for its use and risk and for its employment in the conduct of business, as expressed in the form of stock and fixtures.

In the above grouping are comprised all the costs of doing business. Dealing with these groups in more precise fashion; that is, breaking them up into specific and convenient headings, the costs of doing business may be ascertained by recording the disbursements or charges according to the following procedure.

1. **Charge Rent of Premises** occupied and used. If premises be owned by the occupant, he should charge rent just the same—the amount another should pay for occupying the same premises. The sum to charge, when the retailer owns the premises occupied and used by him, is an amount equal to 6 per cent. or 8 per cent. of the selling value of the premises, plus all outlays for taxes, repairs and general upkeep.
2. **Charge Labor.** Under this head should be entered all wages or salaries paid, including a full and adequate salary to the principal or principals, and the value of services rendered by unpaid assistance—one's wife or daughter, or son who may render regular or occasional service without remuneration.
3. **Charge Fixed Expense.** Under this head will come such items as business or other taxes, water rates, light and fuel, telephone rental, insurance premiums (fire, casualty, plate glass, partnership).
4. **Charge Miscellaneous Operating Costs.** Under this head will come stationery, postage, cleaning, wrapping and packing, general re-

pairs, advertising in all its forms.

5. **Charge Delivery Expense.** This will take in horse and wagon and upkeep; motor and garage and upkeep; express or other carriage disbursements.
6. **Charge Losses.** Under this head will be included bad bebts, shortage, leakage, shrinkage, thefts (including subscriptions and donations of goods or money); special discounts on allowances made to purchasers.
7. **Charge Interest Paid on Borrowed Money;** (Including interest forfeited by lack of ready money, against which can be credited the amount of cash discounts taken).
8. **Charge Depreciation** on stock, fixtures, furniture, delivery equipment. The amounts to be written off each year will have relation to the "life" of the possession inventoried. For example, if a wagon or motor car has a probable life of 5 years, then each year one-fifth of the original value should be charged against the cost of doing business. (Here it may be said that a sort of Sinking Fund should be established to the credit of which the amounts written off for depreciation should go; and it were wise to open a special bank account for the purpose of replacing worn-out equipment; which account, in the inventory, can be regarded as capital).
9. **Charge Interest on Capital.** The sum to charge can fairly be 6 per cent. or 7 per cent. of the capital invested — the amount which would be earned if one's capital were invested in bonds, mortgages or other forms of dividend—paying securities.
10. **Charge Net Profit Desired.** The amount of the profit desired for the year may be $500, $1,000, $1,500, $2,000 or any other reasonable, larger sum, it depending on the amount of one's annual turnover.

The sum of these ten groups of charges will constitute the cost of doing business for the year. Aggregated, these costs may be $2,500, $3,000, $4,000, $5,000, $10,000, the total depending very largely on the amount of one's annual sales.

Add Freight to Invoice Cost

In the above groups, one item—that of freight on incoming goods—is omitted. Strictly speaking, freight should not be reckoned as a cost item, for freight, package, drayage, and duty (if any) on incoming goods, should be added to the invoice price of merchandise. The inventory cost of goods is not what the seller of them charges on his invoice, but, their cost laid down at store; and in the price marking of goods, their cost laid down at store is the right cost price at which to mark them and at which to reckon them in the annual inventory.

Should, however, a retailer omit to add on the item of freight, package, drayage, and duty (if any), in certain cases —this when the item is small in relative to value, or when the addition is seemingly negligible, then such items should be charged under the heading of Operating Costs (group 4 above), in order that they shall be absorbed into the costs of doing business.

Thus it becomes clear that if one opens up in his ledger or books of account group headings as above, and enters under each head, faithfully and fully, every item which should be reckoned as a cost of doing business, one will be enabled, at the end of the year, to say confidently and accurately just what it has cost him to run his business.

Mr. Kirkwood went on to say how absolutely necessary it is, in the interests of truth and full knowledge, to record every item, pointing out that if there be omitted any items or class of charges, the whole calculation becomes faulty and false, and therefore deceiving to all concerned.

Cost in Percentage Form

Having indicated how the retailer can thus ascertain what it costs him to do business, including a desired net profit above all costs, Mr. Kirkwood proceeded to state how these costs, in dollars and cents, can be converted into a percentage.

Supposing that the costs of doing business plus the profit aimed at amounts to $4,000 for the year; and that a dealer's turnover for the same period is $24,000, then the percentage cost of business is ascertained by dividing the $24,000 into the $4,000, and multiplying by 100. The calculation takes on this form:

$$\frac{\$4{,}000 \times 100}{\$24{,}000} = 16\ 2/3\%$$

This calculation gives the percentage of doing business as reckoned on sales or selling price, not on invoice cost.

In common speech, the cost on the selling price is usually stated. Thus when one states that it costs him 16 per cent., or 20 per cent., or 18 per cent. to do business, it is generally understood that he means 16 per cent. or 20 per cent. or 18 per cent. of his sales or selling price.

The Percentage to Add to Invoice Price

Having ascertained how to calculate the percentage cost of doing business on sales, the corresponding or equivalent percentage, reckoned on the invoice price, can be calculated. The general rule is:

(a) Ascertain the cost of doing business, in the form of a percentage, as reckoned on the selling price.
(b) Subtract this from 100.
(c) Then divide "a" as above, with two zeros added, by "b," as above.

For example:

Suppose "a" to be 15 then "b" will be 85 and the "c" operation will be:

85)1500(

Worked out, this calculation gives 17.65 per cent. as the right percentage to add to the invoice cost of goods.

The results of several calculations to show what percentage shall be added to the invoice or cost price of goods, after having ascertained the percentage cost of doing business reckoned on sales or turnover, are as follows:

When the cost of doing business reckoned on the selling price is:	Then the equivalent percentage, reckoned on the cost price is:
9%	10%
10%	11.11%
15%	17.65%
16%	19.05%
20%	25%
25%	33 1-3%
30%	42.86%
33 1/3%	50%
35%	53.85%
40%	66 2-3%
50%	100%

Miscalculations Are Costly

The seriousness of the error made when retailers add to the cost or invoice price the percentage reckoned on the selling price instead of the percentage reckoned on the cost prices, was pointed out, and it was shown that in a business of even moderate size, the error may result in a loss of $1,000 or more a year—in other words, to the amount of the profit desired for the year's effort.

Making a Profit of Thousands a Year

Mr. Kirkwood spoke at some length on the subject, Making a Net Profit of Thousands a Year. He stated that the Federal Trade Commission of the United States had investigated 260,000 businesses, and found that 200,000 of these had no method of determining their cost of doing business, and that 100,000 of them were not making a penny. The reason why so few firms fail to make a penny, year after year, from their trading, was declared to be due, very largely, to the fact that the retailer does not know how to go about the business of profit-making; that he trusts to luck, and hopes that at the end of the year enough goods will have been sold, at a sufficient gain over cost price to pay a desired or substantial profit for the year's effort. Knowing how to figure costs accurately the retailer is in a position, Mr. Kirkwood declared, to know how much goods he has to sell in a year, and how much of the various classes of goods making up his stock. Some goods yield only 10 per cent. or so over invoice prices; some lines will yield only 15 per cent. or so over cost; some 25 per cent.; some 30 per cent.; some 40 per cent., 50 per cent. and 60 per cent When a retailer knows that his costs of doing business are 16 per cent., or 20 per cent., or 25 per cent., of his annual turnover he is in a position to see how necessary it is for him to maintain his sales to a known minimum, and how necessary it is to stimulate the sales of those goods or classes of goods which yield a high percentage gain over invoice cost. When a retailer knows ex-

actly how much he must sell altogether, and how much he must sell of the higher-gain type of goods, then he is in a position to assure himself the year's gain of $1,000, or $2,000 or $3,000 desired. Without knowledge of this sort, the retailer is groping in the dark, and will probably bask in a dangerous content.

Selling Enough

This led the speaker to deal particularly with the subject, Selling Enough, or the Matter of Turnover. He declared, with emphasis, that the retailer has to become a merchant—a forceful and aggressive seller of goods, if he is to achieve his objectives and desires.

The average retailer, Mr. Kirkwood declared, lets the public run his business, rather than runs it himself. By which is meant: the retailer who does not perceive how much he must sell a year, at a profit, to recover all his costs of doing business, including a sufficient salary for himself, plus a desired net profit for his year's effort and risk of capital, is apt to become or remain just a common storekeeper instead of being a merchant.

Selling is the great thing when a man is in business. Wanamaker, and Timothy Eaton, and all the other great merchant princes have been supreme salesmen: They have devoted their energies chiefly to selling more goods to more people. If our Canadian retailers, as a class, will make selling goods their chief and energetic business—their supreme aim—then they will surely become prosperous as a class.

How Large Must Turnover Be?

How large must be the turnover? Or rather, what must be the minimum turnover, in a year, to assure the recovery of all the costs of doing business, plus the desired profit of $1,000 or more? And how shall this turnover be governed or guided or controlled so as to assure the recovery of all costs? That is, what shall the proportion of goods sold on which only a 10 per cent. or so gain over invoice costs is recovered? What shall be the proportion of sales on which only 15 per cent. or so is recovered? How much of the annual turnover shall consist of goods sold at 20 per cent., 25 per cent., 30 per cent., 40 per cent. and 50 per cent. advance over invoice cost? When a retailer analyzes his turnover in this way, he comes promptly face to face with the necessity to be an energetic seller, and to guide his salesmen in their selling, encouraging and directing them to sell goods on which a high percentage gain over invoice cost is secured.

When Costs are $100 a Week

Suppose a retailer's costs of doing business for the year, including an adequate salary for himself, and a desired net profit for the year of $1,200 ($100 a month) total $5,200, or a neat $100 a week; and suppose this works out to show a cost of doing business, on the sales of 20 per cent., then it is clear that the annual turnover will require to be $26,000. This means weekly sales of $500 on an average. 20 per cent. on the selling price is the same as 25 per cent. on the cost price which means that in this suppositious case, goods costing $400 to lay down at store must be sold for $500. It means that a clear $100 a week over and above invoice cost must be recovered.

But suppose that the great bulk of the goods sold in any week yields only 15 per cent. advance over cost—say $200 worth—it will mean that enough other goods, yielding higher profit gains, will have to be sold to give a net gain of $100. It may work out about as follows:

Goods costing at invoice price	and sold at a gain over cost at	give a gross gain of
$200	15%	$30.00
50	20%	10.00
50	25%	12.50
50	40%	20.00
50	55%	27.50
$400		$100.00

By examples of this sort, Mr. Kirkwood made it clear that it is the retailer's business to know his turnover analytically, and to make sure that enough goods are being sold each week, in right amounts according to gain over cost, to assure the recovery of the costs of doing business, plus the required net profit.

A Salary For the Boss.

One of the stumbling blocks in ascertaining the true and full costs of doing business by retailers is the omission of an adequate salary for the principal or principals. Mr. Kirkwood declared that the proprietor should pay himself each week a salary equal at least to what he would be paid if he were engaged on a salary basis to run his business; and that the proprietor, in regard to his own salary and purchases, should regard himself as an employee. That is, he should draw out weekly, in cash, his full salary, and should pay full prices for goods purchased from his own store, the same as any other customer is required to pay for his account. The practice of charging goods, (and not charging goods) leaving the proprietor's personal and family account unsettled, a charge against any profits that may be made, was condemned in strong language, and the right and infinitely better way outlined and commended. (An article on this subject of a salary for the proprietor, by Mr. Kirkwood, appeared in a very recent issue of HARDWARE AND METAL, so that it is perhaps unnecessary to deal at greater length with this section of Mr. Kirkwood's address).

The Training of Salespeople

A division of Mr. Kirkwood's subject which proved highly interesting and suggestive was: Making the Man Behind the Counter a Better Salesman. The growing recognition of the importance of training sales people was dwelt on, reference being made to the practices of the big department stores of the United States and Canada; and to the place the matter is having in text books on retailing and in the schools where salesmanship is taught; also to the attention which this subject is receiving in the specialized business newspapers prepared for retailer's—newspapers produced by the MacLean Publishing Company, for example.

Some of the definite suggestions made by Mr. Kirkwood are:

Teach salespeople about business, making them to know the mechanism of trade, particularly the distribution phases of it.

Teach them to know that helpful service to the customers is a prime requisite in a good salesman, since this wins and holds customers, and leads to larger sales.

Teach salespeople how to sell—how to develop interest, how to raise interest to desire, and to convert desire into sales.

Teach salespeople about the goods they are required to sell—their features, good points, distinctions, uses and advantages, and their value to the customer.

Teach salespeople to know what goods to give time to, what goods to bring to the attention of customers, and what goods to spend little time on in the selling process.

Teach salespeople the factors of cost in the selling price of goods—the style factor, the time factor, the handling factor, the floor or counter rent factor, the tendency-to-depreciate-in-value factor; and so on;—all this so that salespeople will co-operate intelligently with the proprietor to sell the goods that most need selling.

Teach salespeople the value of courtesy and civility; inspire their ambitions; educate them to become fitted for higher work at higher pay; and generally make them productive factors in the business to the fullest possible extent.

Teach them management; teach them to accept and be worthy of responsibility; to have and to exercise initiative; to think out and utilize ideas.

Teach them the value of time, industry, energy; the value of thrift and economy, the profit that lies in analysis.

The practical advantages to be gained from the proper education and training of salespeople were emphasized; and suggestions as to providing for the recommended education and training outlined.

It is asking a hard thing of retailers, Mr. Kirkwood said, to get them to devote time, thought and effort to the education of their sales staffs; hard because the average retailer is himself greatly in need of the very kind of education and training which he is enjoined to give to others. The speaker urged retailers to take time, and to make time, each week, when all could assemble for an hour's work. If need be, and if possible, the services of outsiders competent to train and teach should be en-

gaged—such instruction and training to be carried on by mail, if no other way offers.

Pride in Their Business

Mr. Kirkwood sought, all through his address to make retailers perceive their economic function, in the big and important business of the distribution of merchandise; and to appreciate the fact that an immense amount of attention, in universities and schools, in books and newspapers, at conferences and conventions, is being devoted to retailing and retailers; and he urged fervently that retailers themselves should learn to regard their business, their service, and their obligation highly and seriously, and to join in with all earnestness in every endeavor and movement to make business and the conduct of business more pleasurable, profitable and honorable.

Discussion

Questions and answers formed an interesting feature of the convention proceedings after the afternoon session on Wednesday. At this session the question was asked at the conclusion of Mr. Kirkwood's address:—

"What are we to do in the case of goods sold at a percentage advance over cost much below that of the average cost of doing business—nails, for example?"

In answer Mr. Kirkwood said: "It is true that we have to sell many line on which we do not make any profit. We would gladly eliminate these from our stocks but competition and the prevailing custom lead us to stock them and sell them at the prevailing price. If hardware dealers could get together as one body (and I think they should do this, and believe the time will come when they will) then they will not have to sell these goods at such a low percentage of gain over cost.

"We have got to analyze our turnover and where we find that we are not making sufficient profit, it means that we must throw extra weight and pressure on the goods that give us the returns, and do business as quick as we can with the lines that are not as profitable."

The foregoing question and answer may be regarded as representative of numerous other questions born of Mr. Kirkwood's address, and of the nature and spirit of the replies made. Discussion was animated, and quite largely participated in. This session was regarded as being particularly helpful and inspiring.

SPECIAL POINTERS

Following Mr. Geo. A. Simpson's address on Salesmanship Thursday morning, several "mock sales" were conducted, which proved extremely interesting.

Many manufacturers who were exhibiting gave demonstrations of their products on Thursday, which proved instructive and were the centre of many interested groups of hardwaremen.

A great number of the members of the association remained over Thursday afternoon to take advantage of an invitation extended by the Steel Company of Canada to visit their plant. Provision was made by the officers of the company for their reaching and going through the plant with the least trouble.

ASSOCIATION FEES, $5.00

The discussion on Tuesday afternoon, in which the question of increasing the membership fees to $5.00 was brought up, resulted in the resolutions committee deciding to raise the fee to this amount. That this is by no means too much, and greater service to the members will be possible through the increased revenue, was the opinion expressed by the majority.

Current Events in Photograph—No. 8

THE STRETCHER-BEARER IN EAST AFRICA

THE East African campaign is far afield, and has no definite associations for Canadians, therefore it is little thought of. Yet the troops in this field of action have had to overcome almost superhuman conditions, intense heat, difficulties of transportation, and unhealthy climate. In this photo are shown two of the types of stretchers used in carrying the wounded in theatre of war. The net stretcher has been found to be exceedingly light, effective and handy, and causes the minimum of suffering to the wounded.

OFFICERS FOR 1918

The election of officers resulted in the following being elected for 1918. *The treasurer and secretary were re-elected by acclamation:*

President ..... D. A. MacNab, Orillia, Ont.
1st Vice-President ..... A. J. Wright, Hamilton, Ont.
2nd Vice-President ..... Ed. Wanless, Chatham, Ont.
Treasurer ..... John Caslor, Toronto, Ont.
Secretary ..... W. F. MacPherson, Prescott, Ont.

Members of the Executive

F. B. Smith, Belleville, Ont. — James McGregor, Caledonia, Ont.
A. R. Bernhardt, Preston, Ont.. — George E. May, West Toronto, Ont.
A. H. Wideman, Markham, Ont. — A. E. Bottum, Bobcaygeon, Ont.

THE NEW PRESIDENT

D. A. MacNAB
Orillia, Ont., Elected President O.R.H. & S.D.A.

HELPED CONVENTION TO SUCCESS

(Continued from page 49.)

preciation for the immense amount of assistance given me as president of this association by Mr. Davis. The success of this Convention and of the association to-day is very largely due to Mr. Davis' personal interest and unsparing efforts which he gives because of his own deep interest in the welfare of the association at large. I feel myself personally very deeply indebted to Mr. Davis, who has been unsparing in his devotion to everything that furthers the success of this Convention, and is coming here to-night with an address on a subject with which he is very familiar, and which he will do justice to. I want every one of you to be at to-night's session to hear Mr. Davis. He has a great deal of very interesting matter to tell us. And just here I want to say to you boys of the association, who have been with us right on steadily during this day, that I am proud of the Retail Hardware and Stove Dealers' Association of Ontario. You have shown that when information was here for you, though you were busy with plenty to do about town, you would stay with the Convention and get all the information you could during this Convention, helping to make a success of it."

RESOLUTIONS ADOPTED

The report of the committee on resolutions came before the convention as the first business of Thursday 21st February. Chairman of Committee Mr. Oldham read the resolutions passed in committee as follows.

Your commmittee recommend:—

That a vote of thanks be tendered our president, Mr. J. N. McGregor for his splendid address and effort during the past year. Carried.

That a hearty vote of thanks be tendered our treasurer, Mr. John Caslor, for the very efficient and detailed statement of the past year's business, and for the "watch dog" way he has guarded our funds.

That this meeting feel highly indebted to our trade papers, HARDWARE AND METAL and "Canadian Hardware Journal" for their very valuable assistance to our association for the past, and that a vote of thanks be tendered them. Carried.

That a vote of thanks be tendered our most able and efficient secretary, Mr. W. F. MacPherson for the thorough and condensed report which he has presented to this meeting for the past year. Carried.

That the Exchange and Sales Bureau price lists be continued and extended as widely as our financial condition will permit. Carried.

That the membership fees for the year following 1918 be increased as follows:—

Membership fee $5.00
Associate membership 1.00
Clerk, whose employer is a member 1.00

This is the resolution on membership fees as finally approved and carried. The original proposal to have the associate fee increased to $2.00 was amended on the ground that the attendance of the travellers was a most appreciated factor in the success of the conventions, and not to be in any way retarded.

Resolutions of hearty thanks were also passed at the closing session to those firms and associations which had, by entertainment of the members, contributed so largely to the success and enjoyment of the occasion.

Foregoing resolutions were all unanimously carried—the complimentary resolutions invite cordiality.

RETIRING PRESIDENT'S MOTTO

Retiring president, J. N. MacGregor, in his valedictory, thanked the association for the confidence reposed in him in electing him for the term of office concluded, and suggested as an appropriate parting word, expressive of his effort to reciprocate that appreciation shown him, the epitaph on an English tombstone which reads, "He done his damdest" (cheers).

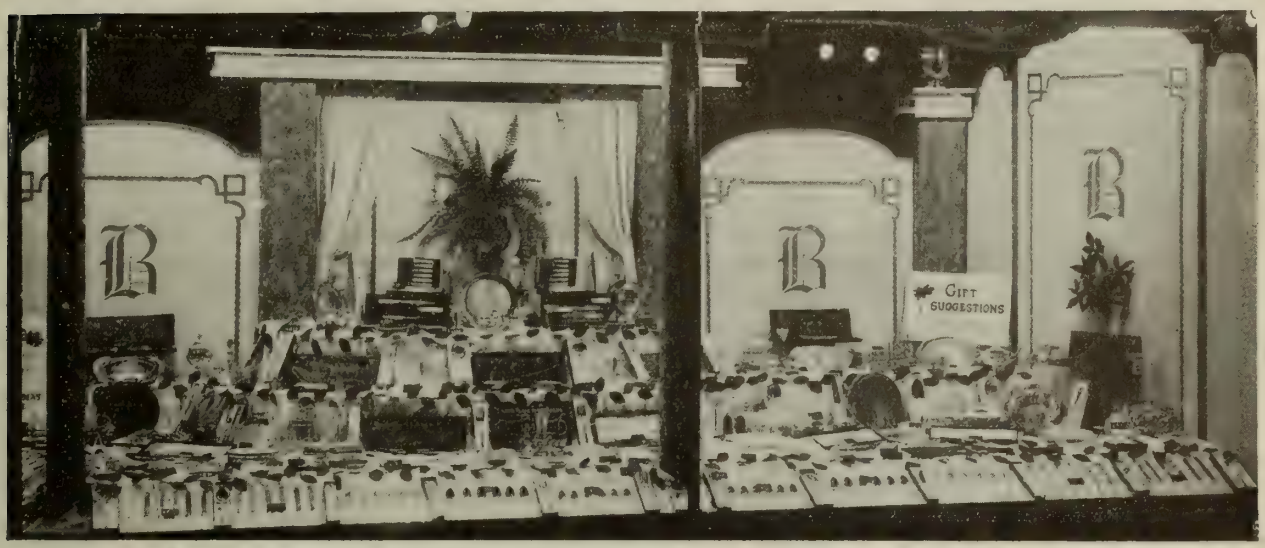
NEW PRESIDENT'S ADDRESS

In his opening address as newly-elected president, Mr. D. A. MacNab said that his election now made him wish he had not withheld himself from such official honors previously, as he felt that his predecessors in office had set such a pace for him that it would be hard to equal, far less excel them. He promised his utmost efforts in the position of president, and hoped that when his time came to retire he would become again as heartily enthusiastic a member on the side benches.

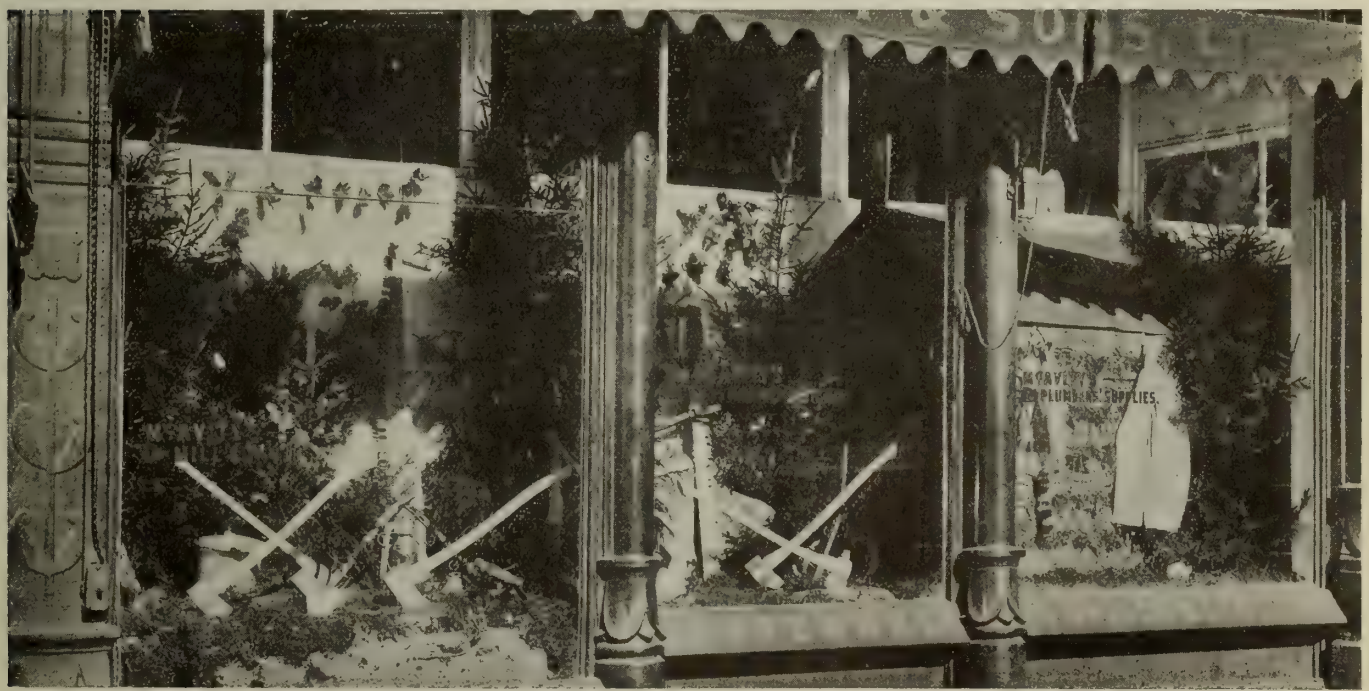
WINNIPEG BICYCLE DEALERS' ASSOCIATION MEETS

The first annual meeting of the Winnipeg Bicycle Dealers' Association was held at the St. Charles' Hotel recently when prominent men in the industry addressed about forty members of the local trade, following a dinner. Invited guests included Manager Patterson of the Bicycle Department of the J. H. Ashdown Hardware Company; S. License of Toronto, representing the Humphrey Bicycle and Motor Company; J. G. Pape of the Canadian Cycle & Motor Company; and the local managers of the Dunlop, Canadian Consolidated and Goodyear Tire companies.

C. J. Scott is the president of the Winnipeg association; J. A. Dick is vice-president and J. C. Warren is secretary-treasurer.



ADDRESS ON SALESMANSHIP



GEO. A. SIMPSON

One of the most interesting features of the convention was an address on "Salesmanship" delivered by Geo. A. Simpson, sales manager, Steel Company of Canada, Hamilton. The complete address will appear in next week's issue of Hardware and Metal.

GOOD WINDOW DISPLAYS ALWAYS BRING EXCELLENT RETURNS

A mighty attractive display of "hardware" which brought results The arrangement of the goods, the decorative effects combined with the dignified background, make for one of the most pleasing and sales-producing combinations possible to attain. Now is a good time to put in a paint window. Get the people thinking and talking paint early. Paint means conservation; are you featuring that element?

The passage of the seasons is indicated by an attractive window in the store of T. McAvity & Sons, of St. John, N.B , arranged recently at the opening of the lumbering season. A real logging camp scene is in evidence which is supplemented by a showing of tools and equipment used by the lumberman in his work.

EDITORIAL COMMENT

A SUCCESSFUL CONVENTION

ELSEWHERE in this issue will be found a complete report of the proceedings of the thirteenth annual convention of the Ontario Retail Hardware and Stove Dealers' Association. To cover this large convention completely and present a complete report to our readers in this week's issue was a task of no small proportions. HARDWARE AND METAL was represented at each meeting by expert reporters, who took verbatim reports of all addresses and discussions, and only on this account are we able to give in this issue practically a complete report of the proceedings. This, however, is in accordance with HARDWARE AND METAL'S policy to give our readers the best possible service. There is, in reports elsewhere in this issue, a wealth of information for hardware buyers and the trade in general.

The addresses by prominent manufacturers, wholesalers and business experts are full of valuable advice regarding present and future conditions, and the reports are worthy of the closest study by every hardware man. That there are many uncertainties regarding the future is made quite clear in the various addresses and discussions, and to-day, more than ever before, sound business advice is needed. The convention was a huge success. It was unanimously voted the best ever held by the association. It was run along new lines. The new features have taken hold, they have shown the officers of the association that the interest of the retail trade can be secured if the proper kind of program is arranged and carried through according to schedule. The attendance would have been greater were it not for the great scarcity of help which made it impossible for many of the retailers to be present. If the good work is continued the association will grow in numbers and in strength, and become a real power in the Canadian hardware trade. Hamilton is an ideal convention city, and the Hamilton manufacturers and wholesalers gave the visitors a royal welcome, and the "Hamilton Spirit" dominated the convention proceedings from start to finish.

THE SPRING SELLING CAMPAIGN

WITH the approach of Spring, merchants should already be planning their sales campaign for the next three months. Great opportunities for business exist and the merchant who goes out after trade aggressively is bound to reap splendid returns.

Practically every department in the hardware store can be freshened up and be made to take on new interest. Spring orders are being taken into stock and a re-arrangement of displays will do much towards effecting a change in the appearance which will hold the customers' attention.

The merchant who keeps the store interior attractive, who changes his window displays often, who writes interesting copy for his newspaper advertisements, is the one the consumer likes to deal with. The store operated on such a policy is one which must win out, which will be able to maintain sales at a high average.

And it is sales which every merchant depends on to make his money. Good, close buying is a decided factor in any merchant's success, but unless he can get the goods over the counter, he is not showing progress, he is not making a profit, and without profits no business can thrive as it should.

From practically every source reports indicate that business this Spring will be good. Shortages in some lines of merchandise exist, but, instead of bewailing the fact, efforts should be made to direct the buyers' interest to some other line in stock. There may be cases where substitution is impossible, but by playing up goods on hand the merchant will have a sufficient range for his activities that can be made profitable.

The spring sales campaign should be planned now, it should be working now. When the first break comes in the weather, your customers will want to know that you are fully equipped to supply their needs. Remember the early bird and take action at once if you have not already done so.

INDIRECT ROUTING OF FREIGHT TO GO.

THE Canadian Railway War Board has taken steps to remove all vestiges of indirect routing for freight travelling between points in Ontario where this condition exists. It is said that experts are now working on the new routings, and that these will provide for a car moving by the shortest route, irrespective of what line it may cover.

This should work out satisfactorily and afford a measure of relief to the railways in their present state of congestion. Practically the only lines moving for some time past have been coal and foodstuffs, and it may be weeks before normal conditions prevail again. The disappearance of indirect routing will play its part in relieving the present strain on the transportation companies.

What To Do During March

A Month for Big Business—Getting Action in the Paint Department—Automobile Accessories to the Fore—Outdoor Sports Again of Interest—Aggressive Selling Campaign Should Start

THE first day of March usually brings with it a realization that spring is rapidly approaching and the hardware merchant must needs shake off the shackles of winter to welcome the new season. March presents an opportunity for big business which no merchant should overlook.

The position that the paint department will occupy during the coming season depends materially on action taken now. It is by no means too early to arouse your customers' interest in paints and varnishes, in fact, a real duty devolves upon the merchant to point out the conservation value of these products. Practically every merchant has faith in the line he handles, and good paint, properly applied, is a means of conservation for property which every owner should have brought to his notice.

For the month of March inside finishes will again predominate, but the advertising campaign should also include references to the outside lines as well. Many householders can be influenced to start their spring housecleaning from the inside and work out. The long winter with its confinement has aroused in many housewives dissatisfaction with the appearance of the interior of the home. A change of colors or at least a brightening up is wanted. Sell your inside finishes now, and when suitable weather arrives for outside painting your customers will be more inclined to brighten the exterior as well.

Building operations are likely to be curtailed materially, and the paint department must play its part in making up any loss sustained in the builders' hardware lines.

However, it must not be thought that there will be no building done. In those towns which serve a farming community, there is more than likely to be a very good demand for builders' supplies. Farmers have enjoyed a measure of prosperity during the past couple of years which will result in many making needed improvements in their homes, barns and outbuildings. This trade should be watched closely and every effort made to develop this business.

Where any building is done, new tools are required, and the tool department should be in shape to take care of any and all demands. When it is remembered that help is scarce, the advisability of mechanics using the latest and most improved tools to do their work better and in less time should be pointed out. Good tools usually mean a better class of work, and the real mechanic is always on the lookout for those lines which will improve his efficiency.

The sale of stoves and ranges is one which can be developed successfully during the month. The heavy expenditures for coal for heating eases off materially now and the selection of a new stove will be given consideration. There will also be interest manifested in coal oil and gasoline stoves for cooking purposes. These do much to relieve the drain on the coal bin and wood pile and the necessity of conserving these two items should result in big sales for substitutes.

Furnaces will be run on a very economical basis and this should mean decided interest in coal oil and electric heaters. These two types of heaters can be carried from one room to another and used as found necessary. The saving these will affect in the heating of the home is a point to be kept prominently before your customers.

Labor-saving devices will also play an important role in the home where the duties of the housewife have multiplied. Calls for patriotic and Red Cross work made on the women to-day mean that a great deal of their spare time is occupied along these lines. Electric irons, sweepers, toasters, washing machines, etc., do their work in less time and give the housewife increased opportunities for such other activities.

The call of the open to the motorist is becoming increasingly insistent. Many cars have been laid up all winter, but interest in their use is again being revived. This means sales of automobile enamels and varnishes to renew the finish of the car, in addition to the movement of tires, chains, patches, tools, spark plugs and in fact practically every item carried in the hardwareman's stock. Some merchants have had their auto accessories under cover during the past three months, others have kept their lines well displayed; to all, however, the coming of Spring means greater activity and the need for an aggressive selling campaign, backed up by good displays, should be evident.

With the departure of the snow enthusiasts in baseball, tennis, football, golf, boating and fishing each have an opportunity to prepare for their particular line of sport. The sporting goods department drops its winter activities for those of spring and summer. Perhaps no department in the store presents such an entirely new appearance as that which will be undergoing change here. It is to the merchant who is prepared for the first break in the weather that the trade will come.

EVENTS IN THE TRADE

TRADE NOTES

Ottawa.—An approximate estimate places the loss of Ottawa retail merchants during the "heatless" days at $350,000.

Kingston, Ont.—Retail merchants have reformed the local association after many years of failure to recognize the value of united action for the benefit of the trade.

Fort William, Ont.—The Board of Trade has elected the following officers for the ensuing year: E. R. Gavin, president; H. A. Miller, vice-president; Mr. Dowler is the retiring president.

Ottawa.—The local branch of the Retail Merchants' Association has unanimously elected L. N. Poulin, president, succeeding Henry Watters. Other offiers elected were: first vice-president, S. McClenaghan; second vice-president, Clarke Cummings; treasurer, A. P. Johnston; secretary, B. G. Crabtree.

Newcastle, N.B.—An association of retail merchants has been formed here with the following officers: President, George Stables; first vice-president, S. B. Miller; second vice-president, G. G. Stothart; secretary, W. Amy; treasurer, H. B. Moody.

INCORPORATIONS

Toronto. — Electric Insulation and Varnish Company, Ltd., has been incorporated with a capital of $60,000 to manufacture and deal in insulating varnish, varnish and varnish compounds.

Toronto.—W. Walker & Son, Ltd., has been incorporated with a capital of $75,000 to carry on business both wholesale and retail of general hardware and woodenware merchants.

INDUSTRIAL NOTES

Toronto.—Wm. A. Rogers, Ltd., have increased capital stock of the company from the sum of $2,400,000 to the sum of $3,000,000.

OBITUARY

Robert E. Mills, well known manufacturer and former resident of St. Catharines, Ont., is dead at his home in Montclair, New Jersey. Deceased was a former member of the firm of Crathern & Caverhill, wholesale hardware merchants of Montreal. Of late years he was head of the Rajah Auto Supply Company of Bloomfield, N.J.

Charles S. Baxter, proprietor of the Baxter Hardware Company, Windsor, Ont., died Thursday in Los Angeles, Cal. Mr. Baxter until five years ago was a partner in the Neveux, Clinton and Baxter Hardware Company.

TO EXTEND ACTIVITIES

Following the announcement which appeared in HARDWARE AND METAL recently, outlining that a charter had been secured by Alfred C. Gilbert of the the A. C. Gilbert Co. of New Haven, and Thomas E. Menzies, of Menzies & Co., Toronto, for the formation of a new company to be called the A. C. Gilbert-Menzies Co., located in Toronto, further advice is to hand that the line of product to be handled will be extended considerably.

The company is already engaged in manufacturing toys in Canada and

T. E. MENZIES and A. C. GILBERT
President and Vice-President respectively of the A. C. Gilbert-Menzies Co., Toronto.

handle electrical products turned out by the A. C. Glbert Co. of New Haven, Conn. The line of electric fans has been added to and electric motors which can be used to operate sewing machines, etc., are now being marketed. It is stated that motors for phonographs are to be manufactured in the New Haven factory and for the present the Toronto company will only act as distributors for Canada. It is intimated however, that the A. C. Gilbert Co. of New Haven, likely take up the manufacture of these electrical specialties when suitable accommodation can be provided.

PERSONAL

Ross H. McMaster, assistant general manager, Steel Company of Canada, has been appointed to the new Canadian War Mission to Washington. It is said his work will be principally in connection with the iron and steel industry.

MONTREAL NEWS NOTES

George Henderson, president of the Brandram-Henderson Co., is in the Halifax office this week. Mr. Henderson reports that there is a fine spirit throughout the Maritime Provinces regarding trade conditions and the outlook is good. The Halifax plant of the company has been running to full capacity of late, and is now in a position to take care of the business accorded the firm at this point.

The Sherwin-Williams Co. were represented in the Maritime Provinces last week by R. C. Misson, who travelled through Nova Scotia and New Brunswick. "Everything seems to be going fine," said Mr. Misson to HARDWARE AND METAL, "and this is going to be a good year. There is a good feeling, and the people of Halifax especially deserve great credit for the manner in which they are meeting the situation there. A great deal of building is in progress."

W. K. Hughes, manager of the Winnipeg hardware department of the Hudson's Bay Co., was a Montreal visitor this week.

George Crump, buyer for the Hudson's Bay Co. at Vancouver, is in Montreal this week.

Mr. Pratt, of St. John's, Nfld., secretary-treasurer for A. E. Hickman Co., fishermen's supplies, was in Montreal this week on business for his firm.

John H. Cameron, representing the Winchester Repeating Arms Co. of New Haven, Conn., was a caller on the Montreal trade this week.

S. R. Brewer, secretary-treasurer of the Thos. Robertson Co., has been confined to the house through illness, but is at his desk again this week.

C. G. Hoose has accepted a position with Jas. Walker Hardware Co. of Montreal, and will cover the territory from Kingston and East in the interests of their accessory line.

H. H. Dalton, of A. M. Bell & Co., Halifax, is in Montreal calling on the trade.

The Jas. Walker Hardware Co. have recently purchased a car for the use of their city traveller selling automobile accessories.

O. B. North, representing the O. B. North Co. of New Haven, Conn., was a Montreal visitor this week in the interests of his firm.

James Kinsman, representing North Bros., of Philadelphia, is calling on the Montreal trade this week.

Mr. Ramsden, of the J. H. Still Co., of

St. Thomas, was a caller this week on the jobbers of Montreal.

Mr. Gallagher, representative of the Sprusetex Mop Co., of Chicago, has been calling on the Montreal trade this week in the interests of his firm.

Robert F. Corley, with the E. Ingraham Clock Co., of Bristol, Conn., was a Montreal visitor this week in the interests of his company.

The Slaymaker Co. were represented in Montreal this week by their traveller, Chas. E. Eichler.

Mr. Andrews, representing the Remington-U.M.C. Co. of Bridgeport, Conn., was a Montreal visitor this week.

St. John, N.B., News

Members of the staff of the Canadian Fairbanks-Morse, Limited, held a skating party at the Victoria rink recently and afterwards were the guests of the assistant manager, Mr. Hill, for supper in Pond's restaurant.

George McAvity followed his annual custom of entertaining the office and sales staffs of T. McAvity & Sons, Ltd., a sleigh drive and dinner afterwards at his bungalow at Pleasant Point being the features of the occasion.

When the McAvity Water street office staff was entertained J. B. Hamm presided at the table and acted as toast master, other members speaking to the toasts being Bruce W. Erb, G. C. McAvity, James S. Hoyt and Miss A. B. Schied. Games and dancing followed.

Two immense sleighs conveyed the McAvity King street office and the retail staffs to the Bungalow a few evenings later. W. V. Stratton acted as toast master on this occasion and other speakers included S. C. Hoyt, Major Percy D. McAvity, A. R. Everett, Troop Thorne, T. A. Ramsay and Ralph Cummings. Miss Piers also contributed to the programme.

The friendly rivalry between the office and foundry staffs of T. McAvity & Sons led to a bowling match this week, with the result that the office staff demonstrated superiority after a close contest.

The shipbuilding committee of the St. John Board of Trade is making inquiries regarding the possibility of securing steel plates to facilitate the establishment of a steel ship building plant which is planning to start operations in St. John.

J. S. Neill, one of the leading hardware merchants of Fredericton, is planning to run an extensive poultry farm in his spare time this summer, in the interests of increased production.

Edward E. Evans, formerly foreman with J. E. Wilson Co., Ltd., St. John, died recently in Framingham, Mass., where he removed several years ago.

WINNIPEG BUSINESS CONGRESS SUCCESSFUL

A business congress at which addresses were delivered by experts on retail problems has been completed at Winnipeg. Frank Stockdale, the American retail merchandising expert, was one of the lecturers. G. Pryer Irwin delivered the closing lecture on "Cash, Credit, Collections, the Future of Your Trade." Members from outside points were guests of the McClary Mfg. Co. to a theatre party. J. H. Curle, secretary of the Retail Merchants' Association, one of the promoters of the short course in merchandising, urged that the congress be made an annual event.

NEW MOTOR ROUTE THROUGH QUEBEC

A meeting was held recently in Worcester, Mass., for the purpose of acquainting the hotel men of the New England States of advantages for motoring through Quebec. Those attending from Quebec were A. L. Caron, President and A. G. A. McNamee, Secretary of the Automobile Club of Canada. They were in conference with Charles A. Averill, President of the New England Hotelman's Association; Mr. Kimball of Northampton, Mass., Secretary of the association and J. A. Flanagan of Malone, N.Y.

The meeting was successful in that what will be known as the "International Tour" was laid out. This is oval in shape, about 1,000 miles in length, thus making one of the longest trips in the United States and Canada. Its course has been arranged to afford tourists the advantages of select scenery, points of interest, the best roads and accommodation along the line.

The tour will have Albany, N.Y., as its starting point and from there it runs north to Lake George, taking in Malone, Rousse's Point and other places and passing through Montreal extends on through Three Rivers and Quebec, across to Levis and southward through Jackman, Maine. Taking in a number of towns and cities it passes southward to Boston and back again to Albany through Worcester, Springfield and Pittsfield. Some variety may be had in covering the outlined towns to suit the wishes of the individual tourist.

As contributing to the convenience of tourists, the Montreal representation emphasized the fact that Quebec roads had been greatly improved.

MEAFORD MERCHANTS ADOPT CONSERVATION MEASURES

Credit System Adopted and a System of Curtailed Delivery to be Put in Force

With the idea of curtailing unnecessary expense the merchants of Meaford, Ontario, comprising the grocers, butchers, hardware, jewellers, furniture, men's wear and drug stores, excepting prescription dept., shoe makers and shoe stores have banded together to commence a strictly cash business or its equivalent, this innovation to become effective on March 4. The merchants are using the local papers in a campaign to acquaint the public with the change, and to forestall any unpleasantness that the change might entail. The merchants have felt impelled to adopt this course to protect themselves against the evils of extended credit.

With a view to curtailing delivery costs, the grocers of the town have also agreed to adopt a schedule of delivery to be adhered to by every merchant. This schedule becomes effective Feb. 18 and is as follows:

For morning delivery orders must be in by 9.30 a.m., for afternoon delivery orders must be in by 4 p.m., for Saturday night delivery orders must be in by 8.30 p.m. No delivery before 9.30 a.m. No special trips for the taking of orders.

Ask Modification of Window Lighting Order

Darkened Windows a Serious Matter with Many Merchants—Business Has Suffered—Power Controller Asked to Permit One Light in Window to be Deducted from Store Lighting

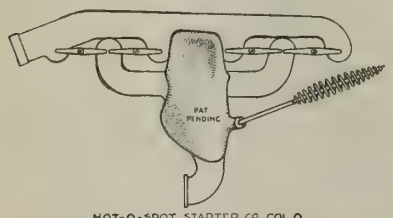
THERE is a move on foot, fostered by the Retail Merchants' Association, to have the regulation forbidding the use of lights in store windows modified to a certain extent. It is pointed out that the prohibition is working a great hardship on merchants generally. It has been noted that since the order came into effect there has been a decided falling off in business. Many stores depend largely on their evening trade, and with the prohibition making it imperative to have all show windows dark there is nothing to attract customers, and there is nothing to indicate that the store is open for business. Evidently many persons have been misled by this fact into believing that the stores are actually closed and as a result the trade that would naturally come to them has passed them by.

The Retail Merchants' Association is petitioning to have the order so changed that a merchant may display a dim light in his store window. They are not asking for anything like the brilliant display of former days, but merely that one light of forty or sixty watts may be used in the window, to indicate that the store is open for business as usual. The suggestion is that merchants agree to curtail an equivalent amount of light in their interior illumination.

This would certainly appear to be a reasonable request. There has been no restriction placed on the number or power of the lights to be used in the stores, and many of these are brilliantly lighted. A curtailment here would cause comparatively little discomfort while even the dim light that is proposed for the window would it is believed go a long way toward rectifying a condition that is having very serious consequences to many merchants. This appeal has been forwarded to Sir Henry Drayton, the Power Controller, and the Association are hopeful that a decision will be rendered in their favor.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN



HOT-O-SPOT STARTER

The Hot-O-Spot starter being sold by the Hot-O-Spot Starter Company, Columbus, Ohio, is, it is said, the simplest, best and most practical way to start a cold Ford car.

It is stated nothing on the motor need be altered to accommodate the Hot-O-Spot; it is attached in an instant, and is locked into place by one motion of its heat-insulated handle. No holes need be drilled and no screws tightened to put it on.

Heat the Hot-O-Spot starter in the house on the stove or grate fire; carry it to the car by its heat-insulated handle; attach it to the manifold with one motion of the handle, and, it is said, that in thirty seconds the Ford engine will start as easily as in summer.

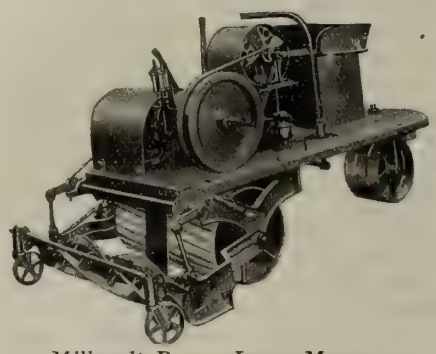
It is claimed that to leave it on the

Hot-O-Spot Starter, Applied.

manifold while running one has a much smoother running motor and saves a big per cent. of gasoline.

It takes heat to vaporize any liquid.

The Hot-O-Spot starter, it is stated, stays hot from the exhaust and gives the Ford the hot spot vaporization. The Hot-O-Spot starter can also be heated outdoors with gasoline, coal oil or alcohol.



MILBRADT POWER LAWN MOWER

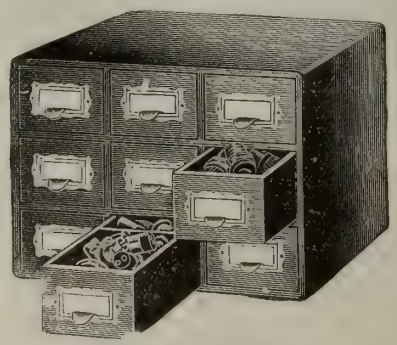
The Milbradt Mfg. Co., St. Louis, Mo., have placed on the market their 1918 power lawn mower. This operates by a gasoline motor, and the driver has a cushioned seat, from which, it is stated, there is no difficulty in operating the machine.

It is stated this mower cuts a 38-inch strip and travels at twice the gait of a horse. It is said work can be done either in open fields or between trees and shrubbery, always turning out a clean neat job of cutting.

It is claimed only one hand is necessary to operate steering lever, leaving the other free to operate the transmission lever or raise and lower the cutting cylinder as desired.

Every part of the mower is, it is said, built very strong, only the best materials being used, and that it will stand many

Milbradt Power Lawn Mower.



years of hard usage. Catalogue and price list will be mailed on request.

PRESTO CABINET

The Presto cabinet now being marketed by Metal Specialties Mfg. Co., Chicago, Ill., contains nine drawers, divided into two compartments, making eighteen in all. It is said this is usually sold to dealers with a complete assortment of eighteen different styles of connectors, sockets, plugs and switches for the lighting equipment of the automobile.

On the rear of the cabinet, which is the part that faces the customer when the cabinet is placed on the showcase, are illustrated the different plugs, connectors, etc., that the dealer carries in stock. It is stated they are all standard numbers and these illustrations make it easy for the customer to select the article he needs.

It is said dealers find this very convenient for keeping their stock of these

Presto Cabinet.

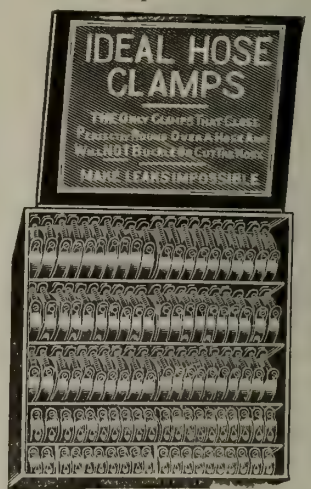
small accessories. The cabinet, which is of wood, mission finish, measures 12 x 12 x 9 inches; comes packed in a carton ready for shipment, and weighs about ten pounds.

INLAND PISTON RINGS

The Inland one-piece piston rings will, it is said, save gas and oil and produce real power. These are now being sold in Canada by the Canadian Fairbanks-Morse Co., Ltd., Montreal and branches.

It is stated the Inland is a continuous one-piece ring so scientifically manufactured and treated that the free ends always hub tightly together; the result is a ring that in expanding uncoils, exerting uniform gas-tight pressure and insuring continually perfect contact with the cylinder wall.

Points enumerated by the manufacturer as essential are: One piece; uni-



Inland One-Piece Piston Ring.

form width and thickness all around with no weak or thin places; made of close grain; elastic cast iron; easy to install; will not break in handling.

IDEAL HOSE CLAMPS

The Ideal hose clamp, which is manufactured by the Ideal Clamp Mfg. Co., Inc., 200-2 Bradford Street, Brooklyn, N.Y., will, it is said, make a perfectly tight joint, and can be applied under any circumstances or conditions. It acts concentrically and closes evenly around the hose.

Ideal hose clamps are now being put

Ideal Hose Clamp in Display Box.

up in a display box containing 100 clamps, this package being known as the shop assortment. There are ten of each of the following sizes:—1¼, 1⅜, 1½, 1⅝, 1¾, 1⅞, 2, 2⅛, 2⅜, and 2¾ inches inside diameter.

It is said the boxes are well designed for counter display and are conveniently partitioned to facilitate the re-filling.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

THERE is much uncertainty over the steel sheet situation at the present time. Intimations have been received by some importers of black sheets that the original order prohibiting the export of all steel commodities except under license has again been restored. This would apply to lighter gauges of black sheets and would be disastrous to Canadian industry if such were made effective. Some importers closely in touch with the situation assert that the embargo on shipment of sheets applied only to countries other than Canada. But the embargo placed on all commodities in value over $100 both going into the United States from Canada and coming from United States into Canada is interpreted as making an effectual embargo on all sheet metal for a time at least. This is, however, considered only a temporary measure to relieve the freight congestion and is thought not to apply as a permanent condition. Clearing up of this situation will cause much relief as a complete embargo on all gauges of black and galvanized sheets would work disaster to the industry of Canada.

One of the spectacular movements during the week was the rapid advance in the price of ingot tin. Intimations have been made that no further supplies of tin are to be allowed to come forward except under license, and existing stocks in Canada are at a premium. Dealers report that stocks are getting within very narrow compass. An advance of 6c to 8c per pound was recorded during the week. In sympathy with the strong situation in tin advances have been recorded in all grades of solder. Advances in other commodities apply to lawn rakes, iron pots, spiders, mattocks, grub hoes, crowbars, crosscut saws, ice saws, bucksaw blades, electric candles, ring compressors, races, gas headlights, foot pedals and cut-outs.

Many wholesalers and retailers were in attendance at the convention of the Ontario Retail Hardware and Stove Dealers' Association at Hamilton this week, which convention has been pronounced a big success. Promise is given that the retail hardwaremen's association will henceforth be a vital force in helping to better conditions among the retailers. Shipment of goods is still hampered through the railroad situation.

MONTREAL MARKETS

MONTREAL, Feb. 21.—Somewhat quieter conditions obtain throughout the city this week. From country points there is a good demand, seasonably speaking, and jobbers express themselves as satisfied with the outlook for spring. Price changes have been fewer than for some time. The ingot market is interesting, in that tin is firmer and copper will be available on a basis of about 28c per lb. in the very near future. Spelter prices have been fixed at 12c for the high grades. Zinc lists have also been revised by the manufacturers. No tinplate can be imported now without the importer having a license and supplying as well the name of the consumer. Somewhat lower prices are named on two or three gauges of galvanized iron. The tone of the old metal market is firmer, but without price changes. Sap supplies are beginning to sell and a good business is anticipated. The rope situation is vague, and with increases in England and suggested downward revision in the States it is difficult to size the situation. Prices, say importers, are expected to hold firmly here.

Steel And Iron List On Certain Lines Revised

Montreal.

TRANSOM CATCHES, FASTENERS.—A revised price list has been issued on certain lines of transom catches and fasteners, bolts, sash lifts and locks, and other steel lines made by H. B. Ives & Co., of New Haven, Conn. This becomes effective at once, the approximate advance over previous prices being about 10 per cent.

Rope Situation Is A Little Confusing Here

Montreal.

ROPE AND CORDAGE.—In view of all that has been written and published the past week on the rope situation, there is somewhat of a confusion. The manufacturers will be represented on the newly-formed committee to regulate the price of hemp, and local importers state that there is little likelihood of a revised price downward, in Canada at least. "Old Country prices have gone up," said an importer to HARDWARE AND METAL, "and our prices are likely to either remain as they are or be somewhat advanced." The advance in England was about 2½c per lb. A fair amount of business is reported, especially from outside points where shipbuilding is being done.

New Prices For 1918 On Coal Oil Stoves

Montreal.

OIL STOVES.—The 1st of March will see the travellers out for bookings on oil stoves, and new prices have been issued as applying to the Florence line. A very considerable advance in the prices over those of last year has been made, approximating 30 per cent. The new prices are as follows:—Two-burner, $13.25; 3-burner, $16.75; and 4-burner, $20.50. These prices apply to Eastern Ontario and Quebec. The ovens and high shelves are extra, and will be somewhat higher in price.

Wire Nails And Wire Being Booked For Spring

Montreal.

WIRE AND NAILS.—All the jobbers are receiving a certain number of bookings for nails, but the immediate business is confined to small sorting. If the congestion were less in outside districts there would be a freer movement, as country demand is reported much better than in the city. It is expected that a good demand for nails will obtain so soon as it is possible to move freight readily. Wire nails are selling at $5.25 per keg base, and cut nails on a base of $5.60. Smooth steel wire is unchanged at a base price of $6.25 per 100 lbs.

Coal Oil And Gasoline Are In Normal Market

Montreal.

GASOLINE AND COAL OIL.—The

position of the market for gasoline is an unchanged one. Sales are somewhat less than they have been, as the cars running are those used for purely business and necessary purposes. The price is held still at 32½c per gallon. Coal oil sales are good and the prices are as follows:—Royalite, 17c; Palacine and Electroline, 20c.

Sheets And Plates Hold Firmly In Market

Montreal.

SHEETS AND PLATES.—There is a fair volume of business here and prices are quoted with less spread than obtained last week. In view of the very serious state of transportation in the United States as well as in Canada it is improbable that deliveries can be improved in the immediate future, and dealers will view this as favorable to the conservation of their supplies. Nos. 20, 22 and 24 gauge sheets in the galvanized are now selling on the basis of $8.85 for the former and for the latter two $9.05.

Fairly Good Trade In Fashioned Lead Products

Montreal.

LEAD PRODUCTS.—There is a fairly good demand for manufactured lead products, considering the season. These are held in firm market without change, and the trade is being well supplied as the various commodities are required. The position of pig lead on spot will serve to hold prices firm on the manufactured lines for the present.

Trading In Iron And Steel Products Is Fair

Montreal.

IRON AND STEEL.—The local situation is one of little change either in the volume of trade or in prices. The weather has militated against any considerable volume of business being done. The country dealers are in good buying mood, generally speaking, and so soon as the conditions permit it is expected that trade will be better. There is some activity in United States markets, and this applies particularly to orders being placed for later delivery in 1918. City trade is reported quiet.

NO TIN WITHOUT LICENSE

It is now definitely decided that no tin will be shipped out of England without the name of the consumer attached and only to a firm who is licensed to handle the same. Just what arrangements are made to provide for the small consumer is not clear and advices covering this point have been cabled for. Dealers will therefore be looking to the requirements of their trade in the meantime as this order goes into effect immediately.

Some Encouragement Shown For Old Metals

Montreal.

OLD MATERIALS.—There is a firm undertone to the market for old metals, which is somewhat marked for certain lines of iron. The demand for heavy melting steel is far in excess of the supply, and there is a firm tendency to this market, but prices are held unchanged. The same applies to wrought iron. There is a generally good demand all around, but the difficulty lies in securing the supplies to fill orders. Old rubbers are held at unchanged prices, with a firming tendency. Bicycle tires are up to 4¼c.

FIXED PRICES FOR SPELTER AND ZINC

The expected announcement regarding the fixed prices for spelter has at last been made and this information has been transmitted direct to HARDWARE AND METAL by a Montreal importer. The War Board's fixed price for the high grade spelter is named at 12c. Further than this the price has also been agreed upon for zinc boiler plates of half-inch and thicker diameters, the new fixed price being 14c. For sheet zinc a base price of 15c has been set. This will have an immediate tendency to revise the prices for sheet zinc by probably 2c to 3c per lb. lower. A new revised list has been issued by the manufacturers on zinc extras and this is considerably higher than previous quotations. This will probably have to be considered by the War Board before becoming effective.

Stoves And Enameled Ware Are Being Booked

Montreal.

STOVES AND ENAMELED WARE.—The immediate business in stoves and ranges is not large although it is seasonable. Weather conditions have had the effect of making a temporary lull, although it is remarkable how satisfactory, outside business keeps, say the jobbers. Travellers will soon be taking orders for the spring and summer requirements of oil stoves. A good season is anticipated, even though prices are very much higher than they were last season. Enameled ware bookings continue to come forward in fairly good volume and in view of the future outlook it is expected that dealers over the country will anticipate their wants early and not take too much chance with securing supplies later.

Sap Supplies Will Be In Active Demand

Montreal.

SAP BUCKETS AND SUPPLIES.—It is expected that there will be a good demand this season for sap supplies. The manufacturers report a good feeling regarding this line and in view of the heavy snow fall this year it is suggested that there will be a good run. Hardware dealers are in a position to give their farmer customers help along the line of suggesting what is needed to make sap and with a concerted effort along this line such action will have a patriotic phase to it. Sap buckets are selling at the following prices: Straight, 1 gallon, $14.95 per 100; 1½ gallon, $18.20 and 2 gallon, $19.50. In 6-quart terne toin price is $18.20 per 100 syrup cans in the 1 gallon round, and square are $22.50 per 100. The prices apply to Quebec and Eastern Ontario.

Tin And Lead Stronger With Lower Copper Price

Montreal.

INGOT METALS.—The interest of the week centres in tin, which is quoted somewhat higher locally, although the London market has declined some points, but only after a considerable rise a week ago and also in copper which is on the way, stated one importer to HARDWARE AND METAL and which will be sold for about 28c per pound under the recent new regulations. Fixed prices have been announced for spelter and zinc boiler plates.

COPPER.—Under new regulations, supplies that are in transit will probably be offered at a price of about 28 cents per pound. In the meantime the prices of 33c to 34c are obtaining and sales are light.

LEAD.—A stronger feeling has developed in the local market for lead which is selling at $9.75 to $10 per 100 lbs. Trading is fair.

TIN.—The interest of the week centres around a firming of prices and quotations here are from 85 to 86c per lb. against last week's range of 82½c to 85c. The London market was erratic for a time but prices are high.

SPELTER.—For many weeks announcement has been awaited regarding the government's prices on spelter. These are now made and for high grade the price is fixed at 12c per lb. The lower grades will be adjusted in accordance with this revision. Locally the prices range from 10½ to 11c.

ANTIMONY.—This is a very quiet commodity here and the price is held unchanged at 19c per lb.

ALUMINUM.—An easier tone characterizes the feeling in aluminum which can be bought at 55c per lb.

TORONTO MARKETS

TORONTO, Feb. 21.—Wholesale houses have started to get their spring shipments out, but the difficulties connected with transportation have made the movement of goods slow. Arrival of goods for their warehouse stocks have likewise been very slow. Business has been seasonably good, being a period in the year between the buying of winter lines and starting of spring and summer lines. Price changes have not been quite as numerous as in some recent weeks, still the number is considerable and includes lawn rakes, iron pots, spiders, mattocks, grub hoes, crowbars, crosscut saws, handsaws, bucksaw blades, electric candles, ring compressors, races, gas headlights, foot pedals and cut-outs. Many wholesalers and retailers attended the convention of the Ontario Retail Hardware & Stove Dealers' Association at Hamilton during the week.

Wire And Steel Lawn Rakes Register Advance

Toronto.

RAKES.—Advances in the price of wire and steel lawn rakes were recorded during the week. Queen 20-tooth wire rakes are now quoted at $5.75 per dozen, while 24-tooth rake is quoted at $6.25 per dozen. J. D. steel lawn rake, 15-inch, is quoted $7.80 per dozen, and 20-inch at $9 per dozen. Dunn's steel lawn rake is now quoted at $11 per dozen.

Hollow Ware And Spiders Show Increase

Toronto.

POTS, SPIDERS.—Various lines of cast-iron hollow ware have been increased in price during the week. Straight high and low pots No. 8 are now being quoted at $1.45 each, and No. 9 at $1.60 each. Bulged pots No. 8 are quoted at $1.85 each, and bulged No. 9 at $1.95 each. Spiders are another line which shows higher prices, 8-inch being quoted at 70c each, 9-inch at 80c each, and 10-inch at 90c each.

Mattocks, Grub Hoes And Crowbars Advance

Toronto.

MATTOCKS, GRUB HOES, CROWBARS.—Substantial increases have been made effective on mattocks, grub hoes and crowbars. Long cutter mattocks, 6-lbs. are now quoted at $10.75, while pick mattocks, 6-lbs. are quoted at the same price, namely, $10.75 per dozen. Grub hoes, 4-lbs., are now priced at $8.25 per dozen. Prices on crowbars have been advanced to $8.50 per 100 pounds. Posthole crowbars are quoted at $8.75 per 100 pounds.

Clay And Rock Picks Advance 10c to 25c Dozen

Toronto.

PICKS.—Advances ranging from 10c to 25c per dozen have been made effective on clay and rock picks. Clay picks are now priced as follows: 5 to 6 lbs., $9.25 dozen; 6 to 7 lbs., $9.75; dozen; 7 to 8 lbs., $10.50 dozen; 8 lbs., $10.75. Rock picks, 7 lbs., are quoted at $10.50, while 8-lb. size is quoted at $10.75 dozen.

Crosscut Saws Increase 10 Per Cent.

Toronto.

SAWS.—An advance of 10 per cent. has been made effective in all lines of crosscut saws which now makes the price as follows: 5-foot, $4.95 each; 5½-foot, $5.85 each; 6-foot, $6.65 each; 6½-foot, $8 each. Included in the advance are the Disston line of handsaws, together with ice saws and bucksaw blades. Arrowhead saws also have been advanced 10 per cent.

Foot Pedals and Cut-Out Lists Advance

Toronto.

PEDALS, CUT-OUTS.—Higher list prices have been made effective on foot pedals for autos. Style O, nickel, formerly 75c list, is quoted now at $1.05 each list. Above design is for operating cut-out and exhaust horns. Style G, for operating horns, is 5c higher on list price at 35c each. Special cut-outs for Maxwell and Chevrolet cars are higher on list prices at $1.40, being an increase of 35c each. Above sizes are for 1⅝-inch pipe. List prices on style G-H cut-out show an increase also. This design is constructed with a view to turning the exhaust from striking the ground and raising the dust. Following prices show an increase from 10c to 25c each over former list prices: 1⅜-inch and 1½-inch, $1.60, 1⅝-inch and 1¾-inch, $2.40; 1⅞-inch, 2-inch, 2⅛-inch and 2¼inch, $2.80c; 2⅜-inch and 2½-inch, $3.20; 2⅝-inch and 2¾-inch, $3.60; 2⅞-inch and 3-inch $4. Discounts applying to all of above lines are: Quantities less than 12, 25 per cent.; quantities 12, 30 per cent.; quantities 48, 35 per cent.

Gas Headlights Up 50c to $1 On List

Toronto.

HEADLIGHTS.—Higher prices have been made effective on gas headlights for Ford cars, constructed with Mangin lens. Black and brass design is now selling at $10.50 per pair list, an increase of 50c, while black and nickel list has been advanced to $12, an increase of $1. Quantities of less than 12 discount is 25 per cent.; quantities 12, 30 per cent. and quantities 48 pairs, 35 per cent. Above design has 9¾-inch front and 7¾-inch prop centre.

Demountable Rims Register A Decline

Toronto.

RIMS.—Contrary to the trend of prices in the majority of instances on automobile accessories the Kelsey demountable rim has been reduced in price to the extent of 50c on list. Following are prices: Natural—small lots, $18; lots of 10, $17; lots of 50, $16. Black—small lots, $17.50; lots of 10, $16.50; lots of 50, $15.50. Above prices are f.o.b. Windsor. For Toronto add 75c per set, freight; Montreal $1 per set freight; Winnipeg, $3 per set freight; Vancouver, $6.75 per set freight.

Races Go Higher; Cones and Retainers Steady

Toronto.

AUTO ACCESSORIES.—A slight advance on the list price of small outer race for Ford cars has been made effective, increase amounting to 2c over previous list price. List formerly at 18c each is now 20c each. Large outer race remains unchanged at 50c list each. Stationary cones for Ford cars hold unchanged at 30c list, while right adjusting cones are quoted at 19c list. Outside ball retainers are quoted at 3c each and inside ball retainers at 4c. Discount 25 per cent., quantities 12, 30 per cent., quantities 48, 35 per cent.

Ring Compressors Advance 15c On List

Toronto.

COMPRESSORS.—An advance of 15c on list price of piston ring compressors has been made effective, making the list price now 75c each. Device is designed to set piston rings, as a slight pressure is sufficient to give a powerful leverage. Discount is 25 per cent; quantities of 6, 30 per cent.; quantities 24, 35 per cent.

Electric Guest Candles Up 25c On List

Toronto.

ELECTRIC CANDLES.—Following the recent advance made effective in all lines of Everready Daylos and batteries an increase has been made effective in

Everready guest candle. New price is $1.40 each, representing an increase of 25c. Discount is 33 1/3 per cent. in small quantities and 40 per cent. when order amounts to $50 and over.

Oil Burning Heaters Up 50c to $1 On List

Toronto.

STOVES, HEATERS, ENAMELWARE.—An advance has been announced in the price of Perfection oil heaters ranging from 50c to $1 on list prices. No. 525 is now quoted at $6.50 each list, No. 530 at $7.25 each, and No. 630 at $9.25 each. For No. 525 the increase is 50c, No. 530 increase 75c and No. 630 increase $1 each. No. 520 has been withdrawn from the market. Bookings can be made on this basis for delivery up to September 15, 1918. Discount on heater lines is 25 per cent. from list prices. Other makes of stoves and ranges held unchanged during the week. Enamelware is in steady market with a fair volume of trade passing. Some lines of hollow ware pots have been increased in price, mention of which is made elsewhere.

Fuel Oil Dominating Factor In Situation

Toronto.

OILS, GASOLINE.—Prices for all oil products held steady during the week. There is plenty of gasoline on this continent at the present time. Owing to the light domestic consumption of gasoline on this continent at this season of the year, stocks of gasoline have been rapidly increasing. The great need at the present time is the production of fuel oil to be used in oil-burning vessels, industrial plants, shipyards, gas plants and even by some railways. The consumption of fuel oil is much greater than the consumption of any other product from crude petroleum. Under the stress of need for fuel oil production of gasoline has been heavy within recent weeks and stocks are accumulating. It will therefore be seen that the situation in gasoline is somewhat easier in tone

Quotations are being made on the basis of 31½c per gallon. Demand for coal still keeps up.

Price Of Manila Hemp Reported Lower

Toronto.

CORDAGE, TWINE.—The report mentioned in these columns last week to the effect that the United States Government had fixed the price of Manila hemp at lower prices than those recently prevailing turns out to be based on fairly sound surmises. A dispatch from Washington during the week reported that the price of Manila hemp would be 26c per pound, to be established by the Food Administration. The price prevailing for fair current hemp at the present time is 28c to 28½c per pound. It will therefore be seen that a substantial reduction is provided for. It is intimated that all negotiations respecting the price have not yet been fixed definitely, as they are contingent upon suitable arrangements being made for steamship space. If it turns out definitely that a price of 26c per pound has been established the local market will be considerably easier in tone. It will be necessary to wait for a short time for confirmation of this announcement. In the meantime rope prices held unchanged. There has been a fairly good movement of small twines and in this respect is gratifying to the distributors.

Waste Has Again Been Moved Higher

Toronto.

WASTE.—Further advances have been made in the price of waste by concerns which had not increased their price since the beginning of the present year. Increased prices amount to 1c to 2c per pound. Quality white wiping has been advanced to 17c, an increase of 2c and a new grade XC added at 16c per pound. In colored wiping waste quality 1 has been advanced 1c and is now selling at 15c. Quality 1A remains unchanged at 12c, while quality 1B has been advanced 1c and is quoted at 11c. No. 5 colored is quoted at 16c, No. 7 at 14c and Japanese colored at 15c per pound. There has been a good demand for waste within recent weeks. Higher prices have been occasioned through the strong situation in the cotton market.

Heavy Bookings On Steel Wire Nails

Toronto.

WIRE, NAILS.—Some wholesale houses report they have had a heavier booking so far this year on steel wire nails than at any time in their history. This is reason for mild surprise. The situation with respect to wire rods may have had something to do with the eager buying. Manufacturers of nails in Canada have in some instances been advised by the manufacturers of rods in the United States that they have nothing to offer. Prices hold unchanged at $5.20 per hundred pounds for standard steel wire nails. Wire products held unchanged during the week.

Fair Movement Of Iron And Steel Lines

Toronto.

IRON AND STEEL.—A fair movement of iron and steel is reported by wholesale dealers, demand being seasonably good. Deliveries by Canadian mills have been hampered through the railway situation, which condition is also common in the United States. In the United States there is a gradual clearing of congested conditions and mills have a chance to carry on operations to better advantage. Prices in the local market held unchanged.

Copper Sheets Lower; Galvanized Weaker

Toronto.

SHEETS, PLATES.—Lower prices were quoted in some quarters on plain copper sheets, base price for 16 oz. and heavier being 35c in instance noted. Quotations range as high as 44c base. Competition for trade in this line has been instrumental in driving the price down. Galvanized sheets were in weaker market during the week, competition again in this instance being responsible for the weaker condition. Range of quotations, however, held unchanged. There is a fair demand for black and galvanized. Prices on black sheets were shaded downward from the high quotations of last week.

An uncertain situation has developed in the market for black and galvanized sheets. Various interpretations are placed on the situation as it exists in the United States. The recent order by the United States Government which prohibited export of sheets to foreign countries other than Canada except under license has been taken by some importers as applying to Canada as well. Within the past few days there has been a further order prohibiting shipment of all goods from Canada into the United States in value over $100. This is also held to apply to goods coming from the United States into Canada. This would apply to black sheets and galvanized sheets as well as all other commodities. However, this is considered only a temporary measure to relieve the freight situation. From information which we have been able to gather up to the present time it would appear the situation is as follows: Embargo applies to shipment of all sheet steel from United States to foreign countries other than Canada. At present time there is a temporary freight embargo on all goods coming from United States into Canada except in quantities the value of which is $100 and less.

Ingot Tin Advances 6c *to* 8c *Pound In Week*

Toronto.

INGOT METALS.—A very active market maintained for ingot tin during the week. Demand for other ingot metals is quiet with prices holding steady, except in the instance of tin.

COPPER.—With a clearing of the transportation lines to a certain extent in the United States there were better deliveries. The situation is one of steadiness and will remain so until matter of price revision again comes up in June. Locally prices were quoted on basis of 30c to 32c per pound for casting copper.

TIN.—There was an exceedingly active market locally for ingot tin and prices went soaring to the extent of 6c to 8c per pound, making quotations from 86c to 90c. Supplies of tin in the local market are reported very light with no prospect of getting additional supplies in the near future as the British Government is not letting any stocks out for the present.

SPELTER.—In the primary markets supplies of spelter are more than sufficient for demands of trade. Locally conditions were quiet with prices unchanged at 9¾c to 10½c per ponud.

LEAD.—Primary market held steady but firm during the week. There is little activity at present time. A buying movement would in all probability send prices higher at primary points. Locally quotations were unchanged at 9¼c to 9½c per pound.

ANTIMONY.—There was very little activity in this commodity in the local market during the week. Prices were unchanged at 16c to 18c per pound.

ALUMINUM.—There is a better inquiry for aluminum in primary markets. Locally conditions were steady with prices unchanged at 60c per pound.

PIG IRON.—Deliveries of raw materials and coke to the smelting furnaces is still the big problem for producers. Sufficient has been reaching the producers to keep them running but arrivals of raw materials are of a hand-to-mouth nature. Prices on foundry iron were unchanged at $49.50 per ton.

LONDON MARKETS

LONDON, Feb. 21.—The week has given further evidence that the trend of prices in many lines is still upward. Advances have been recorded on whiffletree and neckyoke irons, wood hay rakes, wire lawn rakes, lamp black, clay pick, edge and pick mattocks, grub hoes, crowbars, croquet sets, crosscut saws, crosscut saw handles, spade and shovel handles. Business here has been just fair during the week. The sale for winter goods is beginning to drop off some as a result of the few days of mild weather. Most stores are busy taking in shipments of spring goods and preparing them for sale. Merchants also are paying particular attention at present to making sure that all their stock is marked at correct selling prices. They realize the importance of this as in many cases they have been selling goods much lower than the price for which they could be replaced.

Whiffletree Irons And Lampblack Advance

London.

WHIFFLETREE IRONS, LAMPBLACK.—An advance of approximately 10 per cent. has been made effective in whiffletree and neckyoke irons. Lampblack is another commodity to register a higher price during the week. Prices of genuine Germantown are now as follows: ¼-lb. packages, 35c lb.; ½-lb. packages, 28c lb.; 1-lb. packages, 22c lb.; assorted packages, 28c lb.

Hay Rakes And Lawn Rakes Higher

London.

RAKES.—Wood hay rakes have been increased in price and prices are as follows: Split handle, $3.25 dozen, bent wood, $3.65 dozen; bent wire, $3.65 dozen; straight wood, $3.40 dozen; straight wire, $3.40 dozen. A considerable increase has been made effective in price of wire lawn rakes, advance amounting to about 50 per cent. Twenty-tooth size is now quoted at $9 per dozen and 24-tooth at $9.75 dozen.

Prices Of Clay Picks And Mattocks Increase

London.

PICKS, MATTOCKS, HOES, CROWBARS.—Advances have been recorded in the price of clay picks and edge and pick mattocks. Grub hoes and crowbars are other lines to show increases in price. Clay picks are now priced as follows: 5 to 6 lbs., $9.25 dozen; 6 to 7 pounds, $9.75 dozen; 7 to 8 pounds, $10.50 dozen. Edge and pick mattocks are quoted at $10.50 per dozen for 5½-lb. and $10.75 per dozen for 6-lb. Grub hoes are priced: 3-lb., $7.75 dozen; 3½-lb., $8 dozen; 4-lb., $8.25 dozen. Crow bars are now quoted at $8.50 per hundred pounds.

Croquet Sets Now Higher by 10 *Per Cent.*

London.

CROQUET SETS.—An increase in price of croquet sets to the extent of 10 per cent. has been made effective during the week and the following prices now prevail: Light unpainted, four balls 95c per set; light painted, four balls, $1.35 per set; light painted, six balls, $1.75 per set; medium painted, six balls,

$1.90 set; heavy painted, six balls, $2.15 set; heavy painted, eight balls, $2.50 per set.

Syrup Making Utensils In Demand

London.

PAILS, SPILES.—With the approach of spring anticipation is existent of a good demand for syrup making utensils. There has been advocacy of a more extensive tapping of sugar maples in order to secure this commodity as a foodstuff. It is to be hoped results will accrue from this campaign. Sap pails are holding steady in price, straight and flaring being quoted at $19.50 per 100. Eureka sap spiles are quoted at $12 per thousand or $1.30 per 100.

Crosscut Saws And Handles Show Advances

London.

SAWS, HANDLES.—An advance of approximately 10 per cent has been made effective in all makes of crosscut saws. There has been an excellent demand for these goods during the past winter due to the need for augmenting the fuel supply with wood. Handles for crosscut saws also shown an increase in price at following quotations: No. 6. 6½ and 4, $4 per dozen pairs; No. 5, $7.20 dozen pairs; No. 3, $5.30; Lion one-man, $5 per dozen handles.

Spades And Shovels Unchanged: Handles Up

London.

SPADES AND SHOVELS, HANDLES.—New prices have been made effective on D spade and shovel handles, which makes new price $4.50 per dozen. Spades and shovels hold unchanged in price, discounts from list prices being 30 per cent. for firsts, 20 and 2½ per cent. for seconds and 5 per cent. for fourths.

Ash Sifters Still Selling

There is a continued good sale of ash sifters, with prices holding unchanged $2.15 dozen for common wood sides, $2.90 each for Banner and $5.25 each for Rocker No. 1.

Axes and Wedges in Good Sale

A good demand continues for axes and splitting wedges, caused by the activity in wood cutting. Following are prices prevailing on axes: Keystone, $13.25 dozen; Wellandvale Special, $14.75 dozen; Hand-made, $15.50 dozen; Cherokee, $15 dozen; Black Diamond, $16; Model, $16; Handled Axes—Eagle, $15.75 dozen; Cherokee, $17.50 dozen; Boys' red, $12; Hunters' red, $11. Splitting wedges, common, are quoted at 12c lb. and truckee pattern at 13c lb.

Axle Grease Advances; Bucksaws Selling Well

London.

AXLE GREASE, BUCKSAWS.—A substantial advance has been recorded in mica axle grease with the following prices which are being quoted: 1-lb. tins, $16.80 gross; 3-lb. tins, one dozen case, $3.65 dozen; 3-lb. tins, two dozen to case, $3.55 dozen. Bucksaws, in common with crosscut saws, are having a good sale. Prices are holding steady at following quotations: Happy Medium, $8.70 dozen; Prince Rupert, $12.50 dozen; Disston lance tooth, $12.50 dozen.

Poultry Netting, Screen Wire, Tools

Prices hold unchanged for poultry netting at 15 per cent. off list prices for Canadian 1-in. and 2-in. mesh. Screen wire, painted black, in 100-ft. rolls is quotted at $3 per 100 square feet, while bronze screen wire is quoted at 14c per square foot. Harvest tools are still quoted at 25 per cent. off list. Screen door hinges are unchanged in price at $17.75 per gross for No. 20. Lawn mowers are quoted at 40 per cent. off list.

Linseed Oil Up 10c; Turpentine Declines 1c

London.

LINSEED OIL, TURPENTINE.—The firm situation in linseed oil has worked out towards higher prices during the week, an advance of 10c per gallon having been recorded. A big advance in flaxseed during the week is largely responsible for the advance in oil. Following are prices now prevailing: 1 to 2 barrels, raw, $1.65, boiled, $1.68; 3 to 5 barrels, raw, $1.64, boiled, $1.67; 6 to 9 barrels, raw, $1.62, boiled, $1.65 per gallon. An easier tone to the primary market for turpentine has resulted in a decline in the local market to the extent of 1c per gallon, following prices now prevailing: 1 barrel lots, 72c per gallon; 2 to 4 barrel lots, 71c per gallon; 5-gallon lots, 82c per gallon.

Light Demand for White Lead

There is a light demand for white lead in oil at present. Prices are unchanged at $15.70 per hundred pounds for pure grade in ton lots and $16.05 in less than ton lots. Pure Elephant is quoted at $16.20 in ton lots and $16.55 in less than tons.

Putty and Nails Unchanged

Market for putty held unchanged at $5.15 per hundred pounds for standard putty in 25, 50 and 100-lb. drums and $6.90 per hundred pounds for pure. Nails held steady in price at $5.20 base per hundred pounds for standard steel wire and $5.60 for cut nails.

Rope Prices Maintained

The market for rope held steady during the week, pure Manila being quoted at 39c per pound, British Manila at 33c, New Zealand hemp at 33c per pound base, sisal rope at 27½c per pound base. Cotton rope ¼-inch and larger is quoted at 60c per pound and 3/16-inch at 61c per pound.

WINNIPEG MARKETS

WINNIPEG, Feb. 21. — Price changes for this week show numerous advances, all of which show only a moderate increase, and include Paris green, Lincoln saw sets, sash cord, awning cord, cotton rope, hay rack clamps, hasps and staples, rivets and burrs, heel chains, circular saws, and stocks and dies. Business for the past week has been fairly brisk, particularly in auto accessories, many of the bonspiel visitors being interested in this line, which promises to be a leader with many of the hardware dealers.

Linseed Oil Firm; Turpentine Demand Light

Winnipeg.

LINSEED OIL, TURPENTINE.—Prices on linseed oil, which last week advanced 8c, are still holding firm at the advanced price. However, reports indicate that owing to shortage of flaxseed, both here and in the States, and the strikes in the Argentine, which will prevent them making shipments, all tend to keep prices up, and further advances would not be surprising. Prices ruling to-day are: Raw $1.73, boiled $1.76 gal.

Turpentine prices still continue firm, with only a limited demand, and are quoted to-day as follows:—Barrels, 80c gal.; half-barrels, 83c gal.; 5-gal. lots, 85c gal.; 1 gal lots, 85c gal, plus the usual extra for containers.

Paris Green Prices Have Been Announced

Winnipeg.

PARIS GREEN.—Opening prices for Paris green have just been announced by the paint companies and, while not as high as expected, show a fair advance over last year. To-day's market prices are quoted herewith:

Barrels, about 600 lbs., 62¼c lb.; kegs, about 250 lbs., 62¾c lb.; drums, 50 and 100 lbs., 63¼c lb.; drums, 25 lbs., 64¼c; packages, 1 lb., 66¼c; packages, ½ lb., 68¼c; tins, 1 lb., 68¼c.

HARDWARE AND METAL wishes to bring to the attention of all hardware dealers the fact that laws regarding the sale of Paris green and other poisons vary according to the different provinces, and in some cases prohibit the sale of poisons in other than the original sealed packages, also requiring a register of the sales made. Therefore, hardware dealers should familiarize themselves with the law as it applies to their particular district.

Sash Cord And Cotton Rope Up

Winnipeg.

COTTON PRODUCTS.—Further advances are recorded in the cotton market necessitating a further revision in prices and lines such as sash cord and cotton rope and represent an increase of from 2c to 4c per lb. Prices now ruling are herewith quoted:

Hercules Sash Cord—No. 6, 68c lb.; No. 7, 67c lb.; Nos. 8, 9, 10, 66c lb.

Awning Cord, white—No. 4, $3.40 doz.; No. 4½, $4.70 doz.; No. 5, $12.75 doz.

Cotton Rope—3-16 in., 59c lb.; ¼ in. and larger, 58c lb.

Hay Rack Clamps And Solder Advance

Winnipeg.

CLAMPS, SOLDER.—Due to increased cost of manufacture new prices are here-

with announced on hay rack clamps, which show an advance of approximately 10 per cent., and are quoted to-day as follows:—No. 1 x 14 in., $22.80 doz.; No. 2 x 16 in., $25.80 doz.

Due to the exceptionally high price of tin, prices on half-and-half solder again move upward and show an increase of 6c per lb., to-day's prices being: Case lots, 49c lb.; less than cases, 50c lb.

Nail Prices Hold In Unchanged Market

Winnipeg.

NAILS.—A drop of 25c in wire nails and wire, recently reported in Eastern markets, seems to be misleading to the Western hardware dealers. While this reduction is effective in the East, it does not represent a reduction by the manufacturers. Eastern markets have always been higher than the Western on these commodities, and new prices recently issued simply equalize prices. For instance, nails are quoted at $5.25 base Montreal, plus 75c carload freight equals $6, which is the Winnipeg market price, which same principle also applies on wire.

Hasps And Staples And Weatherstrip Up

Winnipeg.

HASPS, STAPLES, WEATHER STRIP.—Hasps and staples No. 30 show an increase in price this week of about 10 per cent. over former prices, and are quoted to-day as follow:—No. 30 x 6 in., 85c doz.; No. 7, $1 doz.; No. 8, $1.10 doz. Nos. 20 and 35 hasps and staples remain unchanged. A further advance has been found necessary on weather strip in cartons, which goes from 38c to 40c per carton, and applies on both comfy felt and anti-frost brand.

Saw Sets Higher; Tinning Extras Up

Winnipeg.

SAW SETS, TINNING EXTRAS.—New prices have just been put into force covering Lincoln saw sets, and show a heavy advance over former price, which was $6.50. To-day's ruling price is $8.75 doz. Manufacturers of rivets and burrs have just announced an increase in the extra for tinning, which goes from 4½c to 8c per lb., making a net advance of 3½c per lb. over former quotations.

Heel Chains And Bolt Clippers Higher

Winnipeg.

CHAINS, BOLT CLIPPERS.—A revision of prices on heel chains has just gone into force showing an increase of 5 per cent. They are quoted to-day at net list. Net prices are as follows:—Heel chains, 6-link, No. 85 x 1½ in. x 1¾ in. x 2 in., $2.30 single doz; No. 90, $1.65 single doz. Prices on New Easy bolt clippers, which have remained firm for the past year, again move up about 10 per cent., due to increased manufacturing cost, and are quoted to-day at the following prices:—No. 10, $3.55 each; No. 1, $4.75 each; No. 2, $6.65 each; No. 3, $8.55 each.

Circular Saws Register Increase

Winnipeg.

SAWS.—Owing to the high prices ruling on the higher grades of steel price revisions have been found necessary on circular saws. A few of the regular sizes are quoted herewith:—Maple Leaf—26-in., $16 each; 28-in., $18.50 each; 30-in., $21 each.

Stocks And Dies Go Up 12½ Per Cent.

Winnipeg.

STOCKS AND DIES.—New prices have just been announced by the manufacturers of Oster stocks and dies, necessitating an advance of approximately 12½ per cent., due to increased manufacturing costs, and new prices now effective are as follows:—Oster Bulldog stocks and dies—No. 101, $11.70; No. 102, $15.30; No. 103, $19.80; No. 104, $22.50; No. 104½, $25.20 each.

PITTSBURG MARKETS

PITTSBURG, Pa., Feb. 21—There has been no iron and steel market, in the ordinary sense of the term, for weeks past, because shipments of pig iron and steel were far short of contract obligations, and shipments were small because the railroads were unable to handle more material, and the railroads were in that position by reason of the weather. Hence the dominant factor in the iron and steel situation is the weather, and the important news of the week is that there have been seven days of very favorable railroad weather since last report, making a spell of favorable weather of 11 days to date, with temperatures averaging about 40° and scarcely any precipitation.

Railroads Make Improvement

The railroads have made excellent progress in clearing up congestion. In tangible results, by way of there being heavier shipments of pig iron or finished steel products, the trade observes very little improvement, but that circumstance arises from the nature of the case. The railroad executive have addressed themselves to the clearing of congestion caused by loaded cars in yards and on sidings. A large amount of freight has been moved forward to destination and receipts at nearly all points have been heavy, but thus far the return of empty cars has continued relatively light. Obviously the moving of freight already en route was the most important work to undertake but the railroad executives were doubtless quite conscious of the fact that if a large increase in the supply of empty cars to shippers were effected they would be offered a correspondingly larger amount of freight to move.

Receipts of coke at blast furnaces the past week have been very heavy and have represented the major portion of the coke that was stalled en route. Shipments from Connellsville ovens have not increased materially. For the six days of the week car supplies in the coke region have been, respectively, 70, 30, 35, 40, 20 and 30 per cent. of allotments. Production of pig iron has increased very considerably while steel works operations have increased but slightly, and some pig iron has been accumulating. For weeks past there have been railroad embargoes that covered nearly all consuming points, and permits to ship through or into the embargoed territory have been very difficult to secure. Up to date there has been very little easing off in this respect, and shipments of finished steel from mills in the past week cannot be estimated at more than 60 per cent. of capacity. The average thus far this year is a trifle under that, about two-thirds of the material being war material and no more than one-third ordinary commercial steel.

By an order issued the middle of the week the "Garfield Mondays" have been canceled, and plants are now entirely free from the fuel saving order, which closed plants for the five days ended with Tuesday, January 22, and three Mondays succeeding. The original order contemplated closing for six Mondays in addition. While Fuel Administrator Garfield took the entire responsibility for the order, it is the firm belief in the trade that the railroad administration was really responsible for it, its rescinding being of course based upon better traffic conditions developed since.

Steel Production

Reports of the American Iron and Steel Institute show that 29 steel making concerns which in 1916 produced 88.14 per cent. of the country's total output of steel ingots (disregarding castings) made 2,733,722 gross tons of ingots in December and 2,203,845 tons in January. Allowing for the producers not reporting, the figures indicate that the annual rate of steel ingot production was 38,340,000 tons in December, and 28,620,000 tons in January. The most conservative estimate admissible is that there is 47,000,000 tons capacity at present, and it is possible the capacity may really be close to 50,000,000 tons. Thus the production in January was at not more than 60 per cent. of capacity at the outside.

The two restrictive influences have been the poor movement of coke to blast furnaces and the poor movement of finished steel from works. Until the end of December the former was the chief influence. Since then the latter has been dominant. With a freer movement of

(Continued on page 110.)

WEEKLY PAINT DEPARTMENT

SELLING MORE PAINT NOW

IT is quite obvious that to sell more paint the dealer must influence his customers to use more paint. There may be individual cases where trade is secured from your opposition merchant and in this way increased sales result, but speaking collectively, it is necessary that more paint be used if more paint is to be sold.

One of the greatest problems facing the paint dealers and paint manufacturers is that of developing successfully the greater consumption of paint and varnish products to a point more nearly approaching their possibilities. Why do dealers spend their energies trying to get their opposition's trade instead of drumming up new business? Half the energy expended on new business will secure equally good and probably far better results. In influencing a man to use paint you naturally attain a measure of prestige for your store which will be felt in other departments as well.

Probably not more than twenty-five per cent. of the paintable surfaces,—houses, barns, outhouses, farm implements, automobiles, public buildings, factories, stores, warehouses, etc.,—throughout your district are painted frequently enough to be kept in proper condition. With the curtailment of building operations it necessarily devolves on the property owner to maintain his present holdings in a high state of repair. The most important consideration by all means in a program of this nature is paint.

In no other way can a property owner expend an equal amount of money and secure greater returns on his investment than by renewing the surfaces of his buildings when they commence to show wear. Unprotected surfaces soon reveal the action of the elements, decomposition sets in and destruction inevitably follows in short order.

The busy season for the merchant in the sale of outside paint rapidly approaches. What steps are being taken to educate your customers as to the real value of paint? Are you, Mr. Merchant, sitting back waiting for spring to break and hoping that your customers will decide to buy paint or are you already inaugurating a campaign on the value of this product which should be the means of increasing your sales? It is by no means too early to go after business for the paint department hard. Get the people thinking paint, get them talking paint, arouse their interest, solicit their inquiries, the results can only be measured by the extent and sincerity of your appeals.

It has been customary for the average consumer to look on paint and varnish only in the light of decoration. There is no doubt that decoration, cleanliness, sanitation will appeal to personal and even civic pride, but most important of all the functions of paint is its power to protect and preserve the more costly materials over which it may be applied. This element of the use of paint should predominate the sales program of the paint dealer. It is one feature which can be played up to great advantage at the present time when on every side is heard the cry of conservation.

No department in the hardware store offers a greater field for the development of this plea for conservation than that represented by paints and varnishes. To those merchants who have not been considering this angle in relation to paint sales, a golden opportunity now presents itself to introduce this element in their sales campaign.

Bringing the value of paint home to the merchants from another angle it is only necessary to ask those who do a credit business what influence property kept in a good state of repair has in their disposition to grant credit to the owner. Those men who use paint and varnish on their property when it needs it, who exercise pride enough to keep their houses, barns or other buildings in a good state of repair, isn't it true, Mr. Merchant, that those men have too much pride not to pay their bills? Are they not in the majority of cases looked on as good credit risks?

Selling paint requires careful study on the part of the retail merchant. The use of paint and the real value in its use is what every merchant should know. Energy directed towards acquiring detailed information about the line of paints and varnishes enables the merchant to solicit the business in his community aggressively and successfully. The consumer leans heavily on the merchant in the matter of what paint and varnish they will buy. To that merchant then who can back up his advertising campaign with intelligent and sympathetic interest in the problems of the consumer will the paint business of the community come. Know your line, prepare your campaign carefully, start now. Spring is not far off and an early start will do much to establish your store as paint headquarters.

An Excellent Varnish for Interior Work.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Feb. 21.—Linseed oil has been advanced six cents per gallon and the scarcity of seed has been the topic of interest in the market. Seed sold as high as $3.54. The spot stocks of flaxseed are very small and until the congestion is relieved dealers will have to accept single barrel deliveries and exercise a little patience for a while. While the price is high at present, some of the crushers feel that there will not be an unduly inflated market, while one source states that oil is likely to rule high because of the shortage that will have to be made up, the output not being considered ample to overtake accumulated orders and the new business that will come. Orders are being shipped out now against the spring bookings and reports indicate that the trade is asking for earlier delivery than usual. The paint trade is expected to be good this year and this is reflected in the number of orders received. White lead in oil is unchanged as are also glass and putty. Turpentine is unchanged but there is a slightly weaker tendency.

Linseed Oil Advances Six Cents Per Gallon

Montreal.

LINSEED OIL.—The continued difficulty of getting seed forward has emphasized the situation for the time being and prices have sharply advanced during the week six cents per gallon. This makes the price for raw $1.60, with the usual advance for the boiled. The prices are for single barrel lots as large quantity orders are not considered just now. However, while the crushers' market is strong this is traceable to the congestion and the delay in getting seed. There is a feeling that an easier situation will prevail in a few weeks' time. The crushers will be working 24 hours a day when the seed deliveries are sufficiently improved to give them the essential supplies. Outside markets are also very strong, the New York prices indicating a two cent advance.

Linseed Oil—	Raw. Imp. gal.	Boiled. Imp. gal.
Single barrels only	$1 60	$1 62½
5 to 9 barrels	....	....
10 to 25 barrels	....	....

Turpentine Easier But Local Price Held

Montreal.

TURPENTINE.—The weaker tendency in turpentine at Southern points has made a somewhat easier tendency here although prices are held unchanged. Trade is confined to small sorting. As yet this commodity is a small factor in the jobbers' turnover. Local stocks have been ample for the existing demand. The decline in the South is about one cent per gallon.

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.69-$0.72
1 barrel lots	0.70- 0.73
Small quantities	.... - 0.83

Mixed Paint Likely To Be In Active Demand

Montreal.

MIXED PAINTS.—There will be a good demand for ready-mixed paint and other lines this spring, if all indications from various sources at the present time are any criterion. The paint men are veyr busy at present and one of the large firms stated that there were more orders on hand for attention than there were at this time a year ago. In a letter to HARDWARE AND METAL from an Alberta hardware retailer this week, the opinion was expressed that there would be a bigger demand and sale for ready mixed paints than ever before. The farmers have the money and are prepared to take care of the buildings that they have been able to erect by applying a good durable grade of paint. The outlook is good.

White Lead In Oil Is Held Unchanged

Montreal.

WHITE LEAD IN OIL.—Little interest is reported in the sale of white lead in oil and prices are held on the recent advances. The price of pig lead is reported steady in the South and jobbers do not anticipate any downward revision in lead prices at the present time here. Along with orders for the usual spring requirements, odd lots of lead are included, while the present demand is confined but seasonable. Five ton lots are selling at $15 per 100 lbs., ton lots $15.50 and small quantities $15.85 per 100 lbs.

Putty Holds Firmly And Glass Prices, Too

Montreal.

GLASS AND PUTTY.—The deliveries of putty as well as glass have been rather small for the past week. Prices are firm all around and particularly for glass. So little is obtainable for import that orders are still being filled from spot stocks. Putty holds unchanged and sales are seasonable and without any special feature. Prices are as follows:

Standard Putty—	100 lbs. per 5 ton	1 ton	Less
Bulk, in barrels	$3.75	$3.90	$4.10
Do., ½ barrels	3.90	4.05	4.25
Do., 100 lb.	4.60	4.75	4.95
Do., 25 lb.	4.60	4.75	4.95
Do., 12½ lb.	4.85	5.00	5.20
3 and 5 lb. tins	6.60	6.75	6.95
1 and 2 lb. tins	7.10	7.25	7.45

Pure linseed oil putty—$1.75 per 100 lb. advance on above prices.

Glaziers' putty—$1.35 per 100 lb. advance on above prices.

TORONTO

TORONTO, Feb. 21.—Interest has centred the week around the linseed oil situation in which a big advance has been recorded. There is a very acute situation at present owing to the inability of crushers to get shipment of sufficient supplies of flaxseed from the Canadian West. Turpentine was in weaker market with a decline registered. Glass is in strong market but changes have not yet been recorded, except for wired glass in which advances have been recorded in some quarters. Wholesalers report the outlook for the spring trade is very encouraging. Good booking orders have been received in many instances.

Linseed Oil Goes Higher By 17c Gallon

Toronto.

LINSEED OIL.—With a rapid advance in the price of flaxseed during the week and difficulty in getting shipments of seed to Eastern crushers an acute situation has developed in the linseed oil situation. An advance of 17c per gallon was recorded during the week making the range of quotations in single barrel lots from $1.58 to $1.72 per gallon for raw oil. Arrivals of seed have been practically nil during the week. Cash flaxseed registered an advance of 12c per bushel during the week, on Thursday of last week being quoted at $3.33 and on Wednesday of the present week at $3.45 per bushel. There is every indication that supplies of seed from the Argentine at best could not reach the United States until May which would be too late to give relief to the situation on this continent so far as painting for the coming spring season is concerned. Supplies of linseed oil were very light during the week and dealers were letting their stocks out only in limited quantities to their customers. There is an active inquiry for the oil but stocks are not anywhere near sufficient to go round. The strong situation is

What Makes Paints Profitable ?

THE people of Canada are going to do more painting this Spring than ever before.

The increasing cost of all building materials will cause more people to preserve their present houses, barns, etc., with a coat of paint.

All classes of people are being brought to a fuller understanding of the value of painting their buildings frequently. The value of their property is increased and the appearance is always wonderfully enhanced by a coat of good paint.

It is not a question this year whether or not it will pay dealers to prepare for a big paint season.

Every Paint User is going to ask: "Where will I buy the paint I want?"

This is what the paint dealer must answer in order to be certain of a successful paint selling season.

B-H Paints Have the Call

Because of their quality and because this quality is made known, B-H Paints have the call. One of the most extensive and impressive campaigns ever launched in Canada will soon appear all over the country, influencing people in favor of B-H Paints.

This campaign includes every known form of effective publicity. Bill-boards, Painted Signs, Farm Paper and Newspaper Advertising—all will be used in goodly proportions.

Our next advertisement in this magazine will explain the new B-H Outdoor Advertising Helps we have prepared for our Agents. Watch for it.

Turpentine Declines 1c Per Gallon In Week

Toronto.

TURPENTINE.—The easier market prevailing at primary points for the past week or ten days has worked out toward lower prices in the local market. A decline of 1c per gallon was recorded from the high quotation of last week, making the range now in single barrel lots from 70c to 72c per gallon. There has been a better movement of turpentine in the local market during the week, but shipments from primary points have been held up owing to the railway situation. When peace comes there is likely to be much higher prices for turpentine.

	Imp. gal. Imp. gal.
1 barrel	$0.70-$0.72
2 to 4 barrels	0.69- 0.71
5 gallon lots	0.77- 0.82

Some Glues Are Selling Lower In Price

Toronto.

GLUE.—Readjustments have been made in the prices of certain classes of glue. An advance of 2c per pound has been made effective in English common sheet glue. Ground glues on the other hand are lower by 2c per pound. Decline is due to existence of fairly heavy stock in the instance noted. English common sheet glue is now quoted at 32c to 34c per pound, while ground glue No. 1 is quoted at 28c to 30c per pound and No. 2 ground glue at 22c to 24c per pound. There is a strong market for English sheet glues due to the fact that further supplies are not to be permitted to come forward.

White Lead In Oil Is Marking Time

Toronto.

WHITE LEAD IN OIL.—The market for white lead in oil held steady during the week. Movement of stocks is slow. Prices held unchanged at $15.70 per hundred pounds in ton lots and $16.05 in less than ton lots. An undertone of firmness has been injected into this commodity by reason of the acute situation in linseed oil. Pig lead on the other hand has not shown a marked tendency to advance during the week, although the undertone for that commodity is also one of firmness.

Mixed Paint Business Progresses Satisfactorily

Toronto.

MIXED PAINT.—Manufacturers report the volume of booking business for spring delivery of mixed paints continues to be very satisfactory. Difficulty experienced by travelers in making their trips from town to town seems to be the biggest bar to trade at the present time. Some wholesale dealers report the conditions for the spring trade in all lines connected with the paint trade as most encouraging. Prices for mixed paint were firmly maintained.

Glass Very Firm; Putty Holds Steady

Toronto.

GLASS, PUTTY.—The strong situation in the glass market showed no signs of abatement during the week. Absence of an active demand at the present time is probably the only factor that is a bar to higher prices. Stocks are within narrow compass, some sizes being entirely depleted. Prospects for getting additional supplies from the United States are rather slim as output has been greatly curtailer in that quarter. Wired glass in some quarters was advanced 3c per square foot during the week, making the selling price in the instance noted 30c per square foot.

Putty held unchanged in price, range on 100-lb. drums still being maintained at $5.05 to $5.15 per 100 lbs. Other sizes of containers held unchanged at prices given in current quotations.

WEEKLY MARKET REPORTS

(Continued from page 105)

coke already, and prospects for continued heavier movement, the effective restrictive influence is the supply of empty cars at steel works, and this is now expected to improve, perhaps quite rapidly once the improvement is really started. There should be a sufficient supply of pig iron for the steel works to take care of such aditional steel production as increased shipments make possible.

Shipments, and in turn production, may increase rapidly in the next few weeks and the question is whether there will be sufficient commercial demand to absorb the steel. Since the first of the year shipments have been at about 40 per cent. of capacity in war material and 20 per cent. in commercial steel, or 60 per cent. altogether. There is no occasion to make any great increase in the shipment of war steel, which has been at very nearly an adequate rate. With improved traffic conditions the demand for commercial steel may greatly increase, but it is rather questionable whether it could increase enough to furnish full employment to all the steel making capacity.

For some time export houses have found steel mills quite unwilling to quote on export business, and with such unanimity as to create suspicion that they were acting under more or less definite instructions. In the past week it has been announced officially that the War Industries Board has ruled that mills should not begin producing any export material for which an export license has not already been granted by the War Trade Board. This was followed by announcement in Washington ping space. Another object, doubtless, is to curtail unessential industrial activity, in which matter there are many who feel the Government has pursued altogether too lax a policy in the past. As to iron and steel, another object, which will be developed by the freedom or otherwise with which export licenses are granted, is doubtless to exercise control over prices, for the present set prices are by agreement made to apply to purchases by the Government, its Allies, and the domestic trade generally. Export sales of peace material are distinctly not included. Many sales of this character have been made at higher than the set prices, while there is no good reason why the Government should permit a premium to rule upon the transaction of such business. Under the new conditions Canada will of course fare better in general that non-continguous countries in that no ocean shipping is involved.

MATAMOROS OFFERS GOOD DEMAND FOR PAINT

While little attempt has been made during the recent years of unsettled conditions in Mexico to keep up other than necessary repairs of buildings in Matamoros, Tamaulipas, Mexico, and other towns in this vicinity, there is a growing tendency among property owners to improve the appearance of their buildings, with the result that there is a good demand for paint.

Practically all of the better-class buildings are built of locally manufactured bricks, which are very porous. As the buildings are all one or two stories high, constructed with a courtyard in the center, and with very large rooms, there is a large surface in front which requires protection. During the extreme heat of the summer months the reflection of the sun on the bricks raises the temperature to possibly 140° F. Its effect is soon shown on outside paintwork. While oil paint is used to some extent in this class of work, a water-mixed product is more widely employed on account of the difference in cost at time of application.

As a specially prepared paint for exterior brickwork which would withstand the extreme heat of the tropical sun in this section would no doubt be cheaper in the long run, there would seem to be an excellent opportunity for placing such an article on the market at present.

CONTRACT TO BUILD SHIPS

The Canadian Car and Foundry Co. have closed a contract for building steel ships at Fort William, Ont., for the United States to the amount of $10,500,000. This will involve the employment of an additional thousand men. Material for the contract has been arranged for with the United States government and next May will see the yards in operation.

Toronto, Ont.—H. J. Daly Co., Ltd., has been incorporated with a capital of $1,000,000 to carry on business as wholesale and retail dealers in all classes of goods and to operate department stores in all lines of mercantile business.

WANTED — RELIABLE, ENERGETIC hardware clerk, 8 to 12 years' experience. Capable of taking charge. Apply, stating salary and giving full particulars, to Box 170, Hardware and Metal, Toronto.

The firm who inserted the above advertisement in HARDWARE AND METAL showed good judgment.

Naturally, replies would only come from clerks who were in the habit of reading HARDWARE AND METAL—and every hardware merchant realizes that a clerk who reads HARDWARE AND METAL is the kind of clerk he wants, because he will be thoroughly informed on market conditions, new selling plans and the best methods of window display and advertising. The above advertisement brought in 23 replies. It cost only 67 cents.

USE THE WANT AD. PAGE.

THE great demand for Berry Brothers' Varnishes, Enamels and Stains grows greater as consumers realize their economy. They not only produce the most beautiful interiors, but their lasting quality offsets the high cost of labor, and as everyone knows labor is the chief item in finishing operations.

It costs no more to apply Berry Finishes that last for many years and the kind that wears out the first year, and the difference in the price per gallon is nominal.

Liquid Granite Floor Varnish, Luxeberry Enamels (white, ivory and three shades of gray), Luxeberry Wood Finish, Luxeberry Wall Finishes, Berrycraft Stain Finishes and Luxeberry Spar Varnish are a few among the many "Berry" products it pays to push because they make permanent customers.

What he wants is a paint that wears well

Your householder customer who paints his house or his verandah this spring will expect to see that paint still bright and new when winter arrives. He wants a paint that will stand up under sun and rain—that will not quickly blister or chalk.

Give him Moore's House Colors—do more, recommend them — tell him they'll stand the weather. And when winter does come and he sees that good paint still spic-and-span, he knows where he'll buy his next lot of paint—and—so do you.

The more a man knows about paint the more he looks for quality.

Jamieson's Paints and Varnishes will give entire satisfaction to even your most exacting customers. They are made to serve and are honest value at a moderate price.

It may be possible to secure paint which sells at a higher figure, but a better paint is not made.

We invite your investigation of

The Jamieson Line

Satisfaction and increased demand are positive, and the dealer's profit is a generous one.

We make no extravagant claims but will stand behind all our statements. If you are looking for more sales, better profits, and a better satisfied circle of paint and varnish customers, write us to-day. A post-card will do.

Quality **Brushes** *Quick Service*

for the

House Painter
Carriage Painter and
General User

Sanderson Pearcy & Co.'s brushes are *specially made* by skilled labor, modern machinery and from the best materials that can be procured. The variety is sufficiently broad to cover all requirements, from the cheaper lines for household use to the highest grades used by the skilled mechanic. Every brush stamped *Sanderson Pearcy & Co.* is warranted to give satisfaction if properly used, has in fact a *double guarantee,* and will bear a larger profit to the retailer.

Below are named a few of our celebrated lines for merchants to handle and are vulcan set—guaranteed.

Flat Varnish	*Flat Wall*	*Kalso*
Raven	**Cracker**	**Kracker**
Tripoli	**Eureka**	**King 1/0**
Vulcan	**Czar**	**King 2/0**
Good Value	**Megantic**	**Queen**
Victory	**Hob**	**Mascot**
Cleo		**Special Congo**
Czar		**Caribou**
		Czar

Prince Spoke is a *solid centre, straight compressed,* flat, oval, chiselled varnish brush.

Czar Chiselled Oval is a *solid centre, straight compressed, bridled* brush used extensively by first-class mechanics.

Consult our representatives for your requirements. Quality and Quick Service our motto.

A237 — "Kitchener" packless, quick-opening Bibb, swan neck, China handle.

When you see "Empire" you're sure of Quality.

Good Money in "Kitchener" Bibbs

The "Kitchener" Quick-opening, Packless Bibb for kitchen, slop sink and laundry tray has proven a good seller wherever shown. Its ease of operation and quick action, together with the big, smooth, splashless stream it delivers have made it a general favorite with householders.

The "Kitchener" is made of full Empire Quality red metal. It is standardized, which means big business for the dealer who lays in a stock of parts.

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

Wa-ko-ver Stain makes permanent friends

Wa-ko-ver Stain has the happy faculty of improving on acquaintance. To the householder who has never before used it the first application is a distinct revelation. The ease with which it is laid and its evenness of shade make a very favorable impression that is heightened by the brilliant gloss finish.

Once Wa-ko-ver has been applied it seems almost impossible to wear it out. Whether on floor or woodwork it continues to display a beautiful clear finish that is always "just like new." Wa-ko-ver holds the friends it makes by durability and permanence.

You can have Wa-ko-ver making permanent friends for you if there is no Stephens' Agency in your locality. Write us to-day about our interesting proposition.

The New Metal Worker Pattern Book

This is the most elaborate and complete work that has ever been brought out for the use of sheet metal pattern cutters. It is printed from new type with a new and improved arrangement, especially convenient for reference and study. Parts of a former edition, entitled The Metal Worker Pattern Book, which have been utilized in its preparation, have been re-written and simplified and later methods embodied. 218 problems are now given, 75 of which are entirely new. A Treatise on Pattern Cutting as applied to all Branches of Sheet Metal Work. By George W. Kittredge. 430 Pages; 744 illustrations; Size, 10 x 13 inches. Cloth bound, Price, $5.00. Sent postpaid only on receipt of price.

Technical Book Department

MacLean Publishing Co., Ltd.
143-153 University Ave., Toronto

A most economical varnish for all interior work. It has great covering powers—it brings out all the beauty of the wood and when rubbed takes on a soft, satin-like finish.

This is a line that will prove most satisfactory to your customers and one that you can place the fullest confidence in.

Let us send you details of our full line.

"There, John! That's what Sells Pratt & Lambert Varnishes for Us."

SMASH! SMASH! One after another the big full-page advertisements of the Pratt & Lambert Spring Campaign are going to hammer their message into the mind of the American public. This is not to be a campaign with a mere handful of page advertisements bolstered up with a lot of small space. Practically every advertisement occupies a full page — and all are in publications of largest or most exclusive circulation, such as the Saturday Evening Post, the American, the Ladies' Home Journal, House Beautiful and Country Life in America. The opening gun of the campaign is a

FULL-PAGE PRATT & LAMBERT ADVERTISEMENT IN THE SATURDAY EVENING POST ISSUE OF MARCH 2ND

Buy a copy. If you're a Pratt & Lambert dealer already, read it through. See if it doesn't give you a feeling of confidence in the goods you're selling — a feeling that the makers of Pratt & Lambert varnishes are willing to *stand back of their product.*

Then tear out the advertisement and paste it in your window.

If you haven't yet stocked the P&L Line, read this Post advertisement. Estimate for yourself the benefits that have accrued to the paint and hardware dealers who have been getting the benefit of this constant, powerful advertising, every season for *ten years.* Then imagine the sales value to you of a line of varnishes backed by ten years of cumulative publicity — products resting on sixty-nine years' experience and a full decade in the continual searching spotlight of national advertising.

Then write for the Pratt & Lambert Dealer Proposition.

PRATT & LAMBERT-INC. VARNISH MAKERS 69 YEARS

Don't worry about your new clerk

He can sell Gargoyle Mobiloils with the sureness of a lubrication expert

WHEN your new clerk waits on a customer do you look around with a worried feeling?

You know the trouble. Experienced help is hard to get. It is easy enough for a new man to sell nails or hammers. But what about articles where the customer wants advice?

What about automobile lubricating oils?

Hardware merchants are finding the answer to this problem.

It is summed up in the four grades of Gargoyle Mobiloils as specified by the Gargoyle Mobiloils Chart of Recommendations.

The Chart of Recommendations enables any one in a hardware store — even your newest clerk—to sell Gargoyle Mobiloils intelligently. Simply ask the motorist the make of his car and the year's model. Then run your finger down the Chart until that car is found.

Ford 1915? Gargoyle Mobiloil "E." Overland 1916? Gargoyle Mobiloil "Arctic." Pierce-Arrow 1918? Gargoyle Mobiloil "A."

GARGOYLE

Mobiloils

A grade for each type of motor

And so it goes. Your clerk cannot give the wrong advice. The right advice is at his finger tip. He makes a good impression for you.

Increasing thousands of motorists know that the Chart is a recognized guide to correct lubrication, and that Gargoyle Mobiloils used as specified in the Chart provide correct lubrication.

IF YOU HAVE OVERLOOKED the clean profit and good will there is for you in Gargoyle Mobiloils, write us at Room 704, Imperial Oil Bldg. Toronto, for booklet, "Correct Lubrication," containing Charts of Recommendation for all makes of automobiles, tractors, motorcycles and motorboat engines, and for full information regarding our proposition to dealers.

The four grades of Gargoyle Mobiloils, for gasoline engine lubrication, purified to remove free carbon, are:—

Gargoyle Mobiloil "A"
Gargoyle Mobiloil "B"
Gargoyle Mobiloil "E"
Gargoyle Mobiloil "Arctic"

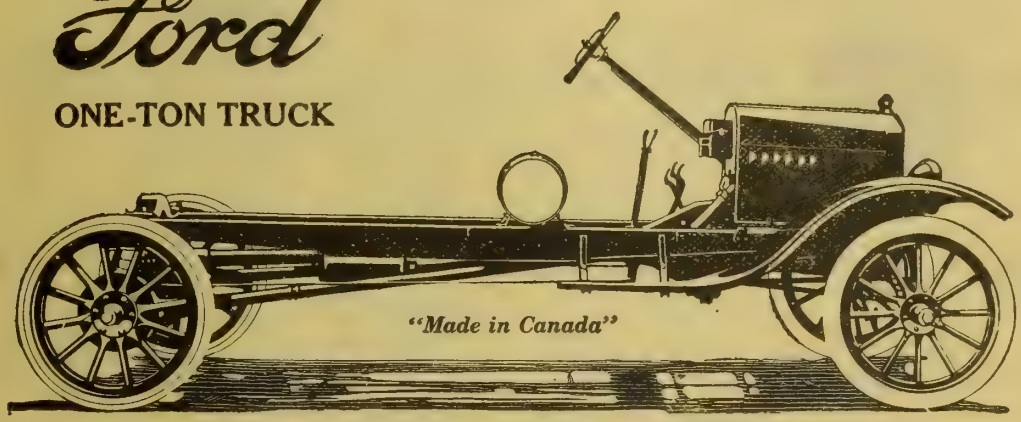
Ads That Pull

THE retailers who are securing best results from their newspaper advertising are those who are using illustrations in their advertisements. Just as a mail order catalog would be dead without illustrations, so is the average consumer advertisement when illustrations are omitted.

Canadian retail hardware merchants can secure attractive illustrations through HARDWARE AND METAL'S Electro Service. Mounted electros are supplied at a cost of 20c each. Booklet showing 365 electros will be supplied on request. Address below.

HARDWARE AND METAL



CANADA'S NATIONAL HARDWARE WEEKLY

143-153 University Avenue, Toronto, Canada

For Ton Trucking Purposes

Ford

ONE-TON TRUCK

BUSINESS men everywhere who have hauling or delivering problems to consider—whether operating a wholesale business, a retail store, or a farm—will welcome the arrival of the Ford One-Ton Truck.

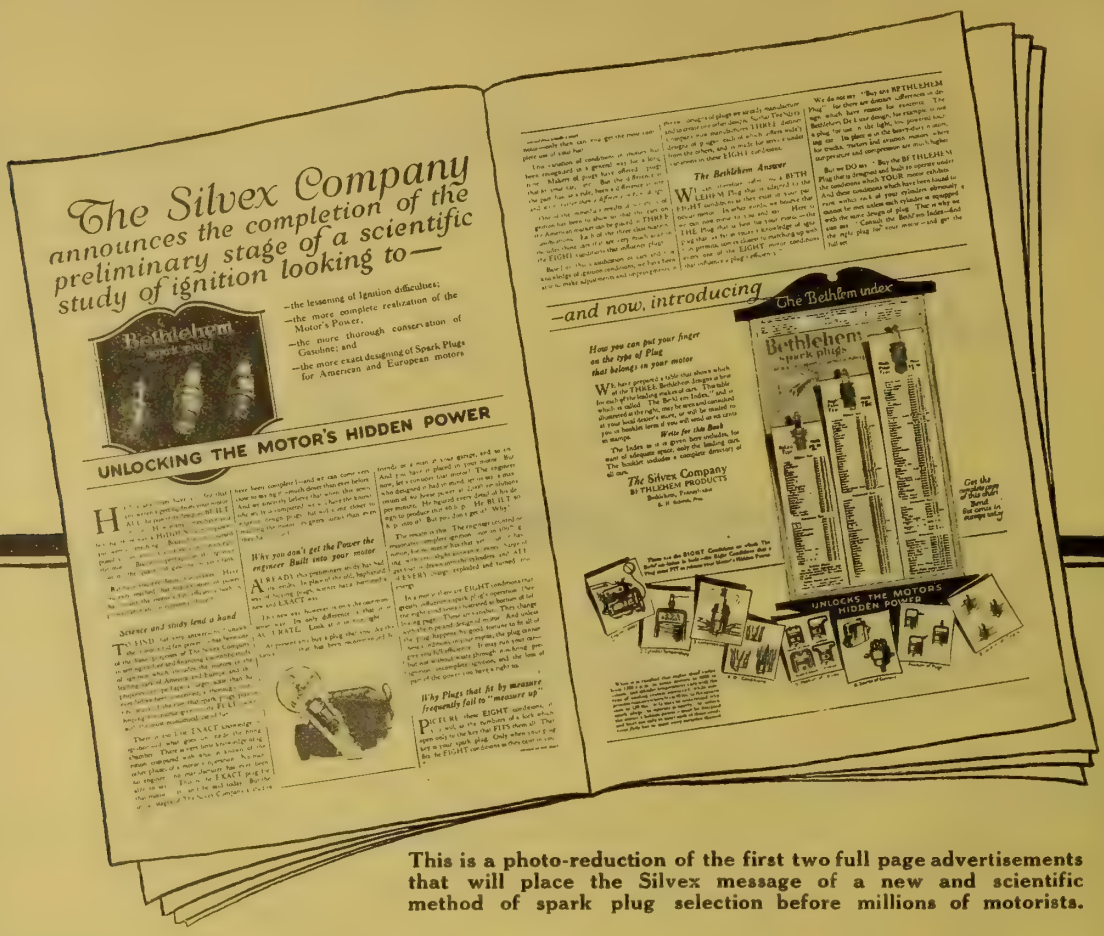
PRICE

$750

F. O. B.
FORD, ONT.

Heretofore, the Ford user who wanted to carry loads up to a ton found it necessary to get one of several special attachments or extensions which were on the market. Now the standard Ford truck is available—a car that can withstand the drudgeries of commercial use, and yet lacks superfluous weight, and is easily handled.

Supplied as chassis only



The truck differs from Ford passenger cars in that it is specially designed throughout in proper pattern and strength for heavy-duty service. It has a final drive of the worm gear type, so that all gears are enclosed. Rear wheels are equipped with solid tires. Front tires are pneumatic. Standard Ford motor, transmission and ignition.

The largest truck and automobile company in the British Empire, with an organization of more than 700 Canadian dealers stands back of every Ford truck purchased.

See any Ford Dealer in Canada, or write for a catalog

Ford Motor Company of Canada, Limited
Ford, Ontario

If interested, tear out this page and keep with letters to be answered.

This is a photo-reduction of the first two full page advertisements that will place the Silvex message of a new and scientific method of spark plug selection before millions of motorists.

—in presenting the Silvex Consumer Advertising Campaign for 1918, we wish

to emphasize the important service rendered the car owner by the Bethl'em-Index — not only as it affects his selection of the proper size and style of spark plug, but as it influences his motor's performance *through the selection of a spark plug designed, built and basically right for the TYPE of motor he drives.*

This, we believe, is the first time that any manufacturer has developed a *definite* method of spark plug selection, based on a scientific study of the varying conditions within each type of gasoline motor as a substitute for the present, almost universal, haphazard way of buying any plug that fits the hole in the top of cylinder.

With the advances in the design, manufacture and marketing of Bethlehem Spark Plugs to be discussed later in these pages, the trade will find open to them new avenues of profit.

The Silvex Company

Bedrock in Auto Tire Prices

¶ No other **standard** make of tires can be purchased at lower prices than Dunlop Tires sell at. (If so, they must be "seconds.")

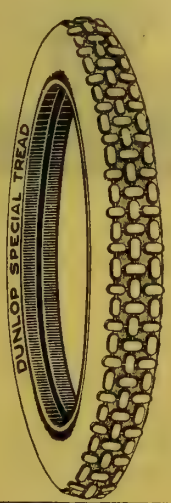
¶ No other **standard** make of tires can show reasons why they should be purchased at higher prices than Dunlop Tires sell at.

¶ Tires lower-priced than Dunlop mean a loss to you **in the end.**

¶ Tires higher-priced than Dunlop mean a loss to you **at the beginning** and **no gain to you in the end.**

¶ If anybody tells you they have lower-priced tires than Dunlop, tell them possibly so but more than likely their tires are Unknown and Untried.

¶ If anybody tries to sell you higher-priced tires than Dunlop, ask them to name a single virtue in their product not found in Dunlop Tires —"Traction Tread," "Special," or "Plain."



¶ Dunlop prices are standardized prices for standardized Quality. Dunlop Tires have been made in Canada since 1894. Therefore, Dunlop means "Dean of the Tire Industry."

ELASTICITY, QUALITY

Both are permanent with

DUNLOP SEAMLESS TUBES

Made by a patented process. It costs you no more to get the most in Auto Tube Merits.

The Dunlop Catalogue A. IA. gives a first-hand idea of the completeness of the Dunlop Line. You should have a copy that you may not only know more about Dunlop Tires and Tubes, but that you may also further appreciate the excellence of Dunlop Accessories.

Their superior construction and quality means satisfied customers, and repeat orders.

Reputation behind the goods, long service ahead of them.

All good jobbers sell the North Star Brand.

CANADA DRY CELLS, LIMITED, WINNIPEG, CANADA

HOLOPHANE AUTOMOBILE LENS

"Within the Law"

The Why of the Holophane Lens

THE HOLOPHANE LENS embodies a fin or shelf of specially treated glass, which extends backward just above the bulb of the lamp, placing a positive shield between the light and the eye of the approaching motorist.

A glance at the illustration will show that this fin must eliminate glare because of the shadow which it casts upward across the eyes of the approaching driver.

In addition to eliminating glare the perfect headlight lens should also provide bright illumination far ahead and to the sides of the car. Below are figures of an official headlight test:

NAME OF LENS.	Distance at which driver recognized man	Distance from car at which newspaper could be read
HOLOPHANE	280 feet	385 feet
L Lens	260 feet	295 feet
N Lens	245 feet	300 feet
P Lens	220 feet	280 feet
D Lens	215 feet	220 feet
C Lens	210 feet	310 feet
M Lens	180 feet	225 feet
W Lens	170 feet	225 feet
S Lens	165 feet	180 feet

Names of all lenses can be obtained from the report.

THE SALIENT POINTS OF HOLOPHANE LENS

1—It bends down the concentrated search light beam below the 42-inch line, preventing glare.

2—Lights the road 250 feet and more ahead of the car.

3—Provides ample light directly in front and to the sides of the car to easily see the curb, ditches, etc., and for passing vehicles.

PRICES

Diameter	List Per Pair
7 to 8¾ inches	$3.60
8⅞ to 9⅝ inches	4.50
9¾ to 10¼ inches	5.25

Fort William and West add 25 cents per pair.

For sale by dealers in hardware, auto accessories and electrical supplies.

The "Carhartt"

Not Like Other Gloves
Sewed with Wax Thread

HEAT WATER PROOF

No Outseams To Rip Good as the Carhartt Overall

Patented

Reinforced Where the Wear Comes. The Service of Two Pair for the Price of ONE.

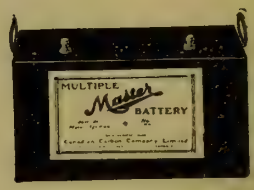
Sure! He will get Gloves. Why not Carhartt's?

The Government is planning to help farmers to produce more this year by supplying labor from non-essential city industries, either by volunteer or draft system. These city men will not be able to do farm work without having their hands protected.

Carhartt $1 Gloves

will have a big call from this class of labor as well as from the hardened farmer and mechanic. 95% of the men who come into your store need gloves for

Working, Motoring, Driving



The railway man prefers Carhartt Gloves; they stand the hard wear of the road. Everything points of an exceptionally heavy demand for working gloves this year.

Write at once for an assortment of styles to retail at one dollar and over.

Hamilton Carhartt Cotton Mills
TORONTO UNIT LIMITED
Toronto Montreal Winnipeg Vancouver Liverpool (Eng.)

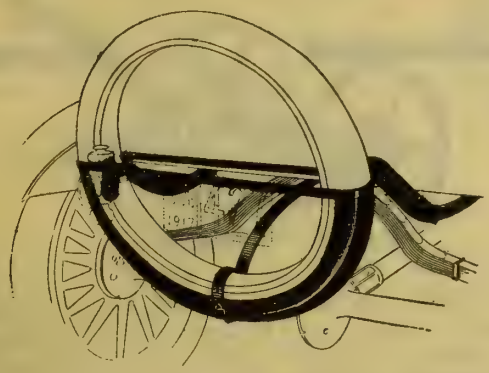
—the Spring drive will soon be on

With the tractors and gas engines enlisted to speed up farm production in Canada the use of the Master Hot Sparker Multiple will be emphasized to a marked degree this year.

The importance of the gas engine around the farm these days is evident from the fact that it is used for threshing, silo filling, corn husking, wood sawing, pumping, etc., etc., and at no time during the year is it idle.

You can see the great need for a reliable system of ignition—a "Master" system.

The Master Hot Sparker Multiple solves the problem —now is the time to get in touch with the Master line.



Write to-day.

FORD SET

The Ford Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

STANDARD SET

Standard Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex. nuts, as follows: U.S. Standards from ¼ to ½ in.; A.L.A.M. Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 in. to ⅝ in.

Autoists like that rachet feature

Lane's Unique Rachet Wrench is ideal for close work

The autoist who has once discovered a few of the hard-to-get-at nuts and screws on his car is only too pleased to have some one introduce to him Lane's Unique Ratchet Wrench. He sees at a glance how effective the ratchet feature would be in close quarters where an ordinary tool would be absolutely useless.

Play up this ratchet feature and so arrange auto accessory displays that when motorists get up against the tool problem they will remember Lane's Unique Ratchet Wrench and come to you for a set.

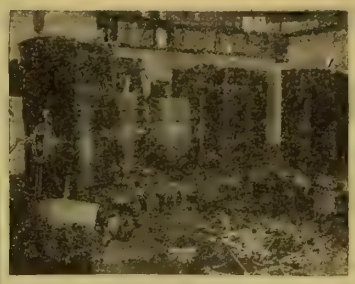
TOWNSEND'S

LAWN MOWERS

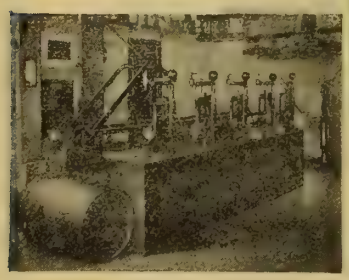
BUILT LIKE A WATCH

TOWNSEND MOWERS are superior in every feature of design and construction. In strength, durability and high character of work they do, they have no rivals.



No Noise but the Swish of the Blades

All Blades are of crucible steel, oil tempered. **Ball Bearings** originally adapted to lawn mowers by Mr. Townsend, insure easy, quiet operation. **Triple Compound Gears** permit of maximum strength with minimum weight. They are entirely enclosed and prevent dirt or grass clogging the pinions. Handsomely finished in colors and gold.



We manufacture a full line of mowers for use on Golf Courses. Send for complete illustrated catalogue and trade terms.

Wanted Immediately Advertising Manager

A MANAGER is wanted by HARDWARE AND METAL to work in Montreal. Successful applicant will be paid a good salary, and will have a very fine opportunity to improve his position.

The successful man will be one who has a good knowledge of advertising theory and practice, and will have salesmanship ability in goodly measure. He ought to be able to devise advertising campaigns for HARDWARE AND METAL for advertisers called on. We do not believe in calling on and taking up time of advertising prospects unless we have definite and constructive suggestions to assist them in their sales problems. For this reason our salesmen are always welcome. If he can make good copy suggestions and put up good ideas, so much the better.

The position is an important one. The field to be covered is rich with good prospects. The classes of firms who can use HARDWARE AND METAL are experiencing prosperous times.

Give full particulars in first letter so as to cut down time-consuming correspondence. State past experience and connections; age; married or single; salary previously earned, and other information which an employer desires to know.

Send Applications to The Manager of

Keep Shotguns Busy

How many shotguns are there in your city? Suppose we say a hundred. Now if 50 were used at the trapshooting club each week, 1,250 shells and targets would be sold.

It is the idle gun that keeps your stock of shells on the shelf. The Du Pont Company

By Boosting the Trapshooting Game

creates a steady demand for loaded shells, targets, trap equipment, sporting goods and many other articles. By vigorous and continuous advertising; employment of salesmen thoroughly familiar with the trapshooting game and its promotion; conducting a shooting school at Atlantic City; introducing novel and instructive features in local, state and national events, and being the leaders in every beneficial project to popularize trapshooting, we are carrying on a vigorous campaign to "put across" the patriotic sport of trapshooting.

Where There's a Gun Club

we want to put more "pep" into its membership—get more guns working. If there is no club organized—write us. Let's get busy—mark X before "Trapshooting" and "Gun Clubs," and mail the coupon to-day to Advertising Division.

Hardware & Metal—1-26-'18

An accessory line distinguished by trade protection and user satisfaction

MORE than ever this year Johns-Manville will depend on the trade for the distribution of accessories, which is the reason why we again emphasize our trade protection policy. We sell only to the recognized jobber. He stocks the retail dealer—and the margin he allows even on very small orders is liberal. This means quick turnovers, frequent re-orders and more profit for all concerned.

Because Johns-Manville accessories are of a satisfying quality—consistently advertised— they are easy to sell to the ultimate consumer. To prove this it is only necessary to point to Johns-Manville Non-Burn Brake Lining, the Johns-Manville Fire Extinguisher and the Johns-Manville Speedometer. Each excels in its own field through perfection of design and dependable quality. And this year we will again advertise these advantages consistently. Ask your jobber or our nearest dealer for complete information.

HOYT METALS

MEMO

February 23rd

for your Babbitt Metal file

You and Your Store

are judged by performance—by what the goods you sell can do for your customer. Dealers who sell Hoyt Babbitt Metals—"Nickel Genuine," "Trojan" and "Frost King"—are always regarded as mighty good merchandisers—men who know how to buy and what to buy.

Hoyt Babbitts do such exceptional work under severe conditions that it's no wonder they make friends both for us and for the dealers who sell them.

If they're not working up friendships for you better get into touch with us. As a starter, write for our price list.

HOYT METAL CO., Toronto

NEW YORK, N.Y. LONDON, ENG. ST. LOUIS, MO.

Wanted

SIUTATIONS VACANT

WANTED—TINSMITH FOR COUNTRY SHOP —must be competent, reliable, exempt from military service. Good salary paid to right man. Apply Drawer A, Rocanville, Sask.

WANTED—A SOBER, ENERGETIC HARDware salesman for retail store. A man who can fill this position can draw a manager's salary and assume management as soon as he proves good. Apply Frank McLagan, Prelate, Sask.

WANTED — THOROUGHLY COMPETENT foreman for tinshop in Maritime Provinces. Man with some knowledge of cornice work preferred. No boozer need apply. Apply A. B. C., care of Hardware and Metal. Toronto.

SALESMEN TO SELL TO HARDWARE AND electrical dealers, side line specialty. A. M. Towe, Canadian Agent, Pioneer Corporation, Imperial Bank Building, London, Ont.

MAN FOR WHOLESALE CONCERN — EXperienced in handling orders, correspondence and knowledge of automobile accessories. Must have capacity to handle details thoroughly. State age and full details, including salary expected. Application will be treated confidentially. Box 800, Hardware and Metal.

WANTED — A COMPETENT HARDWARE clerk and salesman of not less than three years' experience. Must come well recommended, and be exempt from draft. Apply, stating salary required, Box 790, Hardware and Metal.

WANTED — EXPERIENCED HARDWARE travelling salesman to cover Western Ontario. Apply, stating qualifications and salary expected, to Box 739, Hardware and Metal.

WANTED—COMMISSION AGENTS LOCATED in Sherbrooke can handle two or three more specialty lines to sell to hardware and manufacturing trade in Eastern Townships, Province of Quebec. Address P.O. Box 357, Sherbrooke, Que.

WANTED — DISTRIBUTOR FOR HIGHEST grade mechanics' tool chests. Advise lines handled, territory covered, class of dealers reached, and commission wanted. Prefer established manufacturers' representative travelling several men. Union Tool Chest Works, Rochester, N.Y.

FOR SALE

FOR SALE — HARDWARE, FURNITURE, stove and tin business. Good farm trade. R. McClanahan, Belwood, Wellington County.

ELECTRICAL SUPPLIES—TEN M. FT. No. 14 rubber covered S.B. wire @ $12.50; five C. ft. No. 12 rubber covered D.B. wire @ $20.00; one M. ft. No. 8 rubber covered D.B. cable @ $44.00; Three M. No. 5½ split knobs on strings @ $11.50; Five M. 3 x 5/16 tubes @ $5.50; eighty No. 1001 C.D. & C. 30 amp. service boxes @ $1.60; fifty C.G.E. 50 c.p. B.B. key sockets @ 20c; one M. ft. 2/8 Duraduct @ $25.00. A. E. Wrigglesworth, Shelburne, Ont.

POSITION WANTED

YOUNG HARDWARE SALESMAN WITH TEN years' city and country retail experience, and good education and business knowledge, is open for position where energy and industry may pave the way to a position of trust and responsibility. Unfit for military service. Apply Box 358, Hardware and Metal, Toronto.

MARRIED MAN, YOUNG, ENERGETIC, 8 years' "retail" experience shelf and heavy hardware, desires position as salesman or manager in good live town by April 20th. Apply Box 391, Hardware and Metal.

BY A FIRST-CLASS HARDWARE SALESman, having an A1 connection with the best retail hardware merchants in the Province of Ontario; open for engagement 1st of March. Address Box 332, Hardware and Metal.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

Twelve Cents Per Word!

Several weeks ago a firm in Vancouver, B.C., telegraphed a want ad to Hardware and Metal. They wanted a clerk in a hurry and wished to catch the earliest issue.

The cost of a telegram from Vancouver to Toronto is ten cents per word, added to this was our charge of two cents per word.

This firm had faith enough in Hardware and Metal's Want Ad column to pay *twelve cents per word,* for an announcement in this column. This little story speaks for itself. Mail or wire your want ads, we will accept them until Thursday noon for the current issue.

Hardware and Metal Want Ad Dept.

FOR SALE

HARDWARE BUSINESS FOR SALE—IN AN Ontario marine town; $4,000 stock at a discount. Owner wishes to retire. Box 735, Hardware and Metal.

FOR SALE, AT A LIBERAL DISCOUNT—2 National cash registers, cost $210.00 cash; 1 Taylor safe, cost $150.00; 1 oval glass counter show case, cost $30.00; 1 set of tinners' tools, cost $250.00. J. H. Millard, Melfort, Sask.

WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.

THE Columbus Chain Company with factories at Columbus, Ohio, and Lebanon, Pennsylvania, and the McKinnon Chain Company with factories at Buffalo, New York and St. Catharines, Ontario, have been united under the name of the Columbus McKinnon Chain Company. The new Company have formed a Canadian organization, known as McKinnon Columbus Chain Limited, with general offices at St. Catharines, Ontario.

Besides offering the Trade a full line of Electric Welded Chain, it is the intention in the near future to manufacture Fire Welded Chain at St. Catharines, under supervision of experienced men from the Columbus plant. The new Company will therefore be in a position to offer the well known Chain of the Columbus Company—but manufactured in Canada. Until the Canadian plant is in operation our orders for Fire Welded Chain will be imported from Columbus, Ohio.

We wish to take this opportunity to thank the Trade for the support they have already given us, and we will endeavor to merit the continued patronage extended to both Companies in the past.

A Machine That *Saves Time*

No merchant should do the work a machine can do for him

A National Cash Register does 15 important things in 3 seconds. It would take many minutes to do them by hand—yet no merchant can afford to be without the protection and information they give. A National Cash Register—

- Prevents disputes and stops losses.
- Prevents carelessness and forgetfulness.
- Increases the merchant's trade and profits.
- Makes better clerks by showing what each does.
- Saves clerk hire by speeding up sales.
- Protects you against the mistakes of new clerks.
- Lowers cost by increasing take-with sales.
- Gives quick service, and prevents overtime work.
- More than pays for itself out of the money it saves.

A demonstration of the register best suited to work your business will prove these statements. Let our salesman show it to you. This will place you under no obligation.

The National Cash Register Co. of Canada Limited, Toronto.

I would like to know how a National Cash Register enforces system in business, how it prevents carelessness, how it stops mistakes, how it would save me money. I understand that this places me under no obligation.

A Cost Cutter In Making Butter

MAKES
TWO POUNDS
OF
MERGED BUTTER
FROM
ONE POUND OF
BUTTER
AND
ONE PINT OF
MILK

HOW IT IS DONE

Pour one pint of sweet milk into the "Universal" Merger and add one pound of butter shaved in thin slices and one teaspoonful of salt. Place the jar in warm water to soften the butter. Do not melt it. Put jar back in churn frame and churn for two to three minutes until thoroughly mixed. Butter and milk are now ready to put in a cool place to harden.

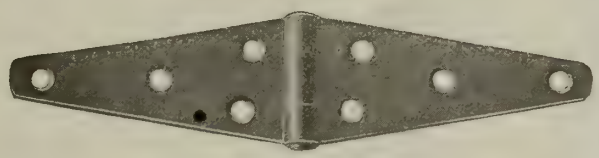
THE "MORRISON"
Automatic Cellar Drainer

For ease of operation and simplicity of construction, this cellar drainer has no equal. It can be installed easily, and takes up very little space. No complicated cams or levers to get out of order, and all working parts are placed above water.

This is a very important feature in cellar drainers, because when such an appliance is submerged, it is liable to get dirt into the moving parts.

No such trouble for you if you instal a "Morrison."

No part of a sanitary system can cause so much damage as can a poorly constructed cellar drainer. The whole contents of a basement is liable to damage.



Building foundations are protected and all other assets below the ground floor when a Morrison cellar drainer is installed. We have been established over 50 years, and all our experience stands behind the "Morrison." Let us furnish you with full particulars and prices before you decide to buy your next lot of cellar drainers.

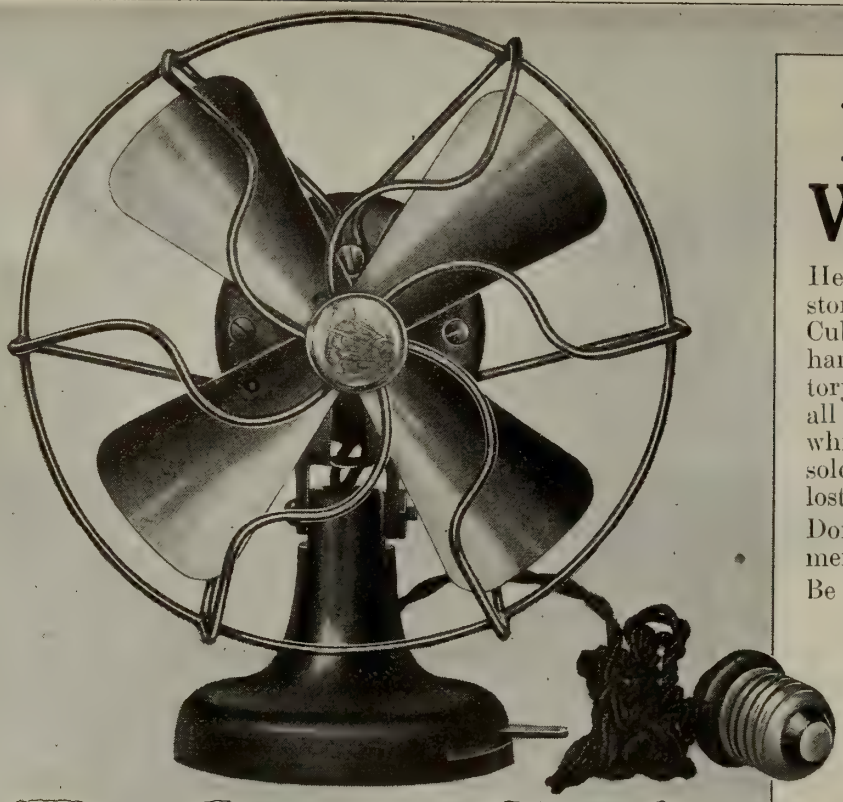
You'll find "National" Hinges easier to sell

Place a "National" Strap or "T" Hinge alongside one of any other make and you'll quickly recognize the added selling value of the "National." The same evidence of care and attention to detail that has earned "National" Hardware the preference with competent builders everywhere is seen in these goods. They are well-balanced, easy working, nicely finished, and the screwholes are sharply cut and well counter-sunk.

The superiority of "National" Hinges is so apparent as to materially assist in the selling.



"National" Wrought Strap and "T" Hinges are made in four styles:—Plain Steel, Japanned, Sherardized and Sherardized with Brass Pin. Strap Hinges pack approximately from 10 dozen pair per barrel in the 14-inch size to 250 doz. pair in the 3-inch size. "T" Hinges pack approximately from 7 dozen pair per barrel in the 14-inch size to 200 dozen pair in the 3-inch size. Also packed, if desired, one pair in a box, with screws.

If you had a "National" Catalog you could find a number of good reasons why you should stock "National" goods.

Polar Cub Electric Fan

REG. U.S. PAT. OFF.

Polar Cub Warns You!

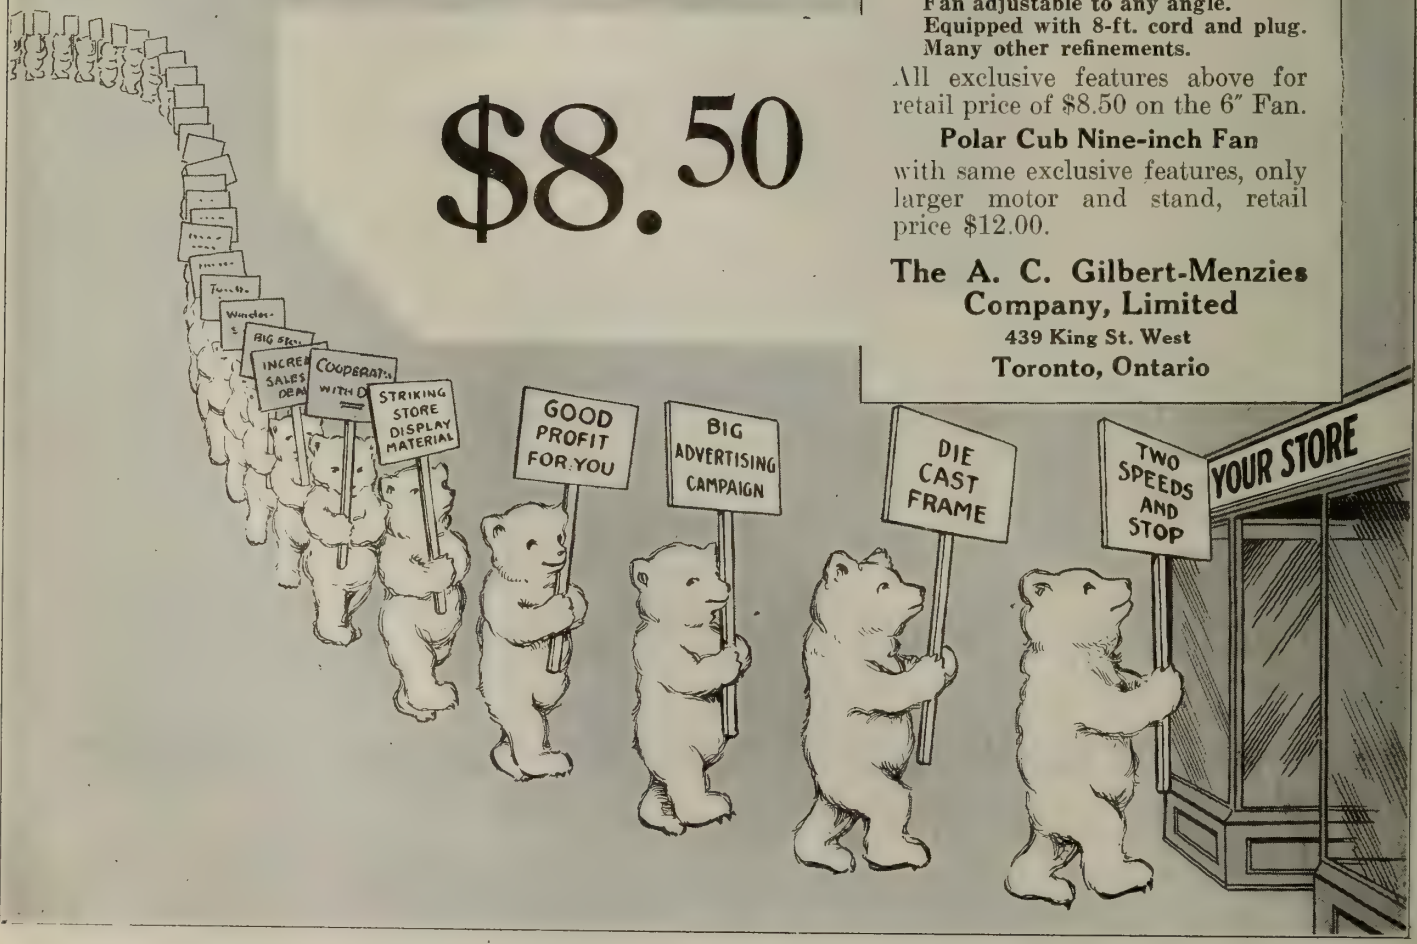
He remembers how, last summer, stores everywhere sold every Polar Cub Electric Fan they had on hand—and were wiring the factory for more. But they couldn't all get them—'twas too late. So while hundreds of thousands were sold, thousands of more sales were lost.

Don't lose those profits this summer.

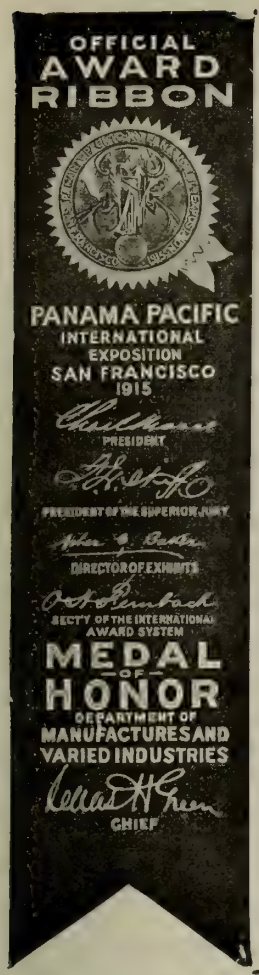
Be prepared for the hot-weather demand. Be prepared to cash in on the big sales-making 1918 Polar Cub advertising campaign. Place your order early. Guard against last-minute delays.

1918 Features:

Motor—Beautifully nickel-plated.
Blades—Black Japan.
Mica filled Commutator.
Two speeds and stop.
Die-cast frame.
Bearings are integral part of die-casting.
Cannot get out of alignment.
Fan adjustable to any angle.
Equipped with 8-ft. cord and plug.
Many other refinements.



All exclusive features above for retail price of $8.50 on the 6" Fan.



Polar Cub Nine-inch Fan

with same exclusive features, only larger motor and stand, retail price $12.00.

Stockdale Lectures for You!

These lectures throb with vitality, solving many problems which confront all lines of business.

Under the following captions one of America's foremost Retail Merchandising Experts gave in a clear, lucid style the why and wherefores of the success and failures in retail stores:

"Many Businesses Wrecked by Details"
"How to Make Figure Facts Earn Profits"
"How to Measure the Value of Turnover"
"How to Get the Information the Customer Wants"

We had these four lectures printed in pamphlet form for distribution among the trade.

Send for your copy TO-DAY. The supply is limited.

153 UNIVERSITY AVENUE, TORONTO

Order Yours Now Be Prepared

Each of the three Freezers, LIGHTNING, GEM or BLIZZARD, has served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible—their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running mate with either the Lightning or Gem. They sell themselves and stay sold! No comebacks or complaints.

This means easy, net profits for you. Your jobber will supply you.

Include the Lightning Ice Chipper. It helps the sale of Freezers.

Stanley Tools

STANLEY
DOWEL AND ROD TURNING MACHINE
NO. 77

A tool that will appeal to Carpenters, Cabinet Makers, Pattern Makers, Furniture Manufacturers and especially to Supervisors and Instructors of Industrial Education, in fact to anyone interested in woodworking.

It will not only cut dowels of varying sizes and lengths to perfect dimensions, but with it one can also form rods of practically any length.

Ready made or stock dowels have a tendency to warp and shrink, making them very unsatisfactory to use where a close fit is desired.

With this machine the workman can cut his dowels when he is ready to use them and furthermore of the same material as the wood being worked.

One cutter head complete for making dowels or rods 3/8 inch in diameter is furnished with each machine.

Additional cutter heads with cutters 1-4, 5-16, 7-16, 1-2, 9-16, 5-8, 11-16 and 3-4 inches can be furnished at slight extra cost.

A workman whose tool equipment includes one of these machines and a Stanley Doweling Jig can make doweled joints with surprising quickness and accuracy. The List Price is $8.50.

A Profitable Tool for you to Carry.

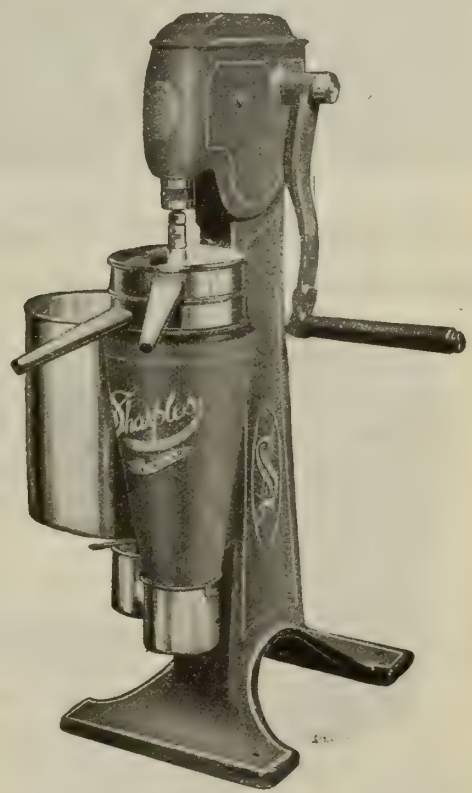
Delivery conditions become more uncertain every day. Transportation congestion and embargoes affect not only shipment of raw materials to the manufacturer, but delivery of finished product to dealers.

BE WELL-STOCKED WITH SHARPLES

To Keep Pace with Demand and Avoid Delivery Delays



BY BEING well-stocked we do not mean that a dealer should overload. That is not the Sharples policy. On the other hand, every dealer should bear in mind that these are *abnormal times.*

Farmers are being urged from all sides to *"save the fats that will help win the war."* High price of butter-fat makes it doubly worth while to save it all in separating.

As there is only *one* separator—the Sharples—that saves all the cream, *skimming clean at any speed,* the Sharples is the one that farmers will want.

Be on the *safe side* by ordering *early* and ordering *adequately.* A Sharples is always a standard investment for the dealer just as it is for the farmer.

SHARPLES
SUCTION-FEED CREAM SEPARATOR

"The Machine of the Hour"

The Sharples has selling points no other separator can even *claim.*

The Sharples suction-feed principle *alone* is a powerful sales advantage for dealers. It absolutely prevents butter-fat waste, no matter who turns a Sharples, and at what speed it is turned. This can be said of *no* other separator.

And, due to the scarcity and unprecedented demand for raw materials, etc., separator prices cannot possibly be lower than they are at present, for even several years after the war is won.

SHARPLES is the most profitable separator contract. EXTRA BONUSES!

Sharples offers the dealer just what he is looking for—a separator with selling points that *convince;* discounts that mean more *profit* for the dealer; protection for the dealer in selling policy—and as an *extra incentive,* a quantity bonus that brings a tidy sum. Order now and take advantage of Spring dating terms—extending payment until May 1st. Write nearest office *today.*

When roofs begin to leak this Spring!

When the snow thaws and the heavy spring rains come there'll be leaky roofs all about you. Turn this circumstance to your advantage by having in stock a supply of Reed's Patent Plastic Asphalt Roof Cement. This is the roof cement that for twenty-five years has stood the test of heat, cold, rain, snow and wind and has never failed to stick where laid. It mends all manner of leaks in slate, metal, gravel and prepared roofs, is effective for pointing around Chimneys, Skylights and Dormer Windows, and for repairing coping stones, gutters and wood and stone work. It is the most useful substance a roofer or plumber can have, and it gives a satisfaction that reflects on the Dealer who sells it.

Reed's Patent Plastic Asphalt Roof Cement can be obtained from all jobbers or direct from the makers. It is put up in 1, 5 and 10 lb. tins, in drums of 125 lbs. and in barrels of 500 lbs. A trial order of the smaller tins will soon demonstrate its stability and value

Geo. W. Reed & Co., Limited, *Manufacturers*, Montreal

WAKYTE M'F'G Co. WAKYTE WINNIPEG CANADA

ANNOUNCEMENT TO THE TRADE

Our new "WAKYTE" models are ready for distribution. Photographs and prices are in the hands of all wholesale hardware travellers, who are now booking orders for fall delivery on "WAKYTE" closets, chemical, barrel trucks, etc. We strongly recommend your placing your order without delay.

The quality of "WAKYTE" goods is not equalled at any price. They not only guarantee you a substantial profit, but enable you to give your customer more value for his money than he can get anywhere else. The 1918 "WAKYTE" products show a decided improvement over anything heretofore offered to the trade.

WAKYTE POWDER CHEMICAL:

To eliminate all loss and annoyance due to defective cans, etc., we are now putting our chemical up in powder form as well as liquid. We recommend your ordering "WAKYTE" POWDER CHEMICAL as it costs less money, goes further, and may be shipped under any weather conditions. It is packed in containers having same capacity as one-gallon cans.

"WAKYTE" BARREL TRUCKS:

You can save yourself considerable time and money by equipping your store with "WAKYTE" BARREL TRUCKS. They are inexpensive and will last practically a life-time. Prices and particulars from your jobber, or direct from us.

Our service this year will be better than ever. By placing your order now you are protected against any advance in prices, and are assured of getting the goods at the specified time to take care of your trade.

For the convenience of our customers, complete stocks of "WAKYTE" goods are carried at Winnipeg, Edmonton, Calgary, Saskatoon, and London, Ont.

The good old dash churn speeded up

The Reliable Patent Dash Churn has taken the tried and true principle of butter-making embodied in the old-fashioned dash churn and adapted it to present-day requirements. It gives the same perfect results in a fraction of the time. A simple, perfect-working mechanism operates the dash at a greater speed than is possible by hand, making a perfect, uniform stroke every time and relieving the operator of all the labor.

The Reliable gives more butter in less time, with less work, less waste, less dirt; is always clean and sweet, always ready for use, and never gets out of order.

Every farmer you can get in touch with will be interested in the "Reliable," no matter what churn he's now using. Make a determined bid for this business. It is very profitable.

The Reliable Churn Company, of Canada

The "Feel" of a Good File

Did you ever watch a really capable mechanic test a file? He has a way of passing a sensitive thumb over its teeth. Instinctively, unfailingly, he thereby determines whether it is fit for use.

This man always chooses "*Famous Five*". He never buys blindly. He can "*feel*" that a "*Famous Five*" is right. He can feel its sharp, keen-cutting teeth, arranged in rows of perfect uniformity. There is no doubt in his mind. He buys "*Famous Five*". He makes sure of satisfaction.

To get this trade and satisfy him specify "*Famous Five*" Files when ordering from your jobbers.

Four Reasons Why You Should Sell BISSELL'S

Carpet Sweepers *and* Vacuum Sweepers

1 For years Bissell Carpet Sweepers have been the standard. To-day the thought of carpet sweepers to the housewife means BISSELL'S. Other makers acknowledge Bissell's right to dominance.

Bissell Vacuum Sweepers likewise are recognized as the best. **They had to be the best.** For Bissell could not dare to put out a product that did not add to their reputation.

2 Bissell advertising is forceful, consistent and selling. It is the work of experts. Men who have been connected with more advertising successes than any other men in the advertising field.

The publications are chosen with care. Every one of them is aimed to reach a definite class of people. Bissell advertising **sells.**

3 But Bissell does not stop here. It offers its dealers a most comprehensive dealer service.

Window cards, electros, newspaper advertisements, letters, booklets and folders are all made a part of this service. Nothing that will help you sell carpet sweepers and that will point you out as a BISSELL dealer is missing.

4 BISSELL margin of profit is liberal. For just as BISSELL demands a fair profit, so does it offer its dealers a fair one.

And BISSELL means more sales and more profits all down the line. For a BISSELL customer is nine times out of ten a customer for other things. It is a trade builder and profit bringing.

Westclox

An Advertised Line

TRADE paper and circular advertisements have made *Westclox* alarms well and favorably known to the trade.

It is now our plan to make *Westclox* alarms just as favorably known to clock users. We intend to talk about *Westclox* as a line in each magazine advertisement we run this year. We shall mention their excellent timekeeping, their accurate ringing, their good looks, their special construction. We shall call attention to the trade mark name *Westclox* on the dial of each clock.

You know the character of Western Clock advertising. You know that through our efforts we shall make the trade mark *Westclox* a guarantee of quality.

This idea will make *Westclox* alarms more profitable for you, by making them easier for you to sell.

You will be interested in watching the development of this feature of our advertising.

The Subject of Salesmanship

Address by Mr. George A. Simpson, Sales Manager, Steel Company of Canada, Ltd., Before Convention of Ontario Retail Hardware and Stove Dealers' Association

EDITOR'S NOTE—An outstanding feature of the hardware convention held at Hamilton last week was the address on "Salesmanship" by Mr. George A. Simpson, sales manager, Steel Company of Canada, Ltd., Hamilton, Canada. Following Mr. Simpson's address, HARDWARE AND METAL'S representatives were approached by many who heard the address, asking if it would not be possible to have the address reprinted in full. A stenographic report having been taken by a member of HARDWARE AND METAL'S editorial staff, we are enabled to reproduce herewith practically the complete address. The address was a rare treat for those who had an opportunity of hearing it, and we feel sure that the reproduction, herewith of the complete address will be appreciated by the entire Canadian hardware trade. On account of Mr. Simpson's broad business experience he possesses rare qualifications for dealing with the subject of "Salesmanship."

MR. CHAIRMAN and Gentlemen,—It is indeed a pleasure to be accorded the privilege of saying a few words to you, especially so when the subject is as important as "Salesmanship."

The subject of Salesmanship is one that has been done to death, and while, in my judgment, it has in a few instances been ably presented, it has in many other instances been so badly abused as to leave a bad taste regarding the profession in general. By some, Salesmanship has been presented as being a form of mysticism, mesmerism, or black art. You, no doubt, have all heard different professional spell-binders discuss this subject under different titles, such as "Get the name on the dotted line," "Put the punch into your business," "Hit him square between the eyes" and such expressions as that, all of which in the mind expressing these thoughts mean Enthusiasm, and this, in their judgment, is all that is necessary to be successful as a seller of goods.

If we analyze the subject, we find that Salesmanship is one of the very highest professions that any well-balanced man, fully understanding the meaning of the term, could aspire to, because if he fully understands the meaning of the term and what is absolutely necessary to be successful in this calling, he must realize that the fundamental basis —the foundation and corner-stone of the entire structure —is Truth.

As to the importance of the profession and its position in the world's progress, I may say that the salesman follows the Flag. He is the one who carries the commercial gospel to the four quarters of the globe, and, realizing this, you can readily see what a preponderating influence he can exert if he fully appreciates and uses it to the limit. And if he is a salesman worthy of the name, the statements he makes will bear fruit and tend to elevate and improve the commercial relation.

Believing that you would be interested in knowing in a general way what steel tonnage is being produced on this continent, out of which will be manufactured the products that must be sold, to a very great extent, through you, I have compiled a few figures which, I feel, will be of interest to you, as they show at a glance the enormous tonnage at present being produced on this continent, which the salesman must sell.

Having these figures in mind and realizing the importance of this enormous production, which must be disposed of profitably if our progress is to be maintained, and taking into consideration the vast changes in business conditions and the terrific demands that have been made during the past three years on producing organizations, the question arises: How about conditions after the war, during the period of reconstruction when the demand for this enormous production has been reduced to normal and such as we do produce will have to be sold? And this question I have answered in a few words under the title of "HUNDRED POINT MEN."

ALL over this great continent, geographically known as the United States and Canada, there are to-day many prosperous industries which were, a few short years ago, facing serious financial embarrassment and failure. These industries in many instances had been grossly mismanaged, while in others lack of capital and kindred ills contributed to their condition; but it matters not now what was the cause, it is results and not explanations we are interested in, as results count and the fact is, these conditions did exist. Then came the war, and as if by magic all was changed; from adversity to prosperity was a short shift, and even industries that were wavering on the ragged edge of failure took on a new lease of life and assumed a prosperous air. The stupendous demand for products of every description was, and is, such that extension of plant and increased production became the order of the day, and under these unprecedented conditions business to-day is pushing the man who, under normal conditions, could not push business. The whole structure—agricultural, industrial, commercial and economic—has been undergoing the most drastic change the world has ever known. But how about the man? And how about business, with its increased facilities for production and its corresponding overhead expense, when this demand ceases and competition sets in? 'Tis said the leopard changeth not his spots, and this in a measure applies to business management. The test of fitness will come when the commercial war begins and a new order of things exists, to which we must adjust ourselves. A tremendous momentum has been started and maintained on business we did not seek, and the wheels of industry have been greased with prices exceeding our wildest dreams. We have been floated into position on a tidal wave of business far and

above the jagged rocks of competition, which awaits us when the tide recedes. What then?—is a question worthy of sincere consideration NOW. To successfully cope with the new conditions and maintain our progress will create a demand for Hundred Point Men. Men who are well balanced—men who are not one-sided in their development, whose energies do not seep into narrow channels, while the main streams of ability are allowed to run dry—men who are broad, who do not take half views of things—men whose education has been received in the school of hard knocks, whose capital is knowledge acquired through experience, who mix common sense with theory and do not permit the technical to distort their practical viewpoint of everyday life—men who have studied men and mastered conditions, whose love of humanity knows no bounds, who despise pretence and worship a good name—men who can decide and whose decisions are intelligent and just, who see education and development, discipline and character in their occupation — men who can honorably and persistently produce results. Such men as these are the executives of the future — HUNDRED POINT MEN.

WHILE the thoughts expressed apply more especially to executives and managers, they are, nevertheless, applicable to salesmen; in fact, they are applicable to everyone in any walk of life—as we are all salesmen with services to sell—because of the fact that conditions are so changed that they demand the application of the hundred point of intelligence in every capacity. In other words, slip-shod salesmanship will no longer be tolerated than slip-shod management, therefore, it becomes necessary for a salesman to study the fundamental principles underlying his profession, and some of these I will enumerate.

GEORGE A. SIMPSON

Sales Manager, Steel Company of Canada, Hamilton, who addressed the members of the Ontario Retail Hardware and Stove Dealers' Association, in convention at Hamilton, Ont., on "Salesmanship."

The abnormal conditions produced by the war also created abnormal conditions in every line of industry and, in consequence, the producers of all kinds of material, especially iron and steel products, have increased their output to an enormous and alarming extent. This does not only apply to Canada, but also to the United States. Every blast furnace on the continent to-day is in operation, and to take care of the increased tonnage of finished product that this abnormal condition demands, our producing capacity has been largely increased; consequently when conditions again assume their proper shape we will be confronted with a competitive condition such as the world has never seen before and this condition will, in a sense, bring into effect the law of the survival of the fittest. Competition, in my judgment, will be fierce and, in consequence, the burden will fall on the shoulders of the salesmen.

After the war the business that expects to succeed will have to be safeguarded by active, alert, attentive, vigilant men—men of big vision—men who realize that while there can be only one captain of the ship, there is captain-material in the crew and as such they must be recognized. The order of the day will be systematic organization, so adjusted as to permit of aggressive, intensified action, all moving in harmony with a determined purpose toward a definite end. The day of the "one man business" is gone, just as sure as the day of intoxicated salesmen has passed into the discard. Business to-day is too big for any one man to personally direct, and where any man aspires to be "It" in an organization, that business will only expand or succeed to the extent of his vision and, in consequence, if he persists the progress will be arrested in proportion be "IT" in an organization, that business will only expand business will be retarded. Therefore, the burden of successful business must fall on many shoulders and the salesman, worthy of the name, will be recognized and in great demand.

It will not be a question of production, as it has been during the past two years; it will be a question of selling the production we are able to produce, and this, in my judgment, is going to be a very serious problem. With this condition confronting us, the thought uppermost in my mind is, how we shall best prepare to successfully cope with it, and I have concluded that considerable work and preparation is necessary. In past years we have heard a great deal about "getting the name on the dotted line," which, of course, we all know, means the closing of a contract of sale. While this expression has been made in the spirit of enthusiasm—all of which I recognize as a determining factor in salesmanship, as there has been nothing of any consequence accomplished without enthusiasm—yet. nevertheless, the advice to get the name on the dotted line is merely an expression and an empty phrasing of words, unless accompanied by some common-sense suggestion as to how to prepare ourselves to bring about this much-desired objective. "Getting the name on the dotted line" is usually the final operation: in other words,—it is merely the approval with our signature of the transaction which has been concluded and, in consequence, the importance does not lie in getting the name on the dotted line as much as it does in the manner in which we conduct the transaction, as you will readily see from this argument that the name would never be put on the dotted line unless the transaction had been conducted in a thorough manner and to a successful end. In other words—it should not be necessary for a salesman to urge, or use any mysterious tactics or enthusiastic efforts to get the buyer's name on the dotted line; but, to the contrary, he should so present his argument and create in the mind of the buyer such an intent desire to purchase that which the

salesman has to sell that the buyer would really be more anxious to get his name on the dotted line than the salesman would be to have him put it there. It seems to me that salesmen should fully appreciate the fact that it takes two to make a transaction and that it is just as necessary for the buyer to purchase the material the salesman has to sell as it is for the salesman to sell it; in fact, he could not run his business without it.

Commerce is no longer exploitation—it is human service; and no business concern or body of men can succeed or exist permanently whose efforts do not meet a human need and add to human happiness, as we succeed only through the good-will and good wish of the people we serve. "Quality" and "Service" to-day correspond with the word "Sterling" on silver and happiness is the true end and aim of life, the result of all that is truly right and sane. Therefore, it is not to urge your getting the name on the dotted line that I propose to touch on, but to try and put forward what, in my judgment, is necessary for a salesman to understand in order to carry the transaction to a successful issue.

THE subject of "Salesmanship" is one that has been discussed from all angles. We have heard a hundred different views from a hundred different people, and I am free to admit that but very few of them analyze the subject to the point of rendering a service to the salesman who hears the discourse. In other words—they deal with the subject in the abstract, rather than in the concrete. In my judgment, what a salesman ought to know and understand should relate to the underlying principles pertaining to salesmanship, that is, he should be familiar with the principles which would enable him to take care of all the preliminaries necessary to bringing the transaction up to the point of getting the name on the dotted line. The question of selling is one that requires a great deal of thought and for any man to become proficient in this science it is as necessary for him to study all the elements that enter into his success as it is for a surgeon, doctor or lawyer, or any other professional man, to make a study of his profession before he becomes recognized.

We have heard that salesmen are born, and "a born salesman" is a common expression. In my judgment, this is wrong, and I maintain that any young man, endowed with common-sense, fair personality, good health and the love of work fairly pronounced, can, with the right amount of study, become a successful salesman. The truth, as always, lies between the two extremes. There is no salesman so born to his duties that he can dispense with a knowledge of the goods he sells, or so independent of experience that practice teaches him nothing he did not know. You should know what you want to do, then hold the thought firmly and do every day what should be done and every sunset will see you that much nearer to the goal. Now the question is—What should he study and how can he prepare himself.

There are certain laws that must be obeyed and certain conditions that must be respected. These conditions, principles and laws do not pertain to the impossible or the mysterious, neither are they beyond the reach of the man who is sincere and who is determined to succeed; but they must be taken into account and reckoned with before we can lay claim to being successful salesmen.

I maintain that the real salesman is the man who is continually sowing seeds that will ripen into profits on future sales,—the man who is building up, through his personality, honesty and fair dealing, a following who believe in him and respect him—one who is forging a chain of satisfied customers over the entire territory he covers, and thereby creating an influence that not only means other sales, but more links in his chain. Such a man is an asset to the interests he represents and his services will always be in demand.

Salesmanship is that power resulting from a combination of certain qualities and faculties, mental, spiritual and physical, which enables him who possesses it to successfully influence a high average of those he interviews to purchase, **at a profit**, mark you, that which he has to sell.

I will touch briefly on some of the essential qualifications that are, in my judgment, necessary for the salesman to understand. Take for instance,

THE SCIENCE OF THOUGHT

THOUGHT is not, as is often supposed, a mere indefinite abstraction, or something of a like nature. It is on the contrary, a vital force, the most vital and irresistible force there is in the universe.

In our laboratory experiments we are demonstrating the great fact that thoughts are forces. They have form, and quality, and substance, and power, and, furthermore, we are finding out that there is what we call "science of thought." Through the operation of our thought forces we have creative power. The spoken word is nothing more nor less than the outward expression of the workings of these interior forces. The spoken word is, in a sense, the means whereby the thought forces are focussed and directed along any particular line. This is concentration of thought, and there is no question in my mind that if we concentrate and then apply the expression of that thought in well-spoken words we will accomplish our purpose. Neither is there any question in my mind that if a salesman goes after his prospects with a determination to get the order, and then concentrates his thought on his prospect and the ends he wishes to accomplish, he will, if he expresses himself right, land the order.

Thoughts are forces: "Like builds like, and like attracts like." If we govern our thinking, we determine our life.

The law of attraction between mental and material things is wonderfully exact in its workings. People ruled by the mood of gloom attract to them gloomy things. People always discouraged and despondent do not succeed in anything, unless it is in making other people unhappy. They live only by burdening others.

The hopeful, confident and cheerful attract the elements of success, and they become a power and an influence for good in any community. In a salesman a disposition of this kind is invaluable.

This may be new sales gospel, but it has been proven to the satisfaction of all real students of business that the most successful man is he who is sure of himself. He who is optimistic and cheerful impresses the world with the fact that he is supremely confident always; and the world of business has every confidence in the man who has confidence in himself. If our outlook is optimistic and our confidence strong, it naturally follows that we inject enthusiasm and clear judgment into our work, and therefore we have a tremendous advantage over those who are inclined to be pessimistic and nervously fearful that their judgment may be wrong, or those who lack confidence that comes with a right condition of mind, which counts so much for success in a salesman's career. In our mental lives we can either keep hold of the rudder and steer the course to success, or we can fail to do this and drift on to the rocks of failure.

There is in connection with the thought forces, what we may term the drawing power of mind, and the great operating law in this connection is identical with that great law of the universe, that "like attracts like." We are continually attracting to us forces and conditions most akin to those of our own thoughts.

THE LAW OF ATTRACTION

THE law of attraction works universally on every plane of action, especially in the field of sales, because no one will buy from a man he does not like unless he has to; therefore, it is necessary and essential that every salesman study the law of attraction.

If we desire one thing and expect another, we are like a house divided against itself—bound to fall. We must first determine resolutely to expect only what we desire; we will then attract only what we wish for. Carry any kind of thought about with you and as long as you retain it you will unceasingly attract to yourself, knowingly or

The accompanying group photo was taken at the conclusion of a most interesting trip through the mammoth plant of the Association. During the convention an invitation was extended by Mr. George A. Simpson, sales manager of the Steel for conveying the party to and from the plant. Under Mr. Simpson's direction the guests were shown over a large portion realizes the immensity of the great plant at Hamilton. Great interest was evinced in the rolling of bars, and also in the

unknowingly, exactly and only what corresponds to your dominant quality of thought. Thoughts are our private property and we can regulate them to suit our taste entirely by steadily recognizing our ability to do so. This being so, why not study and apply our thought to reinforce our power of attraction and draw closer to us those with whom we do business. It is possible, and I can assure you it will lessen your work and increase your sales.

If you do not feel kindly towards a buyer, change your mental attitude. In other words—change your thought and make an effort to attract him towards you; and just as sure as you do, his manner will change and your orders increase because the law of attraction is absolute. And the salesman who is always cherful, hopeful, confident, courageous and determined on his set purpose will, if he keeps to that purpose, attract to him powers favorable to that purpose.

PERSONALITY

ANOTHER vital element is personality. There is something about one's personality that cannot be explained; it cannot be photographed, neither can the painter or sculptor reproduce it, yet it is one of the most important factors in our success or failure in life. It is this indescribable quality, which some persons have in remarkable degree, that holds an audience spell-bound and makes people applaud beyond the bounds of enthusiasm. Charm of personality is a divine gift that will sway the strongest characters. We are unconsciously influenced by people who possess this magnetic power. Of course, that rare charm of manner, which captivates all who come within the sphere of its influence, and that strong personality which inclines all hearts toward its fortunate possessor, are largely natural gifts. But we find that the man who practises unselfishness, who is generously interested in the welfare of others, who feels it a privilege to do a fellow-creature a kindness—even though polished manners and a gracious presence may be conspicuous by their absence—will be an elevating influence wherever he goes. He will bring encouragement to and uplift every life that touches his. He will be trusted by all who come in contact with him. This type of personality we may all cultivate if we will. Personality is intangible; this mysterious something which we sometimes call "individuality" is often more powerful than ability that can be measured, or qualities that can be rated. And while it is—like poetry, music or art—a gift of Nature, it can be acquired and cultivated to a very great extent. And in this connection it is well to cultivate a mild, gentle and sympathetic voice and a sure way to cultivate it is to be mild, gentle and sympathetic yourself. The voice is the sounding board, the index of the soul. It is through the voice we give expression to our thought, therefore, fix your mind on the thought and the voice will follow; and if it is filled with truth, it will vibrate with sincerity, echo with sympathy and so convince your hearers that thoughts in their mind contrary to your own are impossible.

It is the man who acts his thought and thinks little of the act who succeeds. Because success is the most natural thing in the world, there is no secret to it. The man who does not succeed fails because he has placed himself in opposition to the laws of the universe, which is progress. The pathway to success is in serving humanity. By no other means is it possible. Just live your life—work hard—and don't explain. Mind your own business and give others a chance to mind theirs and you can depend upon it great men will appreciate you for this very thing; and while I am not sure that absolute, perfect justice comes to everybody in this world, I do know that a very good way to get a fair slice of justice is not to think of it, or be too anxious about getting it. The great rewards gravitate to the man who fits himself to receive them. The man who does his work so well that he needs no supervision has already succeeded, and the acknowledgment of his success is sure to follow. The work of the world must be done and civilization is simply a search for men who can do it.

Tact is also a very important factor; next to a fine manner, perhaps the most important. One should know what to do and be able to do the right thing at the proper time. Observation, good judgment and common sense are indispensable to those trying to acquire the power of personality. Referring to observation, Herbert Spencer says: "An exhaustive observation is an element of all great success." Therefore, there is no position in life where a trained eye and the faculty of observation cannot be made a great success asset. The efficient salesman is always growing; he is always accumulating knowledge of every kind. He does not merely look with his eyes—he SEES with them; and he not only uses the optic nerve, but he uses his mind. He keeps his mind open to all that is new and helpful. Careless, indifferent observation does not go back of the eye. If the mind is not focused, that which we see is not clear cut; we do not carry it with force and distinctness to the brain, and, therefore, we are not able to draw accurate conclusions. The faculty of observation is particularly

Steel Company of Canada, Ltd., Hamilton, Can., and shows members of the Ontario Retail Hardware and Stove Dealers' Company of Canada, Ltd., to convention delegates to visit the big plant. A special railway car was provided by the company of the plant, witnessing various processes from the ore to the finished products. It is only on a trip of this kind that one new sheet mill which is now in operation.

susceptible of cultivation and is capable of becoming a mighty power and a big asset in the success of a salesman. No matter where you go, study the situation thoroughly; observe, and store your observation away in your mind—some day it will serve you well.

Good taste is also one of the elements of personal charm, as you cannot offend the tastes of others without hurting their sensibilities. The power to please is a tremendous asset. What can be more valuable than a personality which always attracts? It is not only valuable to a salesman, but to every one in every field of life. The ability to bring the best that is in you to the man you are trying to reach, to make a good impression at the first meeting, to approach a prospective customer as though you had known him for years—without offending his taste, without raising the least prejudice, but getting his attention and good-will—is a great accomplishment.

There is charm in personality from which it is hard to get away. It is difficult to snub the man who possesses it. There is something about him that arrests our prejudice and no matter how busy we may be, or how much we dislike to be interrupted, we rarely turn away a man with a pleasing personality. We must give much in order to get much; the more we radiate the more generous we are, and the more we give ourselves to others, the more we get back. The current will not set toward you until it goes out from you. What you get from others is the reflex of the currents you give out. The more generously you give, the more you get in return. In other words—as you pour out your personality, born of courtesy and kindness and the other character-forming virtues, so do you inspire respect and confidence, and invite from others a return of that which you give. Courtesy and consideration in every walk of life is now the accepted rule. No strong man lowers himself by giving somebody a lift, no matter who that somebody is. It may be an ignorant foreigner, unversed in our ways and language; or it may be an old man or woman, a cripple or a child—it matters not—and no time is lost, for the more people you rightly direct and the more intelligence and consideration you rightly lend, the more valuable will be your life. Many salesmen fail because they do not see the importance of being kind and courteous. Kindness, consideration and courtesy to everybody always pays; and besides, it is a pleasure to be kind. It increases our store of happiness. I have seen salesmen lose important positions and their reputations—which are more important than position—through their lack of courtesy to men to whom they did not think it worth while to be kind. Beauty of character, charm of manner, attractiveness and power of expression, blended with courtesy, consideration and kindness, will open the door to any proposition, and our sincerity of purpose will clear the path of its many obstructions.

HONESTY AND TRUTH

HONESTY and truth travel hand in hand, they are two very important factors in successful salesmanship; yet there are thousands of so-called salesmen who are daily practising deceit, thinking and believing they are putting it over. What fools! Temporary success may be gained that way, some sales may be made, but permanent and lasting success is not built on that sort of foundation.

SENTIMENT

THERE is sentiment in business, and a whole lot more than we realize; when there is none, I want to quit doing business. For a salesman I know of no other quality more helpful to his success than sentiment, if he will use tact to reach the sentimental side of his prospect. I do not mean by that that he necessarily start an investigation or search for sentiment, for if he did that would be calculation on his part and even if he discovered it he could not make use of it, as sentiment must be discovered by sentiment to be of mutual advantage in preparing common ground. I have had scores of instances in my experience that have proven beyond doubt the truth of my contention.

Some years ago I was selected by the interests I was associated with to go through the South for them to establish three or four manufacturing companies, to manufacture finished products from sheet iron, sheet steel, etc. I was to promote these companies along the lines of home industry for the South. They were to be Southern companies, financed and operated by Southerners. I called on the Boards of Trade and on different prominent men in the cities and towns I visited and right away everybody fell into line with the idea of home industries. In one of the cities I visited everybody was enthusiastic. They all wanted to see a manufacturing plant in their community. Therefore I went round to raise from one hundred and fifty to two hundred thousand dollars to start the concern.

At once there was a difference. Everybody liked the idea of having the industry there, but no one was ready to put up any money for it, they all wanted the other fellow to do it. There was one man in particular they wanted me to call on. Almost everybody I spoke to asked the

same question: "Have you called on Mr. Blank?" Before long I discovered who this Mr. Blank was whom they were all so anxious for me to see. He was President Blank of the leading bank in that State and when first I saw him he looked very much to me like the familiar caricature you expect of a crusty old banker, all money-bags, with no sentiment in his make-up. He received me with courtesy and heard what I had to say—he was a very fine old fellow, as I soon found out, but he would do nothing about my proposition until he had examined the papers I had prepared, showing facts and figures. These papers he had me leave with him, and I went away. But before leaving him I noticed something that attracted me; something that might be a clue to sentiment. He wore in the lapel of his coat a very sweet little nosegay of flowers. I made three calls on him subsequently and the flowers were always there, fresh and sweet, beautiful and charming. One day I decided to ask him about the little nosegay, and frankly, quite apart from the business altogether, I did ask him. He held out his hand as I spoke about the flowers, as I was just leaving and I could feel as our hands clasped that I had touched a sympathetic chord. "Mr. Simpson," he said, "you ask about that little nosegay. I have worn a flower like that in my coat even since the first one was put there by my sweetheart, who is still my sweetheart after forty years of married life." And he told me how, each morning, it was put in his buttonhole by the same hand, or if she were not there to do it, it was placed there by his daughter. We both stood and looked at one another, and all I said to him was "beautiful sentiment." And then we sat down and talked about flowers—not about the business in hand—and by and by I got up to leave him. And just as we were parting, what do you think he said? "By the way, Mr. Simpson, I am very much impressed with that proposition of yours. What amount do you think I ought to subscribe for?" He left it to me to name the amount. I had secured his confidence to that extent through the touch of sympathetic sentiment and when it came to putting his name down and I made a suggestion of five or eight thousand dollars, he said: "Put me down for ten thousand, and, by the way, put my brother on the list. He ought to go down for something in this company. Put him down for five thousand. I promise you he will approve of it when you call on him with my suggestion." And after that, gentlemen, all that Mr. Simpson had to do down there was just go round with a list and get the names of those who were eager to get on it for various amounts; because they found that the names of the two Mr. Blanks headed the list and they had profound confidence in their judgment.

And if any of you gentlemen should ever visit the South and go to this city, which I shall be pleased to name, you will find there the Metal Products Co. running to-day, a very successful institution and that concern came into being largely through a little nosegay in the buttonhole of a banker's coat, for those little flowers were the key that opened the door of sentiment that aided us in reaching common ground.

That incident, gentlemen, shows what sentiment means to a salesman and how essential it is that we train our minds along certain lines. I grant you that some men with whom you may have to do business are cold-blooded business men, and if a man is a cold-blooded business man you must meet him on that ground until sentiment is reached

Current Events in Photograph—No. 9

THE WORLD'S SEARCH FOR FOOD

THE urgent demand of the world for food has been the cause of introducing many new dishes to the menu. Among these are whale steaks, that were recently served at a great New York banquet, and pronounced by the guests to be delicious. The photo shows whalemen on the Atlantic Coast cutting the choice parts from many whale carcases. It is expected that this new source of food may help the poor man to cheaper food, and may be a means of conserving food for the needy in Europe.

and confidence established. If you recognize and practise these laws of thought and attraction, then as a salesman you will have no trouble in making sales. In my own experience I have found it so—and I am not saying this boastfully—that as a result of respecting these principles, selling is to me a delightful visit to the man to whom I sell and my entire interview is very seldom taken up on the subject of business. We converge on general lines of mutual interest; it may be about flowers or something in which we both have common interest and I usually leave with a good-sized order. Often I am asked to help make up the order.

And further, my experience proves that the average buyer or business man is very well informed on many subjects, that he has his sentiment and sympathies and often he is an interesting conversationalist. If you can reach him through these channels you will in all probability establish confidence and respect. After that, getting his business is an easy matter, because he feels you will, wherever possible, safeguard his interests and this you must do to the limit.

Finally, the thought I wish to convey is, that no investment will give greater returns than cultivating your better self, and thereby developing that indefinable something that leads to success. There is nothing that pays so well as training our minds and thoughts along the lines of the beautiful and true. It matters not how well-versed we are in the material things of life, or how well we understand the lines we have to sell; we may be experts pertaining to technique or detail in connection with iron and steel products—or any other articles of commerce for that matter—but if we are not in harmony with Nature and Nature's order of things, we cannot make the success of our lives that we otherwise would. Being in harmony with Nature, brings us into harmony with all about us and above all it brings us into harmony with ourselves, and when this is so, and the physical is subordinated and ruled by the mental, life becomes full and complete.

I fully realize I am painting an ideal picture, although not an impossible one, and while we may not rise to the height of this ideal, we can, by following, it at least go part of the way, and this part, no matter how small, will take the place of some discordant element, which would retard our success. We should implant firmly in our mind the successful man we wish to be and so will we become, not measured by our bank account, but by our fund of happiness and our good name, for it is the vision we hold in our mind—the ideal that is enthroned in our hearts—that we build our lives by. This we will become. It is the beauty of our thought, the quality of our minds and ideals that make the man.

Some Views on the Convention

Retailers, Jobbers and Manufacturers All Express Approval of Program Followed—Some Suggestions Offered—Planning For Next Year Now is Advocated

IN soliciting views from retailers, jobbers and manufacturers as to the success or otherwise of the convention of the Ontario Retail Hardware and Stove Dealers' Association held in Hamilton last week, HARDWARE AND METAL gathered that the convention was thought to be a decided success. The program was along the lines which should prove of the most benefit to the retail hardware men, and the consensus of opinion seemed to be that it was a great improvement over former years.

* * *

One manufacturer who attended all the open meetings was very enthusiastic over the convention, and stated that he considered it a great improvement over former ones which he had attended. "I would think," he stated to HARDWARE AND METAL, "that it was up to the officers of the association to get busy now and plan for next year. The suggestion was made that merchants should endeavor to arrange their work so that one or more of their clerks would be able to attend, and I consider this most important. The program this year was worthy a far better attendance, and by pointing out to those merchants not there the value of the meetings, greater interest would be manifest, and retailers would feel that they could not afford to stay away nor leave their clerks behind.

"I might mention the morning session at which so many manufacturers spoke on existing conditions re raw material, transportation difficulties, etc., etc. These should create a better feeling towards the manufacturer when the retailer realizes that he has his problems to contend with in turning out his product. But even more than that, it will give the retailer an insight into conditions as they are, and I know from our own experience that not one of the speakers exaggerated matters whatever. Furthermore, the retailer should know these things, for it enables him to gauge his buying to better advantage and gives him an outlook broader than the confines of his own hardware store. The retailer is the loser absolutely by not attending a convention such as the one just past. There was real information given out there which every merchant should have.

"Take the address given by Mr. Kirkwood. I don't suppose I should single him out particularly, but his subject dealing with the everyday problems of the merchant on figuring costs and determining profits was one of great moment, and was worthy the cost of the trip in itself. As a matter of fact I told past president McGregor that I would go to Detroit, if necessary, to hear such a man. Every retail merchant, no matter how good a system he has in conducting his business, would benefit from such a talk. It was a real education to many, I know, and by securing men of this type to address the convention, a better association can be and will be built up."

* * *

"The information given out by the manufacturers at the morning session I attended on Wednesday was quite in accordance with conditions as they really are," stated one jobber, when asked by HARDWARE AND METAL about the convention. "That session was the only one I was able to attend, but most certainly it struck me that this information was most valuable to the retail merchant. We have shipments of goods which have been in transit for months, and our efforts to trace are of little avail, so it will be seen that the transportation situation must be considered as serious, and bound to play a most important part.

"The theory has been advanced that manufacturers in addressing a meeting of retailers will play up their own product to some extent. However, I think every manufacturer who spoke tried to represent his class of trade fairly, and no attempt was made to advertise his own particular goods. This attitude is quite right on the part of the manufacturer and the retailer should bear in mind that these men spoke as representatives of all the manufacturers in their particular lines."

* * *

"There should be a decided effort made to secure the city men as members of the association," stated one retailer in Toronto who attended the convention. "Those men who failed to attend certainly missed something worth while, and I would say to all the hardwaremen in the city that they should join and bring their problems to the convention. I might go further and say that I believe a local organization of the retail hardwaremen would be a good thing, for in this way we could discuss our problems and bring them to the convention in such a shape that they could be dealt with intelligently. More open discussion of our problems must result beneficially and every merchant should make it a point to attend sessions devoted to these. Let him bring a full list of questions of the difficulties he is encountering and to which he is seeking a solution. The get-together spirit is a mighty good thing.

(Continued on page 40.)

EDITORIAL COMMENT

DAYLIGHT SAVING GOOD FOR CANADA

ONCE again the daylight saving question is engaging the attention of the people, and it is interesting to note that the Governments of Canada and the United States are negotiating in regard to this system.

The bill before Congress, which has passed the Senate and has been favorably reported to the House, provides that the law shall be effective from the first Sunday in March until the last Sunday in October. If the scheme is adopted in the United States it is almost sure to follow in Canada, and there is much to be said in its favor.

There have been instances where daylight saving has been tried and the results proved unsatisfactory. This was not so much against the principle of the scheme in general as against the impossibility of individual communities meeting with a due measure of success. Were the daylight saving scheme universal, were every town, city, province on the same basis, a very large proportion of the present opposition would vanish.

To the hardwareman the plea for greater production could be capitalized with the extra hour of daylight, in increased sales of garden tools. The town and city lot is going to be developed to an even greater extent this year than was evident last. Recreation does not necessarily mean baseball, golf or football, this can be supplied with rake and hoe in the backyard to the profit of the individual in health and a saving in his living expenses.

The scheme was tried with great success in Great Britain last year, and their experience over there has been so satisfactory that no opposition developed in renewing this year. It is more than likely that Canada will give it a trial in conjunction with the United States, and the uniformity thus secured will undoubtedly prove a factor in the success of the measure.

IRON AND STEEL IMPROVED

THE situation in the iron and steel trade has improved on account of the more favorable weather now prevailing, and a more optimistic feeling prevails in the market. Although some cold weather may still be expected, the worst part of the winter has passed, and it is hoped that the production of iron and steel will begin to show steady and continuous increase. Traffic conditions are easier, and there has been an increase in volume of freight moved from the border, thus relieving the shortage of fuel to some extent. The scarcity of coke, however, is due principally to the car shortage, and it will likely be some considerable time before conditions in this respect are greatly improved, owing to the difficulty in obtaining cars. Car supplies at the ovens this week have improved. While shipments this week will show an improvement over those of last week, the movements will be below normal requirements.

The bulk of the business in steel continues to be for war orders, although there has been some improvement recently in demand from concerns not engaged on war contracts. Canadian steel plants are supplying considerable of this class of material, and deliveries are fairly good considering prevailing conditions. The new regulations now in force in the United States have given the American Government more control over the exportation of steel, and consequently it is improbable that much material will come in except in connection with war contracts. Available supplies of steel in the States for Canadian consumers have for some time been restricted on account of the serious decline in production. Conditions, however, have recently improved and a heavier tonnage is now obtainable.

BINDER TWINE PRICES UNSETTLED

CONSIDERABLE anxiety is being felt over the delayed action of the Food Administration in Washington in determining prices on binder twine for next season. It is felt that a great deal of time is being expended in conferences over prices of raw materials and the question arises as to whether production is being speeded up to requirements.

There is no question of doubt but that every effort is being exerted by the Department of Agriculture to get the farmers to plant every available acre. This is no less true in Canada than in the United States and there is no question of doubt but that when the grain is ripe that binder twine will be required and any shortage of this commodity is going to be disastrous. It should be possible for the governments of the two countries to get together, for Canada depends in a large measure on the United States for raw materials, and action should be taken at once to insure adequate supplies of this commodity.

Steel Shortage Being Felt

Relief Hoped For by Establishing Plants in B.C. and Alaska—Canadian Trade Preference

WASHINGTON.—The U. S. is facing a shortage in steel. Officials of the Government responsible for the production of the war material necessary to win the war are to-day undeniably worried over the prospect of a proper steel supply to insure the carrying on of the war. The threatening shortage is caused by two factors largely—the problem of transportation and labor. According to officials here, the transportation problem is causing many steel mills to run on short time because they are unable to secure either coal or the pig iron necessary. On the other hand, the finished product is often stacked in their storehouses for weeks at a time because of a lack of cars to carry it away, and when the storehouses become filled and all available storage space occupied it becomes necessary to curtail production. This has affected an already short labor supply. Because many steel mills are forced to close or work on short time labor is turning to other lines of industry, according to the reports received by officials here.

Word has been received here that efforts will be made to relieve this situation by the establishment of a string of steel mills on the Pacific Coast. A syndicate of Pacific Coast manufacturers is being formed, and it is understood that several plants are planned for British Columbia and Alaska.

Labor Problem Improving

The labor situation in the shipping industry in the United States is considerably relieved. Strikers who left their work last week and threatened a tie-up of the industry along the entire Atlantic Coast have for the most part returned to their work and the matter of wages has been left largely to adjustment. Work has been resumed in all shipyards and the work of shipbuilding is progressing now on schedule, and officials declare that early spring will see the work so well organized that the future will be far brighter than it has been at any time for the past few months.

Federal investigators of the Department of Justice are at present engaged in securing evidence concerning the building of the Hog Island shipyards with a view to determining whether the Government has grounds for civil or criminal action on charges of reckless expenditure of Government funds. The Senate Commerce Committee, which started the investigation of the Hog Island yard, and the American International Corporation, the builders, went to the yard on Monday and made a personal investigation of conditions.

Canadian Trade Preference

The War Trade Board has issued a blanket license for all imports from the United States to Canada, as it was predicted in this letter recently. Despite the embargo upon all imports laid last week by the President of the United States in order to conserve the shipping space of the nation, Canadian manufacturers will be allowed to import their products into the United States without applying for an individual license to import.

The United States Senate has passed the Railroad Bill, which provides for the Federal control of all American railroads until eighteen months after the end of the war. The bill as passed by the Senate is substantially the bill prepared by the Administration, with the exception of the time limit placed upon Federal control and the limitation of the power of the President to make rates. An amendment has also been added to the bill, which provides that the Government must take over all short line railroads. It is expected that the House will act accordingly.

Industries in the United States, which have been pressed financially since the outbreak of the war, are to be afforded relief by the Government. Secretary McAdoo's War Finance Corporation will be enacted in the laws within a week, and the Government will then be in a position to make direct loans to railroads, public utilities, and industries which are necessary to the conduct of the war. With these broad powers the Government is now in a position to finance any industry, necessary to the war, which has been unable to weather the financial strain.

Contractors' Identity

American industry has been the gainer in an order issued by Secretary of War Baker this week instructing all purchasing agents of the army to make public the names of all contract holders. This point has long been an issue between the industrial men of the country and the War Department. Industrial leaders claim that unless they know to whom contracts are awarded they are laid liable to unfairness on the part of officials. As yet no order has gone forth from Secretary Baker for a general call for bids for supplies, however. This is another point which business men are striving to make.

The fuel situation in the United States is such now that Federal Fuel Administrator Garfield has allowed predictions that a reduction in prices generally is soon to be made. No official announcement of this has been made, but it is understood that a draft of proposed new prices is now before Dr. Garfield. The shortage which was created by a car shortage is about over. Production is still short, however, and particularly in bituminous coal.

Crop Precautions

An embargo on corn to the Dominion of Canada has been laid by the United States. This has been caused by the general shortage of corn seed in the United States, and it is hoped that it will preserve enough so that the crop for next season will not be endangered.

Increased traffic rates, particularly passenger rates, by the Railroad Administration is now expected. It is understood that rates on passenger fares and freight on non-essential classes will be raised in order that room may be made for necessary freight.

CHANGE SELLING TERMS

Beatty Bros., Ltd., Fergus, Ont., have just issued a new price list to apply on their new catalogue, in which they have changed their terms to 5 per cent. cash with order, 2 per cent. 15 days, or net 60 days. The 2 per cent. discount is now given at 15 days instead of 30 days as formerly.

A year ago last August this firm adopted the 5 per cent. cash with order, and in outlining how successful this plan had been M. J. Beatty says in part: "Our aim in shortening our terms and in giving the extra discount for cash with order was to increase the rapidity of our turnover and reduce the amount outstanding on our ledgers. Our business was increasing at a tremendous rate, and we needed increased capital. It worked out even better than we had anticipated. Although our business increased during the year 60 per cent. over the previous year, the amount outstanding on our books a year after we had adopted these terms was only 5 per cent. greater than the year previous. Had we not adopted these shorter terms it would have been impossible for us to have financed the large increase we have made in our business.

"About 25 per cent. of our business was done on the 5 per cent. cash with order basis. We only allow this 5 per cent. discount when the cheque or cash actually accompanies the order. We will not take an order C.O.D. and allow this discount, nor when draft is attached to bill of lading. The basis is practically the same as adopted by the mail order houses and one of our aims in giving this cash discount is to give our dealers a price at which they can compete with the mail order houses.

"The tendency everywhere for shorter terms and more rapid turnover is bound to improve business methods and lower costs."

FOUND IN BARREL

The Jefferson Glass Co., Follansbee, W Virginia, are now making use of a unique folder as an enclosure in sending out all of their invoices. It is gotten out in the form of a barrel and carries this note: "It was found in the barrel later." Inside under the heading, "A Shortage and a Moral," this firm draws attention to the many claims for shortages which are often due to carelessness in unpacking. They state that they find it well to protect the recipient from common carelessness and that this little folder has accomplished a great deal in this direction.

Going After Trade with a Bulletin

How a Little Trade Circular May Become an Effective Selling Agent at no Great Cost—A Hamilton, Ont., Merchant Uses Method Successfully—Advertising That Gets Right to the Possible Customer.

IN these modern times most men engaged in business are thoroughly sold on the idea of the advantages to be gained from advertising. The only question with most of them is how to make the amount of their advertising appropriation get the best results. Then, too, as the size of the town increases the actual selling power of

D. K. CLARKE, 228 OTTAWA ST.

HARDWARE

The front page of the bulletin issued by D. K. Clarke, Ottawa Street, Hamilton.

one newspaper as far as the store in the suburbs is concerned at least actually decreases. This at least is the belief of D. K. Clarke, who carries on a thriving hardware, grocery and meat business on Ottawa Street, Hamilton.

Despite this fact, Mr. Clarke is a firm believer in the power of advertising, but he figures that only the advertising that reaches his customers, or people who might possibly become customers, can be of any value to him. Newspaper advertising here, he contends, might draw people to the centre of the town, but it will not draw them towards the outskirts, and his store is on the outskirts in a thriving and progressive district. Therefore, he has had to develop his own form of advertising.

The Monthly Bulletin Idea

The idea that Mr. Clarke has developed is the idea of a monthly bulletin that deals particularly with the interests and also the needs of the community it is designed to reach. For instance, from that community there have gone to the front a very unusual proportion of men. Every family has a personal interest in the war. Mr. Clarke himself has a son at the front, and all are eagerly awaiting news of any of the boys from that section. For that reason Mr. Clarke tries to get for this bulletin items of news regarding these boys, scraps from letters, or items of unusual interest clipped from papers that would not be available to all the readers. Items, too, of local interest are dealt with. In other words, it is made the local organ of the district that surrounds the store.

Not a Great Expense

Now it looks as though the issue of a monthly four-page booklet might entail quite an item of expense.

This is not the case, however. There is a certain amount of labor connected with it, but if you set aside the item of labor the bulletin pays for itself. In the district in which Mr. Clarke is located there is quite a collection of stores. These stores were interested in the bulletin and willingly joined in the scheme. Mr. Clarke gave the assurance that there would be no competitive advertising on the bulletin. When a merchant took space to advertise a certain line he was assured that he would be the only one so advertising. There is one grocer, one shoe store, and one hardware, and so on. Each month there are 1,000 copies printed at a cost of $11. Slightly over half of each page is devoted to the actual bulletin, leaving a place at the top and bottom for advertising. For this space on the back cover the charge is $3 a month, and for the same space on the inner pages $2.50, making a total of $16 per month.

There is, of course, the expense of delivery to be set against this. It is a comparatively small item, however. Five boys do the work for a total of $2.50. These boys go out under the supervision of Mr. Clarke's son or the head clerk to make sure that none of the work is scamped, and the bulletins are actually delivered into homes within a radius of about three-quarters of a mile on every side of the store. These homes are all more nearly associated with this district than with any other. Therefore, it is advertising in which there is no waste. In the actual matter of expense, there is a revenue of $16 against an expenditure of $13.50, leaving a small margin to compensate for the time taken in getting out the bulletin.

Effective Advertising

It would seem to be an effective form of advertising, but is it? That is a question not easily answered. You can't question everybody who enters a store as to why they came; that system would lack graciousness, and would not tend to be helpful. So despite the desire to know just what the power of certain advertising is, it can only be determined by more or less indefinite means. Mr. Clarke has noted enough of these instances, however, to convince him that there is a real pulling power in the idea. One day it will be a woman dropping in to ask the price of some article illustrated in the last bulletin. Another time it is a stranger dropping in to ask if she might have an extra copy of the bulletin. Thus the buying public of the section is made familiar, not only with the name of

Meeting Conditions as they Change

New Season, New Goods—Selling Heaters and Stoves Which Burn Substitutes for Coal and Wood—Making Advertising Effective—Start Campaign Now —Sales Will Result

WITH the arrival of spring, merchants are changing the tone of their newspaper copy and effecting a re-arrangement of stock to meet conditions as they may arise during the change in seasons.

Heaters Now Active.

Throughout the winter there has been an unusually big demand for oil heaters and electric heaters to overcome shortage of other fuels and with the the advent of milder weather which will result in furnaces being shut off considerably renewed interest will be manifest in these other lines which may be carried from room to room.

It is impossible to sell the electric heaters in all communities owing to there being no supply or at least a limited supply of current. But in those districts where no restrictions of this nature are in evidence, hardware merchants are going after this trade aggressively and very successfully.

These lines lend themselves to display inside the store or in the window and by keeping one in action where your customers can "feel the heat," the results you will achieve will warrant the little effort on your part.

No Restrictions on Sale.

Oil heaters offer a large field for sales and there should be no restrictions on these in any community. Shown on this page appears a copy of newspaper advertisement which will illustrate how some merchants are bringing these lines to the attention of their readers and it is by keeping the public well informed about the seasonable lines you have to offer that sales are maintained at a high average.

Substitutes for Coal and Wood.

At the present time conservation of coal and wood is being urged and by bringing to the attention of your readers the part which oil heaters can play in effecting a material saving sales should be easily made. Oil is plentiful, it is cheap and the drain on the coal bin can be materially lessened by using an oil heater to warm up a cold bedroom, the bathroom or other rooms in the house not easily reached when the furnace is running on short rations.

Making Advertising Effective.

This should be the basis for effective advertising on this line and it might be well to bear in mind that from many sources the statement is made that next year will see an even greater shortage of coal than has been evident this year. This being possible, it should be good policy to urge those who may have coal to save it for the colder weather of another winter and use substitutes while possible.

Where Volume Helped

Various methods for sales are adopted and one which possessed decided merit was employed in a hardware store visited recently. On entering the store, which was a narrow one but long, a most imposing display of oil heaters was arranged down the entire length of the store at one side. It was impossible to get away from the showing made. Everyone entering that store saw those heaters and an attractive card giving the price and outlining the points of merit briefly carried this display along on a high plane.

People Want to See Goods.

In mentioning the arrangement to the manager of the store he stated that they were having great success in the sale of this line and this had been increasingly evident since they got the heaters out on the floor. People want to see the goods we have and the entire arrangement of our store has been made with the idea of satisfying this want.

Cooking Stoves Will Sell.

But apart from the heaters, the question of cooking stoves is engaging the attention of retail merchants now. Already displays of coal oil, gasoline and electric stoves are becoming prominent and the early bird is the one who reaps the benefits in sales of these lines.

In many homes, these lines are used exclusively for cooking, in others the warmer weather is the time selected for their use. It is by no means too early to place the germ in the minds of this latter class that the use of a coal oil, gasoline or an electric stove will do much to relieve the strain of standing over a hot coal or wood fire and once again the question of fuel must arise.

It would appear that there should be a phenomenal demand for cooking stoves which do not consume coal or wood during the coming season and the sales will start almost as early as the merchant's campaign is inaugurated. Already people are looking forward to spring and summer, planning what they shall buy. They are in a receptive state of mind, they are open to suggestions. Bright, newsy advertisements, good, attractive window displays, a suggestive interior arrangement will do much to turn their thoughts towards the lines you have to offer.

Too much emphasis can hardly be placed on the importance of getting these lines before your customers now. Strike early and strike hard. Sell the goods you can supply and don't worry over the lines on which shortage exists. This should be the keynote for the merchants' activities during the present season, and by pushing hard after business sales will be maintained at a high average.

Alumino! Perfection!

OIL HEATERS!

These chilly nights and mornings you will find this just the article for a room where you require heat for a few hours.
Steel Construction. Easy to carry from room to room. Perfectly Safe and Free From Odors. So simple a child can operate and rewick them. Soft Cotton Wicks suitable for these Stoves supplied at all times.

Emerson & Fisher Ltd.

An attractive advertisement which gives real information about the line of oil heaters this firm sells. If there is any weakness in this it is in the omission of the price, a very essential point which should not be overlooked.

MAY MEAN HIGHER PRICES

Government regulation of the oil industry in the United States has been undertaken to aid the industry in every way it can. It desires increased production and is agreeable to higher prices in order that the industry be encouraged.

Higher prices are looked for in the mid-continent field within a short time, as stocks have decreased in 1917 at a rate, it is figured, which will leave no surplus stocks above the ground five years from now. Production in this field during the last five months has fallen off approximately 400,000 barrels.

TAX WASH MACHINES?

It is said that the city engineer in Hamilton, Ont., will shortly recommend the levying of a tax on all owners of washing machines with water motor attachments. Housewives are, of course, the largest users of these appliances.

EVENTS IN THE TRADE

BUSINESS CHANGES

Sarnia, Ont.—Mackenzie, Milne & Co., Ltd., wholesale and retail hardware. Change in ownership reported.

Saskatoon, Sask.—A. Douglas, hardware, is selling out business.

Foam Lake, Sask.—J. Veum, hardware and implements, has been succeeded by Veum & Narfason.

Campbellford, Ont.—Owen & Birmingham, hardware, have dissolved partnership, J. C. Birmingham continuing.

Zehner, Sask.—M. Rosovsky, hardware and implements, has sold out.

Blythe, Ont.—Blackhall & Sons, hardware, have sold out to Wm. Moore.

Sceptre, Sask.—Shields Bros. hardware, have sold to Skisger & Winikof.

Broderick, Sask.—A Battersby, hardware, has sold to Bentson & Olberg.

Benito, Man.—Morse Hardware & Lumber Co., has been succeeded by Benito Hardware & Machinery Co.

Toronto, Ont.—Stewart & Wood, wholesale paints, oil and glass, have been succeeded by Stewart & Wood, Ltd.

Sibbald, Alta.—J. A. McGregor, hardware, is selling out.

OBITUARY

Phillip Grannan, stoves, etc., St. John, N.B., is dead.

Chas. E. Clarke, president and managing director of Clarke & Clarke, Ltd., manufacturers of leather goods, is dead.

FIRE LOSS

Esterhazy, Sask.—W. H. Blyth & Co., hardware, has suffered fire loss.

Mitchellton, Sask.—Business block destroyed by fire. Owners, W. H. Pritchard, hardware store, loss $10,000; R. Jampolsky, store and residence, loss $13,000; H. Jampolsky, residence, loss $3,000.

TRADE NOTES

Hamilton, Ont.—The Imperial Oil Co. has secured a permit for the erection of three tanks and other structures, to cost $62,740.

INCORPORATIONS

Sherbrooke, Que.—Codere & Fils, Ltd., wholesale and retail hardware, etc., have been incorporated.

Hepworth, Ont.—Northern Gas and Gasoline Co., Ltd., has been incorporated. Capital stock is $60,000.

Toronto.—The Elco Bag and Waste Ltd. have been incorporated to carry on business of manufacturers of bags, burlap, waste, etc. The capital stock is $40,000.

Ottawa.—The Ketchum Manufacturing Co., Ltd., has been incorporated to carry on and engage in business as manufacturers, manufacturers' agents, importers and exporters. Capital stock is $40,000.

Aurora, Ont.—Aurora Foundries, Ltd., have been incorporated with a capital of $40,000 to manufacture castings in iron, brass, steel and aluminum and to carry on general business as founders and machinists.

DEATH OF W. H. THOMPSON

The death occurred in New York City of Wm. H. Thompson, formerly travelling passenger agent in Ontario, for the Allan Line steamships, with headquarters in Toronto. The late Mr. Thompson,

Late WM. H. THOMPSON.
Whose death is referred to elsewhere in this issue.

familiarly known as "Bill" in hardware trade circles, had a host of friends in the hardware trade and was for many years associated with various Canadian hardware firms.

Mr. Thompson first started in the hardware business in Port Dover, Ont., about 18 years ago, and later became associated with John Bowman & Co., of London, Ont. His next move was to James Reid & Co. now the Purdom Hardware Co., of London, following which Mr. Thompson again returned to John Bowman & Co. Later he became associated with David Maxwell & Sons, of St. Marys, Ont., following which he joined the staff of the Hobbs Hardware Co., of London, Ont., where he was engaged in various capacities and for a considerable period as a travelling salesman. After leaving London, Mr. Thompson joined the staff of Rice Lewis & Son, Toronto, and later on became associated with the Allan Company.

Since the outbreak of the war, Mr. Thompson became connected with the Allied Shipping Board in New York City, where he died suddenly from pneumonia in his 34th, year. The funeral was held at Port Dover, Ont., where Mr. Thompson's parents reside.

MONTREAL NEWS NOTES

W. G. Harris, Sr., president of the Canada Metal Co. of Toronto, was a Montreal visitor last week.

W. A. C. Hamilton, representing the Consumers Cordage Co. of Montreal, was in Toronto last week for a few days.

Jos. Dowling, president of the firm of Caverhill, Learmont and Co., is again at his desk after a somewhat protracted illness.

Mr. Hunter, representing the Wentworth Brass Co., Ltd., of Hamilton, was a Montreal visitor this week in the interests of his company.

A. W. Poole, of McArthur Irwin, Ltd., Montreal, spent several days last week in Toronto, Hamilton and other Western Ontario points.

Mr. Rudden, representing the Union Hardware Co. of Torrington, Conn., was a visitor to Montreal this week in the interests of his firm.

J. A. Hossack, sales manager Lufkin Rule Co. of Windsor, Ontario, was a visitor to Montreal on Wednesday on his way west from the Maritime Province.

W. Leslie, president of the firm of A. C. Leslie and Co., metal importers, of Montreal, spent a few days in Toronto last week.

Wm. Starke, president of Starke-Seybold and Co., wholesale hardware merchants of Montreal, was in New York last week for several days and returned at the end of the week.

TAKES UP SPECIAL ADVERTISING

Stanley C. Morse has withdrawn from the managing directorship and control of the Miller-Morse Hardware Co., Winnipeg, Man., in order to devote his entire energies to special advertising on his own account. From reports at hand Mr. Morse is meeting with success in his new field.

L. C. Marr assumes the post of general manager, and states that it is his sole aim and object to continue to add to and build on the foundations laid by Mr. Morse.

MARTIN SENOUR TO RESUME MARITIME SERVICE PROMPTLY

The Martin Senour Co., Ltd., whose Halifax warehouse was totally destroyed by fire last week, have arranged for immediate service from temporary quarters. Premises and stock were almost totally destroyed. The loss was largely covered by insurance. The fire occurred at a most inopportune time as there was in the Halifax branch an almost complete stock to take care of the later spring business. Owing to the recent great disaster, it has been found hard to secure premises even of a temporary nature. Arrangements are being made whereby the Maritime trade will be served promptly and new stocks are already in transit. All urgent orders are in the meantime being filled from Montreal. Mr. A. T. Black, general manager of the company, who has just returned to Montreal from Halifax, stated to HARDWARE AND METAL, that fortunately the majority of spring stock orders of Maritime customers which had been sent on to Halifax for transhipment had been transhipped from the warehouse there prior to the fire. The approximate value of the stock destroyed was $40,000.

TO OPEN LONDON BRANCH

T. S. Simms & Co., St. John, N.B., are opening an office and warehouse at London, Ont., in charge of H. B. Agnew. A complete stock of the company's product will be carried in the London branch.

TO HANDLE CROWN DIAMOND PAINTS

Stewart & Wood, Ltd., Toronto, have been appointed distributors for Crown Diamond paints in the province of Ontario west of Hastings county. A complete stock of Crown Diamond paints will be carried in Toronto by Stewart & Wood. Crown Diamond paints are made by McArthur Irwin, Ltd., Montreal.

CORDAGE PLANT ON COAST

South Vancouver is to have an important addition to its industrial life in the form of a rope manufacturing plant, the International Cordage Co. of B. C., a company recently incorporated in this province with American capital, having signified its intention of locating within the limits of the municipality if certain concessions are secured from the council. The promoters have already taken options on property in South Vancouver upon which the buildings, it is stated, will cover six acres. If negotiations are finally carried through the plant will have a minimum capacity of 10,000 pounds of cordage per day, equipment for an output of 15,000 pounds per day. The plant will require the expenditure of $250,000.

MANUFACTURERS SUFFER LOSS

It is estimated that the Sheet Metal Products Co., Toronto, has had its plant damaged through the Don flood to the extent of $50,000. Cameron and Campbell suffered about $250 damage.

VETERAN HARDWARE MAN PASSES

James Reid, Buyer for Caverhill, Learmont & Co., Passes Away in Montreal

On Monday evening, Feb. 23, James Reid, buyer for the firm of Caverhill, Learmont and Co., died at his home in Montreal.

Since last November, Mr. Reid had not been well and was, in fact, very ill for many weeks. It was thought that he would be able to resume his duties again this spring, however, but a relapse overtook him and he was unable to stand this strain.

For over fifty years, Mr. Reid saw service with the above firm. He was widely known from coast to coast and

The Late JAMES REID
Former buyer for Caverhill, Learmont & Co., Montreal, dies at age of 73.

through an interesting personality he was able to readily make friends, of which he had many. He was 73 years of age.

In speaking with his old firm, Mr. Jos. Dowling stated that Mr. Reid was recognized as one of the best authorities in the hardware trade and that in many respects he was conceded to be a leading exponent of the old school, when facts were thoroughly mastered.

The funeral, which was held from the family residence on Wednesday afternoon, was largely attended by the representative hardware men of the city, in token of the respect held for Mr. Reid. The service was presided over by his old pastor, the Rev. R. W. Dickie and Rev. I. A. Montgomery. Besides a widow and six daughters, Mr. Reid leaves two sons.

OPEN AN AUTO ACCESSORY DEPARTMENT

Great West Electric Co., Ltd., Winnipeg, Will Add a Complete Assortment of Automobile Accessories to their Present Stock

The Great West Electric Co., Ltd., Winnipeg, Man., recently announced an important development in connection with their business, namely, the establishment of an automobile accessory department. It is their intention to house this in their present quarters at 61-63-65 Albert Street, but to be a department absolutely distinct from the electrical end. The new department will, it is said, be in charge of men who have had wide experience in this class of business.

The Great West Electric Co. have been handling a limited number of automobile accessories, such as batteries, spark plugs, automobile lamps, and many other lines which properly could be handled in the electrical department. This connection with accessories was enough to convince them that this line would assume large proportions within a few years, hence their decision to open a new department with a full stock, from wrenches to automobile tires.

J. G. Smith, general manager, is now on a trip to New York and Chicago arranging for new lines. Much of their stock it is said, has been bought, and will be in the hands of their travellers in a few days. It is the intention of this company to cover Western Canada with a staff of five travellers.

This company state they have made it a point to fill and despatch orders the day received, and that the same service will be one of the features of the new accessory department.

TORONTO BICYCLE ASSOCIATION MEETS

Walter Rinck, secretary of the United Cycle Trade Directorate, was in Toronto, February 27. An executive meeting of the Canadian Bicycle Dealers' Association was held in the morning for the discussion and adoption of many important measures referring to the organization in the Dominion. This was followed by a luncheon at the Carls-Rite Hotel, which was attended by many dealers of Toronto and outside centres, as well as by officials and salesmen of numerous manufacturing and jobbing houses. At this gathering the officers of the Canadian Bicycle Dealers' Association outlined plans for close co-operation between the retail and wholesale jobbing interests for the development of the association movement across Canada and for the mutual boosting of the bicycle business. Suggestions were made for various details in connection with the third annual bicycle week in Canada, to be observed from May 4 to 11.

Later in the day the Toronto dealers got together to organize a real local trade organization. In this work they were assisted by officers of the Canadian association and by out-of-town delegates.

CATALOGUES and BOOKLETS

Wells' Self-Opening Die Book

The Greenfield Tap and Die Corporation, Greenfield, Mass., have issued a 24-page book descriptive of the Wells self-opening die. Illustrations of the die in action and in sections adorn the pages, and they are explained by descriptions, which it is said are just as non-technical as possible for the sake of the laymen, but at the same time interesting to the engineer. Copies will be mailed on request.

Catalogue of Hardware Store Fixtures

A most attractive catalogue of hardware fixtures has been issued by the Duluth Show Case Company, Duluth, Minn.

From the standpoint of make-up, workmanship, illustration, and copy this book appears complete, and should prove of value to the merchant interested in the problems of displaying merchandise.

The book is of the loose leaf type, staple bound between attractive covers, is printed on a high grade of calendared paper, and is filled with more than one hundred two-color reproductions from actual photographs of the hardware display cases of different styles, sizes and types which the company manufactures.

The necessity of modern fixtures is

A. J. WRIGHT.
Hamilton, Ont., elected 1st Vice-president Ontario Retail Hardware and Stove Dealers' Association, at their convention in Hamilton last week.

treated in the fore part of the book. Immediately following is a discussion of the general details of construction of this line of sectional hardware store fixtures. It is said an interchangeable unit system is the feature of the products of this company.

More than one hundred pages are devoted to illustrations in two colors of various combinations of these several separate units, revealing modern methods of displaying all the various lines which are included in the ordinary hardware stock. The list of units which comprise each complete combination shown is given. Store ladders and floor show cases are also illustrated, described and priced.

SOME VIEWS ON CONVENTION

(Continued from page 33.)

"With reference to getting our clerks to attend, I most heartily approve of this step. Every clerk, every boss, who can possibly get there should attend conventions of the type just held, and if the officers continue to build on the foundations laid this year, there is no doubt the membership and attendance will increase materially.

* * *

Another view from the jobbers' standpoint was secured, and this representative stated that he considered the convention very successful. "It would seem that at last they have come down to the right basis, and my suggestion would be to follow up closely and enlarge on the program of this year. Not only do the retailers want to see the convention a success, but they want to make it bigger and more representative. This latter is only possible of course when a good program is given, and by following up the start made this year this association can be built up to a splendid level.

"I would think that every merchant would endeavor to have his clerks attend. The suggestion made that the clerks be in attendance is a good one. They are the salesmen in whom the merchant puts his trust, and the more knowledge they have on business conditions and how business should be conducted will undoubtedly result beneficially to the employer.

I would say that the convention, as conducted this year, gave the retailer the information he wanted, and by building along the lines adopted this year the association should grow to more representative proportions."

MONTREAL SPORTING GOODS MEN ORGANIZE

The formation is announced of an organization of dealers in bicycles, motor cycles and sporting goods. An exhibition is being planned for April 20-27, the proceeds to be for patriotic purposes.

The show, which is expected to be an annual affair, will include exhibits of sporting goods of all sorts, bicycles of every description, motor cycles, motor boats, engines and accessories. There will be concerts twice daily by a military band, with vocal solos. The decorations will be on a patriotic plan based on the colors of the Allied nations. The entire gate receipts will be given to patriotic societies, and each organization benefitting will have charge of the ticket arrangements for its particular night.

OCCUPY NEW QUARTERS

The H. W. Johns-Manville Co., have moved into a new building at their St. Louis branch. The new building has six floors and basement, and is equipped with separate elevators for passenger and freight service. It is said show windows running across the front and along one side provide the basis for good displays.

It is said all parts of the building are bright and well ventilated, enabling the employees to work under favorable conditions.

E. J. WANLESS.
Chatham, Ont., elected 2nd Vice-president Ontario Retail Hardware and Stove Dealers' Association, at their convention in Hamilton last week.

THE CLERKS DEPARTMENT

INTO BANKING FROM BASEBALL DIAMOND

Charles H. Sabin, Head of World's Largest Trust Company, Might Have Been a Miller But For His Ability as a Pitcher.

A HARD-HEADED trust company president, chary to praise and quick to censure, was talking some years ago about matters in Wall Street, and mentioned Charles H. Sabin, then a vice-president of the Guaranty Trust Company, in its quarters on Nassau Street. "There is a young man to keep your eyes on," said the speaker. "I did not like him until we found ourselves lined up on opposite sides in a reorganization fight. Since then I have counted him a valued friend. He won my respect because he showed me he always wanted to do the fair and straightforward thing. If he does not become a leader down here I am a bad judge of character." The speaker did not make a bad prediction according to the New York Annalist:

As matters turned out, the speaker did not make a bad prediction. Make up a list of the five bankers who have exercised the greatest amount of influence in financial matters in recent years, and Mr. Sabin will be accorded a place in the group. His rise has been phenomenal. Thirty years ago he was kicking around a small New England village, wondering where he could get a job, since he did not have money enough to go to college, although there was a famous old institution within five miles of his home. To-day he is the head of the largest trust company in the world, whose influence is so great that its decision to enter the Federal Reserve system has already proved the deciding factor in bringing about a general movement of State banks into the Federal system. Best of all, Mr. Sabin has not lost any of his human qualities in the course of his rise. The traits that marked him in his boyhood days still predominate. He has a great capacity for friendship, which does not differentiate between the man who earns $2,500 a year and the one who makes $25,000.

If Mr. Sabin had not distinguished himself on the baseball diamond as a youngster he might be the head of a milling business to-day, and the banking world would be that much poorer. He was born on Aug. 24, 1868, in a baseball country, the son of a hotel and livery man in South Williamstown, Mass. He went to school in his own village, attending Greylock Institute, the Alma Mater of Henry P. Davidson and a number of other men who have become nationally famous. At every opportunity he played ball, and when he left home to find work, after being graduated from Greylock in 1885, his family, not having means to send him to college, he carried his uniform and glove along. He located in Albany, about twenty-five miles west of Williamstown, and went to work under Henry Russell, who had a flour business there.

Amateur baseball was raging in Albany, and a keen spirit of rivalry had

A Gentleman of First Consequence.

The importance of the hardware merchant was the theme of an article "Monthly Reflection on Life Without Servants," by Harold Begbie in "The Quire," England.

developed among the city teams. The National Commercial Bank was a contender for honors, but had a team that was weak in the pitching department. The captain knew where he could get a good pitcher, but the league rules were framed to keep out "ringers." On the eve of an important game he went to the president of the National Commercial and arranged that a job should be given to "Charley" Sabin. The pitcher was released from the flour business forthwith and hastened to the bank, where he stood in a bookkeeper's cage for the remainder of the afternoon to qualify as a bona fide bank employe. History does not record whether or not he saved the game for his team on the following afternoon, but either he pitched good ball or took a greater interest in his bank work than he was expected to, for he remained with the National Commercial Bank for some months, and then joined the staff of the Park Bank. He left there to go to the Albany City Bank, which was afterward merged with the National Commercial, so that he returned to his original institution, where he was a vice-president and general manager from 1902 to 1907.

In the latter year, made memorable by the worst banking panic this generation has experienced, and with weak institutions toppling over following the collapse of the United Copper pool and the attendant disclosures of the activities of Morse, Heinze, and Barney, Mr. Sabin came to New York to open a new national bank. A less auspicious time could not have been chosen, but with the backing of John D. Ryan and other influential friends, the National Copper Bank not only survived the panic but added to its deposits as the trouble ran on. Mr. Sabin remained president of the institution for the two years of its life, and in 1909 it was merged into the Mechanics and Metals. Mr. Sabin went over to the enlarged bank as vice-president.

The Guaranty Trust Company, formerly the Morton Trust Company, had been gaining in strength and prestige under the administration of Alexander J. Hemphill, and in 1910 Mr. Sabin was invited to become a vice-president. In less than five years more Mr. Hemphill was made chairman of the board, and Mr. Sabin succeeded him. In twenty-six years Mr. Sabin has risen from the lowest position in a bank to one of the highest.

The Guaranty had outgrown its quarters in the Mutual Life Building and erected a costly new eight-story home at 140 Broadway, where it had about a third of its space to rent to other tenants. The expansion of the bank's business was much more rapid than the architects had been led to provide for, with the result that the tenants were compelled to vacate with the expiration of their first leases to accommodate the steadily increasing number of bank employees. When the Chase National moved out of the Clearing House Building to the rear of the Guaranty on Pine Street, the trust company took over those quarters, and when they became crowded it was necessary to begin the erection of a new annex on Cedar Street. A connection is now being cut through the back of the main banking floor to reach the new building. The room originally designed for the bond department will be divided into private offices for the chairman and president. It is not likely, however, that Mr. Sabin will make much use of his new office.

He has always occupied a desk on a platform near the front of the bank, where customers and employes could walk in upon him unannounced. How he sees the number of people that call upon him each day, and still have time for all of his correspondence and directors' meetings is a puzzle. His mind works with the speed and precision of an adding machine; he goes directly into each question that is laid before him, and he has a wonderfully efficient organization of the departments of the bank to clean up all of the routine. He has an even disposition that goes with perfect health, and he never allows himself to become irritated under any ordinary provocation. When he has done a week's work in four days he escapes to Southampton to play golf or polo. He has long since dropped baseball, but he has never given up active participation in some form of athletics. Perhaps that is why, at the age of 49, he radiates vitality, enthusiasm, and good humor. In the heart of a district where gloom and optimism succeed one another every few hours, he never appears discouraged. A humorous expression always lurks in his eyes, and while he can be deadly earnest on occasion, he much prefers to smile. He believes in the United States, the Guaranty Trust Company, and Charles H. Sabin, and is always going after new business on that platform.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

SANITARY SINK FLUSHER

The Sanitary Sink Flusher is used in hospitals and, it is said, recommended by physicians for sink sanitation. This little device will, it is stated, keep drain pipes in a sanitary condition, eliminate

The Sanitary Sink Flusher.

all foul odors and prevent disease, by forcing all germ-breeding matter down through the drain-pipe.

It is claimed that by means of water-pressure clogged sinks can be cleared instantly; the Sanitary Sink Flusher is easily attached to any sink, wash basin, or bath tub and can be operated by any housekeeper; it supplies a splendid method of clearing clogged drain-pipes.

These are made by the Sanitary Sink Flusher Co., Elmira, N.Y., and are being distributed in Canada by J. E. Beauchamp & Co., Montreal and P. A. C. McIntyre & Co., Winnipeg, Man.

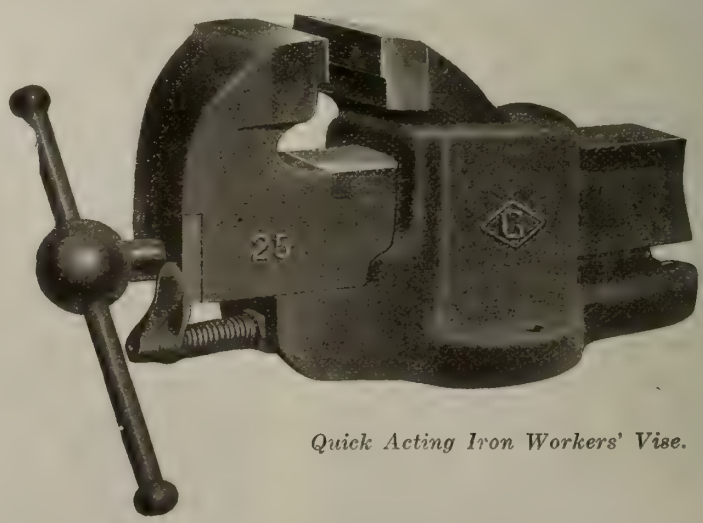
Van Sicklen Speedmeter.

VAN SICKLEN SPEEDMETER

The Canadian Fairbanks-Morse Co., Montreal and branches, are marketing in Canada the Van Sicklen Speedmeter. This instrument, it is said, indicates speed-per-hour on a scientifically correct basis.

In the make-up of these instruments, it is said, there are virtually but three moving parts, the two gears in the air-circulator and the dial; fiction has been reduced to a minimum; the dial is pivoted in jewels of a virtually indestructible nature; the air-circulator gears are subjected to no strain and are so designed as to enmesh and operate without wear.

It is said legibility is the keynote of construction as the speedmeter may be read as easily from the rear seat of a car as from the driver's seat; the case is steel, coated with a heavy black enamel and the dial and odometer figures are all lithographed directly upon these parts.

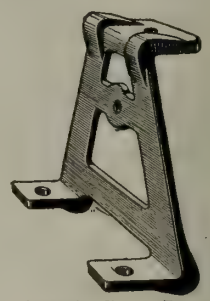


It is stated that the Van Sicklen Speedmeter is not affected in operation or appearance by climatic changes, and that vibration of the most violent sort causes no fluctuation in its indication. This speedmeter is made by the Elgin National Watch Co., in its plant at Elgin, Ill., for the Van Sicklen Co., 14 Chicago St., Elgin, Ill.

QUICK-ACTING VISE

The Canada Foundries & Forgings, Ltd., James Smart plant, Brockville, Ont., and Winnipeg, Man., have placed on the market a quick-acting ironworker's vise.

It is said there is a releasing device which permits the jaws being pulled out and placed in position by hand in place of the old method of working the screw to get the proper opening; this means quickness of operation.



The vise has stationary base and the jaws are steel-faced and milled. The jaws are 3⅝ inches wide, opening out 5¼ inches. The weight of the vise is 50 lbs.

Quick Acting Iron Workers' Vise.

CRANK CASE REPAIR ARM

The Hudson Motor Specialties Co., Philadelphia, Pa., are now marketing the Hudson crank case repair arms for Ford cars. It is said that crank case repairs

Hudson Crank Case Repair Arm.

are difficult, expensive and time-consuming. The engine must be taken out of the chassis, torn apart to make the repair, and then have a new arm riveted.

However, all this is now done away with; in its place it is said you have a simple, quickly executed action, and you are ready for work in a tenth of the time. All you need do now it is claimed is to loosen three bolts, slip the Hudson Repair Arm in place and tighten! This is said to be a great time saver.

VENEER CHAIR SEATS

J. E. Beauchamp & Co. are now manufacturing a line of veneer chair seats in various sizes and shapes. The manufacturers claim that in the preparation of these seats a vegetable glue is used and it is said to possess many good qualities in work of this kind. J. E. Beauchamp & Co. are located at Montreal.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

CHANGES in wholesale hardware markets have been in a steadily upward direction during the week. In view of the conditions in raw materials and in the labor market where prices are high there does not seem any prospect of a downward revision to any considerable extent in the near future. High prices have had the effect of curtailing consumption in some instances and manufacturers are now inclined to ask higher prices only when there is no other way out of the dilemma. This curtailment of consumption is acting as a steadying factor in the markets.

The situation with respect to importation of steel sheets from the United States has cleared up somewhat during the week. It is now apparent that the lighter gauges of sheets are to be allowed to come forward as they have in the past, the embargo applying only to No. 10 gauge and heavier. Confusion was caused in some quarters over the recent railway embargo in the United States which prevented the shipment into Canada of all goods in value $100 and over. This was only a temporary measure, however, to relieve congestion. The basis for the report that all steel sheets were again on the embargo list in all probability had its origin in this temporary railway embargo. It is understood that this embargo has now been raised.

The embargo on movement of goods has been raised by the three Canadian railways and goods held at border towns in transit from the United States are now being distributed more freely. With the opening of navigation conditions are expected to show rapid improvement.

Advances have been fairly numerous during the week and include such lines as washers, stoves and ranges, furnaces, latches, door pulls, barn door hangers, blind hinges, saw vises, carpenters' clamps, cattle leaders, chest handles, roofing pitch, certain sizes of wrought pipe. Announcement of prices on binder twine are expected in the near future and will probably be in the neighborhood of 7c per pound higher than the opening price last year. Linseed oil holds in strong market at the big advance recorded last week. Business with wholesale houses has been seasonably good.

MONTREAL MARKETS

MONTREAL, Feb. 28.—Price changes are somewhat limited and a routine amount of business is being done. Country orders are the most in evidence, city trade being confined to a somewhat small compass. Changes include advances on washing machines, on which the discount has been reduced to 40 per cent. from 45 per cent.; on certain lines of saws, trowels, etc.—the advance being about 10 per cent.; the larger sizes of tire chains, tail and side lamp glasses, automobile oils, etc. Tin has been in a firming market and lead is strong. Black sheets have been reduced locally, and this is probably due to the fairly quiet condition of the markets more than to any other cause. Old materials are still firm. It is stated that stoves are likely to reach higher levels for next fall and that an advance of probably ten per cent. will be made. The outlook for business as indicated among the jobbing trade is good.

Various Lines Of Saws Are Advanced About 10%

Montreal.

SAWS, SAW HANDLES, BUTCHER SAWS.—There has been a movement to higher levels for certain lines of saws and saw handles. The Disston line of hand and rip saws, trowels and compass saws and saw handles have been advanced about ten per cent. A like advance has been made in the prices of the Shurley & Dietrich line. In butcher saws the following prices are quoted: No. 2 x 22, $19.50 per doz.; No. 2 x 24, $20.75. Kitchen saws of this make No. 7 are quoted at $8 per doz. and No. 10, $5.80; No. 19 x 14 compass saws are selling at $4, the former price being $3.60.

Washing Machines Have Been Moved Up

Montreal.

WASHING MACHINES.—Advances have been put into effect on washing machines through a revision of the discount. The former discount of 45 per cent. has been reduced to 40 per cent. and will apply to the lines shown elsewhere in the current market quotations. Materials and cost of labor and factors such as higher prices for paint and kindred materials have contributed in making this advance necessary.

Advances Are Made In Prices Of Automobile Oil

Montreal.

AUTOMOBILE OILS. — Advances have been made in the prices of Crew Levick auto oils which will affect the product in tins as well as in the larger packages, including barrels. Part of the increase is attributable to the cost of containers and other advances for raw materials have also added to this increase. The approximate advance is twenty per cent.

Tire Chains Advance, Also Tail And Lamp Discs

Montreal.

TAIL LAMP DISCS, TIRE CHAINS, ETC.—The larger sizes of tire chains have been placed on a new list which is effective on March 1. This covers the Dreadnought line and some of the new prices are as follows:—34 x 4, $6 per set; 36 x 4½, $7; 35 x 5, $7.50 and 37 x 5, $8.50. Tail and side lamps are also advanced about 10 per cent., effective also on March 1. A very stiff advance of 50 per cent. is also placed on McKinnon tire holders and automobile chairs, this being caused by the advances in seat material and the better grade of materials used in the chairs and tire holders.

Wire Nails And Wire Are Firm At Recent Changes

Montreal.

NAILS AND WIRE.—Jobbers are receiving a fair number of orders for delivery as soon as navigation opens and many lots will go forward early. Just at the present time there is very little movement for large quantities and the business is confined to the sorting of stocks. Most of the orders that are received come from country points, where

a general healthy tone seems to prevail. Standard wire nails are selling on a base quotation of $5.25 and cut nails at $5.60. The base price for smooth steel wire is still $6.25 per 100 lbs.

Iron And Steel Bars Steady And Unchanged

Montreal.

IRON AND STEEL.—Routine trading is the feature of the market and prices are holding without change. Orders from the country are coming to hand fairly well and the city trade is rather quiet. Locally, there is just the usual interest that maintains at this time of the year. With a noticeable improvement in the coke and pig iron industry in United States points it is likely that deliveries of material may be expected to improve in the next few weeks.

MONTREAL—	
Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	11 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

With Pig Lead Strong Products Are Firm

Montreal.

LEAD PRODUCTS.—In view of the fact that lead is firm and stronger, the various manufactured lines are maintained at last week's quotation but are unchanged. Seasonable business prevails and plumbers are using fair quantities of specialties for repair work and odd jobs. Solder is firm but without change and zinc also has been held in a steady market with trading fair.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.	0 14	
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12½	0 13

Solder, wiping, lb.	0 42	....
Zinc sheets, casks	0 26	0 30
Do., broken lots	0 28	0 32

Rope Holds Firmly And Changes Uncertain

Montreal.

ROPE AND CORDAGE.—The local situation has held without change during the week. It is stated that the likelihood of lower prices is remote. Importers and manufacturers seem to be in a questioning mood as to the effect of schedules across the line and are confident that if there is no advance that the prices will hold as at present. It appears that prices have been named on hemp but that these will first have to receive the consideration of the government and its approval before they can be considered to be "fixed." Trading locally is fair and a good movement is anticipated in the near future, as soon as traffic is easier.

Better Tone To Old Metals In All Markets

Montreal.

OLD MATERIALS.—In the outside as well as in the local markets there is a good tone to the market for old material. This is particularly manifest in the scrap steel market which has reflected the effects of recent price fixing for certain grades of machinery scrap and melting steel by a revision of differentials on the part of the American Iron and Steel Institute. The position with regard to copper and brass scrap is one of firmness in view of the absorption of such large quantities of copper by the United States government for the new ship building program. It is stated that one hundred million pounds will be required for these operations. Locally there is a firmness to the market for most of the old materials and prices are unchanged.

MONTREAL—

Black Sheets Decline One Dollar Per Hundred

Montreal.

SHEETS AND PLATES.—The interesting feature of the local market this week is that of reduction made on black sheets. These are marked down from $1 to $1.05 per 100 lbs. and the range is narrower as shown below, as compared with prices prevailing for recent weeks. In view of the general situation regarding deliveries and the difficulty of securing new supplies it is interesting to note these lower prices just now. Lower prices are probably made with a view to greater liquidation of stocks. Galvanized sheets hold unchanged and copper sheets are based at 44c per lb. for the 19 gauge—the base size, equal to 32 ounce.

BLACK SHEETS—		100 lbs.
10 gauge	$8 00	$11 50

Coal Oil And Gasoline Hold At Unchanged Prices

Montreal.

COAL OIL AND GASOLINE.—There is a fairly good demand for coal oil and the prices are maintained here. The high prices for and the scarcity of crude supplies in the United States market have not in any way affected the local market and changes are not anticipated by the local importers and refiners. Gasoline sales are increasing in the States and will soon be in greater volume here in a few weeks, undoubtedly. In the meantime a fair volume of trade is passing in both oil and gasoline. Coal oil is selling at 17 cents per gallon for Royalite and at 20c for Palacine and Electroline. Gasoline is 32½c per gallon.

Prices Of Stoves Hold, But An Advance Likely

Montreal.

STOVES AND RANGES.—There is a fair amount of business, considered in the light of seasonable demand and retail dealers are ordering what they want from week to week to replace stock sold. There is a tendency in some quarters to advance prices but this will probably not be effected for the immediate present Orders are being filled on the basis of the recent advances that were made but it is very probable that the 1918 fall prices will be higher and these may represent ten per cent. increase over ruling prices to-day. There is a good outlook for the trade during the coming season.

Enamelled Ware And Kindred Lines Moving

Montreal.

ENAMELLED WARE AND GALVANIZED WARE.—There is a fairly good amount of business in these lines which is reported as being much better from the country than from city trade. Farmers seem to be buying freely and the country dealer should be taking advantage of his position to cultivate and expand business in his centre. There are no changes for the week but prices are maintained firmly. In viewing the general state of the markets and the delays that are occurring now the jobbers and manufacturers expect that orders will be placed earlier than usual.

Ingot Tin Is Strong; Will Copper Be Scarcer?

Montreal.

INGOTS.—The interesting feature of the week is that of tin, which is again in a strong position. Lead also is very firm and is tending to higher levels. The absorption of large supplies of copper

will probably leave little for regular needs.

COPPER.—Interest in copper is just moderate and the volume of business has not been great. Supplies are fair although not heavy. Prices are unchanged at 33c to 34c per lb.

LEAD.—There is a firm tone again to the lead market and while local quotations are unchanged there is a strong tone with tendencies to higher levels. Advances have been made again by the Trust, and the price is now $7.25 in New York.

TIN.—One of the interesting features of the week, that will be serious if confirmed, is that of the withdrawal of licenses for the import of tin. This has been suggested and advices to this effect have been received, but with the receipt of fuller particulars it is hoped the news will have been discounted. In the meantime there is a strong feeling and prices are quoted at from 85c to 90c per lb. The New York market is firm.

SPELTER.—The supply is reported as lighter and trading is small. The price range still is at 10½c to 11c per lb.

ANTIMONY.—Very quiet in the local market. In the U.S. market there is a firmer tone and this has been brought about through government buying. The local price remains at 19c lb.

ALUMINUM.—A firming tendency is noticeable which is in sympathy with New York tendencies. Prices are firmer at 55c to 57c lb.

TORONTO MARKETS

TORONTO, Feb. 28.—Wholesalers in some instances have noted a disposition on the part of some retailers to cancel orders which had been on the books of wholesalers for several weeks. These goods are about ready to be shipped by wholesalers. Apparently the cause operating to induce retailers to make these cancellations is the belief that lower prices may prevail during the coming months. Wholesalers assert that so far as they are able to judge there is no chance of a general movement toward lower levels. Manufacturers are now working on high-priced materials, and there does not seem much chance of a recession in prices of raw materials in the near future. This feeling on the part of retailers seems to have no real justification, according to the wholesalers. There is every indication, however, that with the demands for commodities of all kinds in the conduct of the war there is likely to be difficulty in getting deliveries. Price changes have invariably been in the upward direction during the week. Business is reported seasonably good.

Discounts On Washing Machines Have Changed

Toronto.

WASHING MACHINES. — Higher prices on washing machines have been made effective through the changing of discount from 45 per cent. to 40 per cent. The advance is approximately 9 per cent. List prices on these machines remain unchanged, and will be found in current quotations. Increasing labor costs and costs of raw materials are given as the main reasons for the advance in price.

Roofing Pitch Advances 5c Per Hundred

Toronto.

ROOFING MATERIALS.—An advance of 5c per hundred pounds has been made effective in roofing pitch, which now makes the price 80c per 100 pounds in carload lots, and 85c to 90c in smaller lots. This is the first advance to be recorded in this commodity for a considerable time past. Coal tar is holding steady in price at $5 to $5.50 per barrel. Ready roofing is also holding in steady market.

Barn Door Latches And Door Pulls Go Up

Toronto.

LATCHES, PULLS.—An advance of approximately 10 per cent. has been made effective in Taylor-Forbes line of goods. Two commodities to be affected are barn door latches and door pulls. No. 9 barn door latches are now quoted at $4.50 per dozen in some quarters. Japanned door pulls No. 275 are also selling at higher prices, new quotation being 65c per dozen.

Barn Door Hangers And Stay Rollers Up 10%

Toronto.

HANGERS, STAY ROLLERS.—Increase in the price of Stearns' barn door hangers to the extent of approximately 10 per cent. has been made. Four-inch is now quoted at $9.35 per dozen, and 5-inch at $12.60 per dozen. Prices for barn door stay rollers are as follows: No. 1, $2.60 per dozen; No. 2, $1.95 per dozen.

Blind Hinges And Saw Vises Go Higher

Toronto.

HINGES, VISES.—Higher prices have been announced on blind hinges and saw vises, increase amounting to approximately 10 per cent. No. 1 blind hinge is now quoted in some quarters at $1.65 per dozen, while No. 3 is quoted at $2.70 per dozen. Saw vises, No. 80, are now quoted at $7.45 per dozen, and No. 81 at $12.65 per dozen.

Carpenters' Clamps And Cattle Leaders Up

Toronto.

CLAMPS, LEADERS, CHEST HANDLES.—An advance in the price of carpenters' clamps in the neighborhood of 10 per cent. has made the following prices effective: No. 13, $4.90 dozen; No. 14, $6.10 dozen; No. 15, $6.90 dozen; No. 16, $7.95 dozen; No. 18, $10.20 dozen. No. 32 cattle leaders are now quoted at $1.35 per dozen. Japanned chest handles is another of the lines to show an advance in price. No. 1205 by 3½ in. is quoted at $2.45 dozen, and No. 1205 by 4 in., at $3.40 per dozen.

Ruby Lantern Globes Showed Higher Range

Toronto.

LANTERN GLOBES.—An advance of approximately 10 per cent. has been made effective in some quarters for ruby lantern globes, common type, new price being $4.50 per dozen in small lots, or $3.80 per dozen in gross lots. Short ruby lantern globes hold unchanged, price being quoted in one quarter at $3.75 per dozen in small lots and $3.25 per dozen in gross lots.

Gas Toasters And Ice Cream Dishers Up

Toronto.

TOASTERS, DISHERS.—An advance of 15c per dozen has been made effective on the Androc gas toaster, making the selling price now $1.50 per dozen. Gilchrist ice cream dishers show an advance of approximately 10 per cent, new prices prevailing being as follows: No. 30, $2 each; No. 31, $1.90 each; No. 33, $2.25 each.

Hydrometers Advance 25 Per Cent. On List

Toronto.

HYDROMETERS.—An advance of 25c on list price of Break Not hydrometer syringes has been made effective, new list price being $1.25. During the year there was a decline of 25c in the original list price, so the increase now restores the original price. This instrument is designed for use in testing storage batteries. The larger sized shop hydrometer holds unchanged in price at $7.80 each list price. Parts for instruments are quoted as follows: Hydrometer float for Break-Not, 40c list; glass jar, 30c list; extra bulb, 45c; extra tips, 30c. Discounts: Less than 12, 25 per cent.; quantities of 12, 30 per cent.; quantities 48, 35 per cent.

Magneto Terminals And Lamp Receptacles Advance

Toronto.

AUTO ACCESSORIES.—An advance of approximately 33 1-3 per cent. on list price of magneto terminals has been made effective. New price is 20c per dozen, former price being 15c. dozen. This terminal is made of brass designed to be forced into end of cable and wire slipped under loop and soldered. Porcelain lamp receptacles also show a substantial advance on list prices, miniature size is now quoted at 20c each list, and candelabra at 25c each list. Magneto terminals are subject to following discounts: Less than 500, 25 per cent.; 500, 30 per cent.; 2,000, 35 per cent. Lamp receptacle discounts: Less than 25, 25 per cent.; 25, 30 per cent.; 100, 35 per cent.

Automobile Drivers Advance 5c On List

Toronto.

AUTO DRIVERS.—An advance of 5c on list price of the Auto-driver, designed especially for use on automobile work. Full polished 3¼ in. is now quoted at 55c list each and 5 in. at 65c each list. Latter size shows advance of 10c on list. Discounts: Less than 24, 25 per cent.; 24, 30 per cent.; 96, 35 per cent.

Binder Twine Likely Higher Than Last Year

Toronto.

TWINE, CORDAGE.—While the price of binder twine had not been announced at the time of going to press there is every likelihood that it will be announced in the near future. There are strong indications that the price will be considerably higher than the opening price of last year. It is understood that a meeting of the twine manufacturers with the United States Department of Food Control was held in Chicago during the present week. Some details have yet to be arranged before the price for the various classifications of twine can be announced. The opening price for binder twine in April last year was 15⅞c for 500-foot length. This price was later advanced to 19½c per pound. Indications seem to point to a price in the neighborhood of 7¼c per pound higher than the opening price of last year, or from 3½c to 4c per pound higher than the price at the close of the selling season last year. There will be plenty of twine this year as manufacturers have been able to obtain sufficient supplies of the sisal fibre. As announced in HARDWARE AND METAL last week, the price of fair current manila fibre had been fixed by the United States Department of Food Control at 26c per pound. This action forestalls the possibility of an advance in price of rope, as the established price is 2½c per pound lower than prevailing price of similar grade of fibre at time price was established. In the face of this condition it would seem that there is no chance of an advance in the price of rope. In fact the rope market seems likely to hold at present levels. Manufacturers will in all probability not take bookings but will sell on the basis of immediate shipment. The season is far-spent now and there would be little need for taking booking orders for spring delivery. Quotations on rope hold unchanged.

Embargo On Higher Grades Of Refined Oils

Toronto.

OILS, GASOLINE.—The United States Government has placed an embargo on shipment of higher grades of all refined oils. This provision is not likely seriously to affect the Canadian market. The higher grades of coal oil, such as Palacine, are practically the only lines to be affected. Compared with amount of other grades of coal oil used there are very small quantities of this class of oil in use. The particular grade noted is refined from Pennsylvania crude. The market for gasoline is holding steady. Mid-continent crude oil has not yet registered an advance and there is now an accumulation of stock of gasoline on this continent due to lack of tonnage to carry commodity overseas. Gasoline is quoted at 31½c per gallon.

Some Sizes Of Wrought Iron Pipe Up

Toronto.

WROUGHT PIPE.—New net list prices have been issued on wrought iron pipe, which provides for higher prices on certain styles of pipe. Standard butt-weld and standard lapweld pipe remain unchanged in price. Standard lapweld genuine wrought iron pipe S/C shows an advance on sizes 4½ in. to 8 in., both black and galvanized, while extra strong genuine wrought iron pipe P. E. shows an increase in sizes 4½ in. to 8 in.

Stoves, Ranges And Furnaces Higher

Toronto.

STOVES, ENAMELWARE.—An advance of 10 per cent. has been made effective on the price of stoves and ranges, together with furnaces for July and August shipment. This advance is in addition to one of 5 per cent. recently made effective. Higher probable costs, together with the firm situation for raw materials, have been the deciding factor tending toward higher prices. Gas ranges and electric ranges are not included in the advance. Enamelware trade is reported fairly good.

Wire Nails And Wire Holding Steady

Toronto.

NAILS, WIRE.—The market for wire nails is holding steady at $5.20 per hundred pounds base. Booking business on nails is reported good in some quarters. Wire products were also in steady market with base price of smooth steel wire unchanged at $6.25 per hundred pounds. Prices on other wire commodities will be found in current quotations.

Shipments From Canadian Mills Improve

Toronto.

IRON AND STEEL.—Wholesale dealers in iron and steel report Canadian mills have been making very good deliveries of iron and steel within recent weeks. Shipments from the United States on the other hand have been practically cut off for the time being. Now that the railway situation is beginning to show improvement the movement of raw materials and coke have been greatly facilitated, and operations are being conducted more nearly on a normal basis. There is a fairly good demand for iron and steel in the local market.

Situation in Steel Sheets Unchanged

Toronto.

SHEETS, PLATES.—The situation in black and galvanized steel sheets holds unchanged as outlined in our report last week. Apparently there has been some misinterpretation of the recent railway embargo on goods coming from the United States in value of $100 or more. This was evidently the foundation for the report that all gauges of sheets had been placed on the embargo list. That was in effect true, for it applied to all commodities and embraced steel sheets as well as other manufactured products. This measure was only a temporary one to relieve the freight situation. It is understood that it has now been raised. In that event black sheets will again be in the same position as formerly, namely, embargo only on No. 10 gauge and heavier. Local dealers report stocks of lighter gauges of sheets are fairly heavy with the prospect of fair receipts of No. 10 gauge and heavier in the near future.

Discount 7½%.

Requirements For Boiler Tubes Met

Toronto.

BOILER TUBES.—Up to the present time there has been no hardship to industrial concerns through being unable to secure needed boiler tubes. Dealers have been able to get permits in each instance where it has been shown that the tubes have been urgently needed. While sales necessarily have been held up pending receipt of permission to sell, still these permits have come through in due time. Prices held unchanged.

Solder Again Goes To Higher Levels

Toronto.

LEAD AND ZINC PRODUCTS.—Due to strong market for tin there has been a continued strong market for solder, prices having been advanced in some quarters in the neighborhood of 2c per pound. Guaranteed is now quoted at a range of 47c to 48c per pound, strictly at 44c to 45c, commercial at 40c to 41c, wiping solder at 39c to 40¾c, and solder wire at 50¾c to 51½c per pound. Demand for solder is reported active, buying evidently being stimulated by the upward trend of prices.

Ammonia And Cleaning Powders May Be Scarce

Toronto.

AMMONIA, CLEANING POWDERS.—Owing to the scarcity of raw materials ammonia and cleaning materials are very firm in price. Recent advances have been recorded in these lines. Ammonia sulphate, one of the principal ingredients of ammonia powders, and soda ash, the principal ingredient of cleaning powder, have been mounting upward in price ever since the war has made a scarcity of these materials.

Ingot Tin Again On Upward Trend

Toronto.

INGOT METALS.—Activity in tin was again the feature of interest in the metal market during the week. Pig lead was also in firm position. Demand for metals was quiet on the whole, activity being confined mostly to tin, with moderate demand for other commodities.

COPPER.—The market held steady locally at 30c to 32c per pound. Fixed price established by the United States Government is acting as a steadying factor. Production at the mines is below capacity, but improvement is expected with better weather conditions. War requirements of Allies are now consuming the major part of output of mines.

TIN.—The trend of the market was steadily upward. Quotations were made in the local market on the basis of 90c per pound firm. Last week the range of quotations was from 86c to 90c per pound. Dealers are in a doubting state of mind as to how the new licensing system of the British Government is going to work out. They do not know whether to expect that smaller quantities of tin will be allowed to come to Canada or whether they will hold about on the recent quantity. Primary markets were strong and active.

SPELTER.—The fixing of the price for best grades of spelter has apparently had very little effect on the general market quotations. Prices remain unchanged locally at 9¾c to 10½c per pound, with a moderate demand reported.

LEAD.—There was a firmer trend to the market for pig lead, with prices showing an upward tendency to the extent of ¼c to ½c per pound, making the quotations from 9½c to 10c per pound. Prospects of a fair export demand in the primary markets has created a firmer feeling. Demand in the local market is somewhat light, which is incidental to this season of the year.

ANTIMONY.—Quotations held unchanged in the local market at 16c to 18c per pound, with demand slow. In the primary market there was dullness during the week, and offers to sell were made at slightly lower figures than during the previous week.

ALUMINUM.—Steadiness characterized the local market for aluminum, quotations being made on the basis of 60c per pound. There was a firmer undertone to the commodity in the primary market.

PIG IRON.—Deliveries of coke to the furnaces have been sufficient to keep them in operation. There has been improvement in this respect, and with milder weather conditions and the opening of navigation in the near future movements of coke by water route should greatly assist in production. Quotations held unchanged at $49.50 per ton for foundry iron.

LONDON MARKETS

LONDON, Feb. 28.—Prices have been in a steadily upward direction during the week, advances having been recorded in a number of lines, including oil heaters, wood clothes pins, calf meal, metal polish, stove polish, crosscut saw sets, grindstones, solder. Business here has been just fair during the week, although Thursday, Feb. 21, was a big day for London merchants by reason of the fact that they held their annual Dollar Day on that date. Special sales, helped by newspaper advertising and window displays, attracted a lot of extra business for the day. Collections are good.

Oil Heaters Show An Upward Tendency

London.

HEATERS.—Higher prices to the extent of 10 per cent. have been made effective. Following are the prices now prevailing on Perfection line: No. 525, $6.50 each; No. 530, $7.25 each. Discount on above lines is 25 per cent. There has been a steadily upward trend to this line of stoves within recent months. There has been a heavy demand for heaters during the past winter.

Nails Holding Steady

Prices on standard steel wire nails have held in a steady position during the month at $5.20 per hundred pounds base. Cut nails are quoted at $5.60 per hundred pounds base.

Clothes Pins And Steel Wool Go Higher

London.

CLOTHES PINS, STEEL WOOL.—An advance has been made effective in wood clothes pins, which now makes the price of common round pins 95c per case of five dozen. Steel wool in family size is quoted at the following prices: No. 1/0, No. 2/0, No. 1 and No. 2, $1.10 per dozen packages.

Prices on Eradium Bulbs

Prices on Eradium bulbs are being quoted at $2.85 per dozen. The use for these bulbs is to hang on electric lamps or switches. They gather light in daytime and give off a dull light at night, helping thereby to locate the light or switch.

Glass Prices Firm; Rope Holding Steady

London.

GLASS, ROPE.—There is a firm situation in the glass market which seems to indicate higher prices in the near future. Quotations during the week held unchanged at 40 per cent. off list for single and double diamond and 25 per cent. off list on cut lights. Prices on rope are holding steady. In view of the establishment of a fixed price for Manila hemp by the United States Government it would seem that the possibility of an

advance has been forestalled. Pure Manila is quoted at 39c per pound base, British Manila at 33c lb. base, New Zealand hemp at 33c base, and sisal rope at 27½c lb. base.

Crosscut Saw Prices Have Been Arranged

London.

SAWS, SAW SETS.—Net prices of crosscut saws have now been arranged on the basis of the recent advance. Following are the prices applying to Maple Leaf Lance No. 1, Premier, Racer, Improved Racer, Arrowhead, Disstons, Simonds: 5-foot, $4.95 each; 5½-foot, $5.85 each; 6-foot, $6.60 each. Higher prices have been announced on crosscut saw sets, Lincoln now being quoted at $8.25 per dozen and Whiting at $6.50 per dozen.

Calf Meal Shows Higher Price Range

London.

CALF MEAL.—Increase in the price of calf meal has been announced during the week by some wholesalers. Royal Purple in 25-lb. bags is quoted at $4.65 per 100 pounds; in 50-lb. bags at $4.50 per 100 pounds; in 100-lb. bags at $4.40 per 100 pounds.

May be Shortage on Dry Cells

There is a probability of a shortage on dry cells owing to the United States embargo on chemicals. Factories and jobbers advise their customers to anticipate their wants on this line. Prices are holding steady at present.

Metal Polish And Stove Polish Advance

London.

POLISH.—Higher prices have been made effective on Brasso metal polish, Silvo silver polish, and Zebra stove polish. New prices on Brasso metal polish are as follows: No. 3 tins, $1.10 dozen; No. 6, $2 dozen; No. 12, $4.20 dozen. Silvo silver polish prices: No. 3 tins, $1.10 dozen; No. 6, $2 dozen. Zebra stove polish is quoted at $1.10 per dozen tins.

Grindstones Higher; Sharp Advance Solder

London.

GRINDSTONES, SOLDER.—An advance has been recorded in the price of grindstones during the week, which makes the price for 20 to 40 lb. size $2.20 per 100 lbs.; 40 to 200 lbs., $2 per 100 lbs. There has been a sharp advance in solder due to the upward trend in the market for ingot tin. Half-and-half solder is now quoted at 46c per pound.

Activity In Supplies For Syrup Making Time

London.

PAILS, SPILES, CANS.—Now that the maple syrup time is approaching there has been considerable activity in supplies needed for this industry. Sap pails, straight and flaring, are quoted at $19.50 per 100. Sap spiles are quoted at $12 per 1,000, or $1.35 per 100. Syrup cans are quoted at following prices: 1-gallon, $22.50 per 100; 2-gallon, $40 per 100; 5-gallon, $65 per 100.

White Lead in Oil Steady

The market for white lead in oil is holding steady on the basis of $15.70 per 100 lbs. in ton lots for pure grade and $16.05 per 100 lbs. for quantities of less than ton lots.

Netting, Harvest Tools Unchanged

Price of poultry netting holds unchanged at 15 per cent. off list for Canadian 1-inch and 2-inch mesh. Harvest tools are still quoted on the basis of 25 per cent. off list. Screen wire, black, in 100-foot rolls, is quoted at $3 per 100 square feet. Bronze screen wire is quoted at 14c per square foot.

Spades and Shovels, Lawn Mowers

Quotations on spades and shovels remain unchanged at 30 per cent. off list for firsts, 20 and 2½ per cent. off list for seconds, and 5 per cent. off list for fourths. Lawn mowers are quoted at a discount of 40 per cent. off list.

Linseed Oil Again Up 7c Per Gallon

London.

LINSEED OIL, TURPENTINE.—Due to the acute situation in the flaxseed market the price of linseed oil has been advanced an additional 7c per gallon, which, together with the advance of 10c per gallon announced last week, makes a total advance of 17c within recent days. Prices now quoted are as follows: 1 to 2 barrels, raw $1.72 per gallon, boiled $1.75; 3 to 5 barrels, raw $1.71, boiled $1.74; 6 to 9 barrels, raw $1.69, boiled $1.72 per gallon.

Turpentine holds steady at the decline recorded last week. In single barrel lots the price is 72c per gallon, and in 2 to 4-barrel lots 71c per gallon. In 5-gallon lots the price is 82c per gallon.

WINNIPEG MARKETS

WINNIPEG, February 28.—Markets for the week again show an upward trend in general with the exception of eave trough, conductor pipe and conductor pipe elbows, all of which register a decline. Among the advanced lines appear belt rivets, Air-O-Lite shades, sheep-shearing machines, bolt clippers, tube expanders, cut nails, oil heaters, linseed oil and window glass. Business continues brisk, while bookings for fall business show up well.

Eavetrough And Conductor Pipe Decline

Winnipeg.

EAVETROUGH, CONDUCTOR PIPE.—The recent declines in galvanized sheets has been the means of reducing some of the manufactured products, and this week's markets show reductions in eave trough, conductor pipe, conductor pipe elbows, metal siding, metal shingles and corrugated iron. A few of the ruling prices are herewith given:

O.G. Eavetrough—8 in., $6.50; 10 in., $7.20; 12 in., $8.45; 15 in., $11.60 per 100 ft.

Conductor Pipe, Plain or Corrugated—2 in., $7.55; 3 in., $9.15; 4 in., $12.05; 5 in., $16.40 per 100 ft.

Conductor Pipe Elbows—2 in., $1.80; 3 in., $2; 4 in., $3.35; 5 in., $8.30 dozen.

Rainwater Cutoffs—3 in., 59c; 4 in., 72c each.

Oil Heaters Make Further Advance

Winnipeg.

OIL HEATERS.—During the past few months Perfection oil heaters have been steadily advancing and new prices just received are again on the upward move, making to-day's prices as follows: No. 525 japanned, $4.85 each; No. 530 nickel plated, $5.45 each; No. 630 blue enamel, $6.95 each.

Tinned Belt Rivets Register Big Advance

Winnipeg.

TINNED BELT RIVETS.—Manufacturers of belt rivets have just announced an advance in the extra for tinning, the previous price being 3½c lb., which now advances to 8c per lb., making a net advance for all tinned belt rivets and burrs of 4½c per lb. over previous prices.

Cut Nails Increase 55c Per Keg

Winnipeg.

CUT NAILS.—Cut nails again move up in price, the latest advance being 55c keg over former quotations, and are quoted to-day at $6.55 base per keg f.o.b. Winnipeg.

Tube Expanders Go 10 Per Cent. Higher

Winnipeg.

TUBE EXPANDERS.—New prices just to hand show an approximate increase of 10 per cent. on Dudgeon pattern and Standard sectional tube expanders, and bookings are now being accepted for fall shipment at the following prices: Dudgeon pattern 1½ in., $3.50; 1¾ in., $3.50; 2 in., $3.50; 2¼ in., $4.20; 2½ in., $4.90; 3 in., $6.30 each; Standard sectional, 2 in., $6; 2 in., $7.50; 3 in., $11 each.

Window Glass Goes 15 Per Cent. Higher

Winnipeg.

WINDOW GLASS.—Much has been said recently regarding the window glass situation which at the present time looks serious as regards further supplies. Mills will only accept orders for shipment at their convenience, and can make no promises as to deliveries. Prices on coke continue to advance, and coupled with wage increases are given as the main reasons for the recent advance which amounts to approximately 15 per cent. Unless some relief is found, further advances will no doubt follow. The prices just announced are as follows:

Window Glass—	Single Per 100 ft.	Double Per 100 ft.
Up to 25 inch	$12 00	$17 50
40 inch	13 25	20 00

50 inch	16 75	23 00
60 inch	17 50	23 50
70 inch	18 75	25 00
80 inch	....	27 00
85 inch	....	30 00
90 inch	....	32 00
95 inch	....	33 00
100 inch	....	38 00
105 inch	....	42 00
110 inch	....	48 00

Single lights, 33 1-3% off list.

Sheep Shearing Machines Up; Other Lines Steady

Winnipeg.

SHEEP SHEARING MACHINES.—Manufacturers of Stewart sheep shearing machines have revised their list on No. 8 and in consequence the price is now advanced from $9.95 each to $11.25 each. All other clippers and parts remain unchanged.

Linseed Oil Advances 13c Gal.; Turpentine Firm

Winnipeg.

LINSEED OIL, TURPENTINE.—The inability of crushers to get sufficient flax seed for their requirements during the past month, due to traffic congestion, has resulted in higher prices during the past two weeks on linseed oil. This has advanced 13c per gallon, and ruling prices to-day are as follows: Raw, $1.78 gal.; boiled, $1.81 gal.

The turpentine market, although very firm, shows no advance over previous prices, which are as follows: Barrels, 80c gal.; ½ barrels 83c gal.; 5 gal. lots 85c gal; 1 gal. lots 85c gal.; plus the usual extras for containers.

Bolt Clippers Up; Also Lamp Shades

Winnipeg.

BOLT CLIPPERS, LAMP SHADES.—Owing to further increased costs, new prices have just been announced on the easy bolt clippers, which move up about 10 per cent. over old figures. To-day's ruling prices are given below:

New easy No. 0, $3.55; No. 1, $4.75; No. 2, $6.65; No. 3, $8.55 each.

Owing to the difficulty of securing materials prices on Air-O-Lite lamp shades show an advance of 10 per cent. To-day's ruling prices are given herewith:

No. 307, opal ribbed, $1.00 each; No. 307, green ribbed, $2.00 each; Nos. 317 and 318, fancy, $2.00 each.

Ventiplex Sweat Pads Advance 25c Dozen

Winnipeg.

VENTIPLEX SWEAT PADS.—Due to increased costs in raw materials, new prices have just been issued on Ventiplex sweat pads, which show an increase of 25c per doz. throughout over former quotations.

PITTSBURG MARKETS

PITTSBURG, Pa., Feb. 28.—While the weather has been colder the past few days, it has, on the whole, been relatively favorable for railroad operation, and it may be said in general there has now been favorable railroad weather since February 6. It continues to be the case, however, that the chief effort of the railroads is in the direction of moving loaded cars to destination so as to clear the congestion, and relatively little has been done thus far towards furnishing the furnaces and mills with more cars for loading. The result is more coke at blast furnaces, resulting in more pig iron being produced, while the shipments of finished steel are only slightly increased.

There is no doubt that the railroads are making excellent progress in their clean-up and that congestion is being reduced as rapidly as could be expected. Large shippers, familiar with the situation, seem to be well satisfied even though definite results, in heavier shipments of finished steel, have been small thus far. They are quite ready to give the railroads two or three weeks more time in which to get into really fair operating condition.

Coke Shipments Light

Supplies of cars in the Connellsville coke region in the past week have been altogether disappointing, as they certainly showed no material improvement over those of last week, and may even have been lighter. The Connellsville *Courier* reports last week's shipments from the Connellsville and lower Connellsville region, at 282,359 tons, against 275,907 tons the week preceding. It may be estimated that shipments of about 375,000 tons a week at least are required to meet the requirements of furnaces depending upon this region, including certain stacks in Canada. At the moment, position as to coke than would be indicated by the shipments for the reason that in the railroad clean-up a great deal of coke that was stalled en route was moved forward to furnaces, and, with the furnaces depending upon their by-product, the ovens were fairly well supplied; it may be estimated that the furnaces are operating at 75 to 80 per cent. of capacity. This rate cannot be maintained, however, unless shipments are heavier than as just reported.

Shipments of finished steel from mills have averaged in the past week a trifle more than 60 per cent. of capacity, against a previous average this year of between 55 and 60 per cent., but with some weeks showing barely 50 per cent. As blast furnace operations show a much higher percentage than finished steel shipments, there must be accumulation at some point. In some cases pig iron is accumulating, while in the case of many steel works with furnaces attached the production of steel has been increased, the steel accumulating in ingot or billet form. Some erroneous reports have been published, referring to much better mill operations, and these may be based upon increased ingot production, sight being lost of the fact that the steel is not all carried through the finishing processes and actually shipped. The mills, indeed, are indisposed to finish more steel than they can ship, as yards and warehouses are already well filled, and it is more economical to reduce stocks as car supplies increase.

Purchases For Railroads

Reports from Washington are that the United States Railroad Administration expects in the very near future to place large orders for the purpose of rehabilitating the railroads now that the Senate has passed the railroad control bill, and the House will pass its bill within a few days. It has been known to the steel trade for quite a while past that the authorities at Washington had carefully studied the situation, and formulated plans for the placing of large orders for equipment, and probably also for additional terminal facilities, and perhaps some trackage. Reports from Washington are that as much as $500,000,000 to $750,000,000 may be spent on the program. One-half the smaller amount would cover, or nearly cover, 2,000 locomotives and 100,000 cars, leaving a large amount for other work, and orders of the size mentioned would mean a great deal to the shops and mills.

Actual market transactions continue extremely light. Buyers are indisposed to plan ahead as conditions are all so uncertain, and as to immediate requirements, their orders are already in, and have been for a long time. What they want is shipments. Fully two-thirds of the steel being shipped is for war purposes, directly or indirectly. With the practical certainty that there will be no legislation by Congress in the near future to empower the Government to fix iron and steel prices, the question is whether the authorities at Washington will make an effort to revise the agreed prices, which late in December were pronounced as effective to Mar. 31. Producers insist that there should be no revision at this time. As production has been greatly curtailed, with a consequent increase in costs, and is likely to increase very considerably in the next few weeks, Washington will hardly press the matter of price revision for a while.

MANUFACTURERS DESIRING WESTERN representation will find that we have had long experience with Far Western hardware trade. Would be glad to correspond with those wishing live connection in Alberta and British Columbia or Saskatchewan. Satisfactory references furnished. Our offices in Calgary, the centre of commercial activity in the Far West, permit of prompt distribution. Write to-day. Box 362, Hardware and Metal.

WEEKLY PAINT DEPARTMENT

Spring Campaign Started

Merchant in N.B. Already Active—Selling Paint Insurance—Community Welfare—Appearance Usually First Consideration

ALREADY retail merchants in many parts of the country are hammering away on their spring drive on paints, and a very interesting paint talk in the form of an advertisement came to light a few days ago. In looking over the St. Andrew's, N.B., *Beacon*, the advertisement of G. K. Greenlaw stood out clearly and distinctly, and extracts are reproduced herewith, and the line of attack followed by this merchant may be successfully employed by other merchants.

The ad. starts off in black face type with this announcement:

"Remember this! Paint insurance on your buildings is just as important as fire insurance." Right there at the start this merchant creates a line of thought which will undoubtedly arouse interest. The individual to-day reads an announcement, and if you give him something to think about he will remember it. He will be curious and follow up the line of thought which you may suggest. The consumer to-day wants to know, and by showing him that you can supply the knowledge about the line of goods you sell, you will be the one to get his trade.

Following Up the Heading

But what else does this merchant say following the startling statement which heads his ad.? Does he carry the idea along or does he let it drag? Read: "Fire may never come, but the deteriorating effect of the weather on buildings of every kind is certain, unless protected by paint.

"Unprotected wooden surfaces crack and become open and porous, then decay and rot starts. This means expensive repairs, which can all be avoided by the regular use of paint.

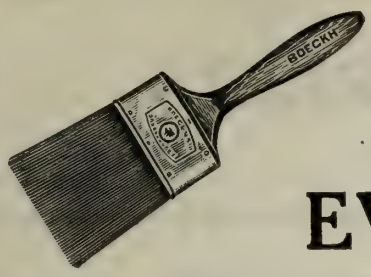
"Examine your buildings now—a little money spent in painting at once may save you much larger expenditure a little later.

"——— paint, prepared, is the ideal paint for outside use. It is made of the purest and best materials, thoroughly mixed and ground by powerful machinery according to special formulae, the result of years of experiment and experience in paint making."

Information What Public Wants

There is far more in an announcement of this kind than in one which contains the bare statement that you sell paint. There is real information about what the product will do besides a boost for the particular line this merchant handles. The consumer reading an advertisement of this nature gets an outlook on the paint question which is more than likely to create an interest which can be turned into sales.

Once Again—Conservation



The cry of conservation can be and should be played up strongly by every merchant to-day. A careful study of the paint situation will reveal opportunities for sales which every merchant wants to secure. It is only by making sales that profits will accrue, and it would seem that there should be a splendid sale of paints and varnishes this coming season.

The merchant who takes an interest in the welfare of his community wishes

(Continued on page 54.)

A very attractive window which is bound to secure attention. Windows well dressed are splendid salesmen and by developing these the merchant has a great opportunity to increase his sales.

A BRUSH FOR EVERY PURPOSE

When your customers buy Brushes and Brooms—they want to get as long service from them as is possible, and also want the kind that are adapted to his or her particular requirement.

There is a BOECKH BRUSH OR BROOM for every known use.

They give a maximum of service because they are made of the very best materials by expert Brush and Broom makers.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Feb. 28.—The paint markets are active this week in so far as the preparation and shipment of spring orders is concerned. There is a general feeling that it will be better to get shipments forward early than not to have the goods when wanted, and some retailers are having goods shipped out forthwith. The only advance of the week is in linseed oil and as a matter of fact the situation is such as to have caused some to sell in single barrel lots only, at open prices. Single barrel orders are being filled by some at $1.70 for raw and the usual advance for boiled. Seed deliveries continue to give great concern to crushers and to the paint men too. A few cars have come through but nothing like what is required. Turpentine holds steady, although it is weaker in the south. White lead in oil, putty, shellacs and varnishes are all unchanged. Whiting will be supplied in sacks of 224 pounds this year instead of in barrels and casks.

Another Advance Makes Linseed Oil One Seventy

Montreal.

LINSEED OIL.—There is not a great deal to add to the report of the situation on linseed oil as made in these columns last week. It is stated that relief in the condition of traffic has been slight and that it will take weeks to overcome the accumulation of shipments from all sources. Some cars of flaxseed have been delivered and crushing is now under way. Altogether these deliveries are small and infrequent. Customers who require quantities of oil are served as well as stocks will permit and distribution is made for the most part in limited lots. While raw oil is quoted at $1.70 and boiled for $1.72½, delivery is dependent upon supplies of seed from the West. The general tendency is decidedly firm with little inclination to accept orders excepting for delivery after 30 and 60 days.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
Single barrels only	$1.70-$1.72½	$1.73-$1.75
5 to 9 barrels	....	....
10 to 25 barrels	....	....

Turpentine Is Weaker In South But Held Here

Montreal.

TURPENTINE.—There is a routine amount of business in turpentine but of course it is not large. There is a tendency at this season of the year to a somewhat easier feeling, but in view of all the unique conditions obtaining at the present time there is not likely to be any immediate lowering of quotations. As a matter of fact there is a tendency to ask a few cents more in some quarters, although 70 cents will still buy requirements here. Better deliveries were responsible for some weakness in the United States market but a subsequent statement that deliveries from now would not be guaranteed has had, and may continue to have, a steadying effect to the markets there.

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.69-$0.72
1 barrel lots	0.70- 0.75
Small quantities	.... - 0.83

Small Sales For Putty And Glass Are Reported

Montreal.

GLASS AND PUTTY.—As is to be expected for the mid-winter season, there is very little interest in the putty situation and this applies also to glass. Dealers' requirements are limited. Putty is unchanged as quoted herewith and glass prices, while firm, have recorded no new high levels. It is quite possible, that further upward revisions in glass discounts may be made within the near future.

Standard Putty—	100 lbs. per 5 ton	1 ton	Less
Bulk, in barrels	$3.75	$3.90	$4.10
Do., ½ barrels	3.90	4.05	4.25
Do., 100 lb.	4.60	4.75	4.95
Do., 25 lb.	4.60	4.75	4.95
Do., 12½ lb.	4.85	5.00	5.20
3 and 5 lb. tins	6.60	6.75	6.95
1 and 2 lb. tins	7.10	7.25	7.45

Pure linseed oil putty—$1.75 per 100 lb. advance on above prices.

Glaziers' putty—$1.35 per 100 lb. advance on above prices.

Considerable Activity For Paints And Varnishes

Montreal.

PAINTS AND VARNISHES.—Makers and jobbers are busy with the preparation and shipment of spring orders and there is considerable activity among the trade. There is a tendency this year to buy with even greater care than usual and while from some districts there may not be as much gallonage asked for as in some seasons, the trade is buying what it estimates can be sold within a reasonable time. Some want their paint and specialties sent forward at once which has been brought about through an appreciation of the transportation problem. It is generally realized now, also, that from price standpoint, there will be no advantage in deferring the purchase of the season's requirements. All lines are firmly held at unchanged prices.

White Lead In Oil Is Quiet But Still Firm

Montreal.

WHITE LEAD IN OIL.—It would be amiss to say that there is a great amount of trade for this commodity. Immediate trade requirements are small and just a routine amount of sorting is being done. For such orders as are being prepared for spring shipment, however, a fair amount of stock will be absorbed, although it is generally admitted that the better demand and sale for the mixed paints has somewhat decreased sales of the white lead in oil. There is a firm tendency in U.S. centres even though the trade there is quite dormant for the immediate present. Quotations: Five ton lots, $15 per 100 lbs.; ton lots $15.50 and lesser lots $15.85 per 100 lbs.

Whiting In Barrels Not To Come This Year

Montreal.

WHITING.—The scarcity of timber suited to the making of barrels and casks used in the transportation of whiting from the English market is causing a change to be made. This will now be delivered in bags containing 224 pounds and the trade will be unable to secure their supplies in the former containers to any great extent. Prices for this commodity are expected to be fixed in the near future and will probably be somewhat higher than those obtaining a year ago. Dealers wanting the product will do well to anticipate their needs, say importers, in view of the likely delays in securing import shipments.

TORONTO

TORONTO, Feb. 28.—The acute situation in linseed oil continues the dominating factor in the paint and oil trade. Crushers have been unable to get supplies of seed forward and paint manufacturers in consequence have been unable to get sufficient supplies of oil for manufacturing paint. Turpentine showed a slightly weaker tendency in the primary markets during the week, but locally quotations were unchanged. Glass continues in strong market, with sup-

plies in some sizes greatly depleted. Booking business is about completed with some paint manufacturers and shipment of goods is now proceeding against contracts for spring delivery. Shipments may be held up in some instances on account of the linseed oil situation.

Supplies Of Flaxseed Still Insufficient

Toronto.

LINSEED OIL.—There was a steadily higher trend to the market for flaxseed during the week, prices having advanced in the Winnipeg market to the extent of 14c per bushel for cash seed. On Wednesday of last week quotations were made on the basis of $3.45 per bushel, and on Wednesday of the present week at $3.59 per bushel. On Tuesday of the present week there were 34 cars of flaxseed inspected at Winnipeg, but for the remaining days of the week inspections ranged from 4 to 9 cars per day. Presumably these cars are moving south into the United States, as shipments to Eastern Canada have been practically nil during the week, and there seems little prospect of getting supplies in the near future. Some of the paint manufacturers have been unable to get sufficient supplies of linseed oil for their requirements, and unless a change in the situation develops in the near future deliveries of paint on spring contracts may be considerably hampered. Some dealers withdrew from the market entirely during the week owing to inability to get further supplies. Other concerns were letting their supplies out very sparingly in small lots to their customers. Quotations quite generally were on the basis of $1.72 per gallon for raw linseed oil in single barrel lots. Price of oil bids fair to be maintained on a very firm basis, as there seems no prospect of immediate relief for the situation.

	Raw, Imp. Gal.	Boiled, Imp. Gal.
1 to 2 bbls.	$1.72	$1.75
3 to 5 bbls.	....	....
6 to 9 bbls.	....	....

Less than barrel lots 10c per gallon higher than single barrel price.

Shipping Conditions For Turpentine Uncertain

Toronto.

TURPENTINE.—There was a weaker tone to the primary market for turpentine during the week, prices in that quarter having sagged 1c per gallon during the week. There are light offerings in that quarter. With an embargo on shipment of turpentine by coastwise ships to New York and Boston and with shipments by rail greatly hampered owing to the freight congestion delivery of turpentine to the Canadian market gives promise of being still further restricted. A carload of turpentine reached the local market during the week, which had been on the way since the latter part of December, fully eight weeks. A carload of rosin which left at the same time as the turpentine has not yet arrived. Prices of turpentine in the local market held steady at a range of 70c to 72c per gallon in single barrel lots. Demand is somewhat light at this season of the year.

	Imp. gal. Imp. gal.
1 barrel	$0.70-$0.72
2 to 4 barrels	0.69- 0.71
5 gallon lots	0.80- 0.82

White Lead In Oil Is In Dull Market

Toronto.

WHITE LEAD IN OIL.—Dullness continued to characterize the market for white lead in oil. Demand is light. Activity was confined largely to deliveries on contracts previously entered into. There is an undertone of firmness in the market, due to the situation in linseed oil. Supplies of oil are very light at present, and prices are at high levels. Pig lead gave some evidence of firmness in the primary market during the week in view of the prospect of an export demand in the near future. Condition of demand for white lead in oil, however, is the dominating factor in the market at present. Until a greater demand develops prices will in all probability hold steady.

Paint Manufacture Restricted By Lack Of Oil

Toronto.

MIXED PAINTS.—Some paint manufacturers report their operations are being restricted at the present time owing to their inability to get sufficient supplies of linseed oil. As outlined in our report on linseed oil the crushers have been unable to get supplies of seed from the Canadian West. Railways have been unable to move the goods. If this condition maintains for any length of time it is probable that shipment of paints against spring contracts may be delayed in some instances. Booking business is now about completed in some instances, and manufacturers report the result has been quite gratifying. Shipment of goods is now proceeding.

Glass Likely To Advance In Near Future

Toronto.

GLASS. PUTTY.—The situation in glass market continues one of considerable strength. Owing to the manufacturing conditions in the United States dealers have been unable to replenish their stocks for certain sizes. Stocks are getting within narrow compass in the local market, especially on certain sizes. The conditions are such that announcement of a higher price for glass is highly probable in the near future.

Putty continues in steady market, with prices unchanged at those given in current quotations.

GOING AFTER TRADE WITH BULLETIN

(Continued from page 36.)

the store, but with the store itself, and the chances are that when they need some article that the store has advertised that it is there they will go to get it.

A Developing Business

Mr. Clarke has only been in business in this section for a few years, starting with a grocery store, that gradually became a thoroughly paying venture, and that was then further enlarged to take in a meat department. The latest addition has been the hardware department, that bids fair to put all the others into the shade. Each department has its separate quarters, though they are all connected by doorways. Mr. Clarke himself keeps a general oversight on the whole business, though he has associated with him his son, who has complete charge of the meat end of the business, doing all the buying of that and the fruit, while Mr. Clarke himself does all the buying for the grocery and hardware. In the few years that the business has been in operation it has grown into very fair proportions, and it is stated is a decided factor in the community.

SPRING CAMPAIGN STARTS

(Continued from page 50.)

to see the business places and the homes of every property owner maintained in a good state of repair. To the hardware merchant the opportunity for profit presents itself in promoting this spirit throughout his district. By suggesting paint, not only for appearance sake, but for its real preserving properties, the dealer provides his fellow citizens with a means of conservation and economy which will impress itself more and more on their minds as the results begin to show.

Study the Individual

It is probably true that the average citizen does not appreciate a blunt statement that his building needs a new coat of paint, but a study of the individual will reveal to the merchant a method of approach which will first lead to interest and later sales.

Appearance Usually First Consideration

Probably the first point to be considered is appearance. It is in this light that practically every one looks on paint, but even admitting that the sale might be effected on this basis alone, it should be well to point out that appearance is by no means the only consideration.

Point Out Advantages

Paint not only adds to the appearance of wood, iron or steel to which it may be applied, but it is a means of preservation which increases the value of a property. There you have it in a nutshell—Property value maintained, upheld, even increased. That goes right to the pocket of the property owner, and there are mighty few who won't spend fifty, one hundred, or two hundred dollars for paint when they realise that their holdings will increase in value probably ten times the amount spent.

To return to the wording of the ad mentioned above, it is well to "Remember this! Paint insurance is just as important as fire insurance." Paint insurance is a measure of protection against inevitable loss; fire insurance is against possible loss only.

THE LOUIS McLAIN LINE

WINNIPEG

THE label and trade-mark of Berry Brothers are equivalent to a varnish insurance policy. They constitute a guarantee that all products sold under them are the best that can be made for the uses intended.

The comprehensive finishing value of Berry Brothers' Varnishes, Enamels and Stains is recognized by most Varnish users and buyers. The sixty year record of these products for uniform excellence not only attracts customers but retains them.

You can build up a bigger Varnish business by pushing Berry Brothers' brands.

Write for our dealers price list and information on new quick selling specialties.

Then Jamieson's will boost for you

When you just "handle" Jamieson's Pure Prepared Paints and your customer comes in and picks them out of your stock you don't get credit for the good work they do. Your customer takes the credit. Didn't he choose the paint himself?

But—when you become the Jamieson Agent—when you come right out flat-footed and say, "Jamieson's is the Paint I recommend"—then Jamieson's Paints begin to boost for you.

Every can of Jamieson's Paint going out from the Jamieson Agent's store with his personal recommendation becomes a little agent for his good. The super-quality paint in that can tells the user many friendly things about the Jamieson Agent. It praises his judgment, it commends his honesty, it lauds his business ability, it hints at like quality in all his goods—it boosts.

If you are going to handle Jamieson's Paints—and you are going to if you have fairly considered your own interest—be advised to become a Jamieson Agent, a "booster" for Jamieson's.

Then Jamieson's will boost for you.

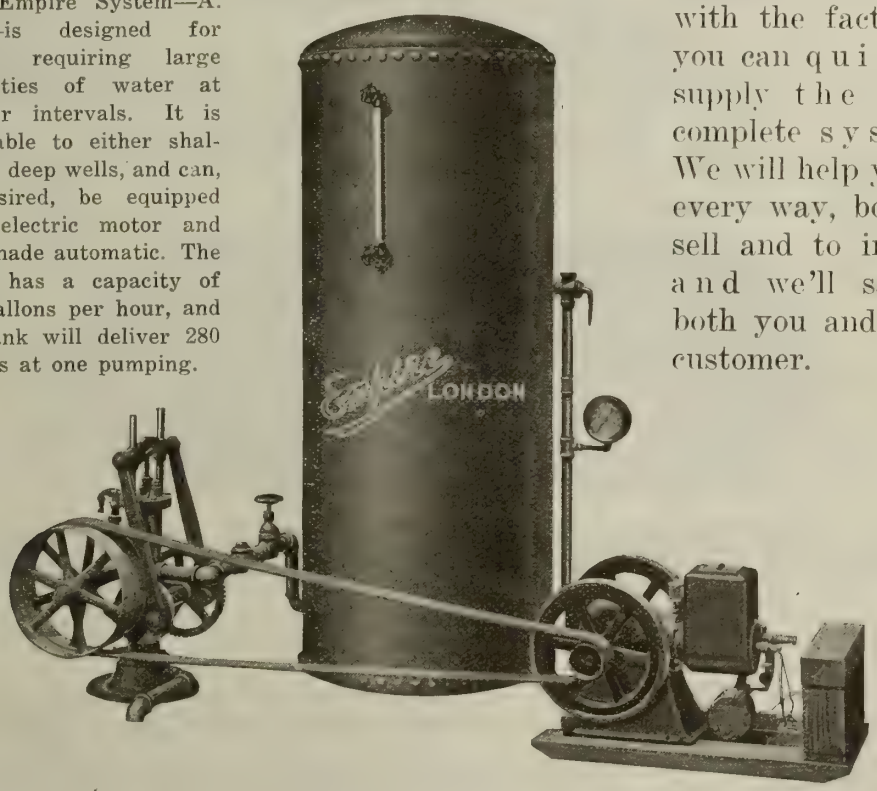
Farmers want modern conveniences



The installation of Empire Pneumatic Water Systems is mighty profitable business

This is the day of the Farmer. High prices and constant demand for his products have placed him in position to realize his cherished ambition to equip his home with "city" conveniences.

The first requisite to this end is a complete water system.

Here is profitable business waiting for progressive Hardware Dealers. Simply be prepared to get one when required. Acquaint your Farmer friends with the fact that you can quickly supply the best complete system. We will help you in every way, both to sell and to install, and we'll satisfy both you and your customer.

This Empire System—A. 1903—is designed for places requiring large quantities of water at regular intervals. It is adaptable to either shallow or deep wells, and can, if desired, be equipped with electric motor and thus made automatic. The pump has a capacity of 360 gallons per hour, and the tank will deliver 280 gallons at one pumping.

There are other Empire Pneumatic Systems suitable for country and suburban homes, golf clubs, etc. Get full information on these also and get after this good business.

Do your customers realize the economy of using

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

?

Just now everyone is thinking, talking and practising economy. This circumstance gives you opportunity to bring to the attention of your customers one of the outstanding features of Silkstone Flat Wall Colours.

Silkstone is cheaper than wall-paper (and decidedly more sanitary) lasts longer than other wall finishes, can be washed often, and won't rub off. It gives a beautiful soft, silky finish that will outwear any other wall covering. The economy of a finish that costs little to apply and lasts so long will forcibly appeal to all.

Set "Economy" to making sales of Silkstone for you.

If there is no Stephens' Agent near you write for our good proposition.

Hitch up with Gregg

For greater and more satisfactory business in Wagon Sets, Neckyokes, Eveners and Hitches link up with "Gregg" steel clad goods and the "Gregg" absolute guarantee. Extra heavy, straight-grained wood is reinforced with one-piece steel straps—guaranteed not to break.

The best way to buy "Gregg" goods is by the crate, each containing: 6 eveners and clevises, 6 neckyokes and 12 singletrees, packed so as to prevent damage in transit.

Any jobber in the West can supply you.

Gregg Mfg. Co., Limited

WINNIPEG

FROM our complete and varied stock of Electrical Supplies and Auto Accessories we can fill immediately any want.

"Service" is our slogan and our boast, and we strain every effort to live up to it.

We make "Service" mean more than the speedy filling of orders. It means that, of course, but also it means: Exactly the goods you want, in perfect condition, carefully packed.

Every order, be it small or large, is subject to the same degree of service—the same care, the same exactitude and the same speed in filling.

Great West Electric Co., Limited

WINNIPEG.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

SAGER AXES
always make Satisfied Customers

because of their sterling quality and excellent design. Our "Sager" special chemical process of tempering gives Sager axes their individuality.

Soo Line Logging Tools

Lumbermen prefer Soo Line Logging Tools because of the careful attention given to the design and their dependability when subject to hard usage.

We desire to impress upon the Merchants the necessity of placing orders NOW for Peavies, Pike Poles, etc., for Spring trade, as otherwise they may be disappointed in being unable to obtain deliveries.

Canadian Warren Axe & Tool Co.

Soo Line Logging Tools

TRANSPARENT SPAR VARNISH
One of the
DOUGALL QUALITY LINE

An extremely durable varnish for all outdoor work. Tough and elastic, it will stand the ravages of rain, snow, sun, cold, dirt and water—For front doors or motor boats—For carriages or battleships it has proved itself to be without equal.

Let us send you particulars of this and our other high-grade products—no obligation.

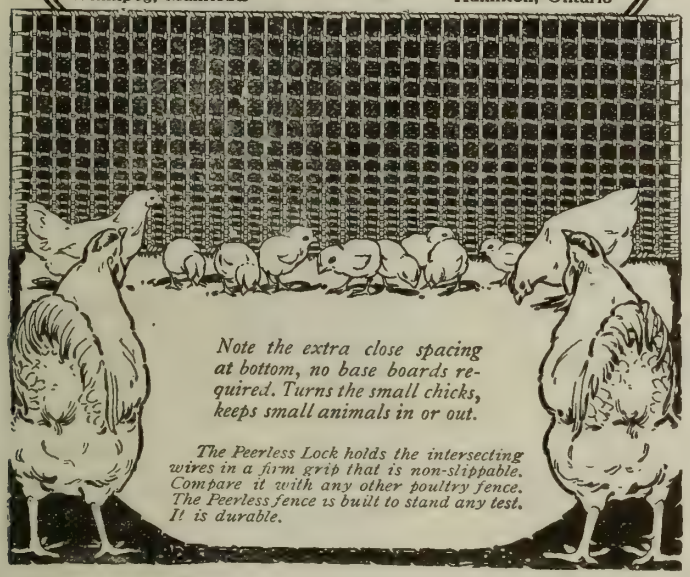
PEERLESS PERFECTION



The fencing upon which you can **build a reputation** and hold the fence trade of your territory. You can put up the strongest kind of a guarantee—we back you up.

We build this fence of open hearth steel wire with all the impurities burned out and all its strength and lasting qualities retained. Peerless poultry fencing is extra strong, heavily galvanized, can't sag, won't rust, never gets out of shape, keeps in and keeps out—both great and small.

Write for Dealer's Proposition

We show you where the big trade is for parks, lawns, cemeteries, fences plain and ornamental for farms, ranches, all purposes.

THE BANWELL-HOXIE WIRE FENCE CO., Ltd.
Winnipeg, Manitoba Hamilton, Ontario

Note the extra close spacing at bottom, no base boards required. Turns the small chicks, keeps small animals in or out.

The Peerless Lock holds the intersecting wires in a firm grip that is non-slippable. Compare it with any other poultry fence. The Peerless fence is built to stand any test. It is durable.

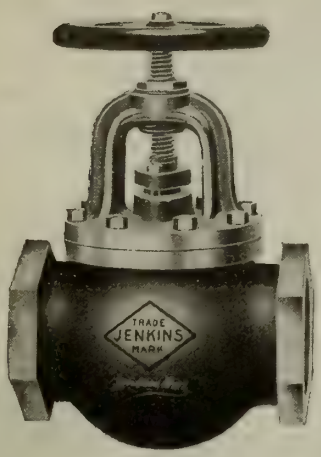

FIG. 141
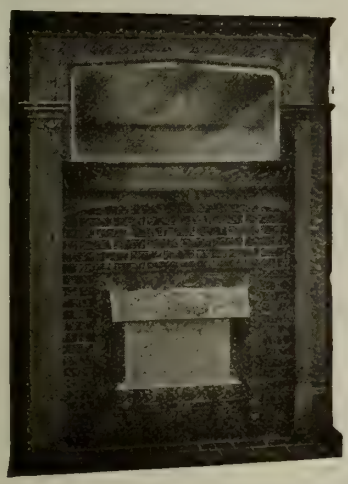
JENKINS BROS.
Standard Pattern Iron Body Globe Valve Screwed with Yoke.

For use under steam service there are no valves quite as satisfactory as



JENKINS BROS.
Globe and Angle Valves
Fitted with Jenkins' No. 119 Discs

The composition of the disc is very hard, but becomes tough and flexible in service when under steam pressure.

It shows remarkable freedom from cracking and flaking and unrivalled durability in working steam pressures up to 150 pounds.

A complete Line of Electric Lighting Fixtures.

WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.

Advertising makes for a better product—

Not only does advertising create a good impression regarding the product advertised but it **makes for a better product.** There are added responsibility and written-printed claims to substantiate.

"There, John! That's what Sells Pratt & Lambert Varnishes for Us."

SMASH! SMASH! One after another the big full-page advertisements of the Pratt & Lambert Spring Campaign are going to hammer their message into the mind of the American public. This is not to be a campaign with a mere handful of page advertisements bolstered up with a lot of small space. Practically every advertisement occupies a full page — and all are in publications of largest or most exclusive circulation, such as the Saturday Evening Post, the American, the Ladies' Home Journal, House Beautiful and Country Life in America. The opening gun of the campaign is a

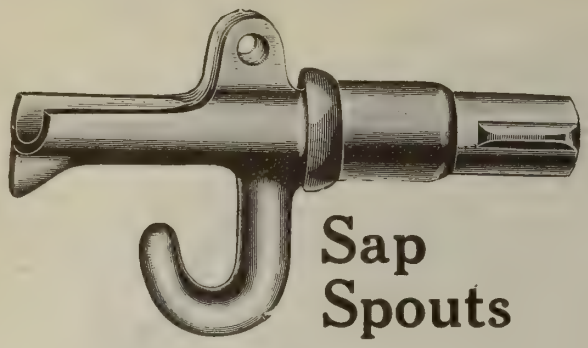
FULL-PAGE PRATT & LAMBERT ADVERTISEMENT IN THE SATURDAY EVENING POST ISSUE OF MARCH 2ND

Buy a copy. If you're a Pratt & Lambert dealer already, read it through. See if it doesn't give you a feeling of confidence in the goods you're selling — a feeling that the makers of Pratt & Lambert varnishes are willing to *stand back of their product.*

Then tear out the advertisement and paste it in your window.

If you haven't yet stocked the P&L Line, read this Post advertisement. Estimate for yourself the benefits that have accrued to the paint and hardware dealers who have been getting the benefit of this constant, powerful advertising, every season for *ten years.* Then imagine the sales value to you of a line of varnishes backed by ten years of cumulative publicity — products resting on sixty-nine years' experience and a full decade in the continual searching spotlight of national advertising.

Then write for the Pratt & Lambert Dealer Proposition.



PRATT & LAMBERT-INC. VARNISH MAKERS 69 YEARS

24 Courtwright Street, Bridgeburg, Ontario

Factories: Bridgeburg, Ontario New York Buffalo Chicago London Paris Sydney

Sap Spouts

Don't let Maple Sugar time find you without a supply of sap spouts because you failed to order in time.

Just keep in mind the unsettled state of the metal market and be advised to order early.

Better tell us your requirements now and be sure of getting what you want.

Taylor-Forbes Co., Limited
Guelph, Ontario

Sell Handles that are Most in Demand

STILL'S

There are more of STILL'S HANDLES sold in Canada than any other make. What's the logical conclusion of this fact?—*they are the best.*

There's a Still Handle to meet every need: Axe, Pick, Sledge and Hammer Handles; Cant Hook and Peavie Handles.

There's nothing like selling the best of everything. Good profits in our handles, too.

Conservation of Food

DOMESTIC ECONOMY is impossible without FRUIT JARS. This is fully recognized by all authorities interested in FOOD CONSERVATION, and their PUBLICITY CAMPAIGN will undoubtedly stimulate the use of JARS this year and create a demand far above normal.

RETAILERS should be ready to do their part by having JARS on hand when required. REQUIREMENTS should be carefully considered and orders placed with WHOLESALERS as early as possible.

LATE ORDERS may not ensure delivery in time to meet the requirements of the PUBLIC.

NO FRUIT or vegetables should be wasted this year for want of JARS.

Ask your wholesaler for JARS "MADE IN CANADA" and guaranteed by a reliable manufacturer.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto

WANTED

WANTED—A COPY OF JANUARY 13th, 1917, issue of Hardware and Metal. If you have one you can spare send it to Box 600, Hardware and Metal.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

FOR SALE

HARDWARE STOCK AND BUSINESS FOR sale in live town of 800. First-class farmers' trade. Hydro just coming in. Apply Box 360, Hardware and Metal.

GOOD HARDWARE BUSINESS IN ONTARIO town of about 1,000 people, with good farm trade. Stock about $6,000. Apply Box 359, Hardware and Metal.

UNIVERSAL

BUTTER MERGER

No. 15
Makes 1 lb. of Merged Butter from ½ lb. of Butter and ½ Pint of Milk.

Saves 40% on Butter Cost

HOW IT IS DONE

Pour one pint of sweet milk into the "Universal" Merger and add one pound of butter shaved in thin slices and one teaspoonful of salt. Place the jar in warm water to soften the butter. Do not melt it. Put jar back in churn frame and churn for two to three minutes until thoroughly mixed. Butter and milk are now ready to put in a cool place to harden.

No. 125
Makes 2 lbs. of Merged Butter from 1 lb. of Butter and 1 Pint of Milk.

No. 145
Makes 4 lbs. of Merged Butter from 2 lbs. of Butter and 1 Quart of Milk.

EASY TO TURN QUICK TO CHURN

The Straight Line Gear Drive admits of wonderfully free and easy operation. Gears are housed between two covers and cannot injure the fingers nor can flowing sleeves come in contact with the gears or the contents of the Merger.

The Rotating Paddle produces maximum churning efficiency with minimum effort. The paddle paddles around and around, breaks up the oily globules of milk and butter and mixes them in a thoroughly merged mass.

For Prices, etc., write to your Jobber or direct to us.

No. 135
Makes 4 lbs. of Merged Butter from 2 lbs. of Butter and 1 Quart of Milk.

WARD & PAYNE W P SHEFFIELD

The experience of a whole century

It is over one hundred years since Ward & Payne's Light-Edge Tools were first placed on the market. In that time a reputation has been gained for unvarying high quality that greatly assists Dealers in making sales. Behind every tool marked with the Anvil Brand stands the knowledge and experience gained in the manufacture of Light-Edge Tools for over a century. No wonder Dealers like to handle them and mechanics prefer to use them.

If your jobber cannot supply you write our nearest representative.

You'll find "National" Hinges easier to sell

Place a "National" Strap or "T" Hinge alongside one of any other make and you'll quickly recognize the added selling value of the "National." The same evidence of care and attention to detail that has earned "National" Hardware the preference with competent builders everywhere is seen in these goods. They are well-balanced, easy working, nicely finished, and the screwholes are sharply cut and well counter-sunk.

The superiority of "National" Hinges is so apparent as to materially assist in the selling.

"National" Wrought Strap and "T" Hinges are made in four styles:—Plain Steel, Japanned, Sherardized and Sherardized with Brass Pin. Strap Hinges pack approximately from 10 dozen pair per barrel in the 14-inch size to 250 doz. pair in the 3-inch size. "T" Hinges pack approximately from 7 dozen pair per barrel in the 14-inch size to 200 dozen pair in the 3-inch size. Also packed, if desired, one pair in a box, with screws.

If you had a "National" Catalog you could find a number of good reasons why you should stock "National" goods.

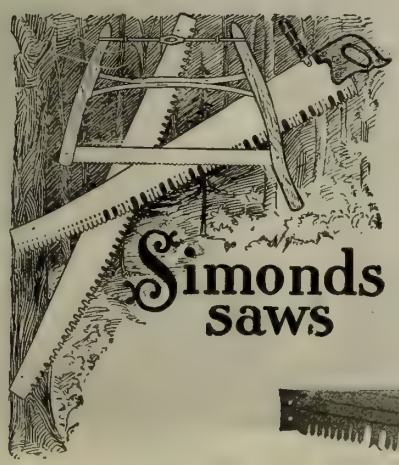
"Home Comfort Range"

It's Wise to Sell a Single Model



A dealer acting as agent for the "HOME COMFORT" doesn't have to keep a big stock. We make only one size and one style. This simplifies matters a whole lot. It used to be, and still is, the custom for the dealer to put forward on his floor the simplest and cheapest model of a range, and to sell his customers this particular range. Then having made the sale, the dealer would proceed to induce the customer to buy extras. For this purpose, the more expensive models kept in the rear would be used for the purpose of demonstration.

Experience has taught a good many dealers that it is wiser to sell but one model, a model like the "HOME COMFORT." It saves time and money—dealers do not have to carry a large stock. This single model plan pleases the customer, too, and makes it safe and easy to make a choice.

We have made the "HOME COMFORT" the most easily sold range on the market. Write for agency proposition. It's a good one.

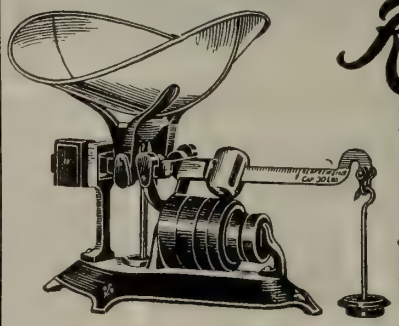
Look at Your Files

Test the balance of them. See how hard they are, Run your finger over the teeth and note their sharpness and regularity.

These qualities of the "*Famous Five*" Files were not arrived at by accident.

They are the result of expert knowledge of the exact needs of every trade. This knowledge has helped us to standardize the merits of "*Famous Five*" Files in the mind of every user.



Specify them when ordering from your jobber.

They are:

Stirs up Business

Precious few housewives realize the many uses of an accurate scale in the kitchen—saving losses in careless weighing at butchers and grocers—weighing produce before marketing—weighing flour and other ingredients while baking, etc., etc., etc. It is surprising what a little bit of salesmanship and displaying will accomplish in stirring up big business in Renfrew Scales! The Renfrew is compact, handy, and stands hard knocks. It doesn't get out of order and always tells the truth. A government inspector's certificate accompanies every Renfrew. These features make the Renfrew a lively seller these days. Push business with the

Renfrew

HOUSEHOLD SCALE

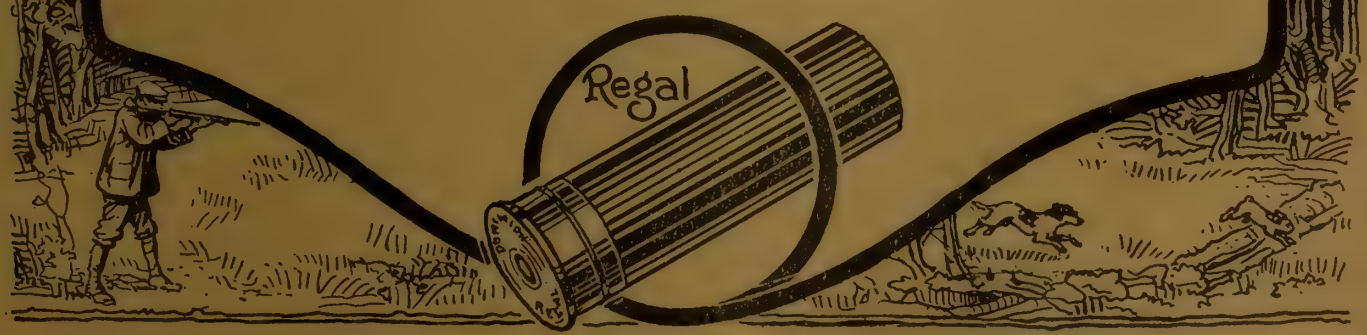
Two Standard Shot Gun Shells

The sportsmen—trapshooters and hunters—who stand at your counter know the superior qualities of

Sovereign and Regal
Shot Gun Shells

The double assurance of strong, safe casings due to the knurled base and the steel reinforced head in both the Sovereign and Regal are points that interest your sportsman customer. Care in loading —well seated wads—the large Dominion 3B primer all help to develop the



Speed—Pattern—Penetration

that have meant so many successful days for Dominion users—your customers.

Show the loading to the doubters by slicing the side of a Sovereign or Regal shell. Demonstrate further by pressing the cut paper back in place and firing the shell at a large piece of paper spread out on a board. Point out to him the number of pellets of shot that have hit and how evenly they are spread on the paper—Pattern. Show him how deeply the shot has gone into the board—Speed and Penetration. The customer will not mind missing a shell from a box when such quality is demonstrated.

Business Houses by the Hundred Buy "Confidential Circulars" for Dollars When Cents Would Buy Far More Facts

Waldon Fawcett, Washington Correspondent, writes as follows in *The Fourth Estate:*

> "Hundreds and thousands of business houses in all lines of trade are to-day paying fees of $25.00 and $50.00 and upwards to 'business correspondents,' 'information bureaus,' etc., located in Washington, which do not supply in their weekly printed or mimeographed 'confidential' letters a tithe of the information obtainable through TRADE PAPERS at a fraction of the price."

THE MACLEAN PUBLISHING COMPANY own and publish the most comprehensive group of Trade and Business Newspapers in Canada. The paper you are reading now is one of the group. The complete list with their subscription cost per year is as follows:

THE FINANCIAL POST (Weekly)	$ 3.00 Per Year
HARDWARE AND METAL (Weekly)	3.00 " "
CANADIAN GROCER (Weekly)	3.00 " "
DRY GOODS REVIEW (Monthly)	2.00 " "
MEN'S WEAR REVIEW (Monthly)	2.00 " "
BOOKSELLER & STATIONER (Monthly).	1.00 " "
PRINTER AND PUBLISHER (Monthly) ..	2.00 " "
SANITARY ENGINEER (Semi-Monthly)...	1.00 " "
CANADIAN MACHINERY (Weekly)	3.00 " "
POWER HOUSE (Monthly)	1.00 " "
CANADIAN FOUNDRYMAN (Monthly) ..	1.00 " "
MARINE ENGINEERING (Monthly)	1.00 " "
FARMERS' MAGAZINE (Semi-Monthly)...	1.00 " "
MACLEAN'S MAGAZINE (Monthly)	2.00 " "
	$26.00

Any single issue of any one of the above newspapers most certainly contains far more information for the business man concerned than could possibly be put into the most voluminous circular ever mimeographed or printed. To subscribe to the whole list would cost you only $26.00 a year. And yet, as Waldon Fawcett intimates, thousands of business houses are still paying $50.00 and upwards for weekly mimeographed circulars containing not a tithe of the business news given in any single issue of any one of THE MACLEAN BUSINESS NEWSPAPERS.

Keep Standard Lines

TO THE FORE IN YOUR STORE

Your profits depend indirectly on the good-will of your customers. Without that good-will your business cannot permanently prosper.

To earn the lasting good-will of every woman who deals at your store, it is advisable that you depend largely upon Standard Lines of Merchandise—lines that assure the customer value.

O-CEDAR products are among your most profitable Standard lines. They have become standard as a result of their true quality and reasonable price. Their merits are known, their popularity ever on the increase.

Extensive advertising of both the O-Cedar Polish Mop and O-Cedar Polish, results in constantly-increasing sales. You can get your share of this demand by displaying these products about your store and in your window.

We have special Display Stands to help you make an attractive O-Cedar showing. Ask your jobber's salesman about our Special Assortment and Free Deals.

Suggestions Will Increase Trade

Advice is Welcomed by Owners When They Have Problems to Face—New Lines Can be Suggested—Arthur Lariviere Gives Some Good Pointers — Value of Display

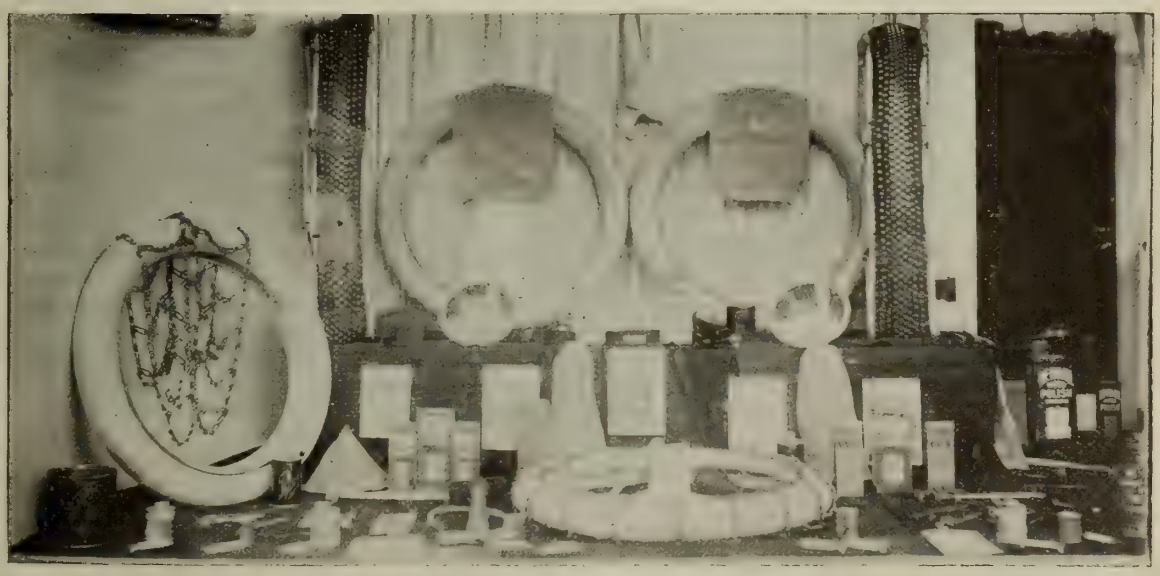
"IT is easy to educate the owner of an automobile and to take an interest in him and in his car," said Arthur Lariviere, manager of the auto accessory department of Lariviere Incorporee, St. Laurent Boulevard, Montreal. "There are many things that the dealer knows which will be of assistance to the owner, and by aiding him in different ways sales can be made and a good customer secured."

It was clearly indicated in a recent interview given HARDWARE AND METAL by Mr. Lariviere that the car owner is the logical customer of the hardware dealer carrying accessories. The owner is naturally interested in the care and upkeep of his car, for which he has paid good money, and the hardware man can win his confidence if a little trouble be taken.

Graphited Shellac For Rims

As an instance of the application of this principle, Lariviere Incorporee has studied the needs of its trade and suggestions have been made as to the care of cars and car parts. Take the rims of car wheels. These become rusted, and to make a proper job before replacing tires these must be cleaned through the use of emery cloth. It is advised that graphited shellac be used after the rim has been freed of its rust, and by some experimenting here it has been decided what proportion of graphite is required for a given quantity of shellac, and the same is made up ready for sale and distribution when called for.

"I would suggest that dealers make up a quantity of this for the trade and that a small outfit, consisting of some emery cloth, a small tin of varnish remover and a bottle of graphited shellac, be assembled during odd times and offered to the owner. In this way, outfit could be retailed for, say $1, and at this price such a line would be popular and yield a splendid margin of profit," said Mr. Lariviere. This is just an instance to show what the dealer can do.



Special Attention To Enamels

This firm is paying special attention to the sale of automobile enamels. The time has arrived when car owners will take a greater interest in the upkeep of their cars for which good money has been paid. Some discouragement to the painting of one's own car has been caused through lack of knowledge to apply the paint, and here is where the co-operative feature can be made to pay for all the attention and thought a dealer cares to exercise.

"I have seen some nice work that has been done by chauffeur," said Mr. Lariviere. "This was carefully and evenly applied and good results were secured. The salesman must make a study of the particular needs of a given case and be willing and able to advise the methods that should be adopted in order to secure an order. Owners are approachable and all appreciate the dealer's interest in advising what to use."

Lariviere Incorporee issue a catalog. This may not be possible with all dealers although it was urged that many of the dealers handling accessories could easily get out a small pamphlet to good purpose, and without excessive cost being entailed.

This year the advantage is being improved of appealing to the trade serv-

A simple but very attractive display for an Auto Accessory Window.

ed by this firm for special interest in their line of auto enamels. An insert is being used in the catalog, giving a good range of shades on "color chips" and making selection of desired colors easy. A good range of blues, greys, greens, wine and black are shown. With the distribution of several thousand catalogs, it will be possible to get in touch with a great many users of enamels.

Salesman's Opportunity

There are more customers trading with the average hardware store who do not know exactly what they require when making a purchase than those that do. Probably there is no salesman behind a retail counter who has greater opportunity to increase sales for his employer or to be of greater service to his prospect than the modern hardware salesman. His experience, if it be worth while at all, has been secured through years of association with a line that requires close application and study He is therefore able to give advice that is invaluable to the customer who does not "just know exactly" what he requires.

Take the matter of selling enamels. Many would ask for a tin of this and proceed to apply the same without any thought of making preparation for the finishing coat. Salesman to the fore here. Ask for particulars as to the work to be done. If the car be in bad shape a tin of remover may be needed to rid the car of old varnish and enamel. Sandpaper and emery cloth will be required, and some turpentine. And of course one or two brushes will be needed, that for the finishing requiring to be well selected so as to give a finish to the job that will not show any brush marks.

Co-operate With Manufacturers

"The paint manufacturers should conduct a campaign on 'How to Paint an Automobile,' said Mr. Lariviere. This will likely receive more consideration as the season advances and if dealers over the country would hook up with the manufacturer and jobber in a campaign of education, there would be some real interest in handling finishes for the thousands of cars that need more care than they receive.

The big advantage in selling good grades of durable enamels lies in the fact that the brush department sales will always be stimulated. In fact this line usually yields the most margin of profit and if a big range be carried it will meet the tastes of one's customers, and the larger stock will eventually draw the trade of the experienced finisher too.

Keep the enamels well displayed and use the valuable advertising literature that manufacturers supply so generously these days. Keep the windows fresh with a display, at least twice a month in season or oftener, and an occasional display at other times. Always have a neat display, well-placed, within the store where your possible customers will have ready access to the lines that are sold by the store.

Some Thoughts On Buying

"The accessory dealer should buy carefully and select such quantities as will be absorbed by his trade within a reasonable space of time," said Mr. Lariviere. "The average turnover in a retail way should be from five to six times a year, and this may be maintained if care is taken in the buying. If one can sell a fair quantity of spark plugs or batteries, for instance, buy what can be sold in a given period, say in six months, and take delivery of a portion of this over the six months, spacing deliveries in such a way as to keep previous orders moving and well cleaned up before the next shipment is to arrive. This will be a stimulus to the dealer in making his sales total up well, knowing that he has an undelivered portion of the original order still to come."

"I would also advise the dealer, no matter how small, to take his cash discounts. It is better to take 2 per cent. discount on each of six shipments during a period of twelve months than to take 10 per cent, discount on a quantity shipment at one time. The buyer not only gets a more favorable net saving, but he is not carrying the stock, with a lot of capital tied up, and can keep the stock fresh and clean all the season through. I would say that a dealer should never carry more than two months' supply ahead, as nearly as can be arranged on accessories."

"We figure that turnover means profit, and by studying the needs of one's customers and securing good lines and watching stock, that it may be kept fresh and saleable, there will be good business in following such a course."

Travellers and Retailers

Mr. Lariviere thinks that there should be more co-operation upon the part of retailers and travellers. Of this fact there is little doubt, namely, that the average retailer throughout the country can work with profit in conjunction with the representatives of our manufacturing and jobbing houses. As showing Mr. Lariviere's attitude he said:—"Travellers should not be discouraged with small orders. They should take an interest in their customers and I think it is essential that they should advise and suggest, so that the needs of trade are fairly met, but overstocking prevented." Indeed it has too often happened that after an excessive order has been placed the traveller coming again has been unable to secure further business, simply because the previous sale had not been kept within reasonable compass.

Studying Accessory Needs

"Turnover will depend on the territory in which a man is located, and upon the number of cars in the district served." If a dealer is situated where he can secure supplies readily Mr. Lariviere suggests that a stock of $200 will be ample to make a start in the average small town.

"Take a district in which there are 100 cars as an instance. I would not estimate that I could sell all of these accessories or even half of them. My stock would be bought on the basis of serving about 25 per cent. of this number, especially if there was a garage near. One dealer cannot and will not serve all the trade of his community and in selling accessories this is something to be considered. But from his selling standpoint the dealer must aim high. I would make up my mind that, while I had bought to supply only 25 owners I must sell 50 of them, and this would be an incentive to increase one's sales and further cultivate the ground. If necessary, when one's stock ran low, it would be better to pay a little more and replace lines quickly by express delivery."

Three Classes of Trade

"There are three classes of trade," said Mr. Lariviere—"the tourist's, which is velvet; the garage man's, which is usually the same as the tourist's, and the owner's—the hardware man's regular and steady trade." On this point the retailer was cautioned to "beware of the tourist trade."

Get An Owners' List Now

"Accessories will have to be sold to the users and owners of cars in one's district, and I would advise the hardware merchant to get a list of these and to keep them posted from week to week or at least once in a while as to what I had for sale." By keeping a record of owners a direct contact with the car owner is possible and personal letters to back up one's advertising should work well. It is well worth the attention of every accessory dealer.

Value of Display

"Try to have every single item displayed and in the customer's view," said Mr. Lariviere. This looks like good advice. There are so many new lines, and practical ones too, and these lend themselves to neat and attractive display. Silent salesmen are indispensable and of course the windows must be used frequently. Indeed it would be well to examine the latter and see if waste space cannot be made use of and kept bright and attractive through a continuous display, changed weekly, in season. I think that space should be figured as worth so much and an effort be made to have it pay a dividend in proportion. From window displays I find that we get direct results."

"Select needs carefully and buy in limited quantities, especially hew and unproven specialties," said Mr. Lariviere. "And as a matter of accomodation I would advise the securing of an agency for a reliable vulcanizing firm, even charging this at cost and trusting to this service to bring its own advantage in demand for the accessory lines carried."

Trade Prospects in Russia Uncertain

Trade Representative of Massey-Harris Company Recently Returned From That Country—Before War One Wholesale and Retail Hardware Store Had Over 1,000 Employees—Russian Peasant Has Mechanical Bent

"HAD it not been for the breaking out of the revolution and the unfavorable conditions that accompanied the war Canadian trade in Russia would have gone ahead by leaps and bounds." That is the opinion of Mr. H. G. Pickard, Russian trade expert of the Massey-Harris Co. Mr. Pickard likes Russia; likes it so well that he wants to go back there as soon as conditions become a little more settled. "Life in Moscow or Petrograd is not the most pleasant thing at the present time," he stated when interviewed recently by HARDWARE AND METAL. "I refer especially to conditions as they existed when I left Moscow less than two months ago. At that time there was no protection for the people. I have seen armed soldiers of the Bolsheviki stop a man on the street who happened to be wearing a good coat. They would simply take the coat. They enter the restaurants or places where people happen to congregate, hold them up, take what they want and depart. They can just as readily enter a man's home and do the same thing. There is no use appealing for protection to the police, for the good and simple reason that there are no police to appeal to. Yet, in spite of all that, strange as it may seem, when I left Moscow I felt that I was leaving home and I want to go back. I like the country and I like the people."

Considering the conditions of traffic at present, Mr. Pickard was able to make an exceptionally good trip, it being just five weeks from the time he left Moscow until he arrived in Toronto, which city he left some ten years before in the interests of the Massey-Harris Co., seven of which have been spent in Russia.

Knows the Country

Mr. Pickard had travelled in Ontario for the Massey-Harris Co. for some time before he went abroad. He is well informed concerning actual conditions in Russia. He knows the trade conditions, the people, their language and their customs. He has followed the trend of the various currents that in the end swelled into the tide that spelled revolution for Russia. He is not a pessimist regarding the future of the country. He has faith in the people themselves, and on this close acquaintance bases his opinion that there is going to be a good future for the development of the Russian trade. He views the present turmoil and uncertainty more in the light of a reaction from conditions of suppression that previously prevailed.

Canada's Trade in Russia

"Was Canadian trade being developed satisfactorily with Russia before the war Russian as a mechanic, Mr. Pickard sees started?" inquired the representative.

"It was being handled remarkably well," replied Mr. Pickard. "The Canadian Government had a most capable man at Petrograd in the person of Mr. Just, who was in charge of the trade bureau at Petrograd. I presume he is in Moscow now, as it will probably be safer there than in Petrograd, but mail addressed to him in care of the Embassy will always be safe. I know of many cases where he has been the go-between for the customer in Russia and the manufacturer or producer in Canada. If we had not been up against war conditions the organization that he had worked out would have been the means of sending Canadian trade ahead by leaps and bounds.

The German Monopoly

"The Russian people in recent years have been getting their eyes open to the fact that they can buy goods cheaper from other nations than they can from Germany, and also that the conditions surrounding the sales are better and fairer. But Germany has had a strangle hold on the trade of that country for a long time. Here's a case that will show it in a concrete way. Just about the time the war broke out I went out in company with Mr. Just, the Canadian Trade Commissioner. We visited a large retail and wholesale store in Petrograd that carried chiefly hardware and other similar lines. To be exact, they had cutlery, house trimmings, including knobs, locks and hinges, millwright tools, machinists' supplies of all kinds, and the other lines that are usually carried in such a place. This was not a small store, but a place that would give employment to at least a thousand hands. The manager was very anxious to show us exactly what he had. It is a matter of absolute fact," continued Mr. Pickard, "that fully 95 per cent. of the entire stock in the store was 'Made in Germany' output. The only things I remembered seeing to break the monotony were some Starrett tools and Yale locks from these United States firms. That is a fair indication of the German influence in Russia, and what the markets of that country have meant to the industrial life of Germany."

Making a Start

"What success had been met in bringing Canadian goods into the Russian market to compete with the product of Germany?" was a further inquiry.

"A good start was being made, and I am firmly convinced that there were good prospects of success," replied Mr. Pickard. "You see, it is this way, the trade conditions are entirely dependent on the transportation, and even at their best these facilities in Russia are poor. Recently the bulk of trade has entered Russia at Vladivostock. The line leaving there runs as a single track. It is safe to say that it takes three months for a car of goods to go from there to Moscow. In broken lots the time taken for that trip would be much longer, as much as six months at times. It is quite within reason to place the time that it takes a shipment to go from a Canadian point to Moscow at well on for a year. The congestion at Vladivostock just now is almost past description. Everything is piled up there. I have heard men who know the conditions trying to figure out just how much war material is piled up there, but a person can't grasp the confusion into which the shipping trade at this great Russian port has fallen. Much the same thing will apply to Archangel, the only difference being that there is not as much material coming in at that northern point to get piled up. Archangel is open for trade from about the first week in May until the end of October. That is where the ice-breakers are operating that Russia bought from the Canadian Government.

The Same All Through

"What applies to these two great Russian ports applies to Russian railroads all through. There is not a single inch of space that is not used on every train that now runs. On one trip I made of considerably over one hundred miles six of us had to stand packed in a small toilet department. A person going on a long journey in Russia just now has to put up with all sorts of inconveniences, some of them being of a most disagreeable nature. I found it necessary to leave all my personal belongings behind when I came from Moscow, as there was no chance at all to find space for them on any of the trains. The rolling stock of the railroads is almost done for. The country just now can neither manufacture or repair the engines or cars. I know of one round house where on an average of twenty locomotives used to be handled every month and made fit for use again. Now that shop cannot turn out more than one a month, and the work is of a very indifferent sort. The car windows are nearly all broken, and there is a general run-down, gone-to-pieces appearance over the whole system. Roving bands of soldiers seem to think that they have a preference in anything, and they apply this to the trains as they do to everything else. Travelling in Russia just now is not altogether a pleasure jaunt," laughed Mr. Pickard.

Russians as Mechanics

Although little has been heard of the no reason why the people there should not develop in this line were the oppor-

tunity for so doing given to them. When asked if the Russian peasant, with proper training, would make an acceptable mechanic, and if this would have any bearing on the future of the country and tend to make Russia an industrial nation, he said:

"Well, our binder is quite a machine for a man to put together who has never seen one," he replied, "and yet I know of cases where Russian peasants, unused to machinery of any sort, have done the trick, and arrived at the result desired. True, they may not have taken the proper or the easiest way, but the peasant has a great knack of sticking with a job like that until he gets it right. That is one thing that would cause me to think that the people there might develop into a great nation were they given the chance and the scope in which to work. Again, go into the Russian universities, and you will find that the students there are trained technically as well as in this country, if not better; but the great trouble is that they have not much of a chance to apply their training. It's a little bit hard for the people of Canada to get a correct idea of what the people of Russia really are. We don't get the best of them in Canada. There are some, in fact, quite a number of Russians who are anxious to get out of the country for various reasons. A man who does so without first securing his passport cannot hope to go back.

A Wonderful System

"The Russians really have a wonderful system of keeping track of every person who enters their country. This is not exactly along the matter of trade," remarked Mr. Pickard, "but it will show Canadians a condition that is hard for them to realize. There are many political prisoners in Russia. It requires only a very small offence to put a man in the category of a political prisoner there. It is not possible, as it is in this land, to refer to a government official as a 'pinhead.' The one great crime there can be summed up in 'Speaking against the government.' Arrest follows. A trial may come in a week, in a month, or in a year. The term 'political prisoner,' of which you read so much, does not necessarily indicate that the prisoner is a dangerous man or a bad one. At every station you find the gendarmes, and they listen to conversation, to the remarks of travellers, to everything they can hear. It is a splendid policy in that land to keep your opinion to yourself, especially if they are not favorable to the government. When Kerensky came into power he attempted to do away with a lot of this. He set about to liberate all the political prisoners. It was never intended that the criminal class should get their freedom. But in the confusion that followed the revolution it was simply turned into a wholesale jail delivery. Criminals, etc., at once climbed into the category of political offenders, and when the jails were opened out they came, and the wave of crime that swept over the country following this is now a matter of history."

German Trade Methods

According to Mr. Pickard, Germany had a wonderful system of following up her industrial expansion with her banking facilities. "As soon as a German industry had found or developed a new avenue for business, immediate assistance would be given from the German banking firms, encouraged and aided by the Government. This worked out especially well in the matter of taking care of collections. It is well known in Russia, probably not here, that a number of the big banking houses there are really German institutions doing business under Russian names. United States has been taking steps to help her business interests there by opening up branch banks. Not long ago the National City Bank opened an office in Petrograd, and later on a branch in Moscow, the idea being to make it easier for American trade to be developed and financed there. German methods of doing business did not bring much favor with many of the Russian people. There was a feeling all the time that the German was getting the Russian country piecemeal and the Russian people resented it. This was the cause for the popularity of the war at the outset. There were other reasons as well, but the chief one seemed to be summed up in the words that Russia was anxious to get a 'crack at the German.'"

The Natural Resources

"Has Russia the natural resources that would make her a great manufacturing country in case the opportunity presented?" was then asked.

"Undoubtedly she has," replied Mr. Pickard. "Russia has coal, oil, minerals, timber—in short, Russia has everything, but there has been no serious development. The mines are worked largely by foreigners. The Belgians and the French are interested largely in the steel and metal trades. Before the outbreak of the war a movement was beginning to take form in Russia that sought to develop the industrial side of her life. The party were advocating a certain form of protection for the industries that would establish their works in Russia. Their programme included the granting of sites and certain concessions, but, of course, the war cut this short. Tariffs in Russia have gone up tremendously since the start of the war. On some lines the start would be at 10 per cent., and from that working up to as high as 50 per cent. Railroad rates have gone up 100 per cent. since the start of the war. But it will take years and years, even under the most favorable circumstances, for Russia to arrive at the stage where she will be sufficiently of a manufacturing nation to supply her own wants."

Can't Repudiate Debts

Nor does Mr. Pickard believe that Russia will repudiate her obligations, as announced by the Bolshevik Government. "The Russian business world, sooner or later will have to go into the markets of the world again if they intend to do business. If this mad idea of debt repudiation were successful, no firm, corporation or nation would want to do a cent's worth of business with Russia. For her own protection she will have to discharge her obligations. The amount of the debt looked so big to the Bolshevik Government when it came into power that they could see no way out. They simply said, 'We can never pay this. It's too great.' To the present Russian mind Socialism means freedom, the getting of what they want without paying for it. But to the Russian mind this cannot appeal permanently, for there is an inherent honesty in the great peasant body. In all my experience with them I never lost anything.

The Haggling Method

"The Russian ruble has dropped and dropped, but that does not affect buying and selling very much. Of course goods are away up now. I paid $40 for a pair of shoes shortly before I left Moscow. In ordinary times you can purchase the standard makes of American shoes there for about $10. The whole trading is done on the old system of beating a bargain. Go into a store and the keeper sizes you up. If you look well to do he will shove on the price. The customer who is experienced will admire the goods, then throw them down and walk out of the store on the pretext that the price is away too high. Nearly every time the dealer will beat you to the door, and a big reduction in the price will result. The same thing applies to the hiring of a cab. Start making a bargain for a ride and you will soon have half a dozen drivers. The result is that you will ride much cheaper than if you had accepted the terms of the first man. Since the war prices of foodstuffs have increased enormously, but wages have also gone up to a considerable extent.

The Political Parties

Mr. Pickard is doubtful if there will ever be a return to a monarchy in Russia. The great mass of people seem determined on one thing, and that is that the fruits of the revolution shall not be lost to them.

"The terms that describe the different factions in Russia just now are not nearly as confusing as they may seem. The word 'Bolshevik' (although Mr. Pickard says the proper spelling would make it 'Bolshevick') means a man with a large or a great idea. It really is used by way of comparing large with something smaller. The first part of it is 'bolshioe,' meaning in Russian, large, extreme, or great, and the 'vick' or 'vik' termination simply puts it in the masculine sex. He is simply an extreme Socialist. The Bolshevik have a very large following all over the country. They are especially strong among the working classes. They are found in the army. In fact they have simply carried their ideas from civil and industrial life into the army with them, and that's where a great deal of the trouble has come in from the ranks. Against this faction is lined up what can be termed the 'Menshiviks.' They have ideas that are far less radical and dangerous than the Bolsheviks. When the

Courage is Needed by Retail Dealer

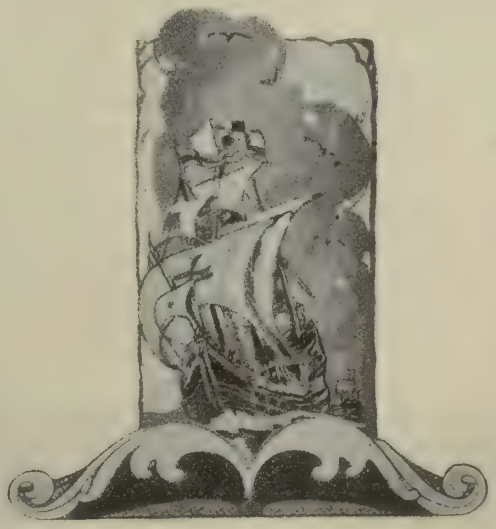
So Asserts Charles S. Kennedy, President of One of the Large Paint Concerns of United States in an Interview With "Hardware and Metal"—Industrial Conditions Likely to Remain Good For Some Time

"THERE is an optimistic outlook for business in the United States at the present time," said Charles S. Kennedy, of Dayton, O., president of Lowe Brothers, paint manufacturers, to a representative of HARDWARE AND METAL. Mr. Kennedy made a short business trip to Toronto during the week on matters connected with their Canadian branch. "Optimism is cheap unless backed by some concrete evidence that genuine faith is at the bottom of one's cheerfulness. We have banked so strongly on good industrial conditions within the next few months and even for some time after the war is concluded that we purchased raw materials in excess by 50 per cent. during the fall of last year than we have ever purchased in any preceding year. Does it not take courage and faith in the future to stock goods to that extent? It would seem as though our concern at least is not looking for declines in lines pertaining to the paint trade. To our way of thinking it will not be so much a question of selling the goods as to be able to get numerous kinds of raw materials at any price. The concern which has anticipated their needs will in all probability find they will have no trouble in getting rid of their goods.

"You ask why we have such faith in the immediate future. The answer is not difficult to divine. The United States has floated Liberty Loans and other bonds to the extent of $5,000,000,000 for her own needs. She has advanced large sums to the Allied countries, all of which money is to be spent among her own people. That is going to make industrial conditions good. People will have plenty of money to spend. You here in Canada have passed through the same period and are still enjoying conditions similar to those upon which the United States has recently entered. We anticipate that conditions in the paint industry will be good for the very simple reason that industrial conditions generally will be very good.

Paint Insurance

"People will do painting this year as a matter of insurance. Buildings are worth more now than they have ever been worth. The high cost of all raw materials has increased the value of buildings. While it might not be easy to realize the value that is in them, still if it were necessary to replace those buildings the owner would find the value was there. When the value of buildings is high it is not a time for the owner to drop his fire insurance. By the same line of reasoning the owner of buildings is not going to let them fall into a tumble-down condition. It is very poor business to do so."



High Prices After the War

The representative of HARDWARE AND METAL asked Mr. Kennedy for his opinion as to the probable trend of prices of various commodities after the war is over. He was firmly of the opinion that there is going to be no decided slump. "History has shown that the period immediately following a great war has always been one of high prices. If this has been true in previous wars it will be all the more marked after the present war. For this war has been carried on on such a tremendous scale, the number of men withdrawn from productive pursuits has been so great and the waste so great, that it will cause a scarcity of goods for a considerable time after hostilities cease.

"In my opinion the readjustment to lower levels, when it does start, will be by gradual stages. Prices will go down gradually, the same as they went upward gradually. That was true with the manufacturers of paint at any rate. But as already stated I am of the opinion that there will be a continuation of the period of high prices for some time after the cessation of hostilities.

Time When Courage Is Needed

"There are many merchants in various lines of business to-day who are not getting the price they should for their goods simply because they have not the courage to ask what they are worth. It is a time when a business man needs to stick out for his rights. His cost of doing business has greatly increased and in very many instances he is not getting the same margin of profit that he formerly did. I have been an enthusiastic advocate on behalf of the retail dealer to the end that he might get better prices for his articles. While this would not mean any increased profits to the manufacturer, we have been advocating such a stand by the dealer purely in his own interests. Let us see how it would work out provided these higher prices are not justified. The result would be that consumption would stop. The manufacturer would be affected far more than the dealer. For the aggregate of business, if it fell flat, would be a serious situation for the paint companies. With the dealer the paint line is simply one among numerous lines. With the paint manufacturer his bread and butter depends upon a single commodity. It will therefore be realized that the manufacturer is the one who stands the biggest chance of suffering most if his advice in this respect does not prove to be well founded.

"Now is the time when the dealer should get his fair margin of profit—at the time when industrial conditions are good and the money is available and is being spent readily. If he waits for the period when the lean years come again he will certainly not be able to entrench himself against that time. It is his duty to safeguard his interests at the present time when it is possible to do so. And he should do this by getting a reasonably good margin of profit now when it is comparatively easy to get it.

Cheapness No Attraction

"The public is not asking for a cheap article so long as they know they are getting value for the money expended. Quality is the big consideration long after the price is forgotten. All it needs is courage on the part of the dealer to assert himself—stand up for his rights. He should learn the reason why prices are high, and then proceed to instruct his customers as to the reason therefor. In nine cases out of ten he will be able to induce his prospective purchaser to see the matter in the light in which he sees it. The line of talk that goes around shouting that prices are high will undoubtedly scarce trade away. But even in spite of high prices the trade can be won when it is shown that commodities are a good buy compared with similar commodities."

Mr. Kennedy is considered one of the leading paint men in the United States. He takes more than the usual interest in things Canadian when he makes a visit to this country for he was born in Canada. He has been in the paint business in that country for more than twenty years and has risen by dint of his business ability to the position of president of his company.

Sale of Cutlery a Matter of Display

Vokes Hardware Company Arranges Display on Maroon-covered Panels, Which Hook to Edge of Shelving—Stock Kept on Shelves Back of Panels—Silver-plated Flatware Displayed on Black Velvet

THE sale of cutlery in all its branches is primarily one of display. Many merchants carry a splendid assortment in their cutlery department, stocked on shelving behind glass doors and also in silent salesmen. The method is excellent but a forward step has been taken by the Vokes Hardwere Ltd., Toronto, in arranging their cutlery display.

Panels For Display Most Effective

With a view to economizing space, samples of table cutlery are ingeniously arranged on maroon covered panels. These panels hook to the edge of the shelving and can be easily lifted off to show to a customer. This makes for promptness in serving customers—permits them to examine all sizes and compare values readily and keeps the stock in the original boxes intact. This is one of the up-to-date methods of displaying cutlery. It is clearly evident that prompt and efficient service can be given to the customers of this store.

Stock Kept Behind Panels

The stock itself is kept on the shelving directly back of the display panels. Each sample is numbered and there is no difficulty in getting the goods from the shelves, wrapping up and handing to the customer. Prompt, efficient service is the policy backing the sales program in this department and it would appear that such service can be rendered from the methods employed.

The silver-plated flatware is displayed in a similar manner, being attached to dark velvet covered panels which enhances the appearance materially, the diamond shaped price cards neatly marked in plain figures with gold letters. The effect thus secured might be termed rich and it is stated that sales are much more easily made since this policy of display and pricing has been inaugurated.

Silent Salesmen Also Used

Two silent salesmen are employed in the showing of butcher knives, steels, etc. These are arranged in a similar manner to the flatware mentioned above, the panels sloping from the bottom front of the cases to the top and back. The stock is carried back of the panel, free from the dust and easily accessible. The stock is complete, ranging from the needs of the householder to the demands which are made by the butcher, hotel or restaurant keeper.

Specialize in High Grade Cutlery

This concern specializes in high grade cutlery. Their stock comprises table cutlery, carvers in pairs and in cases, pocket knives, scissors, kitchen cutlery, razors, shaving supplies, silver-plated flatware; in fact, a full range of the lines called for in this department are always available. "We are suffering from restricted shipments of many lines of cutlery, but fortunately to date we have been able to maintain a very good assortment and a fair supply of nearly all lines," stated the assistant manager, E. L. Evans. "Some items are increasingly hard to secure but this is a condition which we, in conjunction with all others, must make the best of until world conditions show improvement."

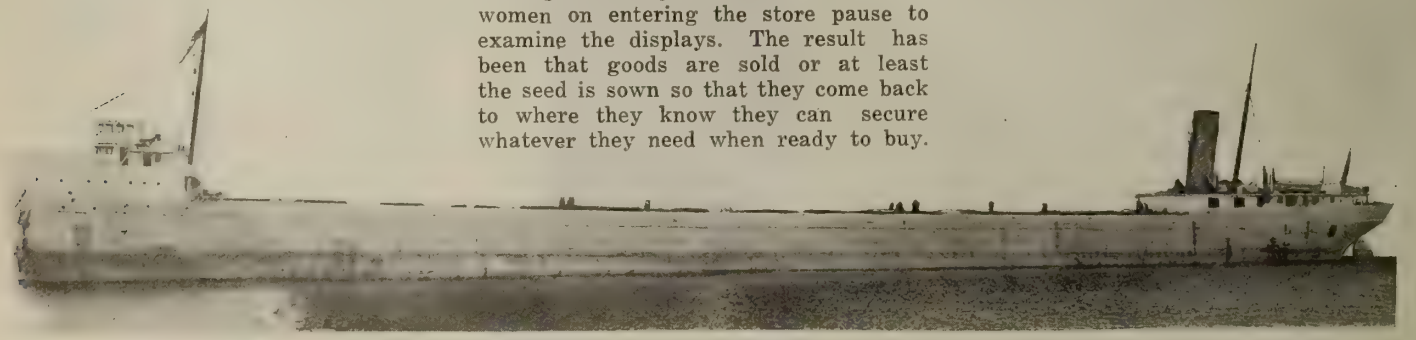
Electrical Goods in This Department

Electrical goods are classed with cutlery in this store. These form a very important branch of the business now and the demand is constantly increasing. Household appliances such as irons, toasters and grills are neatly arranged on a display table at the front of the store and in addition heaters have enjoyed a splendid sale during the winter and chilly nights of fall and spring.

Location and Display Play Important Role

It is by getting the goods effectively displayed that success is attending the efforts in the cutlery department. The location of this department is directly to the right as one enters the store, so everyone must see the goods which are shown. This has been the means of maintaining sales at a high average, for it is particularly noticeable that the women on entering the store pause to examine the displays. The result has been that goods are sold or at least the seed is sown so that they come back to where they know they can secure whatever they need when ready to buy.

Throughout this store the idea of displaying the goods is emphasized. Every item carries a price card. The windows are made use of effectively and the cutlery department is by no means neglected in this respect. They have frequent displays. The display which they maintain during the Christmas season is worthy of note.



Getting the goods out where people can see them, where they will be a constant suggestion to buy, that is the idea being followed. This concern asserts they have so many examples of how their policy is bringing results that they are constantly planning on new arrangements of goods and bringing more goods out from under cover. That the display is important cannot be overlooked and the Vokes methods are eloquent evidence of their faith in "showing the goods."

UNITED STATES MILLS TO SUPPLY STEEL PLATES TO CANADA

Inquiries recently before the market from Canadian shipyards have been withdrawn, and the needs of these yards, which are put at 300,000 tons for the year, will be supplied by American mills under Government arrangement, the distribution being made at Washington according to the "Iron Age."

GETTING READY TO FIX STEEL PRICES

Steel manufacturers of the United States were to confer in New York on March 1, according to the "Iron Age," preparatory to a meeting with Government representatives to consider prices that will prevail after April 1. Steel producers, after months of hamperings, with steadily advancing costs, now ask for stablilized prices over a period of six to nine months. The uncertainty as to the prices and pig-iron and steel supply is beginning to affect consuming industries in a number of lines, and the next conference at Washington is considered of more moment than any that have preceded it.

Varnish Manufacturers Are in the Toils

Federal Trade Commission of United States Has Issued Complaints Against 34 Manufacturers, Some With Branches in Canada

THIRTY-FOUR varnish manufacturers of the United States will have to answer to the charge of unfair trade practices on April 8, which charges have been preferred by the federal trade commission of the United States. Some of these varnish companies have branches in Canada and in this way the accusations will be of interest to the Canadian paint and varnish trade. Briefly stated the charges are that the respondent concerns "stifle and suppress competition through lavish entertainment of competitors' employees, through secret payment of money to employees of customers who might otherwise buy goods from competing concerns." In one instance the company is charged with adulteration of a competitors' goods.

"Boxing" Practices Charged

The charges preferred by the federal trade commission seem to hark back to the "boxing" days in England. Those who are familiar with the "boxing" idea as carried out in the Old Land know that it is the occasion when all those who in any way have anything to do with the purchasing of supplies of any kind look for a little "hand-out" from the merchant because they may happen to turn some trade to the merchant. Thus chefs in hotels, butlers, and purchasers of supplies of any kind look for a present or a "box." These presents often take the form of money, or cigars, or liquor or treats in other forms.

Some of the varnish companies in the United States are charged with attempting to stifle and suppress competition by "systematically and on a large scale giving employees of customers, prospective customers and competitors' customers, gratuities such as liquor, cigars, meals, theatre tickets, valuable presents and entertainment." Charges are also made against one of the big varnish companies with Canadian connection that large sums have been paid secretly to employees of customers and prospective customers as an inducement to influence said employees to purchase varnish and kindred products from the concern in question.

Another charge made against one of the concerns is that it did "secretly pay employees of its customers, prospective customers and competitors' customers large sums of money to adulterate and spoil for proper uses varnish, lacquers, and japans sold or offered for sale by its competitors to such customers."

Hearing to be Given

The firms named in the complaints are given the usual thirty days to reply and have been notified that the commission will hold a hearing on all complaints in question on the morning of April 8 next. The complaints issued against the concerns in question are the first results of a long and intensive investigation by the commission. During the course of this investigation attorneys and examiners for the commission discovered what it believes to be a very unhealthy and serious condition to exist in certain lines of industry. As a result of its deliberations the commission has under consideration a large number of similar cases requiring further deliberation. Some soap manufacturers and manufacturers of printing inks have also been involved.

Varnish Companies Make Denial

Soon after the charges were preferred by the Federal Trade Commission the superintendent of one of the varnish companies made an emphatic denial of the charges, denounced them as "absolutely unfounded and grossly unjust." The varnish companies are apparently one in making a rejoinder to the effect that they have not been using unfair tactics in securing business.

Regulation of Glass Industry Completed

Fuel Administrator of United States Issues Order Limiting Use of Fuel to 50 Per Cent. of Amount Used in 1917—Overproduction of Glass Was Feared

ANNOUNCEMENT was made by HARDWARE AND METAL some weeks ago in the report on market conditions respecting glass that it was the intention of the United States Government to restrict the manufacture of glass to 50 per cent. of the production of 1917. After nearly three months of negotiation between the Government and the glass interests a formal agreement has now been reached whereby through the limitation of the coal supply by the Fuel Controller the production of common window glass is to be restricted to the extent indicated. The Official Bulletin of the United States Government asserts that after a survey of the field it was apparent that not more than 5,000,000 boxes of glass would be used in 1918. Competitive conditions would likely result in an overmanufacture of this material by at least 2,000,000 to 3,000,000 boxes if there was were not a restriction of output. In view of this condition each of the manufacturers was willing to reduce his output to the extent mentioned. Representatives of the workmen have also taken part in the discussion and have agreed to make their part of the sacrifice. The order has been delayed until the agreement could be made practically 100 per cent. complete.

Text of Order Limiting Manufacture

"No manufacturer, as defined above, shall at any of his plants consume or use fuel of any description, including coal, coke, fuel oil, and natural gas, or use power derived from any such fuel for or in connection with the manufacture of common window glass, as above defined, during the year beginning December 8, 1917, and ending December 7, 1918, to an amount in excess of that necessary to produce at such plant one-half of the quantity of such common window glass produced at such plant during the manufacturing year beginning September 1, 1915, and ending August 31, 1916, or the manufacturing year beginning September 1, 1916, and ending August 31, 1917.

"No such manufacturer at any such plant which was not in existence, or which did not produce any common window glass, during either of the said manufacturing years shall continue to use such fuel during the year ending December 7, 1918, to an amount in excess of that which plants of similar capacity severally required to produce one-half of such common window glass produced by them during either the manufacturing year ending August 31, 1916, or August 31, 1917.

"Any such manufacturer violating or refusing to conform to the above regulation will be liable to the penalty prescribed in the aforesaid act of Congress."

As the bulk of the glass used in Canada is now imported from the United States it will be seen that this regulation is of particular interest to the Canadian glass trade. It will be noted that the conference with the glass manufacturers resulted in the conclusion that not more than 5,000,000 boxes of glass will be used in the United States and Canada during the coming year. It is apparently the idea to allow only a sufficient quantity for requirements for the year to be manufactured. If such is the case there will in all probability be sufficient supplies of glass to go around. The limitation of output means that there will be no over-production during the coming year. However, the reduced production will in all probability increase the production cost for the glass manufactured. Higher labor costs may at the same time operate to cause firm prices.

Announcement has been made from Pittsburg that the glass manufacturing plants of the United States which have been in operation since December 8 will close on March 16. The second period of operation will begin March 23 and end June 29.

EDITORIAL COMMENT

THE TREND OF PRICES

MANY merchants are wondering, wondering, what the outcome of the present high prices will be. Some have been expecting to see a break in the market in the near future. And in some instances cancellations of orders have been recorded as a result of this feeling.

From present indications there seems small likelihood that prices are likely to take any decided slump in the near future. Manufacturers are working on high-priced materials. Labor costs are high and are mounting upward. Prices of iron and steel and some of the ingot metals have been fixed by government order. This is working out toward stability of prices for some little time at least.

The president of one of the big paint companies recently asserted that history shows a record of high prices in the period following any great war. Production that has been turned to destructive purposes will have to be turned to constructive work after the war is over. There will be a tremendous demand for materials of all kinds after the war is over. Demand thus created should tend to keep prices at a fairly high level.

The paint manufacturer in question has banked his faith on this to the extent that their purchases of raw materials in October of last year were greater by 50 per cent. in quantities than they have ever purchased before. There may be breaks in the market in some lines when the war is over, but there seems every possibility that the prices of most commodities will rule firm.

SPECTACULAR ADVANCE IN LINSEED OIL

ONE of the spectacular changes in market conditions during the past week has been the big advance in the price of linseed oil. Raw linseed oil was quoted at $1.72 per gallon one week ago on the basis of sale in single barrel lots. At the present time it is selling at $1.95 per gallon and is hard to obtain at that.

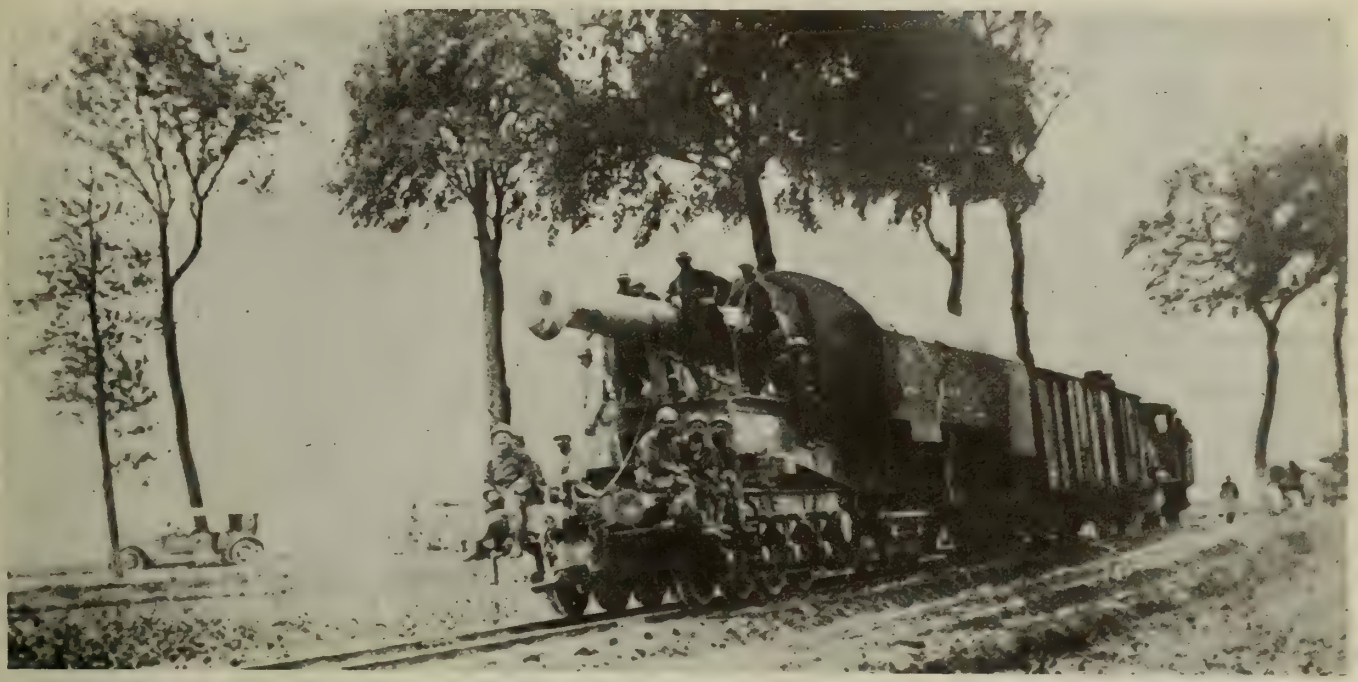
The advance in this commodity has been following the upward trend of the flaxseed market. During the past week cash flaxseed in the Winnipeg market has increased 29c per bushel and at the time of writing was quoted at $3.88 per bushel. From February 4 to March 5 the increase in the price of flaxseed amounted to 63c per bushel.

Eastern crushers have been handicapped in their operations through inability to get supplies of flaxseed moved from the West and from the elevators at Fort William. Crushers in some instances have had to suspend operations through their inability to get flaxseed. There is a fair amount of flaxseed moving in the Canadian West, but this is evidently going south into the United States. Inspections at Winnipeg in six days amounted to 105 cars.

Paint manufacturers are in urgent need of oil at the present time in order to proceed with the manufacture of their paints for spring distribution.

Flaxseed grown in our own Canadian West is slipping away to a foreign market while the Canadian consumer is unable to get supplies in the East at any price.

BINDER TWINE PRICES ANNOUNCED



DURING the week the price of binder twine has been announced by the Canadian manufacturers at 23½c per pound for 500-foot length, 25½c for 550-foot length, 26½c per pound for 600-foot length and 28c per pound for 650-foot length. Prices which have now been confirmed show that the forecast given in the market report of HARDWARE AND METAL within recent weeks, in particular last week, bears out the statement that prices would in all probability be in the neighborhood of 7¼c per pound higher than the opening price of last year.

As it turns out, the price of the 500-foot length is 7⅝c higher than the opening price of last year, when it was 15⅞c. This price was later advanced to 19½c, at which price it remained for the balance of the season.

These prices on binder twine are in conformity with the prices in the United States, where the figure was agreed upon after consultation between the Department of Food Control of the United States and representatives of the manufacturers. The price of sisal fibre at the present time is 19c per pound, and the margin of profit to the manufacturers has been fixed according to a definite schedule.

"WHAT a panic there would be," says the Dodsland Prairie *Times,* Dodsland, Alta., "if there was no retail store at which the farmer could place his rush order,—yes, or if he had to send his horse to the mail order house to be shod." There is the gist of the anti-mail order argument.

Current Events in Photograph—No. 10

THE GUNS THAT SPEAK FOR DEMOCRACY

THE long expected Hun offensive will break some day soon. The Allies await this assault with confidence born of the knowledge of the better morale of their men and of a laboriously achieved preponderance in artillery. The photo shown herewith is one of the monsters that will be heard in the cause of democracy. It is being brought up to its position on the Lorraine front for its baptism of fire. Other guns on other railways are moving up to other fronts all along the "far-flung battle line."

TWINE PRICES IN UNITED STATES

Advices from Washington during the week announce the basis on which binder twine is to be sold during the coming season. The manufacturers of binder twine, sisal importers and the Government have reached an agreement whereby standard increases over the cost of sisal fibre are to be made. The prices is based on the present cost of sisal fibre at 19c per pound. The dispatch anent the situation says:

"Standard and sisal binder twine containing 500 feet to the pound should be sold in carload lots of 20,000 pounds or more at a maximum advance of four cents per pound above the cost of sisal. Lots of 10,000 pounds or more, but less than 20,000 pounds, are to be sold at an advance of not more than four and one-eighth cents per pound, and all amounts are to carry an advance of not more than four and one-quarter cents a pound.

"Twine that contains 550 feet to the pound should be sold at a maximum advance of one and three-quarters cents above the price for standard twine; 600 feet to the pound at an increase of three cents, and 650 feet to the pound at four and one-half cents a pound increase. Pure Manila twine containing 650 feet to the pound should be sold at an advance of not more than six cents per pound above the price of standard twine. All prices are f.o.b. factory."

EARLY CLOSING BY-LAW FOR CHATHAM

Hardware stores and men's furnishing stores in Chatham will be compelled to close according to a by-law which has recently passed the city council of that city. The action was the result of numerous petitions sent to the council. Hardware stores will close at 6.30 p.m. each evening except Saturday and the weeks preceding and following Christmas when the hour of closing will be 9 o'clock. An exception has also been made in the period between June 15 and August 15, hardware stores being permitted to keep open until 9 o'clock between these dates in order to permit farmers to secure harvest supplies. The men's clothing stores will close at 7 o'clock each evening except Saturday and the weeks preceding and following Christmas and nights preceding holidays when the hour of closing will be 10.30 o'clock. These regulations are to become effective March 9.

MANITOBA PASSES NON-GLARE LAW

The Province of Manitoba placed on the provincial statute book on February 21 a law providing for non-glare lenses. Only such lenses as approved by the Manitoba Government can be used, and all motor vehicles must be equipped with them. A number of licenses for sale of non-glare lenses have already been issued. The Motor Vehicles Act has been amended to provide for this change in lenses by the addition of the following:

"The Municipal Commissioner shall appoint an inspector or inspectors to report on the efficiency of non-glare lenses or other devices now or hereafter used or offered for sale in Manitoba, and on the report of such inspector or inspectors shall approve, for use in Manitoba, one or more of such lenses or devices.

"After such approval no motor vehicle shall be operated within the Province of Manitoba unless its headlights are equipped with non-glare lenses or other devices so approved."

Hardware Firm Includes Groceries

Dauphin, Manitoba, Firm Add a Grocery Department to Their Store With Splendid Results—New Activity Instrumental in Greatly Increasing the Firm's Business

IN Manitoba's largest town, Dauphin, is located the McDonald Voigt Hardware Company store, a store of which its owners are justly proud. The management of the store are constantly awake to the possibilities of increased opportunities for business, and as a result there has come to life under this management a new store and a new department. The new store was built some four years ago, and the new grocery department has been the development of the last couple of years.

New Store Built

Some four years ago there was a demand for accommodation upon the part of one of the Canadian banks, located in Dauphin, for increased and more commodious accommodation. The proprietors of the above store were approached with the result that arrangements were made to secure a ten year lease on the corner ground floor and of the whole second floor of the large building contemplated for the bank's purposes. The present structure 44x92 feet was erected, and in the fine bright store adjoining the bank's office the hardware department of the McDonald Voigt Co. is located. This occupies a space 26 ft. x 92 ft. and the appointments are exceedingly well selected with a view to affording expeditious handling of goods and their attractive arrangement.

An Attractive Hardware Store

This store is of an unusually attractive character, standard cabinets, fifty feet in length, in golden oak, standing out well against the tinted walls and ceilings.

Every possible opportunity of suggestion and selection is afforded the buyer as all lines of shelf goods are tastefully shown on the front of the steel drawers.

The opposite shelving is that used for the display of tinware, graniteware and other shelf lines of a house furnishing nature. They have been made to blend nicely with the sectional hardware unit opposite.

The floor is available for the display of all lines of washing machines, sewing machines, stoves, ranges, etc., and being without counters there is added room for the neat display of these lines. A wide ledge on either side of the store's shelving gives ample and required accommodation for the showing of goods and the wrapping of parcels.

To the rear is an elevator for the convenient handling of heavy goods from and to the basement in which ample room accommodates a large surplus stock of nails, oils, rope, and many other lines.

This is the parent store, and a store whose activities would have proved sufficient for many merchants.

The McDonald Voigt block, Dauphin, Manitoba. The front window is that of the hardware department, the large window on the side street is that of the grocery department.

Added Room Suggests Added Activities

With the completion of the new building and the more commodious quarters thus afforded, it was found that there was more room than was actually needed for the hardware, therefore it was decided to try the experiment of adding a grocery department as well. There was ample room just back of the hardware department for this new activity, while the grocery store was served by an entrance on the street at the north of the store.

Naturally the hardware end of the business was the pulling end, for it had a long-established career behind it with all the drawing power that this would naturally give, but this new department has not only been a means of increasing the business, but has actually been a business builder of itself. Many people have drifted from the hardware store into the grocery store it is true, but the reverse is also true, and it has been found that the grocery department has been no small influence in extending the scope of the initial activity of the store.

There is no confusion of departments whatever, the hardware and grocery stores being absolutely separate and each under the direction of a competent head. The grocery section is at right angles to the hardware department.

The ceilings are of splendid height. This is a fine provision as it permits of better display and is of a more attractive appearance all round.

There is no doubt that there are many points in which the experience of the McDonald Voigt Co. might be repeated with good results, and without interfering in any way with the separate conduct of the straight hardware line.

The grocery department has now been in operation for two years or more, and the patronage that it now enjoys is a very encouraging sign.

This department is very well arranged. There is ample shelving to provide for a complete display of a fine stock of groceries, while the more perishable lines and goods in bulk are protected by modern bin counters. In fact no effort has been spared to make the store thoroughly up to date, and in every way in keeping with the well established hardware business.

The firm are well contented with the success of this new activity, and believe that the move was a very wise one.

R.M.A. PLAN AUTO AND ACCESSORY SECTION

The Retail Merchants' Association is planning the formation of an Automobile and Accessory Dealers' Section. In conjunction with the Automobile Dealers' Association an energetic campaign is being planned to get some 700 probable members into line. It is felt by the manufacturers that they are suffering from lack of organization, and they are heartily in accord with the movement. A convention will be held in Toronto on April 1, 2 and 3 and it is the present intention to stage a motor and accessory show in connection with this gathering.

Collingwood, Ont. — Ferguson & Wheatley, Ltd., has been incorporated with a capital of $40,000 to carry on business as hardware merchants, machinery, implement and automobile agents. Geo. H. Ferguson and Horace W. Wheatley are directors of the company.

Co-operation New Key-note in Business

Room for the Little Concern as Well as the Greatest Corporation — Labor and Capital in Greater Harmony for the Common Good—Co-operative Instead of Cut-throat Competition—The War Brings About the Birth of the New Spirit

Address delivered before Toronto Ad Club at Toronto, by J. G. Jones, vice-president and director of sales, Alexander Hamilton Institute, New York, N.Y.

'AFTER the war the American Continent will be governed by working men, but I am not afraid of that kind of government' is what I hear Mr. Schwab said to a gathering of business men who had been his contemporaries at college.

Co-operative Basis of Government

"I don't agree with Mr. Schwab that the United States will be controlled entirely by working men after the war, but I do believe that after the war Canada, the United States, England, France, and the countries of the civilised world will be on a more co-operative basis of government. Working men, tradesmen, business men, manufacturers will all co-operate towards greater harmony. I am not saying that we won't have our troubles: I am not saying that we won't have to close down plants in certain parts of the country, but I will say that we are to have easier re-adjustment because of the new spirit of co-operation that is developing. If men like Mr. Schwab can stand up and say that they look on the future undismayed, then I say that this is because of the new spirit that is springing up for this country and the world as a result of the war."

Prussian Attack Awoke World

J. G. Jones, vice-president of the Alexander Hamilton Institute, New York, thus illustrated the force of the new spirit in business in which he believes, and which formed the subject of his address before the Toronto Ad. Club, on Tuesday, February 12. The key-note of his whole address was co-operation.

"Prior to the war" he said "there was a change coming over the sentiment of business, but it took that cruel war—the savage attack of Prussianism upon a defenceless nation—to startle the world awake to the necessity for the new spirit.

A World Asleep

"When we look back to 1914 we have got to realise that the entire world with the exception of the Central Powers seemed to be asleep. England was through with her colonisation. The British business man was making profits easily and sufficiently with so little exertion that he was asleep. A few far-sighted men such as Lord Roberts, Churchill were different. They were awake to the menace of Prussianism, and gave warnings.

"We in the United States were equally asleep. None of the big corporations were awake. As regards business conscience they were practically dormant. We passed the Sherman Anti-Trust Law to curb the operation of big interests on their old lines. That law to-day is virtually dead because we are coming to a period of co-operation, the new spirit in business which makes the Sherman law unnecessary.

Business Too Prussian

"Why did we need the Sherman law? Because there was too much Prussianism in business. It took the rude shock of the outbreak of war to make the big manufacturer and head of the big trust realise that he too was dealing in Prussian style. It took the war to waken us up to the fact that we were doing business in the German way without regard to the rights of small business.

A New Age of Business

"After this war Great Britain, and France and America will countenance small business as never before, in the co-operative spirit, the new spirit of business. We are approaching the age of co-operation. Why if you had suggested four years ago that the government should take control of the railways, what would have happened? You would have been utterly disregarded. If you had said four years ago that the factories and mills would be ordered to close down on Mondays? Don't you see that we are coming into a new age?

Awakening Conscience

"The awakening conscience of civilisation will make it a better world. Only through sacrifice could we come to realise it. Only the life of sacrifice leads to the life worth living."

That the whole scheme of the trade war Germany was carrying on throughout the world before 1914 was part of the preliminaries of the real war that broke out on August 4th of that year, Mr. Jones declared?

What Paternalism Did

Behind all this commercial preparation was what he sternly described as "damnable paternalism," the policy of the Prussian ruling caste with the Kaiser at their head. "Germany has done nothing since the war began more damnable than Germany was doing before the war in trade" declared Mr. Jones.

"If we had only had the foresight, we might have known that Prussia with her lying guise of peaceful intent was all the time preparing for the war of world conquest." he claimed.

"But none of the nations ever realised that Germany with her policy of paternalism was assiduously building up her power throughout the world. To such an extent was she doing this with her agents everywhere, that we in the United States for long after war started did not know whom we could well trust. That I believe had a great deal to do with our staying out of the war for so long.

Breaking the Prussian Spell

"The Kaiser thought he had finished his work in South America and the United States. Backed up by that damnable paternalism science had stepped forward a long way in Germany. Why, they were so damnably cunning they had got business people in Britain believing that no dyes could be made without German skill. They were making great headway towards their Prussian ideal of world domination with the Kaiser as the right hand man of God.

"But thank God for England that rushed to the aid of little Belgium: thank God for the English colonies that stood shoulder to shoulder with her, and gave every thing they had to end this accursed paternalism of Prussia. Thank God that my own country is side by side in the battle with these countries!"

End of All Autocracy

"The banner of freedom will be unfurled, and autocracy be a thing of the past not only in Governments but in business. The atmosphere of business is becoming clarified. The employee is coming closer to the business man, his employer. From the era of competition that was almost military we come to the age of co-operation, and of co-operative competition. I think that you in Canada have gone farther ahead in this than we have so far in the United States. You have faced your losses, and learned the value of your sacrifices. We in the States will learn our lesson also, and will never forget it.

The Returned Soldier

"Our problems after the war will be industrial problems. You have some of them already. You have your soldiers coming back wounded, and I am glad to see that your government is making plans to take care of the returned soldiers. Some of these boys will have to be made over. They come back almost as helpless as children after having been through the discipline under government orders and supervision, fed, clothed, told where to go and what to do for so long, and facing such nerve testing ordeals.

EVENTS IN THE TRADE

Presentation to Lieut.-Col. C. M. Strange

Lieut.-Col. C. M. Strange, For 23 Years With Lewis Bros., Montreal, Resigns—Banquet Given in His Honor

LIEUT.-COL. C. M. Strange, with the wholesale hardware firm of Lewis Bros., Ltd., for the past 23 years, and for many years their sales manager, was tendered a farewell banquet on Saturday evening last.

There were nearly 90 members of the office and warehouse staffs present and with a few invited guests the number reached this figure.

It was called "Strange" night and a departure from the usual weekly "Change" sheet was made by substituting therefor, "Strange Sheet" number 23. This contained a combination of suitable verse, and "23" was used to designate the number of years' service Col. Strange had seen with the firm.

The duties of toastmaster were ably performed by J. Thurston Smith, secretary-treasurer of the company and the following toasts were proposed—"The King," "Lewis Bros.," "Lt.-Col. C. M. Strange," "The Travellers," "The Ladies," and "Our Guests."

Letters of regret were read from J. G. Lewis, manager, who was unable to be present—and several telegrams and letters from other friends, regretting that they were unable to attend.

The surprise of the evening came when, in proposing the health of Col. Strange, Mr. Smith presented him, on behalf of the firm and its staff, with a very beautiful clock. This was of a cut glass and bronze case, and was gold-plated and suitably engraved.

In replying to the toast and accepting the gift, Col. Strange in a reminiscent way recalled the history of the firm and of his long connection with it. Twenty-three years before he had gone on the road as a drummer and in those early days he had had some of the real trials of the traveller who was compelled to use their limited means of transport, as far as out-of-the-way points were concerned. He had once been compelled to pull the sample trunks, that were carried in Manitoba, from the rig and sleep between them when it registered 22 degrees below zero. He had driven in to town through a blizzard with his gauntlets frozen on, and felt that he had received a very true initiation in these early days into the life of a drummer.

In referring to the growth of the firm, he had been carried back to the time when Mr. F. O. Lewis, and Col. Maclean had roomed together in Kingston, 25 years ago, and he believed that Lewis Bros. were among the first to advertise in HARDWARE AND METAL, and they were still advertising with this paper.

On all occasions he had felt that the staff and travellers were loyal and if the great strides made by the firm were analyzed, it would be found that they had contributed to the success that had been

LIEUT.-COL. C. M. STRANGE
who has resigned his position with Lewis Bros., Montreal

attained. And he admonished the men to continue in this spirit and believed that they would do so.

Other toasts were responded to by Mr. Bureau on behalf of the travellers; "The Ladies" — Lt.-Col. Strange; "Lewis Bros.," also by Col. Strange and "Our Guests," which was spoken to by John R. Anderson, late of the firm, and Mr. Cote, an old employee; Mr. Gratton, and also by J. A. Beaudry of "Le Prix Courant" and A. H. Illsey of HARDWARE AND METAL.

In addition to the toast list instrumental and vocal selections were contributed by members of the staff, the following assisting in this way: J. Thurston Smith; H. Bouchard; Paul Dansereau; Arthur Tanguay; L. Burgeois; Chas. Jones; J. L. Berube; Mr. Pennington and Mr. Litchfield.

Col. Strange assumes the management of the Engineers' Club and will be succeeded by J. A. Fraser, late of the Jas. Walker Hardware Co., Ltd.

The following were those in attendance:

Chairman—J. Thurston Smith, secretary-treasurer.

Guests—J. A. Beaudry, sec.-treas., Retail Merchants' Association; A. H. Illsey, Hardware and Metal; W. A. Rankin, Ottawa; J. R. Anderson, E. C. Cote, C. H. Gratton. H

Travellers—A. Gamache, D. Deschamps, L. Bourgeois, J. A. E. Bureau, A. Desjardins, C. Gobeil, A. D. Lablanc, G. A. Walker.

Staff—H. V. Armstrong, assistant manager; G. R. Burton, superintendent; A. Weir, J. Salmond, F. Savage, D. P. Fraser, C. Neal, E. A. Bouchard, E. Booth, A. L'Esperance, A. Gravel, J. R. Laberge, G. Dansereau, R. Dawson, E. Charlebois, O. Marchand, L. Charron, A. Barnett, C. Lefebvre, A. Demers, A. J. Bedard, J. Pilon, V. Gagne, M. Forest, C. A. Tanguay, C. Dufresne, R. C. Pennington, R. Dyer, J. Hill, H. Bouchard, J. A. Page, J. Berube, R. Bell, A. Faulkner, J. Squires, R. Binnette, O. Lefebvre, J. Moat, H. Gariepy, A. Rollins, A. Boisvert, G. Percy, E. Marsan, L. Lauzon, F. Cantillon, A. H. Duck, A. Paradis, R. Leduc, R. Laganiere, A. Desparois, A. Payette, T. Lesperance, L. Dumont, J. B. Gravel, J. Kennedy, D. Charron, C. Jones, E. Peloquin, A. Drainville, L. Poirer, D. Verdon, P. Savignac, D. Roussin, S. Ashworth, E. Guernon, J. H. Blouin, M. Bourrett, T. Litchfield, A. Forbes, R. Dick, J. Loranger, G. Warfield, E. Vallkamp.

LEWIS BROS. SELECT NEW SALES MANAGER

John A. Fraser, for the past five years retail manager for the James Walker Hardware Co., Ltd., Montreal, has been appointed sales manager for Lewis Bros., Ltd., in succession to Lt.-Col. C. M. Strange, resigned.

Mr. Fraser is a native of Atlanta, Georgia. For years he was with the Simmons Hardware Co. of St. Louis, and represented them on the road as one of their representatives.

He joined the Walker staff as manager and for some time has been retail manager. He also was a shareholder in the firm, and has had charge of the advertising and of the compilation of their auto accessory catalogue. Among the local organizations of which he is a member are the Montreal Publicity Club and the Kiwanis Club. He will assume his new duties on March 18.

Capt. C. W. Wiggs, eldest son of W. H. Wings, president of the Mechanics Supply Co., Limited, Quebec, has been favourably mentioned in Sir Douglas Haig's despatches. Capt. Wiggs went over to France with the First Contingent. He has two other brothers now in England with the McGill Battery

Martin-Senour Acquire International Varnish Company

Important Transaction Affecting Two Large and Well Known Canadian Paint and Varnish Companies

JUST as HARDWARE AND METAL is going to press, it has been learned that the Martin-Senour Company, Limited, has acquired the entire plant and business of the International Varnish Company, Toronto. Complete details are not yet available but it is understood that Martin-Senour will continue to conduct the subsidiary company under the present name of "The International Varnish Company."

The amalgamation of these two companies forms a particularly strong combination as both companies have a splendid trade connection throughout the Dominion, and branch offices and warehouses in many of the distributing points in Canada.

Details of future plans are not available at the time of going to press but will undoubtedly be forthcoming in the very near future. Both companies at present are operating in fields of a somewhat dissimilar character.

The International Varnish Company's Canadian branch, which was an associate of the Standard Varnish Company of the U.S., was established in Toronto about 13 or 14 years ago. This company not only has a good connection with the retail trade in various parts of Canada but also enjoyed a large trade with manufacturers and industrial concerns.

The Canadian branch of the Martin-Senour Co. was established in Canada, In January, 1906, with headquarters at Montreal. The company developed with remarkable rapidity and attention was confined largely to the dealer trade among whom the Martin-Senour Company have built up an exceedingly large connection.

The amalgamation of the two companies makes a strong combination owing to the strength of the Martin-Senour connection with the dealer trade and also to the strength of the International Varnish Co. through the manufacturing and architectural trades.

Former Food Controller Heads Oil Co.

Hon. W. J. Hanna Elected President of Imperial Oil, Limited, at Meeting of Directors Held Last Week

HON. W. J. Hanna, K.C., former Food Controller for Canada, has been appointed President of the Imperial Oil Company, Limited, of Canada. The appointment follows by reason of the resignation from that office of Walter C. Teagle who has been appointed to the presidency of the Standard Oil Company of New Jersey, the parent company of the Standard Oil interests. Mr. Hanna has been the legal adviser of the Imperial Oil Company since its early days and within recent years has been one of the board of directors. Since the retirement of Mr. Teagle from the presidency of the Imperial Oil there have been forecasts from time to time that the mantle of office would in all probability fall on Mr. Hanna. Walter C. Teagle will continue to be a member of the board of directors of the Imperial Oil, Limited. The board is constituted as follows: J. L. Englehart, A. S. Rogers, J. P. Rogers, C. O. Stillman, G. W. Mayor, W. C. Teagle, G. H. Smith, W. W. Oswald, T. S. Smallman, W. T. McKee and W. J. Hanna, K.C.

HON. W. J. HANNA
who has been elected President of the Imperial Oil Company, Limited

Activities as Public Official

Hon. W. J. Hanna became a member of the Ontario Legislature in 1902 and in February, 1905, was made Provincial Secretary, which position he held until December, 1916, becoming at that time minister without portfolio. Recently it has been intimated that he did not intend to seek re-election in West Lambton, which has been taken to mean that he intends to devote his entire time to the Imperial Oil Company. While Provincial Secretary Hon. M. Hanna achieved a reputation as a business executive by the development of several Government enterprises to utilize the labor of prisoners. Some of these enterprises were made profitable from a business standpoint. They were a form of practical philanthropy at the same time in that they caused a revolution in the administration of provincial penal institutions. His idea was to substitute reformation for punishment of the recalcitrant members of the social body.

P. A. C. McINTYRE,
Winnipeg, who heads a new firm of manufacturers' agents.

Mr. Hanna as Food Controller

On June 20, 1916, Hon. W. J. Hanna was appointed Food Controller for the Dominion of Canada. At the time of his retirement from that office on January 24 of this year he was a veteran among Food Controllers, having been appointed prior to either of the present Food Controllers of Great Britain or the United States. Mr. Hanna is now on a trip to Peru, an important source of petroleum production, where some of the oil fields of the International Petroleum Company are located. This latter company is a subsidiary company of the Imperial Oil Company. It is understood that pressing needs for increased production in the petroleum industry have been partially responsible for his present visit to Peru.

NEW FIRM OF AGENTS

P. A. C. McIntyre & Co. have recently opened up for business as manufacturers agents in the Scott Block, Winnipeg. P. A. C. McIntyre, head of this concern is well known in Western Canada, where he represented Berry Bros., Inc., for six or seven years, working out of Winnipeg, and travelling as far west as Vancouver. Prior to that he was with Marshall Wells Co., Ltd., Winnipeg, Mr. McIntyre achieved considerable fame in 1912 by winning the $500 prize in gold offered by Berry Bros., Inc., for the salesman having the largest sales for that year. This was a very creditable achievement considering that he was in competition with salesmen all over the American continent.

The new company is handling hardware and auto accessories.

TWO PROMINENT NEW BRUNSWICK HARDWAREMEN DIE

John Walker Knox, ship's chandler and hardware, died this week at his home in St. John, N. B. He succeeded to the business, with which he had been associated for many years, on the death of his father. The business was one of the oldest in its line in the city and Mr. Knox enjoyed the respect and esteem of the business community as well as of a large circle of personal friends.

After an illness of several months, Philip Granan, who conducted a successful stove and hardware business in the north end of St. John, died this week. Mr. Granan was looked up to as a leader by a large section of the community and was influential in the councils of the political party to which he belonged. In 1912 he was elected to the provincial legislature and served until the general elections in 1917, when the condition of his health made it impossible for him to accept another nomination. His funeral was an impressive public tribute to the place he occupied in the community.

Major Ronald A. McAvity of T. McAvity & Sons, Ltd., St. John, who went overseas with the First Contingent in 1914, has been appointed deputy assistant director of ordnance services with the Canadian headquarters overseas.

Dollar Day was observed again in St. John on February 21, the hardware merchants generally co-operating. The volume of business was large and the merchants expressed great satisfaction with the results.

Negotiations between the master plumbers and the journeymen who have been on strike for the last ten months in St. John have been re-opened with some prospects of settlement. Some of the journeymen have been working in Halifax since the recent disaster; a few opened shops of their own and others have been working in other lines.

The next large building job in St. John will be the reconstruction of St. David's Presbyterian church, destroyed by fire in December. F. Neil Brodie is at work on plans for a building which is expected to cost about $110,000.

TAKES EXCEPTION TO LETTER

In a recent issue of HARDWARE AND METAL, a letter was reproduced from a subscriber in which he asked whether the sale of 9½ gauge wire fencing were permissible in Ontario and whether this might be called a standard gauge. A copy of our reply shown herewith has been taken exception to by one Canadian manufacturer. The letter which we wrote is in part as follows:

"Acknowledging your letter of January 22, there is no restriction placed on the sale of 9½ gauge wire fencing. This might also be called a standard gauge.

"Your letter opens up a really big field for discussion. To import wire from the United States it is necessary to declare fencing No. 9 gauge to have it come in duty free. However, the customs authorities allow a variation of two or three points and in this way 9½ gauge which is really a light No. 9 could be brought in.

"Canadian manufacturers are not compelled to conform to any standard in the selling of fencing outside of the fact that when they declare same is a certain gauge it must be that gauge. There is no reason why a Canadian manufacturer could not draw 9 gauge as well as 9½, but in either case he would have to declare his product.

"In selling a 9½ gauge wire fencing, and calling same a standard gauge fence any manufacturer would be quite within his rights."

The letter which we have received from a Canadian manufacturer is as follows:

"We wish to call your attention to the incorrectness of some of the statements which you have made in connection with your reply to your customer's question.

"In the first place the customs do not and have not admitted No. 9 or No. 9½ gauge wire fencing to enter Canada free, viz., manufactured fencing, but they do permit No. 9 Imperial gauge wire, being .144 with a variation of 2/1000 larger or smaller, to enter Canada free, with the exception of the 7½ per cent. war tax charged against all imports, and No. 9½ gauge wire has not been allowed to enter on the same basis as No. 9 above referred to for nearly four years now. Besides strictly speaking No. 9½ gauge wire means more than a variation of one or two points, for No. 10 Imperial is .128, so that No. 9½ should gauge about .136, or about 8/1000 smaller than No. 9 Imperial gauge wire.

"And as for what you say about it being quite permissible to call No. 9½ gauge wire fencing standard gauge fence, it may be true that there is no penalty attached to said action, but do you not think that, to say the least of it. a manufacturer pursuing such a course, viz. in calling a lighter weight or under gauge article a standard, when there has been no standard established in this connection, is at least open to a charge of misrepresentation.

"We think that what your subscriber had in mind when writing you, was a fence made from No. 10 gauge wire, recently placed on the market and called standard gauge, the manufacturers being apparently willing to convey the idea that this brand of fence is the same as the bulk of the fence manufactured by other Canadian manufacturers, which is practically all made from all No. 9 gauge or .144 wire."

NEW FACTORY PROJECTED FOR CANADA METAL CO.

It is understood that arrangements are being made to erect a new factory at Mile End for the Montreal business of the Canada Metal Company.

The building will be a one and one-half storey structure, and the initial area will be 100 by 110 feet. It is stated that this will be capable of handling business on the same large scale as is done in the parent plant at Toronto.

In view of the probability of requiring further accommodation later some 26,000 feet of land have been secured.

PERSONAL

B. F. Kiesel, of the Canadian Lamp & Stamping Co., Ford, Ont., spent a few days in Toronto and Montreal during the past week on a business trip.

S. E. Waffle of the Alexander McArthur & Co., Ltd., Montreal, manufacturers of paper and roofing materials, was a business visitor to Toronto during the week.

S. L. Adolph, hardware merchant, Listowel, Ont., was a recent visitor at the Toronto office of HARDWARE AND METAL.

The many friends of Mr. H. G. Wright, president of the E. T. Wright Co., Limited, Hamilton, will be very pleased to know that he is recovering from his prolonged illness.

Mr. Wright has been confined to his room for eight weeks with a severe attack of inflammatory rheumatism, and is leaving to-day for a short visit to southern points, with the hopes of effecting a permanent cure, and the expectation of being thoroughly convalescent upon his return to Hamilton.

W. A. Hughes, buyer and manager of the hardware, toys and silverware department of the Hudson's Bay Company at Winnipeg, was a visitor at the Toronto office of HARDWARE AND METAL during the week.

J. Perrault, manager of the George Taylor Hardware Company's New Liskeard branch, has been taking a short vacation. While in Toronto he was a visitor at the office of HARDWARE AND METAL

MONTREAL NEWS ITEMS

O. N. Parent, representing the Canadian Yale and Towne Co., Limited, of St. Catharines, was in Montreal this week.

Mr. Shay, of the Godell Pratt Co., Greenfield, Mass., has been calling on the Montreal trade this week.

J. E. Stone, representative of the Stanley Rule and Level Co., of New Britain, Conn., was a Montreal visitor this week.

John Irwin, vice-president of the firm of McArthur, Irwin, Ltd., is visiting in New York, Philadelphia, Washington, Baltimore and other southern points this week.

Mr. Hunter, representing the Wentworth Brass Co., of Hamilton, was in Montreal this week calling on the trade.

W. J. Falls, representing the New Haven Clock Co., of New Haven, Conn., was a Montreal visitor this week in the interests of his firm.

Mr. Marshall, representing the Woodworth Manufacturing Corporation of Niagara Falls, New York, was in Montreal this week.

THE CLERKS DEPARTMENT

HOW GARY QUALIFIED AS GREATEST EXECUTIVE

An Intimate Story of the Life History of the Present Head of the United States Steel Corporation

HOW did the man who occupies the highest position in the largest organization in the world fit himself for it? The question is asked by B. C. Forbes in "Forbes' Magazine," and he answers it himself by giving a detailed, line-upon-line, fact-upon-fact account of how Elbert H. Gary, a farmer's boy, by diligent study and work, first became a lawyer and judge, and then showed such executive ability that J. P. Morgan and others singled him out as the one man in America to head the new billion dollar steel combination—the United States Steel Corporation—which has ever since been the best-filled job in the United States. Mr. Forbes writes as follows:

Elbert H. Gary had no phenomenal ancestry and owed nothing unusual to heredity. His parents were both of New England stock; his father's forebears had come from England and his mother's from France. His father, Erastus Gary, left Connecticut in 1834 and looked over prospects in Illinois. He examined the land on which Chicago is now located but, though he could have bought any part or all of it from the Government at $1.25 per acre, he decided it was too low, flat and marshy for agricultural purposes, and chose 800 acres 25 miles west of Chicago, near the village of Warrenville, about four miles from what afterwards became Wheaton, Illinois.

When Elbert was about three his father built a house on the spot which shortly afterwards developed into the hamlet of Wheaton. Erastus Gary had analyzed the railroad situation correctly, for the Chicago & Galena Union R. R. (now C. & N. W. Ry.) line was built through the farm. He bought different additional parcels of land and brought about 400 acres under cultivation. Just prior to this two former Connecticut friends, Warren L. Wheaton, who married Erastus' oldest sister's daughter, and Jesse C. Wheaton, who married Erastus Gary's youngest sister, had come west and acquired adjoining farms. A community composed mostly of old New Englanders and including Elbert's maternal grandfather, sprang up—not at the station, but half a mile away, as these careful New England parents did not wish their children to be reared too close to a depot where they might meet people and hear things that would have no good influence upon them. A humble district school was opened; a Methodist Episcopal church was established and the village grew so rapidly that in a few years Wheaton Seminary was built, an ambitious seat of learning which afterwards was changed into Wheaton College, still in existence.

Elbert H. Gary's education began in the district school when he was four. Both his father and mother had taught school in their younger days and were thoroughly grounded in the rudiments. They took the keenest and closest interest in the daily lessons of the children. Indeed, there was a strict rule that each child must keep well ahead of the school tasks: in arithmetic, in geography, in history, in spelling, etc., the Gary children were pages and pages in advance of their classes, the parents going over the tasks at home, so when they came up at school the Garys were entirely familiar with them and with what was to follow. No idling, no indifference, no carelessness was tolerated. Everything had to be learned thoroughly and grasped clearly. Mere superficial memorizing to enable a lesson to be rattled off by rote was never permitted.

Keeps Ahead in School

Contests in spelling, in "ciphering," in reading, etc., were constantly held both in and out of school. These New England settlers were determined that their children should have proper foundations of learning. At the end of each term a public exhibition was held and brought out every parent in the district. In addition to singing and, instrumental music the pupils recited declamations, took part in dialogues and were carefully drilled in pronunciation, enunciation and other oratorical incidences. It was during these early experiences that Elbert Gary gained aptitude for speaking in public.

The school teacher of those far-back days is still alive, and recalls that little Elbert Gary was usually at or near the top of his classes. The boy was especially good at arithmetic and could lick any other pupil in speed contests, both mental and written. His parents regarded him as something of a prodigy in this line, and used to challenge visitors to "race" him. It was, indeed, one of his victories at arithmetic—over a lawyer uncle—that later determined the course of Elbert's early career.

Had No Spending Money

Although Erastus Gary farmed on what was then considered a large scale and was a man of such importance in the county that he was made a Magistrate, the duties of which he carried along with his farm, he possessed very little money. In pre-war days, in fact, money was an extremely scarce commodity in most of those pioneer, rural communities. The Gary children were given no spending money whatever. Nor were they encouraged to indulge in frivolous amusement or recreation. They were taught that work supplied all the exercise they needed for their bodies and that their studies took ample care of the development of their minds.

The year was divided into halves: the winter half was given up to school and the summer half to work on the farm.

"You can either work or study, but you must keep at one or the other," was the father's firm injunction.

And the boys had to work just as hard as they had to study. By the time they reached eight years of age they had to get out of bed by five o'clock in the morning, start the day by each milking half a dozen cows and were kept busily employed until seven at night. While still mere lads they could hoe in the field or garden, herd cattle on the prairies (there were then no fences), drive horses, feed live stock and do a hundred other chores. At twelve they were doing the work of full-grown men, such as pitching hay, stacking hay, binding corn, plowing, sowing, using the scythe, driving a reaper, stacking grain, chopping down trees and cutting timber. In one memorable competition Elbert and his older brother established a record for the number of loads of hay taken from the field and stacked. So familiar did the lads become with the handling of horses that they used to hold races standing with bare feet on the bare backs of the horses, circus style.

Lives Simple Life

Shoes, generally speaking, were worn only in the winter months. The Garys spent very little on clothing. Only on Sundays was any attempt made to dress-up; then great pride was taken by the simple folks of Wheaton in seeing that their children were scrupulously neat and clean when going to school or church. The clothing was of the cheapest quality and often was patched—but patched with skilful hands. As with clothing, so with food; it was of the plainest variety, almost everything homegrown. Indeed, very little manufactured goods of any kind entered the Gary home. The spinning wheel was kept busy. Mother made all the tallow candles used for lighting purposes. Soft soap was likewise made at home. In short, very few dollars were spent in stores from one year's end to the other. Most of the inconsiderable ready money that came to farmer Gary was given to the church or to needy relatives or to other worthy purposes.

This frugal, clean, industrious life developed children of sound bodies and sound minds. The Gary boys did not know what it was to have even a cold. Sometimes they would be so fatigued in harvest time that they would drop down and fall asleep in their tracks, but even though, as sometimes happened, they would get up drenched with rain, they felt no after effects. They were as healthy and lithe and strong as young colts.

From school Elbert graduated to Wheaton College. At this stage he contracted a liking for attending the trials of cases heard by his father in his capacity as a Magistrate. What Magistrate Gary lacked in legal law he made up in horse sense. During his forty years' services as a Magistrate he built up a reputation for absolute fairness, and litigants had no fear of receiving from his hands anything but justice.

Continued in next issue.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

IMPROVED NAIL PULLERS

Smith & Hemenway Co., Inc., tool manufacturers, 261 Broadway, New York, are placing on the market an improved nail puller. The long jaw of this tool is forged from special nail puller steel. The short jaw is a box joint, that is, the joint divides and allows the long jaw to pass through. No springs are used in the construction of the puller. Back of the long jaw there is a box chisel for strapping, nails and barrel hooks. The weight of the No. 101 nail

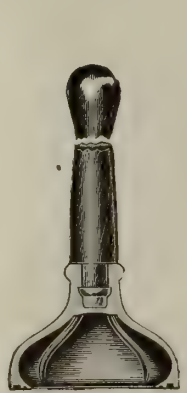
Improved Types of Nail Pullers

puller is 6 pounds. It is claimed that one blow delivered with the rammer will kill any nail in the hardest wood.

In Nos. 01 and 01½ the improvement over the old style of nail puller consists in the fact that long jaw goes through the claws of the short jaw, thereby preventing any side thrust or loosening up of the puller. There is a handguard on the rammer designed to prevent pinching the hand. The weight of this latter design is 5¾ pounds. A smaller type is made weighing 3½ pounds.

COIL WIRE CLOSET CLEANER

Allan J. Coleman, north-west corner Lake Street and Wabash Avenue, Chicago, is introducing a number of new sanitary specialties to the trade. One of these is the flexible coil wire closet cleaner. It is designed to remove obstructions from water closets, drain pipes, etc. By turning the handle to the right the coil goes through the closet, obstruction is caught and brought back to the opening. The flexible coil is made of oil-tempered spring steel wire of No. 12 gauge. There is a steel corkscrew and removable cone wire, which is designed to catch all obstructions.



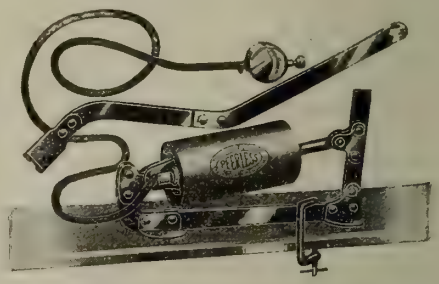
Another of the new lines recently

Coleman Improved Sanitary Toilet Bowl Brush.

placed on the market by the above concern is an improved suction and force cup. The ribbing, both inside and outside, is designed to carry the weight, thereby leaving the wall thin and making a pliable cup. Corrugations which are on the bottom are claimed to give a perfect seal, which improves the sucking and force action.

An improved sanitary toilet bowl brush is also being placed on the market by A. J. Coleman. A curve at the end of the brush is designed to make it easy to remove accumulations at the

Coleman Improved Suction and Force Cup.



Coleman Flexible Coil Wire Closet Cleaner.

turn of the trap. They are made in two grades—a stiff Palmyra fibre and a bleached white Tampico fibre.

NEW OIL ENGINE

A new type of oil engine is being placed on the market by the Evinrude Motor Company, 326 Walker Street, Milwaukee, Wis. This engine is designed to use the low-priced heavier oils, such as kerosene, fuel oil, solar oil, crude oil, stove and coal oils. It is claimed for this engine that a tiny drop of any cheap oil in the cup is sufficient to start the power stroke. It is asserted that super heat caused by high compression produces perfect combustion without waste or loss of power. One of the features claimed for this engine is its saving in fuel cost. It is made in two sizes, namely one and one-half horsepower and three horsepower, with additional sizes to be added. The principle of operation of the engine is as follows: Beginning with the intake stroke, pure air is only taken into the cylinder, while a charge of oil enters the fuel cup. During the compression stroke a part of the compressed air is forced into the fuel cup where a gas mixture is formed which, as the compression in-

No. 20 Peerless Tire Pump.

creases, is ignited. An explosion follows, which forces the oil in a highly atomized state into the cylinder, where the combustion proper takes place. When the combustion is completed the piston is driven forward on its power stroke by the force of the expanding gases. At the end of the power or expansion stroke the exhaust valve opens and the gases are expelled, thus completing the cycle which is, of course, repeated over and over again.

RUNNING BOARD TIRE PUMP

The Corcoran Manufacturing Company of Cincinnati, O., is manufacturing a new product known as the Peerless No. 20 running board tire pump. The manufacturers state that it made of all-steel stampings, and since there are no steel castings used breakage is eliminated. The cylinder is one-piece and seamless. The pump is finished in all black japan with the cylinder finished in red. Each pump is packed in a carton, complete with gauge, if ordered, 90 inches of hose and a clamp to fasten on running board. The handle folds, and all will fit in a small tool box. The manufacturers state they will guarantee the pump for the life of the car.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

ANNOUNCEMENT of prices adopted on binder twine for the season is made elsewhere in this issue and follows along predictions made in these columns last week. The opening price of 23½c for 500-foot lengths is 7⅝c per pound higher than that set in April last year and 4c above quotations later in the season. No difficulty will be experienced in taking care of requirements, it is stated.

A spectacular rise in the price of linseed oil has gone into effect and prices being quoted are 23c per gallon higher than those ruling last week. In some quarters no quotations are being made whatever and the situation with regard to supplies is said to be serious.

A big advance in window glass has been put into effect and a new list adopted. The new list will apply to Montreal as well as Ontario points and be subject to a discount of 25 per cent. This provides for an advance of between 20 and 25 per cent. over quotations previously ruling.

Some slight improvement is shown in the movement of freight generally, though the strike now existing in Toronto is holding up outgoing shipments and jobbers' warehouses are rapidly filling up with orders packed but no means of being shipped.

Advances were not numerous during the week though changes in an upward direction were reported on curtain stretchers, cotton duck belting, saw vises and tin roofing caps. Added strength in the tin and lead markets resulted in higher prices on solder. A very firm situation exists on wire nails and advances in sash cord would not be unexpected. Business is reported good.

MONTREAL MARKETS

MONTREAL, March 7.—The week has been one of a somewhat quieter tone all around, but a fair lot of orders are still coming forward from the country. In one large jobbing house the trucks have been kept well loaded with various lots of goods being boxed for country dealers, and this reflects conditions with others also. Changes have not been great, and there are rather fewer. Wood hay rakes have advanced about 5 per cent. and wood snow shovels nearly 15 per cent. The feature of the ingot metal market has been an increase in the price of tin, which is selling at 95c to $1 per pound. Pig lead is also firm. Rope has been ruling at maintained prices, and the new quotations are announced for binder twine elsewhere. As will be elsewhere noted there are some interesting comments and interviews regarding the situation prevailing and likely to prevail in the sheet steel and tinplate market, and also regarding ingot tin. The outlook for better trade conditions is promising, taking matters generally.

Wood Hay Rakes And Snow Shovels Higher

Montreal.

WOOD HAY RAKES AND SNOW SHOVELS.—The regular lines of wood hay rakes have again been advanced, and these are now selling 5 per cent. higher than formerly. There is also an advance in the price of Victor snow shovels, and this is equal to an increase of nearly 15 per cent., the discount now being 30 per cent.

One Line Single Barrel Shotguns Is Advanced

Montreal.

FIREARMS.—There was an advance this week in the price of shotguns. This applies to Iver-Johnson make and to the single-barreled styles only. The advance is 50c each, and this makes the price of the automatic-ejector variety $9.60 and of the non-ejector style $9.15.

Stoves And Wares Firm, But Unchanged

Montreal.

STOVES ANR ENAMELED WARE. The state of trade is reported to be reasonably fair for this time of the year. However, it is not the stove season, and what requirements there are may be classed as small for present delivery. For the future there is a good outlook, say the manufacturers. Enameled ware and the usual shelf lines of galvanized and tinware are moving slowly, while the promise for good spring business is reported to be reassuring.

Rope Situation Still Rules Firm

Montreal.

ROPE AND CORDAGE.—The cordage and rope markets are ruling firmly this week, but without change. There is not a great deal of business at the present, but this is expected to improve very materially as the season advances and as shipping is being overhauled again for the season's work.

Prices on binder twine have been adopted by the manufactures at higher figures than those ruling last year and are embodied in a panel on another page.

Coal Oil Supplies And Gasoline Are Ample

Montreal.

GASOLINE AND COAL OIL.—These two commodities are said to be available here in satisfactory quantities, and the trade is being supplied from week to week without any shortage. The prices are held unchanged, with Royalite coal oil selling at 17c per gallon and Palacine and Electroline at 20c. Gasoline is still 32½c. It may be that there will be some little congestion when the season opens, as the deliveries of heavy booking of lubricating oils will tax the capacity of local oil concerns. There is a good outlook.

Wire Nails And Wire Have Been Selling

Montreal.

WIRE AND CUT NAILS AND WIRE.—The usual amount of routine business is being done among the trade and orders are better and more frequent from the country than from within the city. There have been a fairly good lot of orders from merchants for spring shipment, and these will be filled, think the jobbers, without any delays as the season advances. Cut nails are still based at $5.60; wire nails at $5.25; and smooth steel wire is selling at the base price of $6.25.

Sheets Are Selling In Fair Quantities

Montreal.

SHEETS AND PLATES.—There is

very little of new interest in the local situation with regard to sheets. The supply of certain gauges is sufficient to meet the trade requirements, which are reported to be just fair and seasonable. It would seem that the range of prices will maintain for the immediate future on some lines, and the existing prices are much more favorable than those prevailing for many previous weeks and months. The situation regarding future deliveries is elsewhere dealt with, and this will be found a very interesting feature to those buying future supplies. Prices rule as follows:

BLACK SHEETS—		100 lbs.
10 gauge	$8 00	$11 50
12 gauge	8 65	10 50
14 gauge	8 80	7 90
16 gauge	9 00	8 00
18-20 gauge	9 25	7 80
22-24 gauge	9 40	7 85
26 gauge	9 45	7 90
28 gauge	....	8 00
10¾ oz (28 English)	10 55	10.75
GALVANIZED SHEETS—		
10¾ oz.		$10 00
28 ga.		9 65
26 ga.		9 25
22 and 24 ga.		9 05
20 ga.		8 85
18 ga.		8 85
16 ga.		8 70

Bar Iron And Steel Hold In Quiet Market

Montreal.

IRON AND STEEL.—The iron and steel markets are naturally somewhat quiet. Fair demand obtains from the outside, where business has continued to remain in a fairly satisfactory state, as indicated by repeat orders received during the winter months. Prices are expected to hold without change, and for the week there have been no revisions one way or the other.

MONTREAL—	
Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	11 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Fashioned Lead Bends And Products Unchanged

Montreal.

LEAD PRODUCTS.—Although there is a firmer tone to the market for ingot lead, the manufactured lines are held without change. It is not suggested that there will be any upward revision at the present time, although it is expected that there will be a firming of these prices for the present. Supplies are ample for the somewhat limited trading that is being done. Prices are as follows:

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 12½	0 13
Lead sheets, 4 to 8 lbs. sq. ft.	0 11½	0 12½
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c lb. extra.		
Solder, strictly, lb.	0 41½	0 47
Solder, commercial, lb.	0 42½	0 45
Solder, wiping, lb.	0 42	0 42½
Zinc sheets, casks	0 26	0 30
Do., broken lots	0 28	0 32

Old Materials Are Quiet, But Are Firm

Montreal.

OLD MATERIALS.—No new features have been applied to the market this week and prices are held without change, excepting that tea lead is higher, and also scrap zinc. It is expected that the better weather will permit of the marketing of supplies that have accumulated here and there. For some of the old metals there will probably be a better demand, and this will perhaps be the case with reference to old rubbers. Steel and iron are in strong position among the scrap metals, but prices have not been changed. Tea lead and scrap zinc are firm.

MONTREAL—		
Tea lead	$ 0 05	$0 06½
Heavy lead pipe	0 06¼	0 06½
Yellow brass	0 13½	0 14
Red brass	0 20	0 21½
Light brass	0 08	....
Scrap zinc	0 05½	0 06
Heavy copper	0 22	0 23
Wrought iron, No. 1, per gr. ton	25 00	....
No. 1 machinery scrap	27 00	....
Heavy melting steel	18 00	20 00
Pipe scrap	15 00	17 00
Stove plate, per ton	17 00	19 00
Old rubbers, boots and shoes.	0 08	0 08½
Overshoes, lumbermen's rubbers		
boots	0 07	....
Bicycle tires	0 04¼	....
Auto tires	0 04½	0 05½
No. 2 busheling	....	13 00

Ingot Tin As High As $1; Pig Lead Is Stronger

Montreal.

INGOT METALS.—The feature of this week has been the continued strength of tin, and this has advanced again. Some are selling it at as high as $1 per pound. Pig lead is very firm, too, and is higher.

COPPER.—The position of copper is held unchanged, and there is stated to be a better supply in sight of the Canadian product. Prices are held still at 33c to 34c per lb.

LEAD.—In view of the strength of lead in the primary markets the prices have firmed here and the range is higher this week at 10c to 10½c per lb.

TIN.—Some uncertainty exists as to the future treatment of Canadian dealers and importers. It is stated that there is a strong probability of the market being closed for a time. Following this suggestion, tin has recorded a new high level, and is selling at 95c to $1 per lb. Reference to this is made elsewhere.

SPELTER.—There is a fair demand for spelter, and the prices are held unchanged at 10½c to 11c per lb. Stocks are light, it is stated.

ANTIMONY.—Position unchanged. There is a fair business being transacted on the basis of 19c per lb.

ALUMINUM.—The trading in aluminum is small. There is really very little interest and the prices range from 55c to 57c per lb.

TORONTO MARKETS

TORONTO, March 7.—Binder twine prices have been set and are on the basis predicted by HARDWARE AND METAL, the 500 ft. being 23½c per pound delivered. Other price changes though by no means numerous have been in an upward direction and include solder, belting, tin roofing caps, curtain stretchers, saw vises, etc. A very firm situation is revealed in wire nails and all lines of waxed products are reported very scarce with prices on an upward trend.

The strike during the past week of Grand Trunk freight handlers has resulted in shipments being delayed and it is reported that the C.P.R. has stopped picking up which will mean further delays in retailers securing their stocks.

Business is reported good and spring orders are being prepared to go forward when the railways are in a position to accept shipment.

Cotton Duck Belting Goes Higher

Toronto.

BELTING.—An advance of about 7½ per cent. has gone into effect on Maple Leaf cotton duck belting, and the discount now in effect is 20 per cent. as against 25 per cent. formerly quoted. The demand for leather belting is good and a firm undertone is evident in the market. No changes have been recorded, the discounts holding as follows: Extra at 35 per cent. and standard at 40 per cent. Tap soles and heels show no change for the week.

Tire Tools, Valve Lifters Change

Toronto.

TIRE TOOLS, VALVE SPRING LIFTERS.—Many lines of Perfect handle tools have undergone revision upward during the week, and this not only affects the auto accessory lines particularly but has extended to many of the standard items as well. Increased costs of raw materials and all phases of production have led to this latest revision which is affecting Perfect handle tools as listed herewith:

Tire Tools—List, $1.70. Discounts, 25%; 12, 30%; 48, 35%.

Screw Drivers—No. 609, 4 in., 60c; 6 in., 85c; 8 in., $1.15; 10 in., $1.40; 12 in., $1.70; No. 610, 4½ in., $1.70; 5½ in., $1.75. Discounts, 25%; 24, 30%; 96, 35%.

Valve Spring Lifters—No. 650, $2; Hammers, No. 616, $1.70; Getatit Pliers, No. 646, 80c. Discounts, 25%; 6, 30%; 24, 35%.

Garage Equipment On New Discount

Toronto.

GARAGE EQUIPMENT.—A slight change has been made in the list and discount of Weaver garage equipment, including jacks, bucket pumps, towing poles, tire spreaders, etc. The new prices established represent an advance which in some instances is less than 5 per cent. The complete list of items with discount applying is appended herewith:

Auto Twin Jacks—Regular set of 2, $30; single, $18; heavy, set of 2, $54; single, $30.
Auto ambulance jack, $47.75.
Body extension for extra heavy jack (per set of 1 jack), $12.75.
Universal tire changer, $86.50.
Bucket pump, $19.50.
Towing pole, $15.85.
Garage press, $117.
Tire spreader, $31.75.
Auto hoist, $158.
Discount now applying on all of the above is 10 and 10%.

Vulcanizers Up 10%; Patches Higher

Toronto.

VULCANIZERS, PATCHES.—A revision upward in the price of some lines of Adamson vulcanizers has gone into effect. The cheapest and most expensive lines remain unchanged, while three intermediate models show advances of about 10 per cent. The lists and discounts now prevailing are: Model E, $1.50; M, $1.75; T, $2.50; U, $3.50; S, $15.00. Discounts, 25 per cent.; in lots of 12, 30 per cent.; in lots of 48, 35 per cent.

Some revision in cementless patches has been made, and lists now prevailing, which represent higher values in each instance, are given at 50c, 75c, and 95c per box of 10, with a discount of 25 per cent.; in lots of 24, 30 per cent.; in lots of 96, 35 per cent.

Demountable Rims, Brake Lining Up

Toronto.

DEMOUNTABLE RIMS, BRAKE LINING.—New prices have been issued on demountable rims, quotations being based on shipment from Windsor, Ont. No change in the freight differentials for the various points have been made. The new prices represent advances, the quotations being for Ford rims, as follows:

Natural—Small lots, $22; lots of 10, $21; lots of 50, $20.
Black—Small lots, $21.30; lots of 10, $20.30; lots of 50, $19.30.

A change in the list on Fordoid brake lining shows price on this line materially reduced. New list just issued is $3.00 against $5.00 per set, with discount unchanged at 20 per cent., and in lots of 12 or more sets, 20 and 5 per cent.

Rubber mats have also come in for revision during the week, an advance of about 20 per cent. being put into effect. New list established is at $2.25, with a discount of 20 per cent.; in lots of 6, 20 and 5 per cent.

Pocket Meters Advance; Storage Batteries

Toronto.

STORAGE BATTERIES, POCKET METERS.—Practically all lines of Eveready storage batteries have undergone slight revisions in list prices. These have not been sufficiently great to really influence the net prices as it will be found that only one or two cents difference in the list is revealed, while the discount remains unchanged at 33 1-3 per cent.

Eveready pocket meters have advanced from 10 to 12 per cent. on all lines as represented by a straight ten cent advance over former figures on each line. The present selling prices are:

Ammeters—Small lots, 90c each; 25 to 49, 85c each; 50 to 99, 80c each.
Volt-Ammeters—Small lots, $1.10 each; 25 to 49, $1.05 each; 50 to 99, $1 each.
Voltmeters—Small lots, 95c each; 25 to 49, 90c each; 50 to 99, 85c each.

10% Higher Prices On Curtain Stretchers

Toronto.

CURTAIN STRETCHERS. — New prices have been issued on curtain stretchers which represent an advance of about ten per cent. This is the first change to be reported for some little time, but follows the previous trend which has been upward. Supplies are fair and demand reasonable. The present prices are: No. 3, $28.50 per dozen; No. 6, $27.00 per dozen; No. 8, $18.00 per dozen.

Saw Vises Revised; Tin Caps Higher

Toronto.

SAW VISES, ROOFING CAPS.—An advance was recorded in saw vises last week, but a further change in the prices quoted on the No. 80 and 105 lines has been made, whereas No. 81 remains unchanged. The corrected quotations now issued are as follows: No. 80, $7.70 per dozen; No. 105 at $13.50 per dozen, and No. 81 at $12.65 per dozen.

Tin roofing caps advanced over 10 per cent. during the week, when the new price of $6.75 per 100 lbs. was put into effect as against $6.00 formerly quoted.

BINDER TWINE PRICES ADOPTED

As announced in HARDWARE AND METAL last week, prices on binder twine, which are reproduced herewith, show a decided advance per pound over the opening price of last year. In dealing with the situation HARDWARE AND METAL stated: "The opening price for binder twine in April last year was 15⅞c for 500-foot length. This price was later advanced to 19½c per pound. Indications seem to point to a price in the neighborhood of 7¼c per pound higher than the opening price of last year, or from 3½c to 4c per pound higher than the price at the close of the selling season last year."

The opening price for the 500-foot length this year is 23½c per pound, which it will be seen is 7⅝c higher than prices issued in April of last year, and is right in line with the conditions outlined in these columns last week.

The prices adopted are as follows on a delivered basis:

500 ft., per lb.	$0 23½
550 ft., per lb.	0 25¼
600 ft., per lb.	0 26½
650 ft., per lb.	0 28

5 ton lots, ⅛c off; 10 ton lots, ¼c off.

It is indicated that supplies will be sufficient to take care of requirements.

Binder Twine Prices Issued; Higher

Toronto.

TWINE, CORDAGE.—Prices on binder twine have been set and follow along the basis predicted in HARDWARE AND METAL last week. In last week's issue it was stated that prices would likely be about 7¼c per pound higher than the opening price last year, and this is confirmed in the present quotation on 500 foot of 23½c per pound, while last year's opener was 15⅞c. The opening prices, which embrace delivery charges, are as follows: 500 ft., 23½c per lb.; 550ft., 25¼c per lb.; 600 ft., 26½c per lb.; 650 ft., 28c per lb. In 5-ton lots ⅛c discount from above; 10 tons and upwards, ¼c discount. Freight paid. The outlook is that sufficient supplies of twine will be available.

In respect to the established price of 26c fixed by the United States Department of Food Control on fair current Manilla fibre, it has been pointed out that whereas this is 2½c lower than the prevailing price on fibre at time price was established, the decline will not affect prices on rope. This is explained in that the price of hemp advanced far more rapidly than the manufactured article, cordage by no means keeping pace with the primary market. If prices had not been established at this big reduction, advances would have had to be made in cordage, and even on the present basis manufacturers state that rope is not yet on a level with the hemp. However, indications are that prices will hold steady at figures shown.

In spite of high prices now prevailing on sash cord, twines, etc., there is a possibility that another advance may be put into effect. From the States comes advice that the Government there has bought very heavily in sash cord and that has firmed the market materially. This may result in high prices being put into effect in the States, and this will undoubtedly have some influence on the Canadian markets. The cotton market is unusually strong, and new records for high prices have been established which will be reflected in many lines if maintained. Quotations on sash cord to-day are: No. 6, 67c to 69c lb.; No. 7, 66c to 68½c lb.; Nos. 8, 9, 10, 12, 65c to 67½c lb.

Paraffine To Advance; Waxed Products Scarce

Toronto.

OILS, GASOLINE.—Of great interest for the week is the shortage of waxed products, and higher prices are expected to become effective. Paraffine remains at 21c, but increased prices will likely occur soon, which will, mean advances on fancy candles, trench candles, plumbers' candles, etc., and stocks of matches, waxed paper, etc., are likely to be seriously affected. Reports indicate that the scarcity is great, and particularly in higher melting point quality. A very firm market exists in all lines of oils and gasoline, though no changes in price have become effective. No excess of supplies is available, and some fear is expressed that the present shortage may become acute. Transportation is playing no small part in bringing about existing conditions, and whereas some easier movement is reported there is by no means sufficient stock moving to take care of demands.

Very Firm Market On Wire Nails

Toronto.

NAILS, WIRE.—A very firm market exists for wire nails, though no change in prices is reported during the week. That conditions are such that higher quota-

tions may be put into effect has been intimated, but no definite announcement is forthcoming that advanced prices will be made. The present base of $5.20 per hundred pounds is being maintained, and a fair volume of business is reported. Wire products held firmly during the week and some shipments are going forward. The base on smooth steel wire is unchanged at $6.25 hundred pounds; prices on other lines will be found in the current market quotations. Cut nails show no disposition to change in price and are being sold at $5.65 base per hundred pounds.

Stoves & Enamelware Holding Firm

Toronto.

STOVES, ENAMELWARE.—Business in stoves is reported fair, and the outlook is that a shortage in some lines will exist. The advanced prices put into effect last week are not expected to curtail sales to any extent, and manufacturers are somewhat doubtful as to whether they will be able to produce sufficient to take care of requirements. Immediate business only is being solicited, and it is felt that merchants would be well advised to buy as heavily as they can and take delivery early. Enamelware sales are in large volume though shortages in many lines are reported. No change in price has taken place during the week.

Iron And Steel Continue Improvement

Toronto.

IRON AND STEEL.—Continued improvement in iron and steel is reported, but the railway situation is by no means back to normal, and until some semblance of regular service is attained some uncertainty must exist in this market. Raw materials and coke are moving a little more freely, and that the situation is generally easier is evident from shipments which Canadian mills are now making. A very fair demand exists for iron and steel locally and the prices held firm on the following basis:

TORONTO—	Per 100 lbs.	
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65
Angle base	....	5 75

Do., No. 12	....	6 00
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Shipments Of Steel Sheets Improving

Toronto.

SHEETS, PLATES. — Nothing new has developed during the week in relation to the steel sheet situation although shipments are reported to be coming along a little better. Stocks of both galvanized and black sheets are in very fair condition although inquiries have been made for 10 gauge black sheets and 3/16 and ¼ inch plates which are extremely scarce and hard to get. Supplies will be limited until decided improvement is effected in freight service and mills are operating at capacity output once more. This happy condition wil not exist for several weeks yet, it is thought. Prices remain unchanged at figures given herewith:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$10 00	$12 00
12 gauge	7 55	10 10
14 gauge	7 45	8 40
16 gauge	7 30	8 50
18-20 gauge	7 30	8 05
22-24 gauge	7 35	8 10
26 gauge	7 40	8 15
28 gauge	7 50	8 25
3/16-inch plate	10 25	....

16	8 20	8 45 9 45
14	8 10	8 35 9 35

Corrugated Sheets In Firm Market

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—The market remains firm and demand fair as regards corrugated sheets. It is indicated that when present stocks are depleted there will be extreme difficulty in replacing. Eavetrough and conductor pipe underwent no change in price and the spring demand is becoming more evident with the milder weather. Prices on these will be found in the current quotations. Corrugated sheets are given below:

TORONTO—	Per 100 Sq. Feet	
	Galvanized	Painted
No. 28 gauge	$ 8 25-$ 8 75	$6 75-$7 25
No. 26 gauge	9 00- 9 50	7 75- 8 25
No. 24 gauge	13 00-	10 50
No. 22 gauge	16 00-	13 25
No. 20 gauge	19 00-	16 50
No. 18 gauge	23 00-	20 00

Discount 7½%.

Wrought Pipe And Boiler Tubes Steady

Toronto.

WROUGHT PIPE, BOILER TUBES.—Shipments of boiler tubes are reported as rolling toward Canada and receipt of these will ease the situation considerably. Stocks are at present limited but the approach of milder weather will relieve any anxiety, for the present at least, over any delays which may occur in getting shipments through

Wrought pipe is holding steady and no change in price is reported over those made on some of the larger sizes last week. Prices are given in the current quotations. Boiler tubes are quoted herewith:

	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Solder Climbs Still Higher

Toronto.

LEAD AND ZINC PRODUCTS.—Added strength in the tin and pig lead markets resulted in a further advance in solder, some prices being made showing a 5c advance over quotations made last week. The spread is somewhat greater, too, than prevailing formerly. Guaranteed now ranges from 48¾c to 53c per pound, strictly 44¾c to 48c, commercial 40¼c to 47c, wiping 38¾c to 43¼c, wire 48½c to 56½c, tinker's up to 53c. No change has yet been made in lead pipe or traps and bends though the market is very firm. Zinc sheets remain stationary at 26c per pound. Business is reported excellent, shipments going forward freely.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 16
Lead sheets, 3 to 3½ lbs. sq ft., lb.		0 13¼

Solder, guaranteed, lb.	0 48¾	0 53
Solder, strictly, lb.	0 44¾	0 48
Solder, commercial, lb.	0 40¼	0 47
Solder, wiping, lb.	0 38¾	0 43¼
Solder, wire, lb.	0 48½	0 56½
Zinc sheets, per lb.	0 26	....

More Interest Manifest In Old Materials

Toronto.

OLD MATERIALS.—A slight improvement is manifest this week and more action has become evident. The demand is better and with embargoes being lifted from day to day, interest will be revived materially. A very strong undertone to the market is evident and some advance in price may go into effect. Prices for the week held firm on the following basis.

Tea lead	$ 0 04½	....
Heavy lead pipe	0 07	0 07½
Yellow brass	0 12	0 13
Red brass	....	0 21
Light brass	....	0 09½

No. 1 busheling	16 00	17 00
No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

Probability Of Waste Advancing Soon

Toronto.

WASTE, OAKUM.—A strong undertone to the waste market is reported and that an advance is almost sure to be made effective in the near future has been gathered. In some quarters, it is felt that present prices are too low. Stocks are reported to be in good shape and equal to heavy demands which may soon develop. At the present time, shipments are limited.

Oakum held steady and no change is anticipated at the present time. Prices are given in the current market quotations.

Higher Woodenware Prices Probable

Toronto.

WOODENWARE.—A decidedly strong undertone prevails in woodenware and

advances approximating 15 per cent. are now being considered. Wood tubs, pails, etc., will be affected and new prices will likely be available within the next week or two.

Ingot Tin, Pig Lead Move Upward

Toronto.

INGOT METALS.—The metal market was featured during the week by further strength in tin, higher prices having been established in this commodity. Pig lead also advanced in some quarters though the range of prices is somewhat wider than that prevailing last week. The commercial demand on practically all metals is greatly restricted just now, though the war demands are large and often result in creating shortage for commercial uses.

COPPER.—No excitement was evident in copper which remains steady owing to the fixed prices established by the United States Government. Locally quotations range from 30c to 32c per pound. Exports during January combined with government orders amounted to about 170,000,000 pounds which left but 16,000,000 for ordinary commercial use, so some idea as to how the production is being distributed may be gathered.

TIN.—Quotations on tin are higher this week on the basis of from 95c to $1 per pound. Licenses for export from Great Britain are now required, which has strengthened the market. How orders will be distributed is as yet uncertain and so no forecast can be made as regard future supplies. A good demand for Banka and Chinese tin has become evident in New York. With decreased shipment from London, trade is switching to the Pacific where it is thought a proportionate increase in Chinese trade may be expected. The primary markets are strong and active.

SPELTER.—A moderate demand prevails on spelter with prices unchanged at 9¾c to 10½c per pound. No change is anticipated in local quotations though slight vitality in the primary markets has been evident and resulted in slightly higher prices.

LEAD.—Pig lead shows an upward tendency though some quotations are lower than those given last week. The range of prices now runs from 9¼c to 10c per pound. Little lead is available for immediate distribution in the primary markets and with uncertainty as to shipments a stronger tone has developed. The demand locally is light.

ANTIMONY.—Quiet prevails in the local market and quotations are unchanged at 16c to 18c per pound. The primary markets continue quiet and no change in the prices prevailing has been made over the previous week.

ALUMINUM.—A very firm tone to the market is evident though no changes in prices have been put into effect. The basis of 60c per pound locally was maintained. A fair inquiry is reported in the primary market with prices holding steady.

PIG IRON.—Increased receipts of coke are reported and furnaces are enabled to maintain operations. Traffic conditions in the United States are substantially improved and a heavier iron production is expected to develop. Foundry iron is quoted at the same figures prevailing for last week, namely $49.50 per ton.

LONDON MARKETS

LONDON, March 7.—Business in London continues seasonably good. Cross cut saws and axes are still moving and the sale of sap supplies has started in strong. Merchants here have their stocks in good shape for spring trade which is expected to be good. Prices all continue very firm.

Washing Machines Take New Discount

London.

WASHING MACHINES.—A revised discount has been put into effect on washing machines of 40 per cent. Increased difficulty in securing necessary supplies of cypress along with advanced prices have resulted in this change being made effective. Net prices on some of the best sellers figured on the new discount basis are as follows:

Dowswell, $5.40; Hamilton, $6.60; New Century A, $9.90; New Century B, $10.80; New Era, $10.80; Patriot, $11.40; New Century Junior, $10.80; Champion, $10.20; Ideal Water Power, $16.80 each.

Canvas Belting Now Quoted At 25 Per Cent.

London.

CANVAS BELTING.—A revision in canvas belting has been made during the week and the new discount established of 25 per cent. provided for an increase of about 7½ per cent. on this line. The primary market on cotton is very strong and this has undoubtedly influenced this upward trend on belting.

Oil Heaters Continue In Good Demand

London.

OIL HEATERS.—An active demand still exists for oil heaters and the advance recorded last week has had no influence in restricting sales. The heavy sale throughout the winter months is being maintained in good volume even now. Prices hold firm at the figures given last week: No. 525 at $6.50 each; No. 530 at $7.25 each, with a discount of 25 per cent.

Lawn Rakes Up; Roofing Pitch, Too

London.

LAWN RAKES, ROOFING PITCH.—New prices for spring delivery of J. D. lawn rakes have gone into effect and reveal an upward tendency. The 15 inch are now quoted at $7.80 per dozen and the 20 inch at $9 per dozen.

Roofing pitch has also taken a jump in price and is being quoted at $1 per 100 pounds.

Split Rivets Record An Advance

London.

SPLIT RIVETS.—For the first time in many months, a change has been made in the price of split rivets. The advance is a fairly substantial one and would seem to be warranted in view of the advances made in other lines of rivets. The present quotations are:

No 9	$0.90 dozen boxes
No. 6	2.50 dozen boxes

Harvest Tools, Snaths, Shovels Steady

London.

HARVEST TOOLS, SNATHS AND SHOVELS.—A firm market prevails on harvest tools and some shipments are being made with spring orders though the movement is by no means general. The discount of 25 per cent. remains unchanged and is likely to hold for some time.

Spades and shovels have experienced no change in price during the week, 1sts being quoted at 30 per cent., 2nds at 20 and 2½ per cent. and 4ths at 5 per cent. List prices are given in the current market quotations.

Snaths are holding steady and no immediate change is anticipated over the following prices: No. 00 patent, $12.50 per dozen; No. 1, $12 per dozen; No. 2, $11.50 per dozen; No. 3, $10.50 per dozen.

Poultry Netting Shows No Change

London.

POULTRY NETTING.—Hexagon netting 1 and 2 inch mesh remains steady at the discount prevailing for some time past of 15 per cent. A fair amount of booking business has been secured and shipments will soon be going forward.

Blue ribbon poultry fence, which is put up in 10 rods rolls, also remains firm at previous quotations which are repeated herewith: 24 in. x 14 strand, $4.30 per roll; 36 in. x 17 strand, $5.50 per roll; 48 in. x 20 strand, $6.50 per roll; 60 in. x 23 strand, $7.65 per roll; 72 in. x 26 strand, $8.75 per roll.

Wire Nails and Rope In Firm Market

London.

WIRE NAILS, ROPE.—A fair demand is in evidence on wire nails and the market is very firm. Prices remain

unchanged at $5.20 base per 100 pounds though an advance in price would not be altogether a surprise. Cut nails are being quoted at $5.60 base per 100 pounds.

The fixing of the price of hemp in the primary market will have a tendency to hold rope on the present basis, although it is said by the manufacturers that the price established on hemp would justify an advance which may be forthcoming at a later date. The market locally is: Pure Manila, 39c per pound; British Manila, 33c pound; New Zealand hemp, 33c pound; sisal, 27½c pound.

Lawn Mowers Hold At 40 Per Cent.

London.

LAWN MOWERS, GRASS CATCHERS.—Prices prevailing on lawn mowers for some time past are still in vogue. Booking on these is progressing favorably and it is said this is the only way to be reasonably sure of securing stock. Shipments will not be long in moving out to retailers. Quotations are being made at 40 per cent. discount from lists herewith:

Daisy, 12 in. $8.25, 14 in. $9.00, 16 in. $9.70 each.

Star, 14 in. $10.70, 16 in. $11.40 each.

Woodyatt, 14 in. $11.80, 16 in. $12.50, 18 in. $13.20, 20 in. $13.90 each.

Empress, 14 in. $15.25, 16 in. $16.00, 18 in. $16.65, 20 in. $17.35 each.

Grass catchers are being quoted for the galvanized bottom, medium weight, 16 ga., $15.50 per dozen and heavy weight 10 ga., $20 per dozen.

Lawn Hose, Bands And Couplings Firm

London.

LAWN HOSE, BANDS, COUPLINGS, NOZZLES.—Other lines of interest with the approach of spring are lawn hose, hose bands, hose couplings and hose nozzles all of which are quoted at firm prices as follows:

Lawn hose, corrugated, ½ in., 15¾c ft.; ⅝ in., 18¾c ft.; ¾in., 21½c ft.; 1 in., 31½ ft. Less 5 per cent .in full roll of 500 ft.

Hose bands, ½ in., 27c dozen; ⅝ in., 27c dozen; ¾ in., 27c dozen; 1 in., 60c dozen.

Hose couplings, ½ in., $1.70 dozen; ⅝ in., $1.75 dozen; ¾ in., $1.80 dozen; 1 in., $3.50 dozen.

Hose nozzles, gem, $6.00 dozen.

Screen Wire And Spring Hinges Unchanged

London.

SCREEN WIRE, SPRING HINGES.—Greater interest is being taken in screen wire and spring hinges and it is of note that no further changes in prices have been recorded of late. The market is firm on these commodities and shows no evidence of higher prices at present. Screen wire, black, in 100 foot rolls is quoted at $3 per 100 square feet, while the bronze is 14c per square foot. Spring hinges for screen doors are selling at $17.75 gross for the No. 20 and $20.20 per gross for the No. 7-11 steel.

Bicycles, Horse Clippers And Cultivators

London.

BICYCLES, HORSE CLIPPERS, CULTIVATORS.—Orders are being accepted for Victor bicycles with 20, 22 or 24 inch frame at $33.50 each, net cash in 30 days from April 1. A good sale of bicycles is expected this coming season and this should stimulate the accessories as well.

Stewart power horse clippers No. 1 are still $8.25 each, while two models of hand clippers, the Handicap at $1.50 each and Newmarket at $2 each maintain prices on the basis ruling for some time past.

The sale of hand cultivators is expected to improve with the increase of the town and city farmer and the Buco, 5 prong type are being quoted at $11.25 dozen.

Window Glass Registers Big Advance

London.

WINDOW GLASS.—As predicted in HARDWARE AND METAL, prices on window glass have been advanced and a new list established. The new list is slightly lower than that formerly ruling, and the discount has been changed from 40 per cent. to 25 per cent. on full cases, which represents a jump of between 20 and 25 per cent. Cut lights are quoted at a discount of 10 per cent. No change has been made in plate-glass, though the indications are that higher quotations will be put into effect. The new list appears in the current market quotations.

Linseed Oil Makes Big Advance

London.

LINSEED OIL, TURPENTINE.—High prices for seed, with increased difficulty in securing supplies for the crushers, is influencing linseed oil to decidedly high prices, and an advance of 23c per gallon has been recorded during the week. There has been a fair demand, but business is not being solicited owing to shortages of stocks. Quotations are now being made as follows:

	Raw.	Boiled.
1 to 2 barrels, per gallon	$1 96	$1 98
3 to 5 barrels, per gallon	1 94	1 97
6 to 9 barrels, per gallon	1 92	1 95
5 gallon lots, add 10 cents gallon.		

Turpentine is holding in a steady market, and no change locally has been made in quotations, which are as follows:

1 barrel lots, per gallon	$0 72
2 to 4 barrel lots, per gallon	0 71
5 gallon lots, per gallon	0 82

White Lead In Oil And Putty Firm

London.

WHITE LEAD IN OIL, PUTTY.—A stronger undertone in the primary market in lead is noticeable, and this has a tendency to firm white lead in oil materially. However, prices have remained unchanged, orders being accepted for pure at $15.70 per 100 pounds in ton lots and $16.05 per 100 pounds in less than ton lots; pure Elephant is quoted at $16.20 per 100 pounds in ton lots and in less than tons, $16.55 per 100 pounds.

Putty has held steady during the week, the standard in 25, 50 or 100-lb. drums being quoted at $5.15 per 100 pounds. For pure putty an extra of $1.75 per 100 pounds is charged.

Arsenate of lime, a preparation used on potato plants, is being quoted at $1.75 per dozen in ½-lb. packages, $3 in 1-lb. packages; 23c per pound in 5-lb. bags.

WINNIPEG MARKETS

WINNIPEG, March 7.—Prices for the past week are again upward and show advances on the following lines: Fibre tubs, pails, cross-cut saws, buck saws, buck saw blades, hand saws, cross-cut saw handles, clinch rivets, tubular rivets, wood planes, bull snaps, Westcott wrenches, washing machines, Dover sad irons, mangles and linseed oil.

Business continues brisk in all hardware lines with all jobbers rushing out spring cars.

Higher Prices Likely On Picks, Mattocks

Winnipeg.

PICKS, MATTOCKS.—Prices on clay picks, mattocks, crowbars, etc., continue firm. However, a further advance can be expected within the month, as new prices are being issued by manufacturers. Prices in the meantime remain as follows: Crowbars, $8.50 100 lbs.; pick mattocks, $10.00 doz.; long cutter mattocks, $10.00 doz.; clay picks, 6-7 lbs., $9.60 doz.

Fibre Tubs And Pails Up 5 Per Cent.

Winnipeg.

FIBRE PAILS AND TUBS.—A further revision has taken place in the prices ruling on fibre tubs and pails which move up another 5 per cent. Although no change is recorded in wood tubs or pails, an advance in the neighborhood of 10 per cent. is to be expected. To-day's market prices on fibreware are as follows: Fibre tubs, No. 3, $12.60; No. 2, $14.80; No. 1, $17.80; No. O, $20.75 doz.; Star fibre pails $4.55 doz.

Buck and Cross Cut Saws, Etc., Higher

Winnipeg.

BUCK SAWS, CROSS-CUT SAWS.—New prices have just been issued by the saw manufacturers, and show fairly heavy advances which they attribute to higher producing costs. The principal lines affected being cross-cut saws, buck saws, buck saw blades and frames, while hand saws show but few changes. Prices now ruling are given herewith:

Cross Cut Saws—"Common," one man, 55c ft.; two man, 52c ft.; Volunteer, one man, 63c ft.; two man, 60c ft.; Improved Racer, two man, 4½ ft., $4.95; 5 ft., $5.25; 5½ ft., $6.20 each.

Buck Saws—Prince Rupert, $13.40 doz.; Maple Leaf, $10.90 doz.; Watch Spring, $10.40 doz.; Happy Medium, $10 doz.; Happy Medium, lance tooth, $10.90 doz.

Buck Saw Blades—Prince Rupert, $8.10 doz., Maple Leaf, $5.70 doz.; Watch Spring, $5.80 doz.; Happy Medium, $5.60 doz.; No. 1 Lance Tooth, $7.20; No. 2 Lance Tooth, $5.70 doz.

Hand Saws—Perry, No. 10 x 26 inch, $11.70 dozen.

Cross Cut Saw Handles Advance

Winnipeg.

CROSS CUT SAW HANDLES.—Cross-cut saw handles also come in for a considerable advance and are quoted to-day as follows: No. 3, 45c pr.; No. 2 Lion, 45c each; No. 107 Boynton, 70c pr.; One man, No. 126, 35c each; supplementary, $2.40 dozen.

Clinch Rivets Go Up 25 Per Cent.

Winnipeg.

CLINCH, RIVETS, TUBULAR RIVETS.—The price on slotted clinch rivets, which has remained the same since the commencement of the war, has just been revised and moves up 25 per cent., while tubular rivets advance about 15 per cent. Prices are given below. Slotted clinch, assorted, $1 carton.

Tubular rivets, 4-16 in., $1.65; 6-16 in., $1.75; 8-16 in., $2.00; 10-16 in., $2.25; 12-16 in., $2.75.

Wood Planes Advance 15 Per Cent.

WOOD PLANES, BULL SNAPS.—Monty wood planes this week show the first advance in price since 1915, which is due to higher manufacturing costs. New prices just issued, however, show only a moderate increase, which is approximately 15 per cent.

Prices quoted to-day are as follows on a few of the standard lines: No. 4, $1.05; No. 16, $1.25; No. 18, $1.35; No. 24, $1.85; No. 40, $2.20 each.

Further advances by the manufacturers makes necessary another advance in bull snaps, which move up 50c doz. and are quoted to-day at $9.50 doz.

Westcott Wrenches Again Up 7½ Per Cent.

Winnipeg.

WESTCOTT WRENCHES.—Probably few lines of hardware have shown such consistent advances as Westcott wrenches. Advice has just been received showing a further increase of approximately 7½ per cent., which becomes effective at once. To-day's ruling prices are 20 per cent. advance on list, making the net prices as follows: Westcott nut, 6 in., $9.60; 8 in., $12.00; 10 in., $14.40; 12 in., $18.00; 14 in., $25.20 dozen. Westcott pipe, 6 in., $10.00; 8 in., $12.50; 10 in., $15.00; 12 in., $18.75; 14 in., $26.25 dozen.

Washing Machines 10 Per Cent. Higher

Winnipeg.

WASHING MACHINES.—Washing machine manufacturers have just announced a further increase of 10 per cent., due to the difficulty of securing supplies of southern cypress and the high prices ruling for same. Reports also indicate that deliveries of raw material are very uncertain owing to the freight congestion in the eastern and southern states. As Winnipeg stocks are fairly well assorted the only lines affected are the Dowswell and Snowball, which advance 25c and 50c respectively. As soon as new stocks of other lines are purchased, prices will have to advance. Price now ruling on the Dowswell is $5.00 each, and Snowball is $9.00 each. Other lines remain unchanged. Following the advance in washing machines, new prices have also been issued on mangles, and show an increase of 10 per cent. over former prices. To-day's price on the Royal mangles is $25.50 each.

Dover Sad Irons Advance in Price

Winnipeg.

SAD IRONS.—Dover sad irons, which some time ago declined in prices, have again advanced, showing an increase of from 5 to 10 per cent. over previous quotations, and are quoted to-day at the following prices: No. 70, not polished, $28.50 doz sets; No. 10 not polished, $4.50 doz.; No. 60 polished, $21.00 doz. sets.

Iron Pipe Is Now In Firm Market

Winnipeg.

WROUGHT IRON PIPE.—Prices on wrought iron pipe continue firm, with good demand. Deliveries from the mills however are not up to standard as raw material for certain sizes is hard to obtain.

Prices ruling to-day are as follows:

	Black	Galvanized
¼	$ 6 08	$ 8 42
⅜	6 16	8 50
½	7 83	9 63
¾	9 95	12 38
1	14 67	18 27
1¼	19 88	24 75
1½	23 76	29 57
2	32 04	39 78
2½	51 30	63 59
3	67 05	83 16
3½	84 92	.....
4	100 62	.....
4½	116 10	.....
5	135 00	.....
6	174 60	.....

Linseed Oil Higher By 8c Gallon

Winnipeg.

LINSEED OIL, TURPENTINE.—The price of flax seed continues to soar, and in consequence linseed oil has again advanced 8c per gal., this being the third advance during the month.

Lack of transportation and reported shortage seem to be the main causes for the strong market. To-day's ruling prices are herewith given: Raw, $1.84 gal.; boiled, $1.87 gal. Turpentine continues firm as formerly quoted. Reports from Eastern points seem to indicate a weaker market. Prices now ruling are as follows: Barrels, 80c gal.; ½ barrels, 83c gal.; 5-gal. lots, 85c gal.; 1 gal. lots, 85c gal., plus the usual extras for containers.

ENCOURAGEMENT FOR SHEET STEEL AND TINPLATE USERS

Interview With Mr. Beverly Robinson, President of B. & S. H. Thompson, of Montreal, on the Steel Situation in the United States

That there will be an improvement in the conditions obtaining in the tinplate and galvanized and black sheet shipments ere long was indicated in an interview given HARDWARE AND METAL by Mr. Beverly Robinson, president of the importing firm of B. & S. H. Thompson, Montreal. Mr. Robinson just returned from New York this week.

"There is a very large tonnage of galvanized sheets, steel sheets and tinplates manufactured and ready for shipment at the mills of our principals, the United States Steel Products Company, which has accumulated owing to transportation conditions. We are informed that the situation in the United States has very much improved lately, and the mild weather is enabling the railways to operate much more freely. In the course of the next week or two, if the present weather continues, the mills expect to have large tonnage in transit to Canada," he said.

WILL INGOT TIN BE DEBARRED?

It is very evident that the position with regard to ingot tin is one of much concern at the moment. As pointed out in last week's issue of HARDWARE AND METAL, the export of tin to Canada was problematical, and it is asserted by one importer this week that there is absolutely no tin leaving England. As a matter of fact another large dealer stated that shipments had been held up, and that in some cases certain lots had been taken from the boats and returned to the warehouses in Britain.

The matter has been taken up with Ottawa and representations have been made and cables despatched to ascertain just what the position is. Up to this writing the position is about as follows, and as reported from two sources:

Said one importer: "Exports to Canada are absolutely shut off from Britain. Representations are being made in the matter and the position is serious. As a direct result of this we have been asked as much as $1 per pound for tin in the Canadian market."

Another jobber said: "It is reported that all export has been shut off to Canada for the next four months, and that this has been done in view of the suggestion that there are large supplies in Canada."

Other jobbers and importers would neither confirm or deny the situation, as there seemed to be a dearth of news in the matter, but it is conceded that there is some ground for the position that is embodied in the foregoing.

Chinese tin, made on the shores of Southern China, has arrived at New York, and this is quoted at 86c, an advance of 3c being made on the strength of the position with regard to the export of Straits from England. This, however, will not be available in Canada owing to the embargo.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, March 6.—The feature of the week that is causing much concern is that of the price of linseed oil. This has advanced very materially and is selling as high as $1.87 for raw and $1.89½ for boiled. In many cases there is no inclination to sell any at all, and some are offering a few lots only in single barrels. The delivery of seed has continued light, although a few cars have come forward. Just what the situation will develop cannot be foreseen, although it is felt that the weather will almost immediately permit of a somewhat better movement of supplies. Indeed, there has been an expression from several quarters that the car situation is much better on some roads, and this improvement should be maintained right along. One of the interesting features of the week has been an advance in the price of window glass, and this approximates nearly 20 per cent. This was a very definite forecast in the columns of HARDWARE AND METAL last week, and it has been suggested in several recent reports. Turpentine, putty and white lead in oil are held unchanged, although white lead in oil is very firm. Business is seasonably good.

Supplies Of Flaxseed Small; Oil Again Higher

Montreal.

LINSEED OIL.—There is little relief in sight regarding linseed oil, and none expected until relief from the congestion of traffic permits better delivery. Seed reached the high-water mark of $3.86 this week, and this is 25c higher than last week's price, and it is the highest price ever known, say the crushers. Some seed has been exported, and this will be a matter of interest to many. It is hoped that shipments to the United States will not be continued in large volume, for some are satisfied that all the seed that we have is needed for the present and the future demands of the Canadian trade. In the meantime a few lots are coming forward, and the mills are crushing some seed. Orders are not being taken at all by some of the jobbers, while in the cases where it is possible to accommodate a customer on single barrel lots as high as $1.87 is being asked for raw. All express the hope that there will soon be some relief. Paint men are proceeding with the manufacture of their spring needs as well as conditions will permit.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
Single barrels only	$1.80-$1.87½	$1.82-$1.89½
5 to 9 barrels	....	....
10 to 25 barrels	....	....

Turpentine Continues To Hold Without Change

Montreal.

TURPENTINE.—The local market holds without any change, and it is stated that there is a fairly good supply to meet the present needs. Sales are very limited for immediate delivery. The opening of the season will probably see a depletion of stocks to some extent, although it is expected that there will then be little difficulty in replenishing these. Certain small lots are going forward with other deliveries of spring orders, and, aside from these, the usual small sorting lots are asked for from the country. Prices are as follows:

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.69-$0.72
1 barrel lots	0.72- 0.75
Small quantities	.... - 0.83

Putty Remains In Quiet Market And Held

Montreal.

PUTTY.—The putty demand is really quite small these days, and little interest is manifested. It is likely to hold in a firm position, in view of the fact that oil is such a high price and likely to remain high for some time. Whiting supplies are also of some interest—that is, in so far as future deliveries are concerned. Odd lots are going forward with mixed shipments of paint and lead, etc. Prices are quoted herewith as applying to this market:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$3.75	$3.90	$4.10
Do., ½ barrels	3.90	4.05	4.25
Do., 100 lb.	4.60	4.75	4.95
Do., 25 lb.	4.60	4.75	4.95
Do., 12½ lb.	4.85	5.00	5.20
3 and 5 lb. tins	6.60	6.75	6.95
1 and 2 lb. tins	7.10	7.25	7.45

Pure linseed oil putty—$1.75 per 100 lb. advance on above prices.

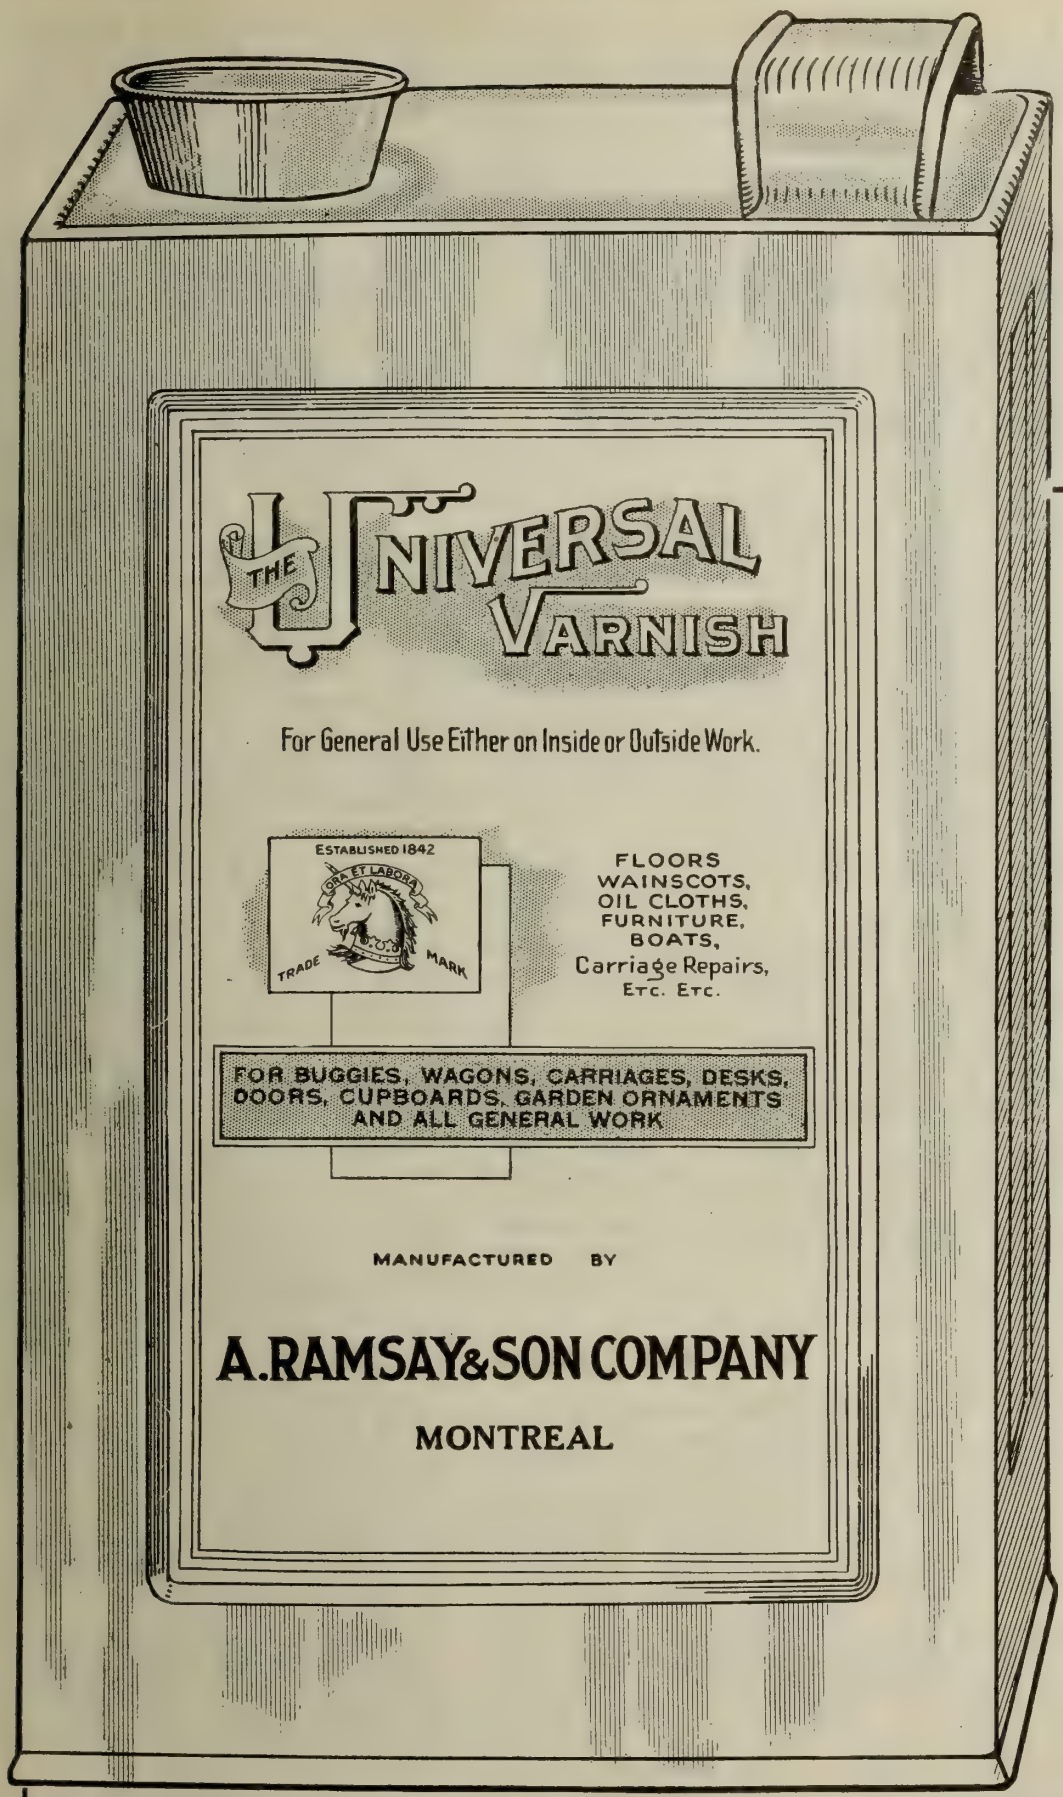
Glaziers' putty—$1.35 per 100 lb. advance on above prices.

White Lead In Oil May Go Higher

Montreal.

WHITE LEAD IN OIL.—The market for white lead in oil is very firm. This is in sympathy with the position on pig lead, and this is ruling strong. One large paint maker said that he would not be at all surprised to see a higher quotation for lead in the near future, and it is generally felt that the various factors which have a direct bearing on this commodity may mean a move upward for lead before a great while. On one thing all seem agreed, and that is that there will be little likelihood of a decline. Five-ton lots are still selling at $15, ton lots at $15.50, and small quantities at $15.85 per 100 pounds.

What Will High Price For Oil Mean On Paints?



Montreal.

MIXED PAINTS.—The only feature of the week of interest is that which has been reported regarding the delivery of spring orders. These are still moving out well, and there is every reason to feel that a large portion of the trade will have their supplies this year earlier than they had them last. Some are suggesting that in view of the fact that oil is and will be scarce for some weeks at least, a revision may be necessary of paint prices, and that this would be a matter of necessity, rather than of choice, if the price of oil continued to soar. However, it is generally agreed that dealers have placed their orders well in advance, and all that is possible will be done to take care of the large business that has been booked.

New Price List on Glass; Advance About 20%

Montreal.

GLASS.—The expected advances have been arranged and made effective on glass. This applies to the various weights of boxed glass and will go into effect at once. The change of list is very considerable, and the discount has been increased and net prices advanced about 20 per cent. This tendency has been very definitely pointed out in the columns of HARDWARE AND METAL for some weeks, and this action was contemplated as heretofore outlined. In addition to the revision on 16 and 21-ounce weights, a new net price list has been issued for 26-ounce, and these prices are as follows: For 100-foot boxes up to 25 inches, $19.86; 26 to 40 in., $21.48; 41 to 50 in., $25.86; 51 to 60 in., $26.52; 61 to 70 in., $28.14; 71 to 80 in., $30.36; 81 to 85 in., $33.30; 86 to 90 in., $35.76; 91 to 95 in., $36.48; 96 to 100 in., $42.78; 101 to 105 in., $47.58; 106 to 110 in., $53.16. These prices are net to the trade. Revisions upward on fancy glass have also been made.

A General Purpose Varnish of High Quality You Should Carry This in Stock

A. RAMSAY & SON COMPANY

Makers of Paints and Varnishes since 1842

Toronto MONTREAL Vancouver

If interested, tear out this page and keep with letters to be answered.

TORONTO

TORONTO, March 7.—Linseed oil as regards price and scarcity is the disturbing element in the paint and oil trade during the week, the present situation being extremely acute. Improved weather conditions while effecting an improvement in transportation has not resulted in immediate relief as regards receipts of seed. Turpentine is by no means strong though prices remain unchanged locally. A new list has been adopted for window glass and the discount changed which provides for an advance of between 20 and 25 per cent. Shipment of goods is being held up for some districts owing to the strike existing on the Grand Trunk and if this extends over another week will result in a further congestion of freight, which the railroads cannot well stand.

Linseed Oil Advances Twenty-Three Cents

Toronto.

LINSEED OIL.—Movement of Argentine seed which it had been hoped would relieve the situation in this country to some extent will be further restricted owing to a regulation which has gone into effect providing that only sailing vessels can be used in this service. This advice has firmed up the market decidedly, as shipments cannot now be expected from the Argentine in less than four months' time. The cash price of seed on the Winnipeg Exchange has risen steadily during the week being quoted 24½c per bushel higher at $3.83½ on Wednesday against $3.59 per bushel on Wednesday of last week. Shipments to the East have been practically nil and the situation is reaching a very acute stage. It is practically impossible to buy any linseed oil and although an occasional barrel is released, inquiries for 5 barrel lots are not entertained at all. Prices on oil advanced 23c gallon during the week to $1.95 for raw and $1.98 for boiled, while some dealers have withdrawn all quotations. Present stocks are away oversold and indications are that prices may be maintained on a firm basis until relief is afforded.

	Raw, Imp. Gal.	Boiled, Imp. Gal.
1 to 2 bbls.	$1 95	$1 98
3 to 5 bbls.	....	....
6 to 9 bbls.	....	....

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Is In Weak Tone

Toronto.

TURPENTINE.—A decidedly weak tone is evident in the primary market on turpentine. It is said this is selling below the actual cost of production and the law of supply and demand seems to be exerting little influence on quotations with this commodity. With regard to shipments, advice is to hand indicating that goods are rolling but no heavy receipts have been recorded. In placing an embargo on shipment of turpentine by coastwise ships to New York and Boston, a further burden is placed on the railways and shipments to the Canadian market will be further restricted. A car of rosin which was shipped on December 12 has not yet reached Toronto, so some idea as to how long it takes to get goods through may be gathered, since this is not an isolated case. Prices on turpentine remain unchanged locally with the demand light which is seasonable.

	Imp. gal.
1 barrel	$0.70-$0.72
2 to 4 barrels	0.69- 0.71
5 gallon lots	0.80- 0.82

Paint And Varnish Are Active

Toronto.

MIXED PAINTS.—Although some paint manufacturers report that continued oil shortage will restrict manufacture to some extent, spring orders have been pretty well provided for and are going forward freely. Spring bookings are practically completed and the volume of business is reported as quite satisfactory. The freight congestion has been accentuated by the strike of freight handlers and is being felt in the accumulation of orders in manufacturers' and jobbers' warehouses.

Demand Light For White Lead In Oil

Toronto.

WHITE LEAD IN OIL.—The demand for white lead in oil is by no means heavy and stocks are more than ample to take care of present requirements. A firm undertone in the primary lead market is revealed during the week and with the heavy advance in oil, this has served to put a decided measure of firmness in market locally. With the satisfactory condition of stocks at present and the light demand, it is not likely an advance will be made in present prices which appear in the current market quotations.

Glass Registers Big Advance

Toronto.

GLASS, PUTTY.—A new list and a new discount have been issued on window glass during the week. The discount is now 25 per cent. in full boxes and 10 per cent. for cut lights, which on the new list provides for an advance of about 20 to 25 per cent. The agitation which it is said has been conducted for many, many months to standardize the glass list at Quebec and Ontario points has borne fruit and the new list, which appears in the current quotations, has been adopted at Montreal, Toronto, Hamilton and London. This should simplify the glass situation as regards quotations to the retailer materially, as in the past it was not always easy to determine which list to work from. In comparing quotations now there will be no difficulty on this nature crop up. Plate glass is in very firm tone though no change locally is reported. Advances have been put into effect in the United States and it is quite likely a higher price will shortly rule here.

Quotations on putty have been firmly maintained and prices appearing in current quotations are correct.

Advance In Brushes Is Possible

Toronto.

BRUSHES, BROOMS.—A strong undertone exists in the brush market for the week and although no change in prices has become effective, an announcement that prices were being revised and would range from 10 to 25 per cent. higher was given out. Just when this will go into effect is not yet certain. Business is reported good, spring orders being prepared for shipment now.

A distinct shortage exists in brooms and the scarcity of broom corn provides for a very firm situation.

BIG FIELD IN RUSSIA FOR HARDWARE

(Continued from page 30.)

Constituent Assembly was called in Petrograd it was found that the Mensheviks had 273 members against a showing of 140 Bolsheviks. But the Bolshevik section had the arms with them, and a man with a gun is a great power in Russia just now."

Mr. Pickard has seen Kerensky on several occasions. He did not impress him as a man who was big enough for the job he undertook to handle. He is not likely to come to the top again, although it is possible he may be heard from in a minor capacity in some future government.

A Good Place to Leave

"Everything was done by the card system in the cities of Russian long before I left there," said Mr. Pickard in conclusion. "Street fighting was not at all uncommon. In fact it got to be more of a matter of routine than exception. Armored motor cars were seen in action in the streets. The troops simply went mad. Very few people ventured out after eight in the evening. The daily allowance of bread was 3½ ounces. It was made of rye, wheat, oats, and barley, with the husks and all ground in with it. It looked for all the world like a straw ball. The allowance of butter is ¼ of a pound every third week. Meat is served in small quantities only twice a week. The cattle have been so poorly fed that the meat is of very poor quality. You can get nothing without a card. But in spite of all that I want to go back to Russia. I would like to make my home in Moscow. It may seem strange," said Mr. Pickard, "but it's a fact that I am homesick for Russia. I like the land and I like the people."

Hamilton, Ont.—The Canadian Cartridge Co. has been awarded a contract for the manufacture of brass cartridge cases for the United States, which will keep the plant in operation for several months.

In this advertisement we give all our dealers full particulars of the new 1918

B-H
Outdoor Advertising Helps

THIS Spring's Selling Campaign will comprise every known form of profitable advertising. But the most important plans centre around B-H Dealers. The huge success gained for B-H Paints is due not only to their quality, but also to the B-H Agents who sell them. Recognizing the importance of our Agents, we supply them with the following Outdoor Sales Helps. Write to us for them at once, if you have not done so already. Or, if our salesman is now near you, ask him about them.

THE *B-H flange metal sign*, measuring 12" high x 16" wide will at once identify your store as the B-H headquarters for your town. It is enamelled in three colors. It shows the three tins of paint—blue, yellow and red,—on which is lettered "B-H Paints for Sale Here."

ANOTHER sign of value to Dealers is the B-H Store Entrance Sign, measuring 5' deep x 2½' wide. This prominently displays the guarantee given B-H English Paints, "70% Pure White Lead and 30% Pure White Zinc, making 100% Pure Paint." This sign can be attractively placed in most B-H stores. It reads, "We Sell Brandram-Henderson celebrated B-H 'English' Paints." It will help you to turn store visitors into paint customers.

Store Front Sign

THIS measures two feet deep by twelve feet long. It will at once point the way to your store. It will make you better known to the people around you. This sign is made of steel and will bear up against all weathers for a number of seasons.

Two Attractive B-H Field Signs

ONE measures 5 feet by 3 feet and the other 5 feet by 8 feet. Their dimensions are very adaptable for placing along roadsides and in fields. They will prove a constant reminder to the farmers that *your* store is the *right* store from which to purchase their paint requirements.

THIS publicity, as well as posters, painted signs, newspapers, magazines, form the largest paint campaign launched in Canada.

Dealers should lose no time in becoming acquainted with our profitable B-H Paint Proposition.

Send for it to-day.

Our next advertisement in this series will give details of the novel manner in which our paint dealers will get some new publicity.

WEEKLY PAINT DEPARTMENT

Painting a Real Necessity Now

Dealers Should Inculcate This Idea Into the Minds of Their Prospective Customers —With Building Materials at High Figure Those in Existence Should be Preserved

MANY hardwaremen have been asking themselves the best method of inducing their customers to buy paints as freely now in a time of high prices as they did in the days when paints were low-priced. HARDWARE AND METAL sought the opinion of an expert paint salesman on this point. "We have, it may be, been appealing to the aesthetic taste of the paint consumer and talking color schemes, sanitation and cheerful surroundings and not leaning strongly enough on the absolute necessity of the use of paint for conservation of property holdings," said the paint expert in question.

This is a time when people are making expenditures in large measure because those expenditures seem to be a good investment. In the instance of painting they perhaps cannot be moved to buy through the appeal to brighten up. But perchance they can be reached when the question of painting is laid before them as a plain business proposition.

That is what painting amounts to at the present time. Comparatively the cost of paint is higher than it was in pre-war times. But undoubtedly the value of buildings has increased when compared with the amount it would take to replace those buildings at the present time when building materials of all kinds are so high.

"People to whom the appeal of cheerful surroundings, sanitation and other arguments might be reached in normal times are now taking a certain amount of pleasure out of wearing sackcloth and ashes these days, and they really think because they are abstaining from decorating their houses and are not spending money that way that they are performing a patriotic duty," continued the paint expert in question. "They are inclined to draw a comparison between their living conditions and the living conditions of the brave chaps who are doing so much for us abroad. And they are therefore inclined to be satisfied with living conditions which they would not be at any other time.

"Bread and Butter" of Paint Business

"It seems to me that when a state of mind like this exists that it is all the more necessary to get right down to the bread and butter of the paint business and drive home the argument that paint is an absolute essential. The nation's greatest asset is in its manhood and womanhood. Next to this comes the property holdings of that same manhood and womanhood.

"This asset consists of buildings of all kinds, such as industrial institutions, stores, dwellings, outbuildings, schools, churches—in fact every class of structure.

"The buildings have all been erected from most expensive materials. Even those erected in recent years could not be replaced to-day at less than 50 per cent. added to their original cost. Many of these buildings which were erected ten years ago could not be replaced to-day at less than double their original cost," concluded the paint expert.

Cheaper to Conserve Than to Build

In this talk of this paint expert there is the basis for an excellent argument on the part of paint salesmen who have to combat the fear of high prices in their customers. It is largely a psychologic state of mind that the consumer gets into. It needs sound logic to make him see the matter in its true perspective. It is cheaper for him to paint his building than it is to let it disintegrate through the wearing process of wind and weather. The amount of damage done to a building that is in need of a preservative coat is immeasurable in a year. Those who value their property will see that it does not get down to such a state that it will make little difference whether or not a coat of paint is placed thereon. The time to stop disintegration is before it starts. It is no time to lock the barn door after the horse has been stolen.

Talk Paint Economy

Here is a line of talk that the paint salesman can adopt to advantage. It is not a matter of merely making a house or barn look bright. It is a matter of economy. If it is allowed to run far past the time when painting should be done the chances are that more than the cost of the paint will be taken out of the building in the shape of wear and tear caused by weather conditions.

"Delta" Files
--they'll make you many friends

When you pass a "Delta" File across your counter you offer your customer the best file service he can get anywhere. If he knows "Delta" he'll warm up to you right away. If he has never been fortunate enough before to meet up with a "Delta" you'll be introducing him to a degree of file quality which he has thought impossible of attainment. Whether he's an old "Delta" user or a new one he's going to gain a new conception of the quality of your stock and of your general business ability. The complete satisfaction which "Delta" Files give him will be reflected in his attitude towards you and your entire stock. He'll actually purchase other goods from you on the strength of "Delta" quality. Do you know our proposition?

ALL LEADING JOBBERS

Get Your Share of this New Business

From fifteen to twenty million dollars is usually spent every year in refinishing motor cars. No one likes a shabby car, but many will be neglected this year from economical reasons unless owners adopt the *"Berry way,"* which makes the cost nominal.

Berry Brothers'
Auto Color Varnishes

enable the unskilled varnisher to refinish his car in his own garage and produce a handsome, durable finish in any color combination for the mere cost of the material.

We furnish an attractive cut-out for counter display, and folders telling how much varnish it takes for a car, how easily an amateur can use it, and showing in colors how cars look when refinished. A selling help of real value.

Ready to Ship Assortments

We have already put up, well selected assortments of colors that we can ship promptly. Order one to-day and get in the field early. You will sell it quickly and want more. Write for further particulars anyway.

"MURESCO"

The Best Wall Finish

Leads All Other Finishes

The Best Wall-Finish

Its ease of application

Next to beauty and sanitation, ease of application is the strong factor in sales of "Muresco." It is well to lay stress on this feature. The tint card with samples of the sixteen delicate tints is evidence of beauty, and anyone can readily understand that clean, tinted plaster is more sanitary than wall paper. So once you have convinced your customer that "Muresco" is easy to apply and easy to renew, a sale invariably results.

Always draw attention to the "Directions for Use" on the "Muresco" carton which show how easy it is to mix and apply.

If you were selling paints for only one season—

If you didn't expect to sell paints after next season

If you just wanted to make all the sales possible this Spring

And didn't care whether or not the paints satisfied those who used them—

You wouldn't read anything about Jamieson's Pure Prepared Paints.

You wouldn't be interested in a paint that has steadily grown in favor during a period of over half a century.

You wouldn't want to handle a paint that would make you keep on selling paints year after year—

A paint that satisfies so thoroughly that users *insist* on that *same paint* always.

But since you want your paint sales of this season to be the cause of greater sales next season—

You'll surely be sufficiently interested to ask us to tell you just what our paint proposition is.

We can tell our story in a few words—and make it interesting.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn. U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.

BB QUICK ACTING VISE

No. 10 Quick Acting Vise

Where rapid production is concerned this vise stands alone.

Operated by a simple push and pull motion instead of the slow acting screw.

Made in four different sizes as follows: 3¾ in., 4¼ in., 5¼ in. and 6 in. jaws.

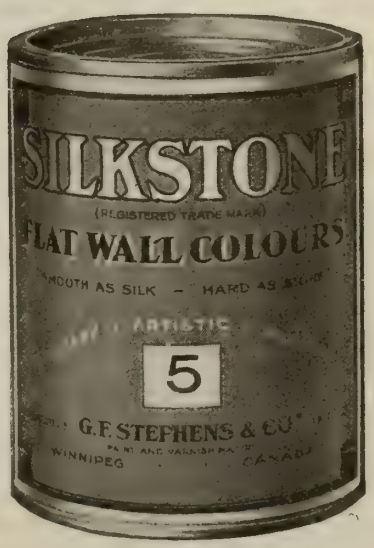
"SILKSTONE"

—that's the economical answer

SILKSTONE



(REGISTERED TRADE MARK)

FLAT WALL COLOURS

It's March, and Housecleaning Time is just around the corner. When it arrives many a household will be faced with the problem of wall decoration. To paper or not to paper?

Don't leave them guessing, for whichever way they guess they're wrong. Tell them about "Silkstone"—tell them with window displays, with counter displays, with personal suggestions. Let them know that "Silkstone" is the correct answer to all wall decoration problems. Let them realize that "Silkstone" is cheaper than wall paper, more sanitary—more permanently beautiful. Tell them how "Silkstone" goes on easily and quickly and dries hard with a soft, silky finish that wears like the plaster on which it's laid.

This Spring, when economy is so much in the public mind, you should sell more "Silkstone" than ever before.

BOILER TUBES

We have a large stock of BOILER TUBES of all sizes for immediate shipment.

Reinforcing Bars for Concrete

Shipment from Mill or Stock.

BAR IRON

Carried in all sizes and lengths for immediate shipment. Special prices on certain sizes.

STEEL SHEETS

A complete range from 10 gauge to 16 gauge, for immediate shipment.

SMALL ANGLES

From ¾" x ¾" x ⅛" to 2" x 2" x ¼" in all sizes, thicknesses and lengths.

STEEL PLATES

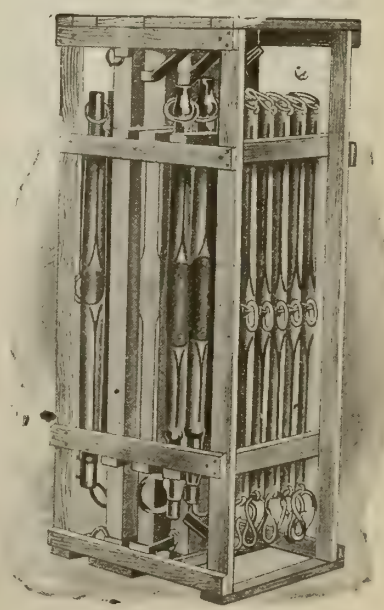
All sizes from 3/16" to 1" thick, in stock now.

Now is the time to protect yourself against the ever-increasing prices.

We carry on hand, ready for immediate delivery, a 5,000-ton stock of standard and miscellaneous steel and iron, such as Plates, Beams, Channels, Angles, Tees and Flat Bars, Cold Rolled Shafting, Bolts, Rivets, etc.

SEND FOR MONTHLY STOCK LIST.

Manitoba Bridge & Iron Works,



WINNIPEG MANITOBA LIMITED

Protected by the Westwo Guarantee

Selling Westwo Painted Wagon, Implement and Plow Sets is satisfactory and profitable. They are made from selected No. 1 quality Oak and Hickory, are carefully painted (2 coats), striped and varnished, and are absolutely guaranteed against defects in material and workmanship.

The best way to order Westwo Painted Sets is in crates of six sets. Then you're sure of getting them in perfect condition. —no bruised woods—no marred finish.

Send to-day for the Westwo folder that describes the various Westwo lines.

Guarantee

All Westwo Sets are guaranteed, and any defective part will be replaced free.

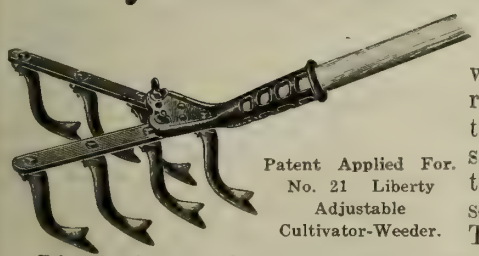
CARTER'S

Products-- Their Qualities

Carter's Genuine Dry Red Lead is a highly oxidized pure red lead, finely pulverized and free from metallic lead. Has the greatest covering capacity and spreads with a film of uniform thickness.



Carter's Genuine Powdered Litharge is finely powdered, freedom from grit, peroxide and metallic lead, chemically pure, bright canary color, dissolves rapidly, free from sludge. When dissolved gives a clear, cloudless solution and is the

BEST QUALITY ON THE MARKET

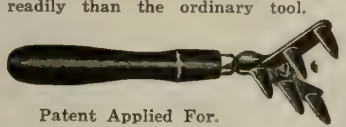
We also manufacture
Dry Orange Lead, and Dry White Lead
All for
Bridge Builders
Marine Engineering Firms
Color Makers
Varnish Makers
Pulp and Paper Manufacturers
Rubber Manufacturers, etc.

Manufactured by
The Carter White Lead Company
of Canada Limited
91 Delorimier Ave. Montreal

Every Amateur as well as Every Professional Gardener

Patent Applied For. No. 21 Liberty Adjustable Cultivator-Weeder.

will quickly recognize the labor-saving features of Gilson Garden Tools.



Take, for instance, the No. 21 Liberty Cultivator-Weeder, an implement of double efficiency, which cuts weeds and cultivates at the same time. It is adjustable, with a minimum width of 4 inches and a maximum of 10. The middle tooth can be quickly removed to allow of working on both sides of a row at once. Fitted with 5-ft. polished ash handle, shipped 6 to a crate, weight 24 lbs.

Our 5 and 7-point Scratch Weeders, with 6-inch and 14-inch handles, are ideal tools for close work in beds or for greenhouse work. The pointed tines are self-cleaning and will not clog in moist earth.

Every Gilson Garden Tool embodies some special feature, and for that reason sells more readily than the ordinary tool.

Regular advertising in Maclean's and Farmers' Magazines is working up a demand for Gilson Garden Tools. Cash in on this publicity.

Ask your jobber. If he cannot tell you, write us direct for information on all our lines.

Patent Applied For. 5 Pt. Scratch Weeder. 6-in. handle.

The Practical Paint for the Farmer

The paint that works easiest, covers best, and is most durable and most economical is the paint that makes permanent customers of the farmers.

C. P. Homestead Liquid Red

is a practical paint prepared to give that protection against severe weather that farm buildings need. It's a paint worthy of the C.P. Trade-Mark—the mark of the highest quality in paint.

Impress this on those customers who want paint for barns, fences, water tanks, sheds, etc. Make it known to factory owners. Tell them about this paint and why it saves them money.

It all means more paint sales for you.

The C.P. Agency is an interesting and profitable proposition. Write us about it to-day.

The Canada Paint Company, Limited

Makers of the

Famous Elephant Brand White Lead

Letting You Into A Secret

THEY were talking about things in general—Jones and Brown. But it was easily seen by Jones that Brown talked with a positiveness and definiteness lacking in himself. Brown evidently had real knowledge about things and this gave him an assurance lacking in Jones. Jones found himself talking in generalities, and he had the sense to know that what he had to say wasn't very convincing. In the end he spoke up. "Brown, tell me, where do you get your information? You talk like one who knows. You use facts to fortify your opinions, and you seem to have a wealth of information about things Canadian. What's the secret of your greater confidence and knowledge?"

And Brown said: "I'll tell you, Jones, how I have strengthened myself in confidence and knowledge, as you put it. I read my newspaper in a new way now, and I make it a point to know a good deal about Canada, the land of my birth, residence and affection.

"For years—until I was forty—I read newspapers, as many others do—pretty thoroughly. I read about accidents, and meetings and fires, and everything else. One day I woke up,—was awakened up, to tell the truth—to discover that I was just frittering away time when I read everything.—Then I determined to concentrate my interest on matters Canadian—the things about Canada that really matter.

"I wanted direction. I needed a focal point, as it were. What should be skipped, and what should be read closely? I was floundering. I am not much of a politician, and I abominate party politics. I wanted to see things fairly.

"Then one day I made the acquaintance of THE FINANCIAL POST. It seemed to me to give me the direction I needed. I found it was sifting things for me, and giving current affairs their right proportioning. At any rate, it was a new kind of newspaper to me, and I read it with zest.

"I am a business man, and business in its larger aspects is the special field of THE FINANCIAL POST. I found the paper written in a readable way, and that it has a breadth of interest pleasing to me. So I subscribed for THE POST, and every Saturday and over the week-end this paper is pretty thoroughly read by me.

"I find that the reading of this paper helps me get out of my daily newspaper the meat in it. As a matter of fact, I read my daily newspaper and other papers with a new and informed interest which makes my reading a profitable thing.

"I read somewhere that an hour a day spent on any subject would make a man master of that subject in 10 years. Well, I do not know that I am seeking to be a master of Canadian affairs, but I do know that for the past two years or so I have been having a new joy in life. I am really trying to know my Canada.

"I clip a good deal, and my scrap book on Canada is a treasure house for me, I collate the material I put in that book, and whenever I want to read up any particular subject, I have before me, gathered up, a surprising amount of material obtained from many sources.

"I take luncheon at the Club daily. There are eight of us who gather daily at the same table. One is a wholesaler, another is a banker, another a publisher, another a manufacturer, another a manufacturers' agent—and so on. We have a representative gathering.

"We talk about many things, and about Canada most of all. I take great satisfaction from the knowledge that I am able to hold up my end of the conversation. To tell you the truth, it is this reputation that spurs me on to keep myself brushed up all the time. I own up, also, to practising a little subtlety. I guide the conversation in the direction of a subject that I am well informed on, and then I bide my time, letting others wrestle with it until they have told all they know. Then is my chance, and I am able to say something useful to a company that is attentive.

"Jones, if you want to improve the quality of your information, read purposefully, objectively. Cut out the reading of everything under the sun. You are a business man, the same as I am. Why not read definitely along the line of business? You will find it a most pleasurable kind of reading, and you'll find that you will acquire the sifting mind which will enable you to pass over a lot of stuff of no value to you, and seize on material of real value.

"I recommend THE FINANCIAL POST as a paper that will give your reading direction. It has helped me much, and I believe will help you. At any rate, it is easy to try it out."

IF JONES wants to try out THE FINANCIAL POST he can have it go to him by mail for four months for a dollar bill. One thing that ought to impress and please Jones is that THE POST is not a one-man paper. It is produced by many men, each a surpassingly well-informed man on the subject he writes. One man writes on matters pertaining to agriculture, another on the iron and steel industry, another on the food problems and milling and cereal subjects, another on insurance, another on textiles, and so on. The special contributed articles which are a regular feature of THE POST are by authorities or by men of position. Besides which, THE POST surveys many fields of interest, and this survey is world-wide. It is a meatful paper, in very truth, and assures those who read it regularly an amount, kind and quality of reading not commonly found in a single newspaper. If you would make your daily reading take on a new interest and value, we suggest that you should sign and forward the coupon opposite.

THE MACLEAN PUBLISHING CO., LTD.,
Dept. F.M., 143-153 University Ave., Toronto.
Send me THE FINANCIAL POST for
one year at three dollars
four months for one dollar.
I will remit on receipt of bill in the usual way.

Your Money is Your Own

You may lose it or you may save it, and use it to make more money, and we wish to tell you plainly that in the three hundred working days of every year you can make money by saving it—saving the change that is given out, made wrong by your salesmen—perhaps every day. We've thought much about this matter—as much as anybody—and by our long experience and exceptional opportunities are able to advise you how to prevent these losses.

Write for our four-page circular which tells about it.

"We Are Oversold"

ONCE upon a time a certain manufacturer was urged by his retailers to cut out his advertising in consumer mediums because it was embarrassing them. This manufacturer was disposed to listen to his retailers because his product was heavily oversold. He half-welcomed the chance to save the money he was spending on consumer advertising in national mediums.

So he cut out his consumer advertising.

Then arose a competitor—a new man in the field. He went to the retail trade and got orders easily, for he was in a position to make immediate deliveries. He made a good article, and it was a "cinch" to open up connections with the retail trade. He got in strong and permanently, and to-day he is a formidable rival to the manufacturer who ceased his selling propaganda.

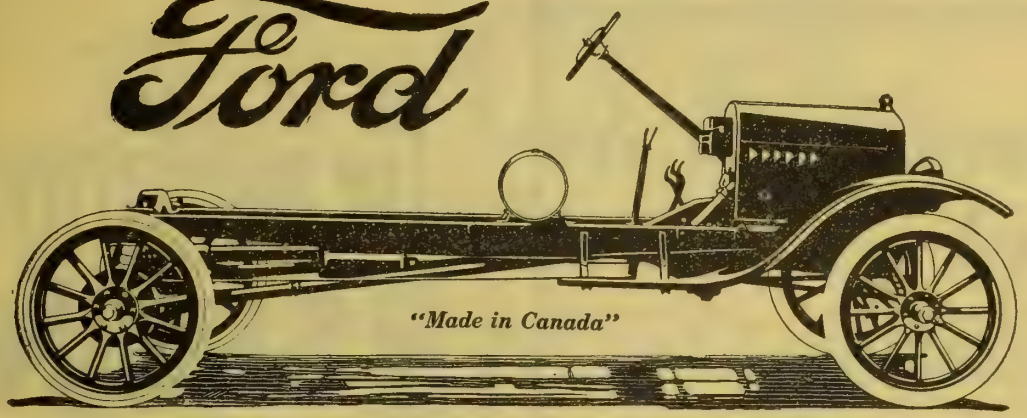
That oversold manufacturer admits that he has had a lesson for life. If retailers were to say to him to-day —"Please cut out your consumer advertising. You can't meet the demand you have created and the public's insistence for your article is causing us to lose sales"—if retailers said this, and they have said it, this manufacturer has his reply all ready. It is— "Never again! I stopped once, and I opened the door to a new maker. It has cost me many times what I thought I was saving to hold my own and to recover what I lost. I learned something three years ago when I yielded to the temptation to cut out my consumer advertising, and in future I'll keep on advertising to the public even though I may find myself heavily oversold."

To-day hundreds of manufacturers are oversold. Some have cut out their consumer advertising. Some have kept up their publicity campaign with little or no diminishment. These consistent and persistent advertisers are not regretting their policy. Some of the others are, and they admit freely their error. They are finding that the lost momentum and the new competition which has arisen will require a doubling and tripling of future advertising and selling effort to get back to old positions.

When war contracts were easy to get and looked plums, many manufacturers dropped making their usual line and went in for the fortunes which they thought could be made in a few months. If you ask some of these manufacturers to-day what they think of their cessation of making their usual line for which a big consumer demand had been created at great cost by national advertising, and which retailers were glad to distribute, because selling it was easy, you will be told by those frank enough to make honest confessions, "We made a mistake. We are finding it harder now to get back to our old place with the retailers and the public. We have lost ground. We regret the mistake we made. It will cost us much money to get back again, and in the meantime retailers and the public have learned to buy others' merchandise."

IF the firms who are oversold, and the firms who have lost something of value because of the stoppage of their advertising, find in the foregoing any message to them, let us say to them that they can do influential advertising of a national sort, effective on both consumers and distributors, by the use of two national mediums—MACLEAN'S MAGAZINE and FARMERS' MAGAZINE. The cost of strong campaigns in each of these magazines, and in them both, is as follows:—

	Circulation	Number of of issues per year	Minimum page rate	Cost of page in every issue
MACLEAN'S MAGAZINE ..	55,000	12	$147.00	$1,764.00
FARMERS' MAGAZINE	30,000	24	75.60	1,814.40
Both Magazines	85,000	36	$222.60	$3,578.40



It means about $300 per month to cover urban and rural Canada. Let it be remembered that 85,000 circulation in Canada is the equivalent of 1,700,000 in the United States with its 20-times larger English-speaking population. That is, using MACLEAN'S and FARMERS' in combination gives an advertiser a circulation in Canada comparable to that of the *Saturday Evening Post* and with that of the *Ladies' Home Journal* in the United States.

We invite correspondence from all oversold manufacturers and others who want to break back into the public's favor. We would like the privilege—and solicit it—of talking over with them the whole matter of national advertising, looking forward to the preparation of a specific proposal based on their own special problems and conditions. And so we ask you to address a letter of enquiry to the General Manager of

The MacLean Publishing Co., Ltd., Toronto, Canada

With branches at: Montreal, Winnipeg, New York, Chicago, Boston and London, England

Ford

Deliveries by Ford One-Ton Truck

THE commercial car is looked upon today as a necessity by progressive business firms who have hauling and delivering problems to consider.

Wholesale or retail merchants who must deliver quantities of merchandise have found the horse-drawn delivery to be too slow, expensive, and entirely inadequate.

The Ford truck, with a single driver, will do more work and cover more ground than two teams and two drivers, for it travels in half the time. This truck will reduce your hauling costs. It eliminates one driver's salary and the care which horses always require. It will make your delivery service more efficient. It will widen your area of distribution. It will be constantly ready for work—day or night. It will show a profit on your investment.

There has been a popular demand for a Ford truck as is shown by the many uses, for commercial purposes, to which our standard chassis has been put. Now, after most careful designing and exacting tests, we are able to offer the Ford One-Ton truck to meet this demand.

The Ford truck is supplied as a chassis only. This permits the purchaser to mount any one of the many body styles specially designed for the Ford truck, and already on the market, and he can select it to meet the individual needs of his business.

Price $750 f.o.b. Ford, Ont.
